

# Web Development and Digital Media (WEB)

---

## Courses

### **WEB 110 HTML and CSS (3 Hours)**

This course will cover the essential skills needed to create websites, with a focus on using HyperText Markup Language (HTML) and Cascading Style Sheets (CSS). Students will be introduced to the concepts, foundations, syntax and structure of HTML. Additional topics include the use of File Transfer Protocol (FTP) to publish websites and validation to web standards established by the World Wide Web Consortium (W3C) and other organizations. 3 hrs. lecture/wk.

### **WEB 112 Professional Skills for the Digital Developer (3 Hours)**

Upon successful completion of this course, the student will be able to demonstrate effective communications and professional skills important to a career in digital development. Topics covered include the use of technology to achieve effective written and verbal communication skills, team management, project management and problem solving skills. Current and relevant legal, ethical and governmental issues important to a career in digital development are also covered. 3 hrs. lecture/wk.

### **WEB 114 Web Scripting: JavaScript I\* (2 Hours)**

**Prerequisites or corequisites:** WEB 110

This course provides a foundation to client-side scripting using the JavaScript language. Students will write, validate and debug JavaScript code to enhance the functionality of Web pages. Topics to be covered include common applications such as responding to user actions, creating pop-up dialog boxes and controlling the Web browser. Students will apply JavaScript to manipulate and validate Web form elements and data and to build menus and navigational structures. 2 hrs. lecture/wk.

### **WEB 116 Digital Media Concepts\* (2 Hours)**

**Prerequisites or corequisites:** ENGL 121

This course examines the digital media creation process and the impact of emerging technology on that process. Emphasis is placed on the need to understand target audiences, as well as the impact of content on those audiences. Creative culture is examined so students may begin to understand the relationship between ideas and the structure and management of the organizations and intellectual property systems used to express those ideas. 2 hrs. lecture/wk.

### **WEB 120 Web Analytics\* (3 Hours)**

**Prerequisites:** WEB 110

Upon successful completion of this course, students should be able to implement and apply Web analytics techniques. Topics to be covered include Web traffic analysis, data collection methodologies, report analysis, best-practices configuration and search engine optimization. 3 hr. lecture/wk.

### **WEB 121 Digital Media Assets\* (4 Hours)**

**Corequisites:** WEB 116

This course focuses on technologies and workflows in managing digital image, digital video and audio assets throughout an asset's life cycle. Through the study of digital and interactive media and its application in information technology, students will analyze and assess current and emerging technologies. Students will design and create multimedia projects that address customer needs and solve real world problems. Students implement personal and interpersonal skills to prepare for a rapidly evolving workplace environment. The knowledge and skills acquired and practiced will enable students to successfully perform and interact in a technology-driven society. 3 hrs. lecture/wk. 2 hrs. open lab/wk.

### **WEB 122 CSS Techniques Projects\* (3 Hours)**

**Prerequisites:** WEB 110

Students will apply Cascading Style Sheet (CSS) techniques through the use of professional, advanced website development projects. Industry-standard Hypertext Markup Language (HTML) semantic markup practices and presentation separation through CSS is emphasized. CSS topics include professional syntax practices, formatting and layout skills. Advanced CSS skills for float, positioning, alignment and image formatting are covered. 3 hrs. lecture/wk.

### **WEB 123 Content Management Systems Strategies\* (1 Hour)**

**Prerequisites:** WEB 110

This course will cover the basics of installing and configuring a Web Content Management System (CMS) to build blogs and websites. Students will use the CMS to perform many functions including installing plug-ins and assigning user permissions. 1 hr. lecture/wk.

### **WEB 124 Web Scripting: JavaScript II\* (2 Hours)**

**Prerequisites:** WEB 114

Students apply JavaScript to manage state information, cookies and security. Students will also study the elements of a basic Asynchronous JavaScript and eXtensible markup Language (AJAX) application. Students will learn advanced debugging techniques and apply their comprehensive JavaScript skills to a capstone case. 2 hr. lecture/wk.

**WEB 125 Digital Video Tools (1 Hour)**

This introductory video production technology course will cover basic desktop computer operating systems and the technologies used to bring photographic (film, video, still) images and audio into the digital domain. Students will learn to prepare audio and video media from pre-production to post-production techniques for digital delivery systems and the Internet. 1hr. lecture/wk.

**WEB 126 Technical Interface Skills\* (3 Hours)**

**Prerequisites:** WEB 110

This course will cover the skills needed to successfully develop Information Architecture (IA) blueprints from concept to completion. Students will use fundamental visual principles, perception, color, composition and typography to analyze and modify existing IA plans while keeping consistent structure. They will create complementary visuals that maintain a client's brand while working through the modification process. Students will review the critical universal usability rules and basic visual design principles quintessential of a design team and to implement an aesthetic vision through every step of development. 3 hrs. lecture/wk.

**WEB 128 Server Scripting: PHP with MySQL\* (2 Hours)**

**Prerequisites:** WEB 110

This course covers the commands and techniques available to add functionality to Web pages using Hypertext Preprocessor (PHP). Students will build client-side PHP scripts with variables, functions, expressions, methods and events to validate forms and enhance Web page functionality. The basics of server-side scripting are introduced. Students also define and build a relational database using MySQL, then use PHP scripts as well as SQL in a Web page to connect to the database to edit, delete and enter records. 2 hr. lecture/wk.

**WEB 150 Essential Web Concepts and Techniques I\* (1 Hour)**

**Prerequisites or corequisites:** CPCA 105 or CPCA 106 or CPCA 128 or appropriate score on an assesment test

This current-events course introduces students to essential Web concepts and techniques. Students will explore a range of topics, from fundamental existing technologies to new trends. Real-world applications of the Web will be the primary focus of this course. Hands-on, practical projects will be performed to reinforce the concepts. 1 hr. lecture/wk.

**WEB 152 Web Pages: Expression Web I\* (1 Hour)**

**Prerequisites or corequisites:** WEB 150

This course will cover the commands and techniques required to create and revise Web pages using Expression Web. Topics to be covered will include researching, planning and creating a website, identifying the purpose of HyperText Markup Language (HTML) and Cascading Style Sheets (CSS), inserting background color, inserting and editing images, creating lists, creating and applying style sheets, inserting files, creating internal and external links and publishing a website. 1 hr. lecture/wk.

**WEB 154 Web Pages: Dreamweaver I\* (1 Hour)**

**Prerequisites or corequisites:** WEB 150

This course will cover the commands and techniques required to create and revise web pages using Dreamweaver. Topics to be covered will include basic text layout, viewing and identifying basic HyperText Markup Language (HTML) tags, creating a site map, formatting a Web page, applying background color, inserting images and sounds, creating ordered and unordered lists, inserting files and creating links on Web pages. 1 hr. lecture/wk.

**WEB 156 JavaScript I\* (1 Hour)**

**Prerequisites or corequisites:** WEB 110

This course provides a foundation to client-side scripting using the JavaScript language. Students will write, validate and debug JavaScript code to enhance the functionality of Web pages. Topics to be covered include common applications such as responding to user actions, creating pop-up dialog boxes and controlling the Web browser. 1 hr. lecture/wk.

**WEB 158 Adobe Flash I\* (1 Hour)**

**Prerequisites:** WEB 110

This course will cover the commands and techniques available to add Flash content to Web pages. Topics covered will include using drawing tools, manipulating text with text tools, adding and modifying sound, creating animation and publishing work. This class will be taught in a classroom with both Macintosh and Windows computers. 1 hr. lecture/wk.

**WEB 160 Essential Web Concepts and Techniques II\* (1 Hour)**

**Prerequisites or corequisites:** WEB 150

This course is a continuation of Essential Web Concepts and Techniques I, and will cover intermediate commands and techniques required to use various Web based tools and programs. Students will explore a wide range of topics, from existing technologies to new trends. Real-world applications of the Web will be the primary focus of this course. Hands-on, practical projects will be performed to reinforce the concepts. 1 hr. lecture/wk.

**WEB 162 Web Pages: Expression Web II\* (1 Hour)****Prerequisites or corequisites:** WEB 152

This course is a continuation of Web Pages: Expression Web I, and will cover intermediate-level commands and techniques required to create and enhance websites using Expression Web. Topics to be covered will include creating and modifying dynamic links, working with tables, creating forms, and using templates to design Web pages. 1 hr. lecture/wk.

**WEB 164 Web Pages: Dreamweaver II\* (1 Hour)****Prerequisites or corequisites:** WEB 154

This course builds upon the concepts and design techniques presented in Dreamweaver I. The course includes a range of intermediate Dreamweaver techniques required to work efficiently and create manageable web site designs using Dreamweaver forms, templates and libraries, as well as covering managing your web site and checking files. 1 hr. lecture/wk.

**WEB 166 JavaScript II\* (1 Hour)****Prerequisites or corequisites:** WEB 156

This course builds on the skills learned in JavaScript I. Students will apply JavaScript to manipulate and validate Web form elements and data. Students will learn to use JavaScript in their Web pages to build menus and navigational structures. Students will expand their debugging skills. 1 hr. lecture/wk.

**WEB 168 Adobe Flash II\* (1 Hour)****Prerequisites or corequisites:** WEB 158

This course will build on the fundamental skills learned in Adobe Flash I. Topics will include complex animation techniques, interactivity with simple frame actions, and interactivity using objects such as buttons, hotspots and movie clips. 1 hr. lecture/wk.

**WEB 170 Podcasting (3 Hours)**

This course will cover how to create sound, use the appropriate software, develop a show, distribute a podcast and build an audience. Students will begin by learning the basics of blogging and then develop their blogs into audio and/or video podcasts. More advanced topics include audio editing, podcasting on the go and videocasting. 3 hrs. lecture/wk.

**WEB 172 WordPress I (1 Hour)****Corequisites:** CPCA 105 or CPCA 106 or CPCA 128 or an appropriate score on an assesment test

This course will cover the commands and techniques required to create and revise blogs and websites using WordPress. Topics to be covered will include basic blogging techniques, working with digital images, hosting, spam and security issues, plugins and themes. Real-world applications of WordPress will be the primary focus of this course. Hands-on, practical projects will be performed to reinforce the concepts. 1 hr. lecture/wk.

**WEB 178 Adobe Flash III\* (1 Hour)****Prerequisites or corequisites:** WEB 168

This course will build on the skills learned in Adobe Flash II. Students will do projects to control movie clips, sound, external data, multiple timelines and text fields. Some ActionScripting will be introduced. 1 hr. lecture/wk.

**WEB 188 ActionScript for Flash\* (1 Hour)****Prerequisites:** WEB 178

This course will teach the basic skills needed to use ActionScripts in Flash movies. Students will build interactivity into their movies using ActionScript. They will also manipulate data and control Flash objects such as movie clips. ActionScript logic and functions will be explained. Students will gain a strong foundation in the latest version of ActionScript and many more general object-oriented programming principles. 1 hr. lecture/wk.

**WEB 190 E-Commerce I\* (1 Hour)****Prerequisites or corequisites:** WEB 150

This course will introduce students to e-commerce in a software-driven, hands-on way. It will use software tools to discuss and explore a variety of e-commerce activities. Students will examine an extensive list of e-commerce sites, such as those that support purchasing, delivery, support, auction, business-to-business, virtual community and Web-portal business goals. They will examine e-commerce stores that incorporate advertising, marketing, branding and business efficiency goals. They will explore how to populate a store catalog, create sitewide navigation links and publish a store. 1 hr. lecture/wk.

**WEB 192 E-Commerce II\* (1 Hour)****Prerequisites or corequisites:** WEB 190

Students will examine e-commerce security issues including privacy, copyright and transaction integrity. Students will study electronic payment systems and international, legal and taxation issues. 1 hr. lecture/wk.

**WEB 230 Asynchronous JavaScript and XML\* (1 Hour)**

**Prerequisites:** WEB 114

This course will introduce and explain the use of AJAX (Asynchronous JavaScript and eXtensible Markup Language). AJAX is not a technology itself but is a combination of HTML (HyperText Markup Language), CSS (Cascading Style Sheets) and JavaScript's use of the DOM (Document Object Model). Students will use AJAX to dynamically load data into a Web page. Topics include auto complete functionality and other interactive features to a Web page. 1 hr. lecture/wk.

**WEB 231 Experience Design\* (4 Hours)**

**Prerequisites:** WEB 126

This course will serve as a broad survey of the user experience design process for interactive products and services. Students will learn the building blocks of the user experience including interaction design, design research, information architecture and design principles. In addition to understanding how to discover needs and fulfill them with design, it will also provide knowledge of how to evaluate the concepts using common methods such as heuristic evaluation, prototyping or usability studies. Through readings, critiques, exercises and discussions, students will explore what makes the experience of an interactive media application successful. 3 hrs. lecture, 2 hrs. open lab/wk.

**WEB 232 Introduction to eXtensible Markup Language\* (3 Hours)**

**Prerequisites or corequisites:** WEB 124

This course will introduce and explain the use of XML(eXtensible Markup Language) documents to encapsulate and transfer data across the Internet. Students will learn to use document type definitions, attributes and entities, and XML schemas to build valid and useful XML documents. CSS (Cascading Style Sheets) will be introduced to format the XML documents. JavaScript will be used to incorporate programming instructions into the XML document. 3 hrs. lecture/wk.

**WEB 233 Visual Storytelling (3 Hours)**

Storytelling is how people share ideas and meaning. It's how we communicate, reach each other and connect. This course provides an introduction to the methods and tools of visual storytelling. Students will explore the impact of visual storytelling and how to communicate visually. Students will use storytelling techniques enabling them to create, design and produce stories using digital media. This course will explore the key elements to tell realistic and compelling visual stories. Students will write scripts, design storyboards, create still and moving images using music and narration to tell their stories. 6 hrs. integrated lecture/lab/wk.

**WEB 234 Web Apps I\* (3 Hours)**

**Prerequisites:** WEB 124

Mobile devices outnumber desktop and laptop computers three to one worldwide. This course will cover practical guidelines, standards, techniques and best practices for building Web applications using Client-Side programming including Hypertext Markup Language (HTML), Cascading Style Sheet (CSS) and JavaScript, including basic design and development principles for all mobile devices and platforms. Students will have strong knowledge about the methods and tools used in developing Web applications. 3 hrs. lecture/wk.

**WEB 235 Digital Communications Technologies\* (3 Hours)**

**Prerequisites:** WEB 116

This course is intended as an introduction to emerging digital communications technologies. While the primary focus will be on digital and mobile technologies and practices (contemporary new media), the course will also consider a range of older media when they were new including print culture, cinema, television, recorded sound, photography and the telephone. Students will focus on social technologies, such as blogs, wikis and spaces like YouTube, Facebook and Twitter to explore how people find information and how organizations communicate. 3 hrs. lecture/wk.

**WEB 236 Content Management Systems Development\* (3 Hours)**

**Prerequisites:** WEB 128

Content Management Systems (CMS) have gained in popularity as the number of robust and complex websites continues to grow. Students will cover the life cycle of websites, including their creation, management, distribution and publishing of content. This hands-on course will cover open source CMS applications such as Joomla, Drupal, WordPress and other technologies and the resources available to designers and developers. Students will explore the fundamentals of planning dynamic websites, CMS database management, developing Cascading Style Sheet (CSS)-controlled site templates, and creating database-driven websites through the planning and creation of their own topic-based sites. Student exercises include how to interact, engage and contribute to online communities and projects. 3 hrs. lecture/wk.

**WEB 238 Interactive Scripting: JQuery\* (4 Hours)**

**Prerequisites:** WEB 122 and WEB 124

Designers and developers can use jQuery to have complete access to all Cascading Style Sheets (CSS) styles of any element on a Web page, effortless Web page content manipulation via filters and patterns, detection or creation of events (mouse movement or click), moving, hiding and fading elements and other features. Students will be exposed to how to write efficient jQuery selectors to round up sets of Document Object Model (DOM) elements, how to use the framework's many methods to manipulate DOM elements, how to use the jQuery event application programming interface (API) to set up event listeners and event delegation, how to manage Ajax requests with jQuery and how to extend jQuery with custom filters and methods. 3 hrs. lecture/wk. and 2 hrs. open lab/wk.

**WEB 240 HTML and CSS II\* (3 Hours)****Prerequisites:** WEB 124

This course focuses on the latest generation of browser-based technologies for front-end design and development. Topics in the course include Cascading Style Sheets (CSS), HyperText Markup Language (HTML) elements, HTML Application Programming Interface (API), forms, audio and video, offline applications, Canvas drawing and animation, communication APIs, Web Sockets and Web Workers, Geolocation, local and session storage, Web Structured Query language (SQL) Database, and advanced topics such as mobile Web applications, performance analysis, browser issues and developer tools. 3 hrs. lecture/wk.

**WEB 241 Digital Management Methods\* (4 Hours)****Prerequisites:** WEB 110

The course covers systems development methodologies and the phases of development process from an idea to a product. Students will learn methods and tools that are used in the process of developing web-based and digital media applications. The course will introduce the students to systems development life cycle and the basic skills needed in systems analysis, design and development. Students will deliver an integrated, strategic campaign that demonstrates innovative digital media mastery. Out-of-class collaboration is required to complete the final project. 3 hrs. lecture, 2 hrs. open lab/wk.

**WEB 243 Search Engine Optimization\* (1 Hour)****Prerequisites:** WEB 110

This course will cover how to optimize a website to maximize search engine ranking. Upon completion of the course students will be able to identify and implement effective website designs and strategies for search engine optimization. 1 hr. lecture/wk.

**WEB 244 Web Apps II\* (3 Hours)****Prerequisites:** WEB 234

This course examines the theory, concepts and techniques for designing, producing and evaluating Web applications to meet specific information needs. Students will engage with concepts, techniques and system issues in advanced Web application design and development using advanced programming tools and techniques. Students will look beyond the current status of development and design techniques and conjecture what is possible in the future. 3 hrs. lecture/wk.

**WEB 245 Motion Graphics Tools\* (1 Hour)****Prerequisites or corequisites:** WEB 125

This course is designed to introduce students to motion graphics and special effects. All basic applications of the program will be touched upon including credits, transitions, filters, masks and mattes. Students will experience the complete motion graphics workflow, beginning by capturing their own still images and videos and concluding by rendering and exporting an original composition. 1hr. lecture/wk.

**WEB 290 Web Development and Digital Media Capstone\* (3 Hours)****Prerequisites:** Department approval

This course is the culmination of the course work that makes up the Web Development and Digital Media AAS degree. It incorporates elements from each of the core program courses to allow students to walk through the entire Web design process, including design/project documentation, wire framing, creating mock-ups, revisions, pages and final deliverables. Upon completion of course, students will have a professional website that can serve as part of their professional portfolio. 3 hrs. lecture/wk.

**WEB 292 Special Topics:\* (1-3 Hour)****Prerequisites:** Department approval

This course periodically presents specialized topics in Web Development and Digital Media that are not available in the regularly offered curriculum. Special Topics may be repeated for credit, but only on different topics. 1 - 3 hrs. lecture/wk.

**WEB 294 Web Development and Digital Media Internship\* (1 Hour)****Prerequisites:** Department approval

Web Development and Digital Media Internship provides students with the opportunity to gain experience in the workplace and translate classroom learning into practice. An internship experience provides the student with an opportunity to explore career interests while applying knowledge and skills learned in the classroom in a work setting. The experience also helps students gain a clearer sense of what they still need to learn and provides an opportunity to build professional networks. 180 hours minimum requirement of on-the-job training.
