Catalog of Courses Spring 2008

JCCC Statement of General Education

Graduation Requirements

Associate's Degrees and Certificates

Transfer Guides

JCCC's transfer programs range from accounting to theater. Credits from JCCC can be transferred to many colleges and universities in the United States.

Credit Career and Certificate Programs

JCCC's credit career and certificate programs range from automotive technology to veterinary technology. JCCC's credit career and certificate programs give you the opportunity to study a specific career and enter the job market directly.

Johnson County Community College and the Metropolitan Community College District (MCC) have developed cooperative agreements that allow Johnson County residents to enroll in selected career programs at MCC, while paying Johnson County resident credit hour tuition. Reverse Cooperative Programs allow Missouri residents to enroll in selected career programs at JCCC, while paying the MCC tuition rates. For more information, see the student handbook cooperative programs.

Credit Course Descriptions

Descriptions of the courses offered at JCCC, with additional links to the course outlines.

Continuing Education Certificate Programs

Certificate programs offered through JCCC's continuing education program.

Continuing Education Course Descriptions

Student Handbook

Admissions information, services for students, student code of conduct, and academic policies and procedures.

Faculty and Staff

A list of full-time faculty and administrators.

Accreditation

Johnson County Community College is officially accredited by the North Central Association of Colleges and Schools. In addition, individual programs are accredited by associated professional organizations:

- Accounting, Business Office Technology, Business Entrepreneurship, Business Administration and Marketing and Management - Association of Collegiate Business Schools and Programs
- Dental Hygiene - American Dental Hygienists Association and American Dental Association
Notice of Nondiscrimination

Johnson County Community College is committed to a policy of nondiscrimination.

Johnson County Community College

Series 400: Personnel

Section 411: Application of Personnel Policies

Johnson County Community College is a place where freedom of expression and civility are encouraged. In valuing diversity, the college recognizes the individual differences based on unique ethnic, cultural, gender and political backgrounds, and the differences represented by staff in age, education and physical ability. In a diverse environment, it becomes the responsibility of each employee to respect these individual differences and to refrain from imposing personal viewpoints on other staff or students.

All personnel policies of the Johnson County Community College shall be applied without regard to a person's race, color, age, sex, religion, marital status, national origin, disability, veteran's status, sexual orientation or other factors which can not be lawfully considered, to the extent specified by applicable federal and state laws.

Date of Adoption: 3/2/00, 4/10/06

Johnson County Community College does not discriminate on the basis of sex, race, color, national origin, disability, age, religion, marital status, veteran's status, sexual orientation, or other factors that cannot be lawfully considered in its programs and activities as required by all applicable laws and regulations. Inquiries concerning the college's compliance with its non-discrimination policies may be referred to the Dean of Student Services or Director of Human Resources, Johnson County Community College, 12345 College Blvd, Overland Park, KS 66210, 913-469-8500; or to Office for Civil Rights, 8930 Ward Parkway, Suite 2037, Kansas City, MO 64114, 816-268-0550.

JCCC provides a range of services to allow persons with disabilities to participate in educational programs and activities. If you desire support services, contact the office of Access Services for Students With Disabilities (913) 469-8500, ext. 3521, or TDD (913) 469-3885. The Access Services office is located in the Success Center on the second floor of the Student Center.

JCCC Statement of General Education

General education at Johnson County Community College combines essential thinking skills with knowledge from areas such as the arts, communication, humanities, language, mathematics, natural sciences, and social sciences. It prepares students to become lifelong learners capable of making informed, ethical decisions in an increasingly complex and diverse global community.

Students who pursue a course of study at JCCC will be expected to:
• Access and evaluate information from credible sources.
• Collaborate respectfully with others.
• Communicate effectively through the clear and accurate use of language.
• Demonstrate an understanding of the broad diversity of the human experience.
• Process numeric, symbolic, and graphic information.
• Read, analyze, and synthesize written material.
• Select and apply appropriate problem-solving techniques.
• Use current technology efficiently and responsibly.

Graduation Requirements

One semester prior to your graduation:

Complete an Application for Degree and/or Certificate of Completion Form and turn it in at the
Success Center, second floor, Student Center, or mail to the attention of the Records office, 12345
College Blvd., Overland Park, Kan. 66210-1299.

Graduation Application Deadlines:
- June 15 for summer graduation
- October 15 for fall graduation
- February 15 for spring graduation

Requirements for degree or certificate of graduation

• For an associate's degree, 15 credit hours must be earned in residence at
JCCC. Advanced standing credit will not count toward satisfying this credit hour
requirement.
• For the associate of arts and associate of science degrees, a student must
complete an approved cultural diversity course.
• For certificates, a student must complete a minimum of 50 percent of the
required coursework at JCCC.
• Graduates must have earned both a 2.0 grade point average at JCCC and
have a cumulative 2.0 or better on all completed course work.
• Developmental and/or prerequisite courses, required before enrollment in
college-level courses, will not count toward fulfilling graduation
degree/certificate requirements.
• Students must be enrolled in classes at JCCC during the semester they
anticipate completing degree/certificate requirements and wish to graduate.

Rules to determine a student's graduation catalog term

Students are considered continuously enrolled if they complete at least one class during each
regular fall and spring semester. If students do not maintain continuous enrollment, they will be
required to follow the graduation requirements that are in effect at the time of re-enrollment.

Graduation Verification Process

1. When an Application for Degree and/or Certificate of Completion Form is received in the
Records office, an initial verification will be completed to ensure degree and/or certificate
requirements will be satisfied.
2. A letter will be sent to the student once the verification is complete. If you do not receive a letter,
please contact the Admissions office to verify your mailing address.
3. A student's degree and/or certificate status will be recorded on a student's permanent transcript
once grades have been posted and a final verification is done to ensure that all graduation
requirements have been completed.

Graduation Application Deadline Appeal Process

If a student misses the application deadline, a student may submit an Graduation Appeal Form.
Associate's Degrees and Certificates

Associate's Degrees Offered at JCCC

Graduation Requirements
To officially graduate, an application for graduation must be filed in the Records Office by the appropriate deadline.

Students graduating with an associate of arts degree or an associate of science degree must complete an approved cultural diversity course. This diversity requirement will be waived for students graduating before August 2009.

Cultural Diversity Requirement

Degree and Certificate Program List

Associate of Arts

Associate of Science

Associate of Applied Science

(Associate of Science and Associate of Applied Science degrees require a student to choose an academic major. See the Degree and Certificate Program List to view the majors of study available at JCCC.)

Associate of General Studies

Kansas AVS/TC Articulated, A.A.S.

Certificates

Certificate programs at Johnson County Community College provide specialized training for a specific career. To earn a certificate, students must successfully complete approved certificate requirements with a cumulative grade point average of 2.0 or higher and a JCCC GPA of 2.0 or higher. Students must complete a minimum of 50 percent of the required course work at JCCC.

Students must be enrolled at the college during the semester they anticipate completing certificate requirements and must submit an Application for Graduation to the JCCC Student Success Center.

Certificates are issued at the end of each semester.

Graduation exercises are held once a year at the completion of the spring semester. Students who have completed the requirements for a certificate in prior semesters of the same academic year will be invited to participate in graduation.

JCCC offers two types of certificates.

- Certificate of Completion: A certificate of completion may be awarded for a specified course of study not exceeding 15 credit hours.

- Career Certificate: A career certificate may be awarded for programs of 16 to 59 credit hours.
Associate of Arts

The associate of arts degree from JCCC

- is designed for students who plan to transfer to a baccalaureate college or university.
- requires completion of 64 college-level credit hours within specified course distribution areas with a 2.0 or higher GPA.
- requires the completion of a cultural diversity course from a list of approved courses. Some of the courses in this list will also meet humanities, social science or non-lab science requirements for this degree.

The 64 hours of credit necessary to complete the associate of arts degree include the following:

- Communications (9 credit hours)
- Humanities (6 credit hours)
  - History is included in the Humanities category
- Social Science and/or Economics (6 credit hours)
- Science and Mathematics (9 credit hours)**
- Health and/or Physical Education (1 credit)

**Must include one course from a lab science and one from mathematics

Note: The associate of arts degree is designed as a transfer curriculum. Students should refer to the transfer program sheets in the Student Success Center.

The following is an example of a first year schedule for an undecided transfer student. Students interested in a specific major or degree should talk with a JCCC counselor.

First Semester - CR (Credit Hours)

ENGL 121 Composition I 3
Social Science Elective 3
Math/Natural Science Elective 3-5
Humanities Elective 3
General Elective 3
Total Credit Hours 15-17

Second Semester - CR (Credit Hours)

ENGL 122 Composition II 3
Oral Communication Elective 3
Math/Natural Science Elective 3-5
Social Science/Humanities Elective 3
General Elective 3
Total Credit Hours 15-17

An associate of arts program is designed specifically to meet your educational objectives and needs by allowing you to complete general education requirements.

General Education Requirements

Communications - 9 hours

A. English Composition - 6 hours

ENGL 121  Composition I* ............................................... 3
Prerequisite: ENGL 106 or appropriate placement test score or EAP 113 and EAP 117
ENGL 122  Composition II* .................................................. 3
Prerequisite: ENGL 121

*Prerequisite/Corequisite required

B. Oral Communication - 3 hours

SPD 120  Interpersonal Communication............................... 3
SPD 121  Public Speaking.................................................. 3
SPD 125  Personal Communication....................................... 3
SPD 180  Intercultural Communication^ ................................. 3

^Also meets Cultural Diversity Requirement

Humanities - 6 hours

No more than one course from each of the five areas may count toward the six required hours.

A. Literature/Theatre

ENGL 130  Introduction to Literature* ................................. 3
Prerequisite: ENGL 121
ENGL 215  U.S. Latino and Latina Literature^* ....................... 3
Prerequisite or corequisite: ENGL 122
ENGL 227  Introduction to Poetry* ......................................... 3
Prerequisite: ENGL 122
ENGL 230  Introduction to Fiction* ........................................ 3
Prerequisite: ENGL 122
ENGL 231  American Prose* .................................................. 3
Prerequisite: ENGL 122
ENGL 235  Drama as Literature* ............................................ 3
Prerequisite: ENGL 122
ENGL 250  World Masterpieces* ............................................ 3
Prerequisite: ENGL 122
ENGL 254  Masterpieces of the Cinema* ................................. 3
Prerequisite: ENGL 122
ENGL 256  American Poetry* ................................................ 3
Prerequisite: ENGL 122
THEA 120  Introduction to Theater......................................... 3

*Prerequisite/Corequisite required

^Also meets Cultural Diversity Requirement

B. Foreign Language

FL 178  Intermediate Russian I* .......................................... 3
Prerequisite: FL 151 or two years of high school Russian
or three years of high school Russian
FL 179  Intermediate Russian II* ........................................... 3
Prerequisite: FL 178 or three years of high school Russian
FL 192  Intermediate Chinese I* ............................................ 3
Prerequisite: FL 166 or equivalent
FL 193  Intermediate Chinese II* .......................................... 3
Prerequisite: FL 192 or equivalent
FL 220  Intermediate German I* .......................................... 3
Prerequisite: FL 121 or two years of high school German
FL 221  Intermediate German II* .......................................... 3
Prerequisite: FL 220 or three years of high school German
FL 230  Intermediate Spanish I* .......................................... 3
Prerequisites: FL 131 with a grade of C or higher or
three years of high school Spanish or the appropriate
score on the placement test
FL 231 Intermediate Spanish II*.............................................3
Prerequisite: FL 230 with a grade of C or higher or
or four years of high school Spanish or the appropriate
score on the placement test
FL 240 Intermediate French I*..................................................3
Prerequisite: FL 141 or two years of high school French
FL 241 Intermediate French II*..................................................3
Prerequisite: FL 240 or three years of high school French
*Prerequisite/Corequisite required

C. History
HIST 125 Western Civilization: Readings and Discussion I........3
HIST 126 Western Civilization: Readings and Discussion II.......3
HIST 128 Medieval History.......................................................3
HIST 129 Early Modern Europe 1500-1789.............................3

PHIL 121 Introduction to Philosophy........................................3
PHIL 124 Logic and Critical Thinking.......................................3
PHIL 143 Ethics........................................................................3
PHIL 154 History of Ancient Philosophy...................................3
PHIL 176 Philosophy of Religion..............................................3

Social Science/Economics - 6 hours
No more than one course from each of the six
areas may count toward the six required hours.

A. Anthropology
ANTH 125 Cultural Anthropology^........................................3
ANTH 126  Physical Anthropology..................................3
ANTH 130  World Cultures^......................................3
ANTH 142  World Prehistory.....................................3
^Also meets Cultural Diversity Requirement

B.  Economics
ECON 132  Survey of Economics..................................3
ECON 230  Economics I..........................................3
ECON 231  Economics II.........................................3

C.  Political Science
POLS 122  Political Science....................................3
POLS 124  American National Government.........................3
POLS 126  State and Local Government...........................3
POLS 132  Introduction to Comparative Government^..............3
POLS 135  International Relations^................................3
^Also meets Cultural Diversity Requirement

D.  Psychology
PSYC 121  Applied Psychology...................................3
PSYC 130  Introduction to Psychology...........................3

E.  Sociology
SOC 122  Introduction to Sociology^...........................3
SOC 125  Social Problems^....................................3
SOC 131  Marriage and the Family................................3
^Also meets Cultural Diversity Requirement

F.  Gender and Ethnic Studies
WGS 201  Global Women's Studies^..............................3
^Also meets Cultural Diversity Requirement

Science and/or Mathematics - 9 hours
Must include at least one course from a lab science
and one from mathematics.

A.  Life Science
BIOL 122  Principles of Biology..................................3
BIOL 123  Principles of Biology Lab*............................1
Prerequisite or corequisite: BIOL 122 or
consent of the assistant dean
BIOL 124  Oceanus: Essentials of Oceanography.................3
BIOL 125  General Botany.........................................5
BIOL 127  General Zoology........................................5
BIOL 130  Environmental Science................................3
BIOL 131  Environmental Science Lab*...........................1
Prerequisite or corequisite: BIOL 130
BIOL 140  Human Anatomy........................................4
BIOL 144  Human Anatomy and Physiology.......................5
BIOL 150  Biology of Organisms*................................5
Prerequisite: BIOL 135 or
consent of the assistant dean
BIOL 225  Human Physiology*...................................4
Prerequisites: CHEM 122 and either BIOL 140
or BIOL 144
BIOL 230  Microbiology*........................................3
Prerequisite: CHEM 122 or
one year of high school chemistry  

BIOL 231 Microbiology Lab*...............................2  
BIOL 231 students must be currently enrolled in  
BIOL 230 or have successfully completed BIOL 230  
within the last three years.  

*Prerequisite/Corequisite required  

B. Physical Science  

ASTR 120 Fundamentals of Astronomy......................3  
ASTR 122 Astronomy........................................4  
CHEM 120 Chemistry in Society..............................4  
CHEM 122 Principles of Chemistry..........................5  
CHEM 124 General Chemistry I Lecture*......................4  
Prerequisite or corequisite: MATH 171 or assessment  
test and Corequisite: CHEM 125  
CHEM 125 General Chemistry I Lab*..........................1  
Prerequisite or Corequisite: CHEM 124  
Students who withdraw from GENERAL CHEMISTRY I  
LECTURE must also withdraw from the corresponding  
laboratory GENERAL CHEMISTRY I LABORATORY  
Students may not withdraw from the laboratory course  
GENERAL CHEMISTRY I LABORATORY without withdrawing  
from CHEMISTRY I LECTURE.  
CHEM 131 General Chemistry II Lecture*.....................4  
Prerequisites: CHEM 124 and CHEM 125 and  
Corequisite: CHEM 132  
CHEM 132 General Chemistry II Lab*.........................1  
Prerequisites: CHEM 124 and CHEM 125 and  
Corequisite: CHEM 131 Students who  
withdraw from GENERAL CHEMISTRY II LECTURE  
must also withdraw from the corresponding  
laboratory GENERAL CHEMISTRY II LABORATORY.  
Students may not withdraw from the laboratory  
course GENERAL CHEMISTRY II LABORATORY without  
withdrawing from CHEMISTRY II LECTURE.  
CHEM 140 Principles of Organic & Biological Chemistry*.....5  
Prerequisites: BIOL 135  
and CHEM 122 or permission of the assistant dean  
GEOS 130 General Geology........................................5  
GEOS 140 Physical Geography.................................3  
GEOS 141 Physical Geography Lab*............................2  
Prerequisite or corequisite: GEOS 140 or the  
equivalent  
GEOS 145 World Regional Geography^............................3  
PHYS 130 General Physics I*.................................5  
Prerequisite: MATH 171 or assessment scores  
PHYS 131 General Physics II*................................5  
Prerequisite: PHYS 130  
PHYS 220 Engineering Physics I*............................5  
Prerequisite or corequisite: MATH 242  
PHYS 221 Engineering Physics II*.............................5  
Prerequisites: PHYS 220 and MATH 242  
PSCI 120 Physical Science......................................4  
^Also meets Cultural Diversity Requirement  

*Prerequisite/Corequisite required  

C. Mathematics  

MATH 165 Finite Mathematics*...............................3  
Prerequisite: MATH 116 with a grade of "C" or higher  
or appropriate score on the math assessment test  
MATH 171 College Algebra*+....................................3  
Prerequisite: MATH 116 with a grade of "C" or higher  
or MATH 134 with a grade of "C" or higher  
or appropriate score on the math assessment test  
Note: Not available to students with credit in  
MATH 173  
MATH 172 Trigonometry*+.........................................3  
Prerequisite: MATH 171 with a grade of "C" or higher
or appropriate score on the math assessment test
Note: Not available to students with credit in MATH 173

MATH 173 Precalculus*.................................5
Prerequisite: MATH 116 with a grade of "C" or higher
or appropriate score on the math assessment test
Note: Not available for credit for students with
credit in MATH 171 and/or MATH 172

MATH 175 Discrete Mathematics and its Applications*........3
Prerequisite: MATH 171 or MATH 173
with a grade of "C" or higher
or appropriate score on the math assessment test

MATH 181 Statistics*........................................3
Prerequisite: MATH 171 or MATH 173 or an
equivalent course with a grade of "C" or higher
or appropriate score on the math assessment test

MATH 225 Mathematics as a Decision Making Tool*............3
Prerequisite: MATH 171 or MATH 173
with a grade of "C" or higher
or appropriate score on the math assessment test

MATH 231 Business and Applied Calculus I*...................3
Prerequisite: MATH 171 or MATH 173
with a grade of "C" or higher
or appropriate score on the math assessment test

MATH 232 Business and Applied Calculus II*...................3
Prerequisites: MATH 231 and either MATH 172 or
MATH 173 with a grade of "C" or higher
or appropriate score on the math assessment test

MATH 241 Calculus I*....................................5
Prerequisite: MATH 172 or MATH 173
or an equivalent course with a grade of "C" or higher
or an appropriate score on an assessment test

MATH 242 Calculus II*....................................5
Prerequisite: MATH 237 or MATH 241
or an equivalent course with a grade of "C" or higher

MATH 243 Calculus III*..................................5
Prerequisite: MATH 242 with a grade of "C" or higher
or an equivalent course with a grade of "C" or higher

MATH 244 Differential Equations*............................3
Prerequisite: MATH 243
or an equivalent course with a grade of "C" or higher

*Prerequisite/Corequisite required

Note: +MATH 173 is not available for credit to students
who have completed MATH 171 and/or MATH 172.
Students who have credit in MATH 173 will not
receive credit for MATH 171 and/or MATH 172.

Health and/or Physical Education - 1 hour

HPER Any Activity Course.............................1
EMS 121 CPR I - Basic Life Support for Healthcare Provider...1
HMEC 151 Nutrition and Meal Planning.......................3

*Prerequisite/Corequisite required
~also meets a General Education requirement

Associate of Science

The associate of science degree from JCCC

- is designed with an emphasis in a specific career program.
- requires completion of a minimum of 64 college-level credit hours within specified course distribution areas, including the emphasis of study, with a 2.0 or higher GPA.
- requires the completion of a cultural diversity course from a list of approved courses. Some of the courses in this list will also meet humanities, social science or non-lab science requirements for this degree.

The 64 hours of credit necessary to complete the associate of science degree
include the following general education requirements plus the courses listed for the specific career program:

- Communications (9 hours)
- Humanities (6 hours)
- Social Science and/or Economics (6 hours)
- Science and Mathematics (12 hours)
- Health and/or Physical Education (1 hour)

Specific courses that meet the associate of science degree requirements are:

**General Education Requirements**
*(available for career programs only)*

**A. Communications - 9 hours**

ENGL 121 Composition I*.......................................3
  Prerequisite: ENGL 106 or appropriate placement test score or EAP 113 and EAP 117
  *Prerequisite/Corequisite required

**B. Communications Elective - 6 hours**
*(two of the following)*

ENGL 122 Composition II*......................................3
  Prerequisite: ENGL 121
ENGL 123 Technical Writing I*.................................3
  Prerequisite: ENGL 121
ENGL 140 Writing for Interactive Media*.......................3
  Prerequisite: ENGL 121
BUS 150 Business Communications*.............................3
  Prerequisite: ENGL 121
SPD 120 Interpersonal Communication..........................3
SPD 121 Public Speaking......................................3
SPD 125 Personal Communication...............................3
SPD 180 Intercultural Communication^.........................3
  *Prerequisite/Corequisite required
  ^Also meets Cultural Diversity Requirement

**Humanities - 6 hours**

Two courses from any of the following categories may count toward the six required hours.

**A. Literature/Theater**

ENGL 130 Introduction to Literature*..........................3
  Prerequisite: ENGL 121
ENGL 215 U.S. Latino and Latina Literature^..................3
  Prerequisite or corequisite: ENGL 122
ENGL 227 Introduction to Poetry*..............................3
  Prerequisite: ENGL 122
ENGL 230 Introduction to Fiction*..............................3
  Prerequisite: ENGL 122
ENGL 231 American Prose*......................................3
  Prerequisite: ENGL 122
ENGL 235 Drama as Literature*..................................3
  Prerequisite: ENGL 122
ENGL 250 World Masterpieces*................................3
  Prerequisite: ENGL 122
ENGL 254 Masterpieces of the Cinema*.........................3
  Prerequisite: ENGL 122
ENGL 256 American Poetry*.................................3
Prerequisite: ENGL 122
THEA 120 Introduction to Theater.............................3
^Prerequisite/Corequisite required
^Also meets Cultural Diversity Requirement

B. Foreign Language

FL 178 Intermediate Russian I*................................3
Prerequisite: FL 151 or two years of high school Russian
FL 179 Intermediate Russian II*..............................3
Prerequisite: FL 178 or three years of high school Russian
FL 192 Intermediate Chinese I*...............................3
Prerequisite: FL 166 or equivalent
FL 193 Intermediate Chinese II*...............................3
Prerequisite: FL 192 or equivalent
FL 220 Intermediate German I*................................3
Prerequisite: FL 121 or two years of high school German
FL 221 Intermediate German II*..............................3
Prerequisite: FL 220 or three years of high school German
FL 230 Intermediate Spanish I*...............................3
Prerequisites: FL 131 with a grade of C or higher or
or three years of high school Spanish or the appropriate
score on the placement test
FL 231 Intermediate Spanish II*.............................3
Prerequisite: FL 230 with a grade of C or higher or
or four years of high school Spanish or the appropriate
score on the placement test

~also meets a General Education requirement

Associate of Applied Science
The associate of applied science degree from JCCC
- is designed with an emphasis in a specific career program.
- requires completion of a minimum of 64 college-level credit hours within specified course distribution areas, including emphasis of study, with a 2.0 GPA.

The 64 hours of credit necessary to complete the associate of applied science degree include 15 credits of general education requirements plus the courses listed for the specific career program. At a minimum, the distribution must include:
- Communications (3 hours)
- Humanities (3 hours)
- Social Science and/or Economics (3 hours)
- Science and Mathematics (3 hours)
- 3 additional credit hours to be selected from one of the above categories
- Health and/or Physical Education (1 hour)

Specific courses that meet the associate of applied science degree requirements are:

General Education Requirements
(available for career programs only)

A. Communications - 3 hours
ENGL 121 Composition I*.................................................3
Prerequisite: ENGL 106 or appropriate placement
  test score or EAP 113 and EAP 117
If your specific degree program requires a communications elective, choose three hours from the following:

ENGL 122  Composition II*.................................3
Prerequisite: ENGL 121
ENGL 123  Technical Writing I*...............................3
Prerequisite: ENGL 121
ENGL 140  Writing for Interactive Media*.....................3
Prerequisite: ENGL 121
BUS 150   Business Communications*..........................3
Prerequisite: ENGL 121
SPD 120   Interpersonal Communication.........................3
SPD 121   Public Speaking.........................................3
SPD 125   Personal Communication.................................3
SPD 180   Intercultural Communication............................3
*Prerequisite/Corequisite required

Humanities - 3 hours

One course from any of the following categories may count toward the three required hours.

**A. Literature/Theater**

ENGL 130  Introduction to Literature*..........................3
Prerequisite: ENGL 121
ENGL 215  U.S. Latino and Latina Literature*...................3
Prerequisite or corequisite: ENGL 122
ENGL 227  Introduction to Poetry*...............................3
Prerequisite: ENGL 122
ENGL 230  Introduction to Fiction*...............................3
Prerequisite: ENGL 122
ENGL 231  American Prose*........................................3
Prerequisite: ENGL 122
ENGL 235  Drama as Literature*....................................3
Prerequisite: ENGL 122
ENGL 250  World Masterpieces*....................................3
Prerequisite: ENGL 122
ENGL 254  Masterpieces of the Cinema*............................3
Prerequisite: ENGL 122
ENGL 256  American Poetry*.......................................3
Prerequisite: ENGL 122
THEA 120  Introduction to Theater.................................3
*Prerequisite/Corequisite required

**B. Foreign Language**

FL 178    Intermediate Russian I*...............................3

Associate of General Studies
The associate of general studies degree from JCCC

- is designed for students who do not plan to transfer to a traditional baccalaureate institution, but wish to receive recognition for completion of a more general program of study
- requires completion of 64 college-level credit hours within specified course distribution areas with a 2.0 or higher GPA.

The 64 hours of credit necessary to complete the associate of general studies degree include the following:

General Education Requirements (26 credit hours)

- The Arts (3 hours)
- Communication Skills (6 hours)
- Culture and Ethics (6 hours)
- Health, Physical Education, Recreation (2 hours)
- Mathematics (3 hours)
- Modes of Inquiry (6 hours)

Computer Skills (3 credit hours)

Global Issues/Diversity (3 credit hours)

College level electives (32 credit hours)
Courses may not be used to satisfy requirements in more than one category.

The Arts - 3 hours

Transfer Guides

**University Transfer Program for Undecided Students**

If you are planning to transfer but have not decided upon a major or chosen a four-year school, you should select courses from the general education requirement areas and under the associate of arts degree requirements. In general, a total of 124 to 128 hours are required for most four-year degrees. If you are still undecided about a major in your second year, you should work closely with a counselor in making a decision that will enable you to transfer without loss of time or credit.

**University Transfer Programs for Specific Majors**

Copies of university transfer programs are available in the Success Center on campus or on the transfer information Web site.

**Individual Transfer Program**

If you plan to attend a four-year college or university that is not local or if you choose a major not listed under local university transfer programs, you may work with a counselor to develop your own individual transfer program.

Credit Career and Certificate Programs

**Degree and Certificate Program List**

Listing of JCCC’s career and certificate programs

**Career Programs**

JCCC’s career programs provide the opportunity for students to study specific careers and enter the job market directly. Each program has been designed with the assistance of a community advisory committee of men and women currently working in the field who are well aware of the requirements and job potential in today’s market. Although career program courses usually are not intended to be transfer programs, some of the courses may transfer to four-year colleges and universities. Specific information on course transferability can be found in the Success Center on campus or on the transfer information Web site (http://web.jccc.net/academic/transfer). Several of the career programs enable students to gain valuable work experience in the community while taking the career program courses. Students who are interested in a career program should contact a JCCC counselor for more information. Counselors can assist students with entrance requirements, course selection and sequence, and job possibilities. Careful planning and course selection can be just as important in a career program as dedication in the classroom.
Certificates

Certificate programs at Johnson County Community College provide specialized training for a specific career. To earn a certificate, students must successfully complete approved certificate requirements with a cumulative grade point average of 2.0 or higher and a JCCC GPA of 2.0 or higher. Students must complete a minimum of 50 percent of the required course work at JCCC.

Students must be enrolled at the college during the semester they anticipate completing certificate requirements and must submit an Application for Graduation to the JCCC Student Success Center.

Certificates are issued at the end of each semester.

Graduation exercises are held once a year at the completion of the spring semester. Students who have completed the requirements for a certificate in prior semesters of the same academic year will be invited to participate in graduation.

JCCC offers two types of certificates.

- Certificate of Completion: A certificate of completion may be awarded for a specified course of study not exceeding 15 credit hours.

- Career Certificate: A career certificate may be awarded for programs of 16 to 59 credit hours.

Degree and Certificate Program List

Programs, degrees and certificates are listed in alphabetical order (by 1st letter of title). Additionally, degrees and certificates are included under their program area.

ABLE

Academic Bridges to Learning Effectiveness (ABLE)

The Academic Bridges to Learning Effectiveness (ABLE) program is granted by Metropolitan Community College, but coordinated at JCCC.

This nationally recognized program teaches students with neurological disabilities (learning disabilities, traumatic brain injuries, autism spectrum disorders, ADHD, etc.) how to become independent learners.

Students take courses with supplemental workshops as well as attend weekly support group meetings to build skills and confidence for college and vocational programs.

An educational specialist works with each student to design an individualized course plan. For more information, call Longview Community College ABLE program, 816-672-2053, or Penn Valley Community College ABLE program, 816-759-4089.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.
Johnson County Community College students should refer to Cooperative Program Information.

Accounting, A.A.S.

Accounting is a crucial part of every business operation and the language that businesses speak. The associate of applied science degree program focuses on practical skills often required for entry-level paraprofessional positions. The internship course gives the graduate on-the-job experience working in an approved business. Two-year graduates may find positions as accounting assistants, accounting clerks and general bookkeepers.

The accounting career program (see: www.jccc.net/home/depts/1202) is accredited by the Association of Collegiate Business Schools and Programs (ACBSP). For students wishing to transfer to a four-year college accounting or business program, this accreditation makes the transfer a smoother process. For more information, please contact the career facilitator (skleiner@jccc.edu) or a JCCC counselor.

Administration of Justice, A.A.

More than 1 million people are employed in the administration of justice/law enforcement fields in the United States. Employment opportunities are expected to grow as fast as or slightly faster than average for all occupations in the field. JCCC’s administration of justice/law enforcement program provides you the opportunity to study various aspects of the criminal justice fields. Successful completion of 64 hours of credit in this two-year program leads to an associate of arts degree. You should contact a counselor when developing a program plan.

(Major Code 2120; CIP Code 43.0107)

Administration of Justice

Associate of Arts Degree

Students graduating with an Associate of Arts degree or an Associate of Science degree must complete an approved cultural diversity course. Some of these courses are able to meet both a diversity requirement and a general education requirement.

  - ADMJ 235: Community Based Corrections (3 credits)
  - ADMJ 281: Readings in Police Science* (3 credits)
  - ADMJ 285: Administration of Justice Internship* (3 credits)
Prerequisites: Fifteen credit hours in ADMJ courses or program facilitator approval and a grade point average of 2.0 or higher

** You must take two courses from the following list, but not more than one course from each group may count toward the required 6 hours.

**Group 1:**
- POLS 124 American National Government
- POLS 126 State and Local Government

**Group 2:**
- PSYC 130 Introduction to Psychology

Note: This is a prerequisite for ADMJ 230.

**Group 3:**
- SOC 122 Introduction to Sociology
- SOC 125 Social Problems

^Meets Cultural Diversity requirement

NOTE:*** The 9 hours required must include at least one course from a lab science and one from mathematics.

NOTE: + If you are certified under the Kansas Law Enforcement Training Act, you are eligible to receive assessment of prior learning credit for some or all of these courses.

**Police Academy Certificate**

This course consists of 60 clock hours of law enforcement training provided in addition to the 540 hours required by the Kansas Minimum Standards Training Act for recruits attending the Police Academy. While the required 600-hour curriculum is provided without fee, enrollment in advanced training is required of all those attending the academy. The curriculum covers law, criminal investigations, patrol procedures, defensive tactics, report writing and specialized training required by local law enforcement agencies.

Prerequisite: Selective Admissions - open only to currently employed full-time police officers attending the Police Academy under sponsorship of a law enforcement agency

(Major Code 4880; CIP Code 43.0103)

**Certificate of Completion**

**Required Course**
- ADMJ 265 Advanced Police Training

Prerequisite: Selective Admissions - open only to currently employed full-time police officers attending the Police Academy under sponsorship of a law enforcement agency

**Animation, A.A.S.**

The Associate of Applied Science Degree Animation program provides instruction
for creating animation, 3D modeling and special effects for applications such as animated shorts and movies and games, and rendering 3D environments. Fundamental interactive concepts, the development of assets and screen design will be covered. Depending on individual choices and talents, students who complete the Animation program should be prepared for employment as an animator, a game art creator, a 3D visual artist, and/or a special effects artist.

(Major Code 2630; CIP Code 10.0304)

**Kansas AVS/TC Articulated, A.A.S.**

This degree is designed to facilitate student transfer of technical education programs under the provisions outlined in the Transfer Agreement and Articulation Guide for Kansas Community Colleges, Area Technical Schools and Colleges for the Associate in Applied Science, dated September 1999.

Beginning Fall 1999, this degree may be earned by a student wishing to transfer from a Kansas Area Vocational Technical School or Kansas Technical College with the following criteria:

- Completion of an eligible technical program of 1080 hours or more from a Kansas Vocational Technical School or Kansas Technical College.
- Official transcript from the technical institution documenting the number of hours and certificate or degree awarded.
- The student must have 15 credits from JCCC in order to receive this degree from JCCC.
- The 1080 documented hours will be transferred to JCCC as 45 transfer credit hours and will be placed on the student's JCCC transcript when the
student applies for graduation from JCCC.
• Students must also meet general JCCC admissions, residency and graduation requirements.
• Interested students should contact a JCCC counselor for further information prior to transfer and enrollment.

Automotive Technology, A.A.S.

Automotive technicians generally begin their careers in service repair shops, with continually expanding industrial and service career advancement opportunities. Technicians work with experienced professionals and have frequent contact with the public. This field requires good mechanical aptitude and manual dexterity skills.

The two-year associate of applied science degree, which is certified by the ASE, covers all major areas, including diagnosis and tune-up, chassis, electrical/electronic and hydraulic systems, automatic transmissions, engines, and emissions. Students work on developing the skills needed to advance to a supervisory position, such as customer relations, estimating materials and labor costs, and managing the work of others.

In the Kansas City area, the anticipated job growth is 32 percent by 2008. About 239 annual openings are expected to occur each year. The average hourly wage in 2002 was $16.22.

(Major Code 2420; CIP Code 47.0604)

Automotive Technology Certificate

The automotive technology certificate program is designed to meet the needs of today’s beginning and experienced auto technicians. With the completion of the certificate program, the student will have a well-rounded background in the repair required for dealership and independent service personnel. Completion of courses should assist students in preparing for ASE certification tests. Most automotive trades expect applicants to pass one or more of the ASE tests, which will enable them to qualify for technical positions in service repair.

Biotechnology, A.A.S.

The greater Kansas City area and specifically Johnson County have numerous biological-, pharmaceutical- and chemical-related formulating, manufacturing, research and testing companies. Many of these facilities employ scientific technicians to support the endeavors of their professional scientists and engineers.

JCCC’s science technology program is designed to develop scientific support personnel for the metropolitan area.

This program offers specific knowledge and training designed to provide you with entry-level skills for employment as a technician. It also provides the breadth of background sufficient to encourage change and flexibility.

The biotechnology associate of applied science degree program will prepare students to work in biotechnology laboratories associated with universities, medical centers, private research institutions, and a variety of industrial applications. Upon completion of this 66-68 hour degree, students will be able to find entry-level or higher positions in diverse fields of biotechnology. Along with basic and more advanced science courses, students will take specialized courses such as laboratory safety and biotechnology methods.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers.

Metropolitan Community College students should refer to Cooperative Program Information.

Business Administration, A.A.S.

Business is more competitive than ever before. People running businesses will be
decided by how well they manage change, stay ahead of trends and learn the
latest theories. JCCC’s business administration career program can train you in
the many skills required to manage a variety of businesses.
Focusing on the development of decision-making, organizational and supervisory
skills, the program offers professional courses in management, marketing, economics, accounting, finance, communications, business law and data processing. These are combined with a core of general education courses to ensure that students receive a well-rounded curriculum.

Graduates have opportunities in entry-level management and supervisory positions in a variety of businesses. Johnson County’s continued growth as the business center for the area means job opportunities are available. (Major Code 2430; CIP Code 52.0201)

Business-Logistics Mgt, A.A.S.

The Business-Logistics Management, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

This program focuses not only on those who currently work in a logistics career but also those who wish to test their interest and want more knowledge about that field. The program stretches all employees, including management personnel, professionally. Students receive information and training that can lead them to one of hundreds of careers tied to logistics. In addition to classroom knowledge, students receive current insights from professionals in the field.

The JCCC business logistics management program is offered to Johnson County residents in cooperation with Metropolitan Community Colleges of Kansas City. Related courses are taken at JCCC. You must be accepted as a student to JCCC and accepted into the program by MCC. Students must be residents of Johnson County in order to receive in-state tuition rates. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Blue River at 816-220-6532 or visit www.mcckc.edu

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Johnson County Community College students should refer to Cooperative Program Information.

Civil Engineering Technology, A.A.S.

Civil engineering technicians use theory and practical application in planning, designing, constructing, inspecting and maintaining civil engineering projects. Job duties can include performing land surveys, creating civil engineering drawings using computer aided drafting, assisting engineers with design, and project management.

JCCC's civil engineering technology program offers a broad base of instruction in mathematics, engineering design, drawing interpretation, computer-aided drafting, construction methods and communication skills. The program will qualify graduates for a variety of entry-level positions in design firms, construction companies or public agencies. Successful completion of 64 hours from the civil engineering technology curriculum will lead to an associate of applied science degree.

(Major Code 2210; CIP Code 15.0201)

Construction Management Certificate
The construction management certificate is designed to address the management training needs of supervisors in the construction industry. Necessary management skills include construction methods, safety, estimating and management; personnel supervision; business management; and financial and data management. Construction management practices are directed toward those encountered by small- to medium-sized contractors.
(Major Code 4750; CIP Code 52.2001)

Civil Engineering Technology

Career Certificate
Suggested/Sample Course Sequence
The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

First Semester
CET  105  Construction Methods...........................................3
CET  125  Construction Specifications*.................................2
  Prerequisite or corequisite: CET 105 or equivalent
DRAF 129  Interpreting Architectural Drawings........................2
MATH 120  Business Math or higher*.................................3
  Prerequisite: MATH 111 with a grade of "C" or higher or appropriate score on the math assessment test
BUS  140  Principles of Supervision.....................................3
  Total Semester Credit Hours.................................13

Second Semester
ACCT 111  Small Business Accounting.........................3
or
ACCT 121  Accounting I..................................................3
CET  129  Construction Management.................................3
CET  227  Construction Cost Estimating*...............................3
  Prerequisites: CET 105 and CET 125 or permission
  of program administrator and
Prerequisite or corequisite: DRAF 129 or permission of program administrator

CET 150 Construction Safety........................................3
INDT 155 Workplace Skills........................................2

Total Semester Credit Hours.................................15
TOTAL PROGRAM CREDIT HOURS.............................28

*Prerequisite/Corequisite required

Computer Information Systems, A.A.S.

Employment opportunities for programmer analysts continue to grow as the need for sophisticated information systems increases in the business environment. Increased demand will focus on the areas of object-oriented programming, database management and client-server applications.

JCCC’s information systems program focuses on developing the skills needed for entry-level programmer analysts and related positions. The associate of applied science degree in information systems offers an integrated program of study designed to prepare professionals with skills that are applicable to different hardware systems. With its emphasis on practical experience and on currency in the areas of software and curriculum, the program has much to offer the
information systems professional who wishes to upgrade or broaden his or her knowledge of the field. The associate of applied science degree is awarded for successful completion of 69 credit hours. (Major Code 2930; CIP Code 11.0201)

Information Systems

Associate of Applied Science Degree

Prerequisite for Required Courses

Prior to beginning the information systems program, the student must take the following prerequisite, or have taken an equivalent transfer course, or have passed the waiver test, or have obtained a waiver from the department:

CIS 134 Programming Fundamentals.........................4

First Semester

CS 200 Concepts of Programming Algorithms Using C++*........4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
or
CS 205 Concepts of Programming Algorithms using JAVA*.......4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
CIM 133 Screen Design*.......................................4
Prerequisite: CDTP 135
ACCT 121 Accounting I........................................3
ENGL 121 Composition I*.......................................3
Prerequisite: ENGL 106 or appropriate placement test score or EAP 113 and EAP 117
MATH 171 College Algebra*.....................................3
Prerequisite: MATH 116 with a grade of "C" or higher
or MATH 134 with a grade of "C" or higher
or appropriate score on the math assessment test
Note: Not available to students with credit in MATH 173
or
Any Precalculus/Calculus Course*.........................3
Total Semester Credit Hours.........................17

Second Semester

Level One Programming Language
Option..............................................................4
CS 210 Discrete Structures I*....................................3
Prerequisites: MATH 171 or both MATH 116 and CIS 134
or appropriate math assessment scores
CIS 162 Database Programming*.................................4
Prerequisite: CIS 134 or the equivalent
CIS 242 Introduction to System Design and Analysis*........3
Prerequisite: CIS 138 or CS 200 or CS 201 or CS205
SPD 125 Personal Communication............................3
or
ENGL 123 Technical Writing I*...............................3
Prerequisite: ENGL 121
Total Semester Credit Hours.........................17

Third Semester

Level Two Programming Language
Option...............................................4
CIS 258 Operating Systems*..........................3
Prerequisite: CIS 138 or CIS 162 or
CS 200 or CS 201 or CS 205
or
CIS 204 UNIX Operating System*................3
Prerequisites: CS 200 or CS 205 or
CS 201 and CPCA 139
CIS Elective.........................................3
Humanities/Art Elective.............................3
Social Science and/or Economic Electives....3
Health and/or Physical Education Elective....1
Total Semester Credit Hours....................17

Fourth Semester

Level Three Programming Language
Option...............................................4
CIS 264 Application Development and Programming*........4
Prerequisites: CIS 242 and either CIS 260 or CIS 162
Prerequisites or Corequisites: CIS 238 or CIS 253 or
CIS 269 or CIS 240 and CIS 262
CIS 260 Database Management*..........................4
Prerequisite: CS 250 or CS 255 or CIS 235 or
CIS 238 or CIS 248
CIS 262 Project Management*............................3
Prerequisite: CIS 242
CIS Elective.........................................3
Total Semester Credit Hours...................18
TOTAL PROGRAM CREDIT HOURS...............69

Each student should select one option area from
the following list.

All three levels of programming language must
be from the same option area.

Level One Programming Language Options:

Option in C++:
CIS 235 Object-Oriented Programming Using C++............4
Prerequisite: CS 200 using C++
or
CS 250 Basic Data Structures using C++..................4
Prerequisite: CS 200
Prerequisite or corequisite: CS 210
for students transferring to most four-year
computer science programs

Option in JAVA:
CS 255 Basic Data Structures using JAVA..................4
Prerequisite: CS 205

Option in VISUAL BASIC:
CIS 138 Visual Basic .Net*.............................4
Prerequisite: CIS 134

Level Two Programming Language Options:

Option in C++:
CIS 235 Object-Oriented Programming Using C++............4
Prerequisite: CS 200 using C++
or
CS 250 Basic Data Structures using C++..................4
Prerequisite: CS 200
Prerequisite or corequisite: CS 210
for students transferring to most four-year
computer science programs

Option in JAVA:
CIS 240 Advanced Topics in JAVA I*.........................4
Prerequisite: CS 250 or CIS 235 or CS 255

Option in VISUAL BASIC:
CIS 238 Visual Basic Intermediate Topics*..................4
Prerequisite: CIS 138

Level Three Programming Language Options:

Option in C++:
CIS 269 GUI Programming*..................................4
Prerequisites: CIS 235 or CS 250

Option in JAVA:
CIS 280 Advanced Topics in JAVA II*.......................4
Prerequisite: CIS 240

Option in VISUAL BASIC:
CIS 277 Active Server Pages.Net*...........................4
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162
and either CPCA 139 or CIS 204 and either CPCA 161
or CPCA 158

Six hours of computer information systems electives
are to be selected from the following list:

CS 180 Introduction to Artificial Intelligence*...........3
Prerequisite: CIS 145 or CIS 148 or
CIS 150 or CS 200
CS 200 Concepts of Programming Algorithms Using C++*....4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
CS 201 Concepts of Programming Algorithms using C#*.....4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
CS 205 Concepts of Programming Algorithms using JAVA*....4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
CS 250 Basic Data Structures using C++*...................4
Prerequisite: CS 200
Prerequisite or corequisite: CS 210
for students transferring to most four-year
computer science programs
CS 255 Basic Data Structures using JAVA*...................4
Prerequisite: CS 205
CS 211 Discrete Structures II*...............................3
Prerequisite: CS 210
CIS 138 Visual Basic .Net*.................................4
Prerequisite: CIS 134
CIS 204 UNIX Operating System*............................3
Prerequisites: CS 200 or CS 205 or
CS 201 and CPCA 139
CIS 206 Programming in PERL*..............................4
Prerequisites: CS 200 or CS 205 or CS 201 and
CPCA 139
CIS 223 Law Office Computing*..............................3
Prerequisites: Paralegal program students – admission
to the paralegal program and either CIS 124 or CPCA 128 or three hours of CPCA 108 and CPCA 110 and CPCA 114.

CIS 235 Object-Oriented Programming Using C++*..............................4
Prerequisite: CS 200 using C++
CIS 238 Visual Basic Intermediate Topics*..........................4
Prerequisite: CIS 138
CIS 240 Advanced Topics in JAVA I*..........................4
Prerequisite: CS 250 or CIS 235 or CS 255
CIS 243 Object-Oriented Analysis and Design*^..................4
Prerequisite: One programming course using an object-oriented programming language or equivalent experience
CIS 244 Advanced Topics in C# I*.............................4
Prerequisite: CS 250 or CIS 235 or CS 255
CIS 254 UNIX System Administration*..........................4
Prerequisite: CIS 204
CIS 258 Operating Systems*^..................................3
Prerequisite: CIS 138 or CIS 162 or CS 200 or CS 201 or CS 205
CIS 269 GUI Programming*.....................................4
Prerequisites: CIS 235 or CS 250
CIS 270 Information Systems Internship*^..........................3
Prerequisites: CS 250 or CS 255 or CIS 235 or CIS 238 or CIS 248 and program facilitator approval
CIS 275 Web-Enabled Database Programming*..........................4
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162 and either CPCA 139 or CIS 204 and either CPCA 161 or CPCA 158
CIS 277 Active Server Pages.Net*..................................4
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162 and either CPCA 139 or CIS 204 and either CPCA 161 or CPCA 158
CIS 280 Advanced Topics in JAVA II*..............................4
Prerequisite: CIS 240
CFOR 150 Introduction to Computer Forensics*..........................3
Prerequisites: CIS 134 and CPCA 139 and assistant dean's approval
CFOR 180 File Structure & Residual Artifacts*.........................3
Prerequisite: CFOR 150
IT 200 Networking Technologies...........................3

*Prerequisite/Corequisite required
^ recommended electives

Database Certificate
Completion of this certificate, offered through the computer information systems program, will help to prepare students for future careers as database specialists or for one of many other information systems careers in which knowledge of database concepts, products and technologies is important. Students will be able to design and build personal databases using Access. The student will acquire a strong foundational knowledge in an object-oriented programming language (Visual Basic) and will work with Web-enabled databases, SQL and other database products, as well as attaining formal systems analysis and design skills. (Major Code 5190; CIP Code 11.0802)

Computing Sciences and Information Technology Department

Career Certificate
Prior to beginning the database certificate program, the student must take the following prerequisite or have taken an equivalent transfer course, or have passed the waiver test, or have obtained a waiver from the program administrator.
CPCA 105  Introduction to Personal Computers: Windows........1
or
CPCA 106  Introduction to Personal Computers: Macintosh........1

First Semester

Full Semester Course
CIS 134  Programming Fundamentals.............................4

First Five Week Session
CPCA 114  Databases I: MS Access*..............................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
CIS 124 or an appropriate score on a waiver test

Second Five Week Session
CPCA 115  Databases II: MS Access*..............................2
Prerequisite: CPCA 114
CWEB 101  Introduction to the Web using Internet Explorer.......1
Prerequisites: CPCA 105 or CPCA 106 or CPCA 128 or
CIS 124 or appropriate score on an assessment test

Third Five Week Session
CPCA 141  Internet I*..........................................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
CIS 124 or appropriate score on an assessment test
Total Semester Credit Hours..........................9

Second Semester

Full Semester Course
CIS 138  Visual Basic .Net*...................................4
Prerequisite: CIS 134

First Five Week Session
CPCA 138  Windows for Microcomputers*..........................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
CIS 124 or an appropriate score on an
assessment test

Second Five Week Session
CWEB 136  Introduction to PHP*.................................1
Prerequisites: CWEB 101 and CPCA 114

Third Five Week Session
CWEB 146  PHP with MySQL*......................................1
Prerequisite: CWEB 136
CPCA 117  Databases III: MS Access*.............................1
Prerequisite: CPCA 115

TOTAL PROGRAM CREDIT HOURS..........................32
*Prerequisite/Corequisite required

Desktop Publishing Applications Specialist Certificate

An individual, with or without a college degree, with the goal to acquire or improve computer desktop publishing application skills, will accomplish that goal in this certificate. Emphasis is placed upon the acquisition of results-oriented career business and industry skills.

The desktop publishing certificate is intended for those seeking entry-level positions, as well as for those currently employed, who desire to enhance their job skills. This certificate provides current or prospective employers with tangible evidence of desktop publishing competency, on the part of the certificate completer.

Application courses for the certificate will encourage students to develop a “cross-platform” mastery, which is made possible by offering most on-campus courses in a dual-platform Macintosh and Windows computing environment.

Required courses that cover skills a student already has may be replaced with other CDTP courses at the discretion of the Assistant Dean of Computing Sciences and Information Technology or a desktop publishing professor. An applicant must complete 14 credits at Johnson County Community College.

(Major Code 4830; CIP Code 11.0202)
Computing Sciences and Information Technology Department

Certificate of Completion

Prior to beginning the database career certificate program the student must take the following prerequisite or have taken an equivalent transfer course, or have passed the waiver test, or have obtained a waiver from the program administrator.

CPCA 105 Introduction to Personal Computers: Windows...........1
or
CPCA 106 Introduction to Personal Computers: Macintosh........1

Suggested/Sample Course Sequence Completion in One Semester

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

First Five Week Session

CPCA 134 Managing Your Macintosh*.............................1
Prerequisite: CPCA 106 or an appropriate score on an assessment test
or
CPCA 138 Windows for Microcomputers*.......................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on an assessment test
CDTP 135 Desktop Photo Manipulation I: Photoshop..............1
CDTP 140 Desktop Publishing I: InDesign.......................1
CDTP 145 Desktop Illustration I: Illustrator....................1

Second Five Week Session
CDTP 155  Desktop Photo Manipulation II: Photoshop*............1
   Prerequisite: CDTP 135
CDTP 160  Desktop Publishing II: InDesign*.....................1
   Prerequisite: CDTP 140
CDTP 165  Desktop Illustration II: Illustrator*...............1
   Prerequisite: CDTP 145

Third Five Week Session

CDTP 175  Desktop Photo Manipulation III: Photoshop*...........1
   Prerequisite: CDTP 155
CDTP 168  Desktop Publishing III: InDesign*....................1
   Prerequisite: CDTP 160
CDTP 185  Desktop Illustration III: Illustrator*...............1
   Prerequisite: CDTP 165

Select four of the following twelve courses:

CPCA 108  Word Processing I: MS Word*..........................1
   Prerequisites: CPCA 105 or CPCA 106 or CIS 124
   or CPCA 128 or appropriate score on a waiver test
CPCA 123  E-Presentation: MS PowerPoint*.......................1
   Prerequisite: CPCA 105 or CPCA 106
   or CIS 124 or CPCA 128 or an appropriate score on a
   waiver test
CPCA 125  Word Processing II: MS Word*..........................1
   Prerequisite: CPCA 108
CWEB 105  Introduction to Web Pages: Dreamweaver*..............1
   Prerequisite: CWEB 101
CWEB 106  Introduction to Microsoft FrontPage*..................1
   Prerequisite: CWEB 101
CWEB 115  Intermediate Web Pages: Dreamweaver*................1
   Prerequisite: CWEB 105
CWEB 125  Introduction to Dynamic Web Pages: Dreamweaver*.....1
   Prerequisites: CWEB 115 and CPCA 114
CWEB 130  Introduction to Flash*..................................1
   Prerequisite: CWEB 161 or CWEB 105 or CWEB 106
CWEB 140  Intermediate Flash*...................................1
   Prerequisite: CWEB 130
CWEB 150  Advanced Flash*.......................................1
   Prerequisite: CWEB 140
TOTAL PROGRAM CREDIT HOURS..........................14

*Prerequisite/Corequisite required

Microcomputer Programmer Analyst Certificate
The Microcomputer Programmer/Analyst Certificate provides a foundation in skills
needed to analyze business problems and develop software solutions using
current industry standard development tools. The certificate provides an
academic credential reflecting enhanced job skills for those seeking advancement
in their information services career or for individuals with a prior degree in another
discipline seeking a career change.
(Major Code 5030; CIP Code 11.0201)
Computing Sciences and Information Technology Department

Career Certificate
Prerequisite for Required Courses
Note: Prior to beginning the program, the student must take
the following prerequisite, or have taken an equivalent
transfer course, or have passed the waiver test (if
applicable), or have obtained a waiver from the program
administrator.
Suggested/Sample Course Sequence

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

First Semester

CS 200 Concepts of Programming Algorithms Using C++*^........4
Prerequisite: CIS 134 or ENGR 171 or equivalent experience
or
CS 205 Concepts of Programming Algorithms using JAVA*~........4
Prerequisite: CIS 134 or ENGR 171 or equivalent experience
CS 210 Discrete Structures I*............................3
Prerequisites: MATH 171 or both MATH 116 and CIS 134 or appropriate math assessment scores
CIS 162 Database Programming*................................4
Prerequisite: CIS 134 or the equivalent
Total Semester Credit Hours.................................11

Second Semester

CIS 235 Object-Oriented Programming Using C++^..................4
Prerequisite: CS 200 using C++
or
CS 250 Basic Data Structures using C++^.......................4
Prerequisite: CS 200
Prerequisite or corequisite: CS 210 for students transferring to most four-year computer science programs
or
CS 255 Basic Data Structures using JAVA~.......................4
Prerequisite: CS 205
CIS 242 Introduction to System Design and Analysis*............3
Prerequisite: CIS 138 or CS 200 or CS 201 or CS205
CIS 204 UNIX Operating System*.................................3
Prerequisites: CS 200 or CS 205 or CS 201 and CPCA 139
Total Semester Credit Hours.................................10

Third Semester

CIS 269 GUI Programming*......................................4
Prerequisites: CIS 235 or CS 250
or
CIS 240 Advanced Topics in JAVA I*.............................4
Prerequisite: CS 250 or CIS 235 or CS 255
CIS 262 Project Management*.................................3
Prerequisite: CIS 242
CIS 260 Database Management*................................4
Prerequisite: CS 250 or CS 255 or CIS 235 or CIS 238 or CIS 248
Total Semester Credit Hours.................................11
TOTAL PROGRAM CREDIT HOURS..............................32

*Prerequisite/Corequisite required

Note: ^ CS 200 students must take either CS 250 or CIS 235
Note: ~ CS 205 students must take CS 255

Personal Computer Application Specialist
Individuals with or without a college degree whose goal is to acquire or improve their personal computer application skills will accomplish their goals in this program. Emphasis is on acquiring results-oriented career business and industry skills. The program is intended for those seeking entry-level positions as well as those currently employed who desire to enhance their job skills and take MOUS (Microsoft Office User Specialist) certification tests. It provides employers and current prospective employees with tangible evidence of computer competencies.

(Major Code 4730; CIP Code 11.0202)

Computing Sciences and Information Technology Department

Certificate of Completion

Prior to beginning the database career certificate program the student must take the following prerequisite or have taken an equivalent transfer course, or have passed the waiver test, or have obtained a waiver from the program administrator.

CPCA 105  Introduction to Personal Computers: Windows ............1
or
CPCA 106  Introduction to Personal Computers: Macintosh ..........1

Suggested/Sample Course Sequence Completion - Two Semesters

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

First Semester

First Five Week Session
CPCA 123  E-Presentation: MS PowerPoint* .........................1
Prerequisite: CPCA 105 or CPCA 106
or CIS 124 or CPCA 128 or an appropriate score on a waiver test
CPCA 138  Windows for Microcomputers* ............................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on an assessment test

Second Five Week Session
CPCA 108  Word Processing I: MS Word* ..........................1
Prerequisites: CPCA 105 or CPCA 106 or CIS 124 or CPCA 128 or an appropriate score on a waiver test
CPCA 110  Spreadsheets I: MS Excel* ..............................1
Prerequisite: CPCA 105 or CPCA 106 or CIS 124 or CPCA 128 or an appropriate score on a waiver test

Third Five Week Session
CPCA 111  Spreadsheets II: MS Excel* ..............................1
Prerequisite: CPCA 110 or CPCA 128
CPCA 125  Word Processing II: MS Word* .........................1
Prerequisite: CPCA 108
Total Semester Credit Hours ...........................................6

Second Semester

First Five Week Session
CPCA 114  Databases I: MS Access* ...............................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on a waiver test
CPCA 141  Internet I* ...............................................1
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on an assessment test
Second Five Week Session
CPCA 115 Databases II: MS Access*.............................2
    Prerequisite: CPCA 114

Third Five Week Session
Continuation of CPCA 115-Database II: MS Access*
CPCA Elective........................................1
Total Semester Credit Hours..............................5
TOTAL PROGRAM CREDIT HOURS...........................11
*Prerequisite/Corequisite required

CPCA Electives

CPCA 118 Groupware: Outlook*.................................1
    Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124
    or an appropriate score on a waiver test
CPCA 121 Introduction to Project Management*................1
    Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
    CIS 124 or an appropriate score on a waiver test
CPCA 151 Internet II*........................................1
    Prerequisite: CPCA 141 or an appropriate score on an
    assessment test
CPCA 161 Introduction to Web Pages using HTML*.............1
    Prerequisite: CPCA 151 or an appropriate score on an
    assessment test

NOTE: A student can elect to take CPCA 128,
Personal Computer Applications,
in lieu of CPCA 108, CPCA 110 and CPCA 123.
An additional elective can then be substituted for CPCA 105.

Second Option

Suggested/Sample Course Sequence Completion in One Semester

The sequence taken by the student may vary depending
on prerequisites, course availability, and personal/
professional responsibilities.

First Semester

First Five Week Session
CPCA 108 Word Processing I: MS Word*.........................1
    Prerequisites: CPCA 105 or CPCA 106 or CIS 124
    or CPCA 128 or appropriate score on a waiver test
CPCA 110 Spreadsheets I: MS Excel*............................1
    Prerequisite: CPCA 105 or CPCA 106 or CIS 124
    or CPCA 128 or appropriate score on a waiver test
CPCA 114 Databases I: MS Access*.............................1
    Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
    CIS 124 or an appropriate score on a waiver test
CPCA 141 Internet I*..........................................1
    Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
    CIS 124 or appropriate score on an assessment test

Second Five Week Session
CPCA 123 E-Presentation: MS PowerPoint*.......................1
    Prerequisite: CPCA 105 or CPCA 106
    or CIS 124 or CPCA 128 or an appropriate score on a
    waiver test
CPCA 138 Windows for Microcomputers*............................1
    Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or
    CIS 124 or an appropriate score on an
    assessment test
CPCA 115 Databases II: MS Access*.............................2
    Prerequisite: CPCA 114
Web Applications Certificate

This certificate is designed for those seeking entry-level positions and those who are currently employed and want to improve their job skills and career opportunities relating to Web-oriented applications. This certificate gives an employer tangible evidence of Web-based software skills and competencies.

(Major Code 5610; CIP Code 11.0202)

Computing Sciences and Information Technology Department

Certificate of Completion

Prerequisite for Required Courses

Prior to beginning the program, the student must take the follow prerequisite, or have taken an equivalent course, or have passed the waiver test, or have obtained a waiver from the program administrator.

CPCA 105 Introduction to Personal Computers: Windows...........1

First Semester

First Five Week Session
CWEB 101 Introduction to the Web using Internet Explorer*......1
Prerequisites: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or appropriate score on an assessment test
Elective from First Semester List of Electives............1

Second Five Week Session
CWEB 105 Introduction to Web Pages: Dreamweaver*.............1
Prerequisite: CWEB 101
CWEB 106 Introduction to Microsoft FrontPage*...............1
Prerequisite: CWEB 101
Web Developer Advanced Certificate

The Web developer advanced certificate is for the computer professional who wants to acquire the necessary skills to enable clients to interface with databases on the World Wide Web.

Computing Sciences and Information Technology Department

Career Certificate

Prerequisites for Required Courses

Note: Prior to beginning the program, the student must take the following prerequisites, or have taken an equivalent
transfer course, or have passed the waiver test (if applicable), or have obtained a waiver from the department.

CIS 134 Programming Fundamentals.............................4
CPCA 161 Introduction to Web Pages using HTML*..............1
Prerequisite: CPCA 151 or an appropriate score on an assessment test
CDTP 140 Desktop Publishing I: InDesign.......................1
or
CDTP 135 Desktop Photo Manipulation I: Photoshop..............1
CIS 162 Concepts of Programming Algorithms Using C++........4
Prerequisite: CIS 134 or the equivalent
CS 200 Concepts of Programming Algorithms using JAVA*........4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
or
CS 205 Concepts of Programming Algorithms using JAVA*........4
Prerequisite: CIS 134 or ENGR 171
or equivalent experience
CS 235 Object-Oriented Programming Using C++.................4
Prerequisite: CS 200 using C++
or
CS 255 Basic Data Structures using JAVA*......................4
Prerequisite: CS 205

Suggested/Sample Course Sequence

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

First Semester

CIM 133 Screen Design*.......................................4
Prerequisite: CDTP 135
CIS 204 UNIX Operating System*...............................3
Prerequisites: CS 200 or CS 205 or CS 201 and CPCA 139
CIS 240 Advanced Topics in JAVA I*............................4
Prerequisite: CS 250 or CIS 235 or CS 255
CIS 260 Database Management*.................................4
Prerequisite: CS 250 or CS 255 or CIS 235 or CS 238 or CIS 248
Total Semester Credit Hours.................................15

Second Semester

CIM 130 Interactive Media Concepts............................2
CIS 254 UNIX System Administration*...........................4
Prerequisite: CIS 204
CIS 275 Web-Enabled Database Programming*....................4
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162 and either CPCA 139 or CIS 204 and either CPCA 161 or CPCA 158

or

CIS 277 Active Server Pages.Net*...............................4
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162 and either CPCA 139 or CIS 204 and either CPCA 161 or CPCA 158
CIS 280 Advanced Topics in JAVA II*............................4
Prerequisite: CIS 240
Total Semester Credit Hours.................................14
TOTAL PROGRAM CREDIT HOURS..............................29

*Prerequisite/Corequisite required
Advanced Esthetics Certificate

This 100 contact hour course is designed to meet the educational requirements for licensure by the Missouri Board of Cosmetology for estheticians in the cosmetology sciences and meet the needs of students who desire exposure to advanced esthetics techniques. Students will attend 44 hours of lecture/discussion/demonstration, practice 44 hours of integrated lecture/clinical, complete 4 hours assisting in a salon and participate in 8 hours of community service. Topics covered include body treatments, theory of the day spa, airbrush, makeup, microderm abrasion, and manual lymphatic drainage.

Prerequisite: Must possess current esthetics license granted by the Kansas Board of Cosmetology or a current cosmetology license.

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

(Major Code 3760; CIP Code 12.0409)

Cosmetology/Esthetics/Nail Technology

Certificate of Completion

Required Course

AVCO 218  Advanced Esthetics Training*.................................6
Prerequisite: Must possess current esthetics license granted by the Kansas Board of Cosmetology, a current cosmetology license, or the minimum of 500 hours of esthetics training from another institution.

TOTAL PROGRAM CREDIT HOURS...........................6

*Prerequisite/Corequisite required

Cosmetology, A.A.S.

This degree may be earned only by a student who has completed the JCCC cosmetology certificate program. A student must have 19 additional credits in order to receive a degree from Johnson County Community College. Students who graduated with the certificate prior to conversion to credit hours will receive 45 hours of documented advanced standing credit, which will be placed on the student's record when the application for graduation is filed. Students must also meet JCCC admissions, residency and graduation requirements.

Interested students should contact the JCCC Student Success Center for further information prior to enrollment in the sequence of courses.

Certain courses within this program require a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

**Total Program Credit Hours:** 64

---

**Cosmetology Certificate**

The field of cosmetology relies on creative people who use their ability to visualize shapes and forms for hair design and personal care. Cosmetologists need manual dexterity, an understanding of chemistry and superior client communication skills. This program provides theory and skill development in shampooing, cutting, shaping, curling and coloring hair, as well as manicuring and esthetics.

Employment opportunities are available in beauty salons, department stores, health care and hotel facilities. Entrepreneurship opportunities are also available for cosmetologists who choose to pursue this pathway. Additional employment choices include nail artist, complexion care, cosmetic or beauty supply sales and services, manufacturing technician and color chemist.

Enrollment is limited in the program. Admission requires an interview, testing and a physical examination. Contact the salon at 913-469-8500, ext. 4723 or 2390, for additional information.

Certain courses within this program require a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

Dental Hygiene, A.A.S.

A key member of the professional dental team, the licensed dental hygienist is on the "front line" of patient care, responsible for providing educational, clinical and therapeutic services that promote total health through good oral health. The growing public awareness of the benefits of oral health, combined with the growth of corporate dental plans, has significantly increased the demand for dental care and has made dental hygiene one of the country’s fastest-growing careers. The demand for dental hygienists is expected to grow 46 percent by 2010. Competitive
salaries and flexible work schedules are added benefits. Students in JCCC’s dental hygiene program prepare for careers as preventive dental professionals who have a choice of working in a variety of settings. Upon successful completion of licensure requirements and board examinations, graduates get jobs in school systems, nursing homes and dental supply firms, as well as private dental offices. Fully accredited by the American Dental Association Commission on Dental Accreditation, this 83-credit-hour program requires four semesters and one summer session of full-time study. Successful completion leads to an associate of applied science degree. All dental hygiene students gain important practical experience working in JCCC’s state-of-the-art clinical facility under the supervision of licensed dental hygienists and dentists.

Enrollment is limited. The deadline for fall semester applications is December 1st. Fall course transcripts are due January 15th. For an application, call the dental hygiene program at 913-469-3808 or download a copy by clicking http://www.jccc.net/home/depts/001253

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

Computer-aided Drafting and Design Technology,
A.A.S.

Drafting technicians are engineering communication specialists who apply
mathematics, computer applications and manual skills to develop specifications
and drawings for the manufacturing and construction of virtually everything made
in the world. JCCC’s drafting technology program offers students up-to-date
equipment in facilities located in the Industrial Training Center on the JCCC
campus. In addition, the program offers departmental specialty courses. The
program provides students with the skills necessary to produce detailed shop
drawings, land plats, erection drawings and designs for manufacturing, building,
production, commercial building and site construction as well as detailed drawings
and designs of components, assemblies and systems used in manufactured
products.

Industrial growth and increasingly complex design problems will greatly increase
the demand for design and drafting services, particularly using CAD equipment.
Employers are most interested in applicants with drafting and mechanical skills, a
background in CAD techniques and courses in math, science and engineering
technology.

The two-year curriculum enables students to use the latest computer-aided design
equipment. Course projects and laboratory procedures are similar to those used
in industry.

An associate of applied science degree is awarded upon the successful
completion of 67 credit hours.
(Major Code 2220; CIP Code 15.1302)

Computer Aided Drafting and Design

Associate of Applied Science Degree

Prerequisites for Required Courses

Note: Prior to beginning the program, the student must take
the following prerequisite courses, or have taken an
equivalent transfer course, or have passed the waiver
test (if applicable), or have obtained a waiver from the
program administrator.

DRAF 120  Introduction to Drafting.............................2

Computer-aided Drafting Certificate

This certificate makes it possible for those students who already have a drafting or engineering degree, or those who have sufficient work experience, to obtain certification in CAD.

(Major Code 4800; CIP Code 15.1302)

Computer Aided Drafting and Design

Certificate of Completion

Suggested/Sample Course Sequence

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

Prerequisite for Required Course

DRAF 120  Introduction to Drafting.........................2
or approval of career program facilitator
or prior learning credit (contact the Testing Center)

First Semester

CPCA 105  Introduction to Personal Computers: Windows.......1
CPCA 138  Windows for Microcomputers*........................1
           Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on an assessment test
           Elective.............................................1
DRAF 130  Introduction to CAD Concepts - AutoCAD: 2008*........3

*Prerequisite/Corequisite required
Early Childhood Education, A.S.

The Early Childhood Education associate's degree program is for those students who currently are employed or aspire to work in early childhood care and education programs. Completion of JCCC’s associate of science degree program provides students the credentials to advance in quality early childhood care and education settings. The program has four areas of specialization: administration, care and education of young children with special needs, infant/toddler care and education and school age programs. Credits will transfer to many Kansas universities. Excellent practical education opportunities are available to students in the program.

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

Prerequisite

Students must meet the requirements for employment in early childhood care and education centers in Kansas (stated in the Kansas Licensing Regulations for Preschools and Child Care Centers).

(Major Code 2100; CIP Code 19.0708)

Early Childhood Education Program

Associate of Science Degree

Students graduating with an Associate of Arts degree or an Associate of Science degree must complete an approved cultural diversity course. Some of these courses are able to meet both a diversity requirement and a general education requirement.

Early Childhood Education Certificate

This certificate is for students seeking employment in early childhood care and
education programs and for current early childhood care and education
teachers/administrators who want to upgrade their skills and increase their
knowledge in this area of study. The program does not need to be completed in
one year.

Students must be first aid/CPR certified to receive the early childhood education
certificate. The first aid/CPR certification may be obtained through your center;
you may also enroll in HPER 200 First Aid/CPR at JCCC. Students must meet the
requirement for employment in early childhood care and education centers in
Kansas (stated in the Kansas Licensing Regulations for Preschool and Child Care
Centers).

This program requires a professional liability insurance fee. Students will be
notified via their JCCC student e-mail account if they are required to pay a $16
fee. The dollar amount for fees is subject to change.
(Major Code 6600; CIP Code 19.0708)

Electrical Technology, A.A.S.

The use of electrical technology in residential, commercial and industrial applications continues to grow rapidly. Electricians install and maintain electrical systems for a variety of purposes, including lighting, appliances, climate control, security and communications.

JCCC offers a 65-credit-hour associate of applied science degree program and a 29-credit-hour vocational certificate program. Both programs emphasize hands-on training integrated with a knowledge of theory and study of the National Electrical Code that prepares students to take a national licensure exam.

The associate of applied science degree program prepares students to enter the electrical trade in four types of electrical occupations: residential, commercial, industrial and maintenance. The program also prepares students for continued education in electrical contracting/management, electrical design and industrial/electronic controls.

Electronics Technology, A.A.S.

Electronics technology influences almost every aspect of modern life. Skilled electronics technicians are needed to support growth in this industry. These technicians must be able to fabricate, test, install, operate and maintain highly technical systems such as communications systems, computers and computer networks, and industrial process control systems. The program focuses on the underlying principles of electronic devices, circuit analysis and digital electronics and will provide a broad systems view of electronics.

Students in the electronics program will work with outstanding facilities and the latest laboratory equipment. Graduates of the program will have the opportunity for employment in one of today’s most challenging and exciting career fields. Program graduates also have the opportunity to pursue a baccalaureate degree (B.S.E.E.T.) in electronics engineering technology through the transfer of JCCC electronics technology and other courses to participating four-year institutions. Students contemplating this option should seek early counseling and prepare a program plan with specific course selections in anticipation of four-year institution requirements. Students should be prepared to enroll in higher-level math and physics courses when compared with current electronics technology program requirements.

Students who are transferring to JCCC with significant numbers of electronic technology credits should be aware that at least 9 credit hours of approved electronic technology courses must be completed at JCCC before the A.A.S. degree will be awarded. In addition, because of changes in technology, students who desire to graduate using electronics technology courses completed more than seven years ago should seek counseling regarding the current relevance of those courses.

**Industrial Controls Certificate**

This certificate is designed to focus on programmable logic controllers and a variety of input and output devices. The certificate is a 9-credit-hour, 3-course sequence involving both the hardware and programming aspects of controllers used in industrial processes. Lectures provide a theoretical basis and laboratory projects offer experience in controller program planning, documentation and
troubleshooting.
(Major Code 4720; CIP Code 47.0101)

Emergency Medical Science, A.A.S.

People who work in the field of emergency medical science (EMS) often enter people’s lives during critical times of illness and injury. Their ability to act knowledgeably, compassionately, quickly and calmly can stabilize chaotic, frightening situations.

JCCC offers three progressively intensive options for learning the skills of emergency medical science. All three options prepare you for state certification examinations.

JCCC’s financial aid program includes scholarships, grants and loans if you are eligible. Financial aid is particularly important in the MICT program, since long hours usually prohibit you from holding a full-time job.

EMS First Responder Course

EMS first responder students receive classroom and skills training in cardiopulmonary resuscitation (CPR), patient assessment, and fracture and airway management. This class is recommended for:
- people without a medical background who wish to enter the EMT program
- anyone who wishes to learn basics of emergency medical care
- firefighters, police officers, lifeguards and others from agencies involved in public safety
- employees involved in company safety programs

Students successfully completing this course will be allowed to sit for the certification examination administered by the Kansas Board of Emergency Medical Services.

The EMS First Responder class is offered as the need arises – in general, once each semester.

EMS 128   EMS First Responder.....................5
TOTAL CREDIT HOURS.....................5

**Emergency Medical Technician Course**

This program is designed for individuals interested in providing medical care to patients in the pre-hospital setting. It will provide the participants with opportunities to gain information, skills and attitudes necessary for certification and practice as an emergency medical technician (EMT) in the state of Kansas.

The program has been approved by the Kansas Board of Emergency Medical Services. It addresses information and techniques currently considered to be the responsibility of the EMT, according to the United States Department of Transportation, National Standard Curriculum. The program consists of lecture instruction, practical skill training and clinical experience.

Classroom instruction includes anatomy, physiology, recognition and care of actual medical emergencies and trauma-related injuries. Skills in performing CPR, bandaging, splinting, childbirth techniques and other emergency care procedures are taught. An extrication session will give students hands-on experience with auto accident situations and provide the opportunity to observe an air evacuation of a patient. Upon instructor recommendation, students will participate in a clinical observation in a hospital setting. Students participate in seven hours of lecture and five hours of lab a week (average). Students are also required to attend Saturday session(s) as necessary. Saturday dates and times will be announced during the first class session.

Students successfully completing this course with a "C" will be allowed to sit for the certification examinations administered by the Kansas Board of Emergency Medical Services.

EMS 130   Emergency Medical Technician Course*.............9

*Prerequisite - EMS 128 or equivalent, or be an active member in a health-related occupation (firefighter, rescue, ambulance, law enforcement, industrial first-aid personnel or other health-related field), or attained the minimum of an associate's degree.

TOTAL PROGRAM CREDIT HOURS.....................9

**EMT Practicum**

EMT Practicum is designed to give the EMT-B, recently certified or those with limited field experience, the additional skills and confidence needed to successfully compete for a position as an EMT-B with an EMS service. Skills will include ambulance operation, driving, map reading, insurance billing and unit maintenance. This course will also provide high-fidelity scenario training in all aspects of the EMS call, as well as extensive field lab time with a local EMS service.

Students will become directly involved in their own training by leading and participating in realistic medical emergency scenarios with "actors" playing life-like patients and bystanders. Numerous field internship shifts on a licensed ambulance are part of the training. Students will work through all phases of an ambulance call. They will be presented with complex patient-care situations that require the development of critical thinking and decision-making skills. Students will be tested on their ability to lead a team of pre-hospital caregivers in the diagnosis, proper treatment and evacuation of a patient. Scenario simulations will be set up to be as life-like as possible.

EMS 133   EMT Practicum*.....................3

*Prerequisite - EMS 130 EMT-B or equivalent and a copy of current EMT-B card
TOTAL CREDIT HOURS...........3

**Mobile Intensive Care Technician (Paramedic) Program**
This advanced emergency medical care program consists of four courses, including a clinical rotation in a hospital setting and a field internship with an ambulance service. You learn emergency procedures such as cardiac monitoring and defibrillation and the administration of medications and IV fluids. Successful completion of this program and subsequent certification exams will enable graduates to work as skilled paramedics and to provide sophisticated, advanced pre-hospital life support.

JCCC's MICT program is fully accredited by the Committee on Accreditation of Educational Programs for the EMS Professions (CoAEMSP). If you are interested, contact the Admissions office for an application packet, which includes deadlines, admission requirements and options for meeting academic criteria.

This is a selective admission program with limited enrollment. If you are accepted into the program, you take classes in the spring, summer and fall, completing the program in December.

Students successfully completing this program with a "C" will be allowed to sit for the certification examinations administered by the Kansas Board of Emergency Medical Services.

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

Entrepreneurship, A.A.S.

The small business sector is one of the fastest growing in the nation’s economy. With an ever-increasing number of adults today self-employed, many residents in Johnson County either work for a small business or plan to start their own. JCCC’s entrepreneurship program can help prospective entrepreneurs launch new ventures or, if you are an entrepreneur who already has your business established, you can strengthen your managerial and business skills to grow your business.

You will learn the fundamentals of starting and operating your own business. The program includes basic business skills as well as specific courses in starting and managing an entrepreneurial business. Course work covers evaluating a business opportunity, preparing a business plan, legal issues for small business, planning advertising and sales promotions, marketing a product or service, developing an accounting system and financial management for the entrepreneurial company.

You also will complete two internships in a small business. You can apply what you learn in the classroom to your job and take your work experiences back to the classroom for analysis.

Prerequisites: ENTR 210 and Assistant Dean's Approval
*Prerequisite/Corequisite required

Business Plan Certificate

The business plan certificate program focuses on evaluating an idea for a business and concludes with writing a business plan to start and/or grow a business.
(Major Code 4810; CIP Code 52.0701)

Entrepreneurship

Certificate of Completion

Suggested/Sample Course Sequence

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.
## First Semester

- ENTR 120 Introduction to Entrepreneurship.........................2
- ENTR 180 Opportunity Analysis..........................................2
- Total Semester Credit Hours..............................................4

## Second Semester

- ENTR 142 Fast Trac Business Plan....................................3
- Total Semester Credit Hours..............................................3
- TOTAL PROGRAM CREDIT HOURS.........................................7

## Fashion Merchandising, A.A.S.

Rome, Paris, New York and Tokyo are centers of the fashion world. In today's fast-paced fashion market, these cities aren't that far ahead of your local shopping mall. Fashion is on the move -- in New York, Paris and Johnson County.

At JCCC, the fashion curriculum is designed to prepare you for a career in retail management, retail sales, apparel and textile design, promotion, display, illustration, and representative positions.

The program includes professional courses in merchandising, design, apparel construction, management, visual merchandising, creative selling and merchandise evaluation. To complement your education, you will also study important basic subjects such as business math, English, economics and marketing.

An associate of applied science degree is awarded after successful completion of the 65-credit-hour curriculum in fashion merchandising or fashion design. The program also offers an 18-credit-hour certificate in visual merchandising.

Seminars in career options and industry topics are available. Required work-study internships in the fashion business of your choice will give you experience in technical, creative and merchandising skills and make you more marketable in the industry.

With an associate’s degree or certificate, you'll be ready to apply your energy and creativity in an industry that rewards both. Or, if you prefer to continue your education, you can complete a bachelor’s degree through a transfer program to a college or university.

(Major Code 2520; CIP Code 52.1902)

Fashion Merchandising and Design

## Associate of Applied Science Degree

### First Semester

- FASH 277 Fashion Seminar: Career Options..........................2
- FASH 283 Fashion Internship I.........................................1
- FASH 121 Fashion Fundamentals.....................................3
- FASH 220 CAD Apparel Design.....................................3
- MKT 134 Professional Selling.................................3
- ENGL 121 Composition I*..........................................3
  - Prerequisite: ENGL 106 or appropriate placement test score or EAP 113 and EAP 117
- FASH 135 Image Management..................................1
- Total Semester Credit Hours.................................16

### Second Semester

- FASH 242 Consumer Product Evaluation............................3
- FASH 284 Fashion Internship II.....................................1
- MATH 120 Business Math or higher*..............................3
  - Prerequisite: MATH 111 with a grade of "C" or higher or appropriate score on the math assessment test
- FASH 150 Textiles................................................3
- FASH 125 Visual Merchandising....................................3
BUS 150  Business Communications*.............................3  
  Prerequisite: ENGL 121  
  Total Semester Credit Hours..........................17  

Third Semester  
BUS 225  Human Relations........................................3

Fire Services Administration, A.A.
The goal of the fire science program at Johnson County Community College is to provide comprehensive education and training, specifically designed to:

- Promote the academic and professional development of fire service company-level officers.
- Prepare those seeking employment with fire service agencies of Johnson County.

The program serves to provide higher academic education, technical training and lifelong learning for members of Johnson County fire-related organizations and those seeking employment in those organizations.

The fire science program at JCCC, in close cooperation with the Johnson County Fire Chiefs Association and the University of Kansas Fire and Rescue Training Institute, has developed a degree for advancement in the fire service and for further study toward the baccalaureate degree at a four-year institution, should you elect to pursue your education goals beyond the associate’s level.

The program emphasizes general education in addition to technical education and is built around a core of fire science courses carefully selected by the members of the Fire Science Advisory Committee to prepare for your career growth. Technical electives may be pursued through courses available under a continuing cooperative agreement between area fire science programs or through other degree-granting institutions that are accredited by the International Fire Service Accreditation Congress. The transfer of credit from other institutions is governed by JCCC policy. You may fulfill technical education requirements through the advanced standing credit process.

JCCC also offers course work that will prepare you to take the Fire Fighter I and II certification examinations offered by the University of Kansas Fire and Rescue Training Institute. This course work includes FIRE 120 Fire Academy; EMS 130; HPER 240, Lifetime Fitness I; or equivalent. HPER 240 or department approval is a prerequisite FIRE 120 Fire Academy.

Note: Mechanisms have been developed to compensate for the effect of students working 24-hour shifts.

(Major Code 2320; CIP Code 43.0203)

**Associate of Arts Degree**

Students graduating with an Associate of Arts degree or an Associate of Science degree must complete an approved cultural diversity course. Some of these courses are able to meet both a diversity requirement and a general education requirement.

**Prerequisite**

Prior to admission into any FIRE course, the student must possess an International Fire Service Accreditation Congress certification as a firefighter or be an active member in a fire-related occupation.

Game Development, A.A.S.

The game development associate of applied science degree provides students with the focused knowledge and understanding of game design and development useful in qualifying for entry level industry positions as game programmers, tool builders, collision detection developers, engine builders and interface programmers as well as video and online training developers, Q/A (Question/Answer) Testers, customer supporters and simulations developers. Completion of this degree program will greatly enhance students' ability to create code for 2D/3D graphics and real time virtual environments. Additional skills will
include an understanding of game ethics, of the proper presentation of “game
bibles” and of math and physics required to model a realistic game world.
Note: Metropolitan Community College students should seek specific counsel
from the JCCC program personnel for the appropriate course plan and numbers.
Metropolitan Community College students should refer to Cooperative Program
Information.

Geographic Info Systems Cert

The Geographic Information Systems Certificate program is granted by Metropolitan Community College, but coordinated at JCCC. This is a professional certificate that gives the GIS user the tools needed to attract a good job in the exciting field of GIS or to advance in their chosen field. It also prepares students to complete their AA degree or transfer to a four year institution. GIS professionals are found in the fields of city, county and state business, economics, natural resources, conservation, pollution, industry, science, infrastructure planners, public works, transportation, architects, education, healthcare, travel, space industry.

The JCCC geographic information systems program is offered to Johnson County residents in cooperation with Metropolitan Community Colleges of Kansas City. Related courses are taken at JCCC. You must be accepted as a student to JCCC and accepted into the program by MCC. Students must be residents of Johnson County in order to receive in-state tuition rates. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact www.mcckc.edu. Required
GIS classes are taught at MCC-Longview and MCC-Maple Woods Community Colleges as early evening courses.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Johnson County Community College students should refer to Cooperative Program Information.

**Career Certificate**

Certificate granted by Metropolitan Community College

**Specific Program Requirements—must be taken MCC**

- **KEOG 120** Introduction to Geographic Information Systems............3
- **KEOG 220** Geographic Information Systems Database & Design*........3
  Prerequisite: KEOG 120
- **KEOG 224** Applications in Geographic Information Systems*..........3
  Prerequisites: KEOG 120 and KEOG 220
- **KEOG 228** Administrative Issues in Geographic Info Systems*........3
  Prerequisite: KEOG 120
- **KEOG 230** Geographic Information Systems Internship*.............1-3
  Prerequisites: KEOG 120 and KEOG 220

Note: A student currently employed in a GIS Facility may take the 1-hour option. All others must complete the 3-hour internship.

**Specific Program Requirements—must be taken at JCCC**

- **ENGL 121** Composition I*........................................3
  Prerequisite: ENGL 106 or appropriate placement test score or EAP 113 and EAP 117
- **CIS 162** Database Programming*..................................4

*Prerequisite/Corequisite required

Graphic Design, A.A.S.

The graphic design field is highly competitive for both salaried and freelance positions. There is a demand for artists with above-average talents and graphic art skills. Opportunities in the field range from entry-level layout and production to art director positions.

Demonstrated abilities are most often the key to obtaining a position in the graphic design field. JCCC has structured its graphic design program to help the student develop a comprehensive portfolio. The student's work will be critiqued by a team of professionals every semester. These professionals working in the field, along with the faculty, will help develop the student's skills in creative problem solving and in the use of materials, processes, tools and equipment. Outstanding studio and computer facilities are available for working on class projects. The two-year curriculum consisting of 71 credit hours leads to an associate of applied science degree.

Some GDES courses are typically offered in the fall semester only, and some courses are typically offered in the spring semester only. This information can be found under the relevant course descriptions.
(Major Code 2290; CIP Code 50.0409)

Graphic Design

Associate of Applied Science Degree

IMPORTANT:

Please enroll in the CDTP sections identified in the credit class search as a Graphic Design Qualifier section. The content of these CDTP sections places emphasis on the Graphic Design career specific application of the Adobe Creative Suite to industry standards for print production and is reserved for students enrolling in the Qualifier semester courses.

It is recommended that you enroll in these five-week CDTP classes in sequence in the Qualifier semester.

Qualifier Semester

ART 124 Design 2D*...........................................3

Health Information Tech, A.A.S

The Health Information Technology, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

A health information technician has the technical skills needed to maintain the components of health information systems consistent with the medical, administrative, ethical, legal accreditation and regulatory requirements of the health care delivery system. Area hospitals and a variety of other health facilities in the community offer field experience in all procedures performed by the health information technician. When the 70-72 credit-hour program has been completed and the associate of applied science degree obtained, you will be eligible to take the accreditation examination of the American Association of Health Information Management.

Health information technology is a cooperative program between JCCC and MCC-Penn Valley Community College for Johnson County residents. You must be accepted as a student at JCCC and accepted into the program by MCC-Penn Valley. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Penn Valley Community College at 816-759-4231 for an application packet, which includes deadlines, program prerequisites and admission requirements.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Johnson County Community College students should refer to Cooperative
Program Information.

Certified Medication Aide Certificate

This 80-hour course covers information related to many commonly prescribed medications. Students learn the classification, side effects and techniques of administration, including preparations and accurate distribution of medications. Safety of clients in long-term care will be discussed and demonstrated by students. Clinical practice sessions will be conducted in a long-term care facility.

A pre-requisite to admission is successful completion of a reading level exam/assessment. Copies of the following will be required on the first day of class: social security card, current Kansas CNA card, current CPR for Health Care Provider card and documentation of a current negative TB test. The Kansas CMA examination is administered to successful completers of this course.

The employment outlook for the future is excellent. Facilities employing the CMA include long-term care nursing centers as well as other types of group homes and agencies.

For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CMA_Information-Requirements

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

(Major Code 3560; CIP Code 51.2603)

AVHO 104 Certified Medication Aide (CMA)*.........................4
Prerequisites: Appropriate Compass reading test score, and proof of Kansas CNA certification or having completed the state CNA examination and awaiting results. If CNA examination results are not satisfactory, the student must withdraw from the CMA course.
Documentation of current TB skin test - negative results within the last year.
Current CPR for Health Care Providers and Social Security card.
TOTAL PROGRAM CREDIT HOURS.........................4

*Prerequisite/Corequisite required

Certified Medication Aide Update Certificate

Certified medication aides in Kansas are required to obtain continuing education every two years to renew the CMA certificate. This course meets the state requirements for recertification. The update course includes review of commonly used drugs and their interactions with foods and other drugs.

Students will discuss and identify legal implications and regulations related to
administration and record keeping. Biological effects of medications on the elderly and basic safety principles are reviewed and discussed with other CMAU course participants. This course is available in the classroom and online. A roster of CMAs who complete the update course will be submitted to the Department of Health and Environment for certificate renewal.

Copies of the following are required on the first day of class: social security card, CNA card, and CMA card. Students also must provide a check or money order payable to KDHE for $20.00.

For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CMA_Update_Info-Requirements

(Major Code 3600; CIP Code 51.2603)

Proof of Kansas CNA Certification
TOTAL PROGRAM CREDIT HOURS...........................1
*Prerequisite/Corequisite required

Certified Nurse Aide Certificate

This 96-hour course provides classroom and clinical instruction for basic care of clients in long-term and acute-care facilities. Students will learn skills for daily hygiene, bedside care, vital-sign measurement, positioning and safe transfer of clients. You will learn about common health problems and chronic illnesses. Clinical practice sessions are conducted in the nursing home setting. This course is offered in a classroom setting as well as non-traditional online.

Enrollees for this course must pass a reading level exam/assessment prior to admission. Copies of the following will be required on the first day of class: social security card, current CPR for Health Care Providers card and documentation of a current negative TB test.

Attendance is critical and should be given top priority. Failure to meet the criteria outlined in the syllabus will necessitate withdrawal from a class. Upon successful completion of the course, students will be scheduled to take the Kansas CNA examination. Sufficient notice of the exam date is given to allow students to make arrangements to be in attendance on the appointed day.

Employment for workers with CNA skills and training is abundant in long-term care facilities. Acute-care hospitals also employ basic patient care aides who are willing to learn advanced skills.

For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CNA_Information-Requirements

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

(Major Code 3530; CIP Code 51.1614)

Health Occupations

Certificate of Completion

Required Course

AVHO 102 Certified Nurse Aide (CNA)*..........................5
Prerequisite: ENGL 121 with a grade of "C" or higher
or Appropriate Compass reading test score.
Documentation of current
Certified Nurse Aide Refresher Certificate

The CNA in Kansas is required to work at least eight hours every two years for the CNA certificate to remain active. If the CNA does not work for two years, a 21-hour refresher course must be completed. This course meets the state requirement to activate the CNA certificate.

This course includes 12 hours of classroom instruction and 9 hours of laboratory experience. Students will discuss the nurse aide’s responsibility in the current health care system and the importance of resident’s rights. The student will demonstrate safety measures, infection control procedures, personal care skills, measurement of vital signs and transfers, positioning and turning.

Students enrolled in the refresher course must show proof of certification as a Kansas CNA by bringing a copy of their card on the first day of class.

For more information, go to
http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CNA_Refresher_Info-Requirement

Dental Assisting, A.A.S.

The Dental Assisting, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

This program, which leads to either an associate in applied science degree or a certificate of proficiency, prepares the student to enter the workforce as a trained dental auxiliary. Graduates of this program are eligible to take the national certifying examination given by the Dental Assisting National Board.

Admission to the Dental Assisting Program - Because enrollment in the program is limited, a student must meet the requirements and apply for admission.

JCCC offers the cooperative dental assisting degree for Johnson County residents with MCC-Penn Valley Community College. You must be accepted as a student at JCCC and accepted into the program at MCC-Penn Valley Community College. The student is awarded the degree from MCC-Penn Valley Community College upon successful completion of all requirements. It is the student’s responsibility to check with a JCCC counselor before enrollment.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Penn Valley Community College at 816-759-4231 for an application packet, which includes deadlines, program prerequisites and admission requirements.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Johnson County Community College students should refer to Cooperative Program Information.

TOTAL PROGRAM CREDIT HOURS..........................77-82

*Prerequisite/Corequisite required

Dental Assisting Certificate
The Dental Assisting Certificate program is granted by Metropolitan Community
College, but coordinated at JCCC.
One of the most exciting features of a dental assistant career is the variety of work experiences you'll have, including working chair-side with dentists, taking radiographs, mixing dental materials, performing laboratory procedures, taking dental impressions, creating models, and fabricating bleaching trays and mouth guards. The demand for dental assistants and other professionals that dentists rely on to serve patients has increased dramatically.

The dental assistant program has accreditation from the American Dental Association (ADA), Commission on Dental Accreditation. Graduating from an ADA-accredited dental assisting program allows you to take the Dental Assisting National Board examination without the two years of full-time work experience that would otherwise be required.

JCCC offers the cooperative dental assisting certificate program for Johnson County residents with MCC-Penn Valley Community College. You must be accepted as a student at JCCC and accepted into the program at MCC-Penn Valley Community College. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the certificate-granting institution. Contact MCC-Penn Valley Community College at 816-759-4231 for an application packet, which includes deadlines, program prerequisites and admission requirements.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Johnson County Community College students should refer to Cooperative Program Information.

Home Health Aide Certificate

Home health care services are in demand, and continued growth in employment opportunities is expected into the next century. Home health aides may be required to provide support services for all age levels in the home setting. This 21-hour course will provide you with information necessary for nutritional meal planning, task modification, emotional support and personal services to clients and families needing health care assistance at home.

Enrollees must complete a reading comprehension exam/assessment prior to admission. Copies of the following will be required on the first day of class: social security card, current Kansas CNA card, current CPR for Health Care Provider card and documentation of a current negative TB test. Those who successfully complete this course will be scheduled to take the Kansas HHA certification examination. Sufficient notice of the exam date is given to allow students to make arrangements to be in attendance on the appointed day.

For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/HHA_Information-Requirements
This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

Requirements - copy of current TB test, current CPR for
Health Care Providers card, social security card
*Prerequisite/Corequisite required

IV Therapy for LPN's Certificate

This 48-hour course is designed to prepare the student for clients who require intravenous fluid therapy. This course meets the Kansas requirements for nurses seeking certification in IV therapy.

During this course, you will review basic physiology of the circulatory system and learn principles of site selection for veins appropriate to assess for IV therapy. A pharmacology review will include action, interaction, breakdown and allergic responses to medications commonly administered via the intravenous route. Principles of infection control, correct legal documentation and calculation of infusion rates will be taught. Equipment and supplies routinely used to initiate and administer IV therapy will be used in instruction. You will use the laboratory setting to demonstrate the basic skills of initiating intravenous therapy along with clinical sessions in a hospital setting.

At the conclusion of the class, a comprehensive written exam will be administered. Upon successful completion of the exam, the Kansas State Board of Nursing will be notified and the individual’s nursing license will be updated to reflect IV certification.

Copies of the following are required at the first class: Current LPN License, documentation of current Professional Liability Insurance-standard policy, current CPR for Health Care Provider card and documentation of a current negative TB skin test or negative chest X-ray.

For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/IV_Therapy_Info-Requirements

Required Course

AVHO 115 IV Therapy For LPNs*.........................3
Prerequisites: Proof of Kansas LPN licensure.
Present evidence of personal liability insurance at the time of application for admission to the program and maintain it throughout the clinical practicum. Maintenance of current CPR certification for the duration of the course. Evidence of negative TB test or chest X-ray within the past year.
TOTAL PROGRAM CREDIT HOURS.........................3
*Prerequisite/Corequisite required
Occupational Therapy Asst, AAS

The Occupational Therapy Assistant, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

The occupational therapy assistant works under the supervision of a registered occupational therapist, helping people with emotional and developmental limitations achieve more functional lives. Graduates are eligible to sit for the national certification examination for the occupational therapy assistant administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of the exam, the individual will be a Certified Occupational Therapy Assistant (COTA). Most states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination.

The JCCC occupational therapy assistant program is offered to Johnson County residents in cooperation with MCC-Penn Valley Community College. The support courses are held at JCCC. The clinical courses are held at MCC-Penn Valley or at affiliated clinical agencies. You must be accepted as a student at JCCC and accepted into the program at MCC-Penn Valley. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Penn Valley Community College at 816-759-4231 for an application packet, which includes deadlines, program prerequisites and admission requirements.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Physical Therapist Asst, A.A.S

The Physical Therapist Assistant, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

The physical therapist assistant, under the supervision of a licensed physical therapist, performs direct patient care. The therapist uses physical agents such as heat, light, sound, water, cold, massage, exercise and rehabilitation techniques as prescribed by a physician. The Commission on Accreditation in Physical Therapy Education accredits the program.

The JCCC physical therapist assistant program is offered to Johnson County residents in cooperation with MCC-Penn Valley Community College. The support courses are held at JCCC. All the clinical courses are held at MCC-Penn Valley and affiliated clinical agencies. You must be accepted as a student at JCCC and accepted into the program at MCC-Penn Valley. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Penn Valley Community College at 816-759-4231 for an application packet, which includes deadlines, program prerequisites and admission requirements.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers. Johnson County Community College students should refer to Cooperative Program Information.

Radiologic Technology, A.A.S.

The Radiologic Technology, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.
The radiologic technology curriculum (X-ray technology) consists of a continuous
24-month period of study. Areas of study are radiographic exposure, positioning, and anatomy, and the use of imaging equipment. The program is fully accredited by the Joint Review Committee on Education in Radiologic Technology.

The JCCC radiologic technology program is offered to Johnson County residents in cooperation with MCC-Penn Valley Community College. Related courses are taken at JCCC with lab and clinical courses held at MCC-Penn Valley or at a cooperating health facility. You must be accepted as a student at JCCC and accepted into the program by MCC-Penn Valley. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Penn Valley Community College at 816-759-4231 for an application packet, which includes deadlines, admission requirements and options for meeting academic criteria.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers. Johnson County Community College students should refer to Cooperative Program Information.

*Prerequisite/Corequisite required
Modern residential, commercial, institutional and manufacturing operations depend on carefully monitored temperature conditions and well-trained installation and service technicians. Government researchers say graduates of training programs that emphasize hands-on experience will have a definite advantage when seeking employment in heating, ventilation and air conditioning technology. JCCC provides you the opportunity to work on actual equipment while pursuing a degree or certificate program. The 64-credit-hour associate of applied science degree program focuses on developing an awareness of basic mathematical and scientific principles. The curriculum is concerned with the manner by which these principles affect the control of temperature and the quality of air, design, testing, installation and development of heating and cooling systems.

If you select the commercial maintenance technician degree, you will learn the special emphasis is on energy conservation through computer management. The theory of operation as well as installation, service and repair of rooftop air conditioners, cooling towers, steam boilers and commercial systems air conditioning are part of the curriculum. In addition to the 31 core hours, the following courses are required for the A.A.S. degree, facilities maintenance technician option.

(Major Code 2870; CIP Code 47.0201)

Heating, Ventilation, Air Cond. Technology

Associate of Applied Science Degree

HVAC Commercial Service Technician Certificate

The postsecondary certificate program is designed to prepare you for the basic job skills needed to service and maintain heating and air conditioning equipment. Students who elect the facilities maintenance technician certificate option learn the theory of operation and how to service, repair and design rooftop air conditioners, cooling towers, steam boilers and commercial systems air conditioners. This knowledge is reinforced by working on actual equipment in the laboratory. Completion of this program will allow the student to seek employment as a commercial maintenance and service technician in the heating/air conditioning trade.

HVAC Installation Technician Certificate

The heating, ventilation and air conditioning vocational certificate program is a
one-year program you can complete in two semesters. The program is designed
as a fast track to employment for both new students into the job market and those
who have been displaced from their jobs due to changes in the employment
market. Upon successful completion of the program, you will be equipped with the
entry-level technical skills necessary to enter the job market as an installation
technician in the heating/air conditioning trade.

Career Certificate

Suggested/Sample Course Sequence

The sequence taken by the student may vary depending on
prerequisites, course availability, and personal/
professional responsibilities.

First Semester

HVAC 121  Basic Principles of HVAC*............................4
       Prerequisite or corequisite: HVAC 123 or ELTE 123
HVAC 123  Electromechanical Systems............................4
HVAC 167  Sheet Metal Layout and Fabrication...................3
HVAC 155  Workplace Skills.....................................1
INDT 125  Industrial Safety.....................................3
Total Semester Credit Hours........................................15
HVAC Residential Service Technician, A.A.S.

Modern residential, commercial, institutional and manufacturing operations depend on carefully monitored temperature conditions and well-trained installation and service technicians. Government researchers say graduates of training programs that emphasize hands-on experience will have a definite advantage when seeking employment in heating, ventilation and air conditioning technology. JCCC provides you the opportunity to work on actual equipment while pursuing a degree or certificate program. The 64-credit-hour associate of applied science degree program focuses on developing an awareness of basic mathematical and scientific principles. The curriculum is concerned with the manner by which these principles affect the control of temperature and the quality of air, design, testing, installation and development of heating and cooling systems.

If you select the residential degree, you will learn the theory of operation as well as installation, duct design, service and repair of gas and electric furnaces, heat pumps and central air conditioners. In addition to the 31 core hours, the following courses are required for the A.A.S. degree, residential option.

HVAC Residential Service Technician Certificate

The postsecondary certificate program is designed to prepare you for the basic job skills needed to service residential heating and air conditioning equipment. Students who elect the residential service certificate option learn the theory of operation and how to service, repair and design gas furnaces, central air conditioners, heat pumps and rooftop air conditioning systems. This knowledge is reinforced by working on actual equipment in the laboratory. Completion of this program will allow the student to seek employment as a residential maintenance and service technician in the heating/air conditioning trade.

**Horticulture Certificate**
Programs in some career areas are made available by means of cooperative agreements with other educational institutions. These cooperative agreements have resulted in the sharing of programming, curriculum and staffing in the greater Kansas City area and have promoted increased economies of operations for cooperating institutions. The horticultural certificate program is a cooperative program with the Metropolitan Community Colleges.

The 29-credit-hour certificate granted by Johnson County Community College is a certificate program designed to prepare students for a career in the "greening industry." Upon completion of this certificate, students will possess the competencies to be successful at entry-level or higher positions in landscape design and maintenance, lawn care, garden centers and nurseries, wholesale greenhouse growers, and greenhouse operations and other related occupations.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers.

Metropolitan Community College students should refer to Cooperative Program Information.

Sustainable Agriculture Entrepreneurship Certificate

This certificate will provide educational opportunities that involve agriscience and agribusiness. It will focus on sustainable agriculture, market farming, the preparation of locally grown food, and entrepreneurship. Experiential learning will be emphasized by the offering of hands-on courses, numerous field trips, guest lectures, and the engagement with local farming and food communities.

Chef Apprenticeship, A.A.S.

The hospitality management program at JCCC is a comprehensive study of the food service and public lodging industries. The program is accredited by the American Culinary Federation Educational Institute Accrediting Commission.

The chef apprenticeship program at the college is sponsored by the American Culinary Federation and the U.S. Department of Labor. The three-year program has special admission requirements. You must be 18 years old and have a high school diploma or the equivalent.

The career program features formal course work along with the opportunity to actually practice such skills as baking, menu planning, food purchasing, beverage
control and food preparation. After job placement, you join the American Culinary Federation Educational Institute for registered apprentice membership. Likewise, you register with the Department of Labor and will be officially indentured to supervising chefs and the sponsoring American Culinary Federation affiliate chapter for 6,000 hours. The program consists of 75 credit hours and leads to an associate of applied science degree.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers. Metropolitan Community College students should refer to Cooperative Program Information.

Food and Beverage Management, A.A.S.

The hospitality management program at JCCC is a comprehensive study of the
food service and public lodging industries. The program is accredited by the
American Culinary Federation Educational Institute Accrediting Commission.
The JCCC food and beverage management program prepares graduates to enter
restaurant, club or food service management as a trainee or assistant manager.
Courses in the 66-credit-hour program include supervisory management,
hospitality accounting, hospitality law, food management, design techniques and
advanced hospitality management. In addition, students learn food preparation skills through courses in basic and intermediate food preparation, menu planning, purchasing, nutrition and beverage control. Individuals considering this field should enjoy a very active environment and a lot of contact with people.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers. Metropolitan Community College students should refer to Cooperative Program Information.

Hotel & Lodging Management, A.A.S.

The hospitality management program at JCCC is a comprehensive study of the food service and public lodging industries. The program is accredited by the American Culinary Federation Educational Institute Accrediting Commission.

The JCCC hotel and lodging management program prepares the graduate to enter hotel and lodging management, usually as a trainee or department supervisor. Courses in supervisory management, hotel accounting, hotel sales and marketing, and advanced hospitality management provide a comprehensive management background. In addition the students learn basic skills through courses in housekeeping, front office management, basic and intermediate food preparation, and beverage control.

Individuals considering this field should enjoy a very active environment and a lot of contact with people.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers. Metropolitan Community College students should refer to Cooperative Program Information.

**Pastry/Baking Certificate**

The one-year pastry/baking certificate program is for students who are seeking employment as pastry cooks in pastry/bake shops, hotels, restaurants or other areas that produce pastry and baked products. Students may have an entrepreneurial interest for opening their own operation.

The program involves a total of 30 credits over two semesters with a maximum enrollment of 15 students. This is an open enrollment program beginning only during the fall semester. Current industry professionals may desire this program to upgrade their skills and increase their knowledge in this area of study.

Students must complete HMGT 120, Food Service Sanitation, and HMGT 123, Professional Cooking I, before enrolling in the program.

(Major Code 4350; CIP Code 12.0501)

Pastry/Baking Entrepreneurship Certificate

This certificate is designed to prepare students to open their own business, and to provide the student with basic skills in pastry/baking preparation and small business development and management.

The program involves two semesters of pastry/baking courses with a maximum enrollment of 15 students. This is an open enrollment program beginning only during the fall semester. Students must complete HMGT 120, Food Service Sanitation, and HMGT 123, Professional Cooking I, with a passing grade before enrolling in pastry/baking courses (HMPB). Current industry professionals may desire this program to upgrade their skills and increase their knowledge in this area of study.

Industrial Maintenance, A.A.S.

Industrial maintenance requires people employed in the field to be trained in a
variety of areas, including welding, electricity, HVAC, gasoline or diesel engines,
and generators. Often, the needs will change due to growth in a company or the
expansion of services provided. This degree option will allow a student to choose
from numerous courses to custom build a program that will fit the needs of an employer. It will also allow students employed in an industrial maintenance position to broaden their skill areas and achieve an associate of applied science degree.

(Major Code 2270; CIP Code 47.0303)

**Industrial Maintenance Certificate**

Industrial maintenance mechanics are employed in the die-casting, plastics, food processing, printing, precision metal and woodworking industries. The vocational certificate course work includes a broad curriculum of industrial electricity, welding, HVAC and blueprint reading. Emphasis will be hands-on training in the repairing and testing of equipment. This also allows students employed in an industrial maintenance position to broaden their skill areas and achieve a vocational certificate.

(Major Code 5210; CIP Code 47.0303)
Electrical Technology Program

Information Technology, A.A.S.

Information technology connects people, departments and companies for communication purposes. The technology of local area networks gives employees
the ability to share and retrieve information at the group level. Combining local
area networks with the Internet and telecommunications resources gives
employees unlimited intranet access to information throughout the company and
beyond. The associate of applied science degree in information technology
provides students with a foundation in designing, installing and implementing
computer networking resources. Course requirements include network operations
and product-specific requirements for Windows, Unix and Cisco.

### Networking Administration: Windows Certificate

The networking administration: windows vocational certificate is a 28-credit-hour program that students can complete in four semesters. The program is designed to give students the hands-on skills needed to install, troubleshoot and administer a local area network with Windows operating system. Course work parallels the requirements for the Microsoft Certified Systems Associate (MCSA) certification exams.

Network Connectivity Certificate

The network connectivity vocational certificate is a 13-credit-hour program that students can complete in three semesters. The certificate addresses the crucial area of Internet connection devices and provides necessary skills for students to be successful in the field. This certificate is supported and promoted by Cisco through its Networking Academy initiative.
Certificate of Completion

Suggested/Sample Course Sequence

The sequence taken by the student may vary depending on prerequisites, course availability, and personal/professional responsibilities.

Interactive Media, A.A.S.

The interactive media program provides instruction in the design and development process for different types of interactive media, acquiring and managing assets, the history and theory of communication forms, authoring for interactive media, screen design, interface design, and project management. This program is designed to build a common foundation of experience while allowing the student to select courses from the interactive media electives list as well as general electives that best serve his or her individual needs. Depending on individual choices and talents, students who complete the interactive media program should be prepared for employment in a variety of positions in the interactive media field. For more information and to see samples of student work, go to web.jccc.net/academic/cim

Multimedia Design Certificate

The multimedia design certificate provides instruction in the design and development process needed to deliver information and media, primarily via CD-ROM and DVD. This includes acquiring and managing assets (text, graphics, sound and video), the history and theory of communication forms, screen design, multimedia authoring, interface design and project management.

Students who complete the multimedia design certificate should be prepared for employment in a variety of positions within the interactive media field. Potential positions in multimedia design include writer/editor/researcher, graphics professional, photography/imaging/video professional, music/audio professional, programmer, information designer, interface designer and/or project manager. For more information and to see samples of student work, go to web.jccc.net/academic/cim

(Major Code 4480; CIP Code 11.0801)

Interior Design, A.A.S.

Seven options in JCCC's interior design program offer students opportunities to choose a career path from a wide variety of exciting fields. Three associate of applied science degree options -- interior design, interior merchandising and interior entrepreneurship -- offer design, retail and business proprietorship skills. Three certificate programs, the interior products sales certificate, interior design and merchandising entrepreneurship certificate and the interior design sales and marketing representative certificate, are available for students who need skills for immediate employment or who want a broader knowledge base for their current employment. The interior design advanced certificate offers classes needed to sit for the NCIDQ exam.

JCCC's program offers courses in interior materials and resources, professional
selling, business management, manual and CAD drafting, and product presentation, combined with a basic curriculum of business math, English and art history. Two required internships help develop technical, creative and business skills.

Faculty have worked in the field, which equips them to offer valuable firsthand knowledge of what it takes to succeed.

JCCC's interior design program is recognized by the National Kitchen and Bath Association as an NKBA Accredited program.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers.

Metropolitan Community College students should refer to Cooperative Program Information.

Interior Design & Merchandising Entrep Certificate

The interior design and merchandising entrepreneurship certificate prepares
students to open their own interior design or merchandising service or retail
business. This certificate is designed to provide the student with basic skills in
interior merchandising and design and the basic skills in small business
development and management.

Faculty have worked in the field, which equips them to offer valuable firsthand
knowledge of what it takes to succeed.

Note: Metropolitan Community College students should seek specific counsel
from the JCCC program personnel for the appropriate course plan and numbers.

Metropolitan Community College students should refer to Cooperative Program
Information.

Interior Entrepreneurship, A.A.S.

Seven options in JCCC’s interior design program offer students opportunities to choose a career path from a wide variety of exciting fields. Three associate of applied science degree options—interior design, interior merchandising and interior entrepreneurship—offer design, retail and business proprietorship skills. Three certificate programs, the interior products sales certificate, interior design and merchandising entrepreneurship certificate, and the interior design sales and marketing representative certificate, are available for students who need skills for immediate employment or who want a broader knowledge base for their current employment. The interior design advanced certificate offers classes needed to sit for the NCIDQ exam.

JCCC’s program offers courses in interior materials and resources, professional selling, business management, manual and CAD drafting, and product presentation, combined with a basic curriculum of business math, English and art history. Two required work-study internships help develop technical, creative and business skills.

Faculty have worked in the field, which equips them to offer valuable firsthand knowledge of what it takes to succeed.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers. Metropolitan Community College students should refer to Cooperative Program Information.

Interior Products Sales Representative Certificate

The interior products sales representative certificate is a 17-credit-hour program designed for students employed in or seeking positions in the interior design retail market. The required courses are already included in the approved curriculum of the interior design program.

Faculty have worked in the field, which equips them to offer valuable first hand knowledge of what it takes to succeed.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers.

Metropolitan Community College students should refer to Cooperative Program Information.

Interpreter Training, A.A.S.

The employment outlook for sign language interpreters is promising. As the population grows, so does the need for interpreters. Another factor in the predicted increase in employment opportunities is the effort many social service agencies, school systems, medical services and industries are making to provide interpreter services.

JCCC’s program concentrates on preparing students to provide entry-level interpretation and transliteration for the deaf, hard of hearing and non-deaf communities. During the last semester of the program, students participate in a practicum class in which they interpret under supervision in a variety of situations. Upon successful completion of this program, and a required capstone evaluation, students will earn an associate of applied science degree.

This is a selective admission program with limited enrollment. The deadline for fall semester applications is February 15th. If you are interested, contact the Admissions office for an application packet, which includes prerequisites, deadlines, admission requirements and academic criteria.

Students must earn a grade of "C" or higher in all coursework.

(Major Code 259A; CIP Code 16.1603)

American Sign Language Studies Certificate

The American Sign Language (ASL) studies postsecondary certificate has been
developed based on the need for professionals and community members to be
skilled in ASL. This program is intended as supplementary and does not prepare
the learner to work as an interpreter. MATH 115 or higher is required for the
certificate program; students planning to apply for admission to the interpreter
training program after receiving their certificates are advised that MATH 116 or
higher and/or a science elective are required for the A.A.S. degree. Students
should contact a counselor or the career program facilitator for advice concerning
graduation requirements.

Students must earn a grade of "C" or higher in all ASL courses.

Please note: ASL 145, ASL 122 and ASL 147 are only offered in the fall semester;
ASL 123, ASL 135 and ASL 150 are only offered in the spring semester.

Prerequisite: MATH 243
or an equivalent course with a grade of "C" or higher

*Prerequisite/Corequisite required

Health Care Interpreting Certificate

Health care interpreting (HCI) is designed to give bilingual (English and Spanish) students the awareness, knowledge and skills necessary to serve as entry-level interpreters and translators in health care settings, including hospitals, clinics, medical offices and similar environments. Program completers should be eligible for employment as salaried or on-call staff interpreters, or as self-employed freelance interpreters. Employment opportunities may also be available with professional interpreting and translating service companies. Although the emphasis of the program is medical interpreting, the skills gained could be applied to other interpreting and translating settings in the community, such as conference and escort interpreting and translation of written documents.

The health care interpreting program is a 20-credit hour vocational program leading to a certificate of completion. It is designed to be completed in three semesters, although there is enough flexibility in the curriculum to extend the time period for several additional semesters, if the student prefers a slower pace. The program is organized in a progression of courses leading the student from general concepts to increasingly complex skills and knowledge, culminating in a comprehensive skills exam and a professional practicum. It includes five courses developed specifically for the program plus two courses offered through other departments. Students must earn a grade of C or higher in each of the program’s courses to continue in the program. The latter two courses, AAC 130, Medical Terminology, and HC 101, Introduction to Health Care Delivery, do not have prerequisites and could be taken at any time prior to completion of the program. Students must have all course work but the HC 101 course completed before beginning HCI 180, the medical interpreting practicum.

The HCI program is organized as part of the JCCC interpreter training program, although it has its own unique course prefix (HCI) and curriculum. Other courses in the interpreter training program emphasize deaf communication and sign language. HCI students should enroll only in courses with the HCI prefix, plus AAC 130 and HC 101.

Students must earn a grade of "C" or higher in all coursework and be able to demonstrate at least 85% accuracy in both English and Spanish while interpreting.

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

**Health Care Interpreting Entrepreneurship Certificate**

This certificate is designed to prepare students to open their own business providing health care interpreting services. The certificate will provide the student with instruction in the national standards; professional roles and responsibilities of interpreters; common medical conditions, treatments, protocols and procedures; medical terminology in both English and Spanish; culture competence; code of ethics and professional standards of practice; and legal aspects of interpreting. Students will successfully complete a field practicum course and a comprehensive skills test. Prospective students must demonstrate fluency in both English and Spanish through an oral interview and other documentation as needed. Additionally, the certificate provides the student instruction in small business development and management.

Students must earn a grade of "C" or higher in all coursework and be able to demonstrate at least 85% accuracy in both English and Spanish while interpreting.

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

**Land Surveying, A.A.S.**

The Land Surveying, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

This program leads to an associate in applied science degree which provides students with the experience and knowledge they need to take the exam to become a land surveyor.

The JCCC land surveying program is offered to Johnson County residents in cooperation with MCC-Longview Community College. The support courses are held at JCCC. Program course and credit hours are subject to change because of the requirement changes at the degree-granting institution. It is the student’s responsibility to check with a JCCC counselor or advisor before enrollment.

Contact MCC-Longview Community College at 816-672-2510 for an application packet, which includes deadlines, program prerequisites and admission requirements.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Paralegal, A.A.

The expanding role of the paralegal in the delivery of legal services has created
increased opportunities with private law firms, corporate legal departments,
insurance companies, real estate and title firms, banks, and government
agencies. If you are interested in entering this career field, you should be aware
that although the number of jobs for trained paralegals is rising, competition for
these positions is increasing. A minimum of 18 hours of legal specialty courses
must be taken at Johnson County Community College.
PARALEGALS MAY NOT PROVIDE LEGAL SERVICE DIRECTLY TO THE
PUBLIC, EXCEPT AS PERMITTED BY LAW.
The paralegal program at JCCC

- has a challenging curriculum
- requires that you possess excellent communication skills, analytical ability
  and a high level of motivation
- is approved by the American Bar Association
- is a selective admission program based on various academic and testing
criteria

(Major Code 264A; CIP Code 22.0302)

Paralegal

Associate of Arts Degree

Students graduating with an Associate of Arts degree or an
Associate of Science degree must complete an approved
cultural diversity course. Some of these courses are able
to meet both a diversity requirement and a general education
requirement.

The following courses must be completed with a
minimum GPA of 2.0 prior to application for admission
to the paralegal program. Upon successful completion
of the requirements for the associate of arts degree,
you will be eligible to receive an A.A. degree and a
paralegal certificate.
Suggested Order of Courses: Students may take any number of courses each semester that will also allow them to fulfill their other personal and professional responsibilities.

**First Semester**

Legal Nurse Consultant Certificate

A legal nurse consultant (LNC) is a registered nurse who possesses both medical and legal knowledge. The LNC assists members of the legal profession with medical malpractice, personal injury and workers’ compensation cases. The LNC functions in two roles: a consulting expert and a testifying expert.

Prior to admission, you must have earned a registered nurse degree and have satisfied JCCC and American Bar Association general education requirements. Students will have fulfilled these general education requirements if they have 18 hours of general education. LNC applicants must also possess a current state license to practice nursing and have completed 2,500 hours of clinical work as a registered nurse. A minimum of 18 hours of legal specialty courses must be taken at Johnson County Community College.

LEGAL NURSE CONSULTANTS MAY NOT PROVIDE LEGAL SERVICES DIRECTLY TO THE PUBLIC, EXCEPT AS PERMITTED BY LAW.

(Major Code 5450; CIP 22.0302)

### Legal Nurse Consultant Entrepreneurship Certificate

This certificate is designed to prepare students to open their own legal nurse consultant (LNC) service business providing two services to their clients: consulting testifying expertise. A legal nurse consultant is a registered nurse who possesses both medical and legal knowledge. The LNC assists members of the
legal profession with medical malpractice, personal injury and workers' compensation cases.

This certificate is designed to provide the student with basic skills as a legal nurse consultant as well as small business development and management skills.

Prior to admission, you must have earned a registered nurse degree and have satisfied JCCC and American Bar Association general education requirements. Students will have fulfilled these general education requirements if they have 18 hours of general education credits. LNC applicants must also possess a current state license to practice nursing and have completed 2,500 hours of clinical work as a registered nurse. A minimum of 18 hours of legal specialty courses must be taken at Johnson County Community College.

LEGAL NURSE CONSULTANTS MAY NOT PROVIDE LEGAL SERVICES DIRECTLY TO THE PUBLIC, EXCEPT AS PERMITTED BY LAW.

Marketing and Management, A.A.S.

Merchandising, marketing and management-related fields have recently experienced tremendous growth and expansion in Johnson County. Surveys indicate that few other areas offer greater opportunity to qualified people. In fact, employment of people in this field is expected to increase faster than the average for all occupations nationwide.

JCCC’s marketing and management program prepares you for jobs in this field. Graduates of JCCC’s program are ready for entry-level management or sales positions in retail, wholesale or manufacturing and marketing services.

Through marketing and management courses and in the case studies capstone course, you learn the latest in business trends. You also learn the importance of good customer service and the skills needed to deliver that service. The curriculum reflects current industry standards, including an emphasis on personal computer use, interpersonal communications and human relations.

Because all marketing and management students work at least 15 hours a week each semester in a store or business, you can apply what you learn in the classroom to your job. You also can take your work experiences back to the classroom for analysis and a greater understanding of the problems businesses face. You acquire basic merchandising information and learn how to work with people. By integrating coursework and on-the-job experience, you are given the knowledge, skills and attitudes necessary to reach your career objectives.

Sales and Customer Relations Certificate

JCCC’s sales and customer relations program is designed for people employed in
sales who wish to refine their skills or those who are contemplating a career in
sales. The program focuses on the steps involved in the selling process and the
delivery of effective customer service. Students who complete the program may
find careers in sales (retail, wholesale or manufacturing) or in the customer
service departments of stores, businesses and manufacturers.
All of the 33 credit hours required for the sales and customer relations certificate
apply toward JCCC’s 64-credit-hour marketing and management associate of
applied science degree.
Overall, employment in the selling field is expected to increase significantly
through the year 2005.

### Teleservice Representative Certificate

The teleservice representative certificate program at JCCC was developed in conjunction with the Kansas City Area Call Center Managers Users Group with the objective of providing students with business and practical skills that will help make them successful in the teleservice industry. Twenty-four of the 33 credit hours required for the teleservice representative certificate apply toward JCCC’s 64-credit-hour marketing and management associate of applied science degree.

(Major Code 5250; CIP Code 52.0411)

Metal Fabrication Technology, A.A.S.
The welding technology/metal fabrication is a safety-oriented program that provides students the opportunity to learn practical knowledge and skill competencies associated with welding, metal fabrication and related processes. The JCCC welding technology/metal fabrication curriculum is designed to prepare students for various phases and levels of occupational skills. The program also offers currently employed professional welders the opportunity to upgrade their
skills by taking advanced welding courses. Day and evening classes are available. Opportunities for those who wish to become welders, cutters and machine operators should be good through the year 2015. The number of qualified (certified) welders graduating from technical schools and community colleges is expected to be in balance with the number of future job openings. Welding technology/metal fabrication offers the service of five welding instructors and two machine tool instructors. Three are American Society (AWS) Certified Welding Inspectors (CWIs) for the inspection and testing of welds. JCCC welding technology professors can customize welding and machine programs to provide course materials utilizing many processes, materials or welding positions that can meet a particular company’s needs.

JCCC provides well-equipped laboratories that enable students to receive instruction in blueprint and symbol reading for welders. The welding technology program consists of individual welding processes that allow students time to master each. After students master the Introduction to Welding course, other welding processes can be selected to meet individual needs. They are oxyacetylene welding (OAW) and cutting (OFC), plasma arc cutting (PAC), shielded metal arc welding (SMAW), gas metal arc welding (GMAW), flux cored arc welding (FCAW), gas tungsten arc welding (GTAW), metallurgy and allied processes. Basic machining includes hands-on training with milling machines, turning lathes, surface grinders, band saws and the use of hand tools. The program is accredited as an American Welding Society Participating Organization in the Training and Testing of Entry Level Welders and the National Center for Construction Education and Research (NCCER). Eligible students may elect to test under AWS QC10 certification guidelines and, if successful, be listed in the AWS National Registry of Entry Level Welders and/or the NCCER National Registry for Construction Workers.

A series of welder related certificates or completion and career certificates are offered, all leading toward the associate of applied science degree.

*Prerequisite/Corequisite required

**Combination Welder I Certificate**

This certificate is the second step to the achievement of the MFAB A.A.S. degree. It is 11 college credit hours of general basic knowledge in welding.

The Combination Welder I certificate could be a completion point, for employment as a combination welder. This certificate verifies that the student has an understanding of several welding and cutting processes, and is entry level skilled with two basic welding processes, shielded metal arc welding (SMAW) and gas metal welding (GMAW). The student should have an understanding of basic metallurgy or welding symbols and blue print reading for welders.

Students are encouraged to pursue other welding certificates that will enhance their knowledge of welding and metal fabrication.

*Prerequisite/Corequisite required

Combination Welder II Certificate

This certificate is the third step to achievement of the MFAB A.A.S. degree. It is 14 college credit hours of advanced welding knowledge.

Entry into this vocational certificate will depend on the applicant’s past experience as a welder and on the prerequisites of course materials.

This certificate is a completion point if an advanced combination welder with entry level skills in several welding processes is needed. Both certificates, general basic welding and the combination welder I, must be completed before the combination welder II can be taken.

This certificate verifies that the student has entry level skills in at least four main welding processes, Shielded Metal Arc Welding (SMAW), Gas Metal Arc Welding I (GMAW), Gas Tungsten Arc Welding (GTAW) and Gas Metal Arc Welding-S (GMAW-S) and aluminum wire and stainless steel. The student should have successfully completed work place skills. Blue print and symbol reading for welders and/or metallurgy.

*Prerequisite/Corequisite required
Combination Welder/Machinist I Certificate

This certificate is the fourth step to the achievement of the MFAB A.A.S. degree. It is 15 college credit hours with an emphasis on machine tool materials and processes.

Completion of this vocational certificate will depend on the applicant's past experience as a welder, and/or machinist, and on the prerequisites of course materials and successfully completing the basic machine tool processes class.

The advanced combination welder/machinist provides entry level skills in several welding processes. Both certificates, general basic welding and combination welder I, must be completed before starting this certificate. Combination Welder II is optional welding training and can be taken before or after this certificate is pursued.

This vocational certificate verifies that the student understands and has entry level skills with several basic machines and processes welding and cutting skills needed for entry level repair welding with multiple welding processes and machine tool skills.

The student should also have an understanding of metallurgy and blueprint and symbols for welders.

Welder Fabricator Advanced Certificate

This certificate is the capstone for the MFAB program. It will allow all previous certificate completers along with current degree seeking students to continue their education as a professional metal fabricator-certified welder, and American Welding Society (AWS) certified welder. Coursework will focus on modern welding fabrication techniques and practices used in the manufacturing and installation of structural steel, piping systems, tank and vessel systems, and miscellaneous welded mechanical items. Students will work in teams as workers do on the job.
All teams will work from discipline specific drawings to manufacture and assemble a mock building section using acquired skills. Fabrication Practices I focuses on structural steel and Fabrication Practices II focuses on tanks and vessels. Completers with this certificate may elect to test to the AWS Entry Level I and Level II Welder program and the National Center for Construction Education and Research (NCCER) accreditation and national registry.

(Major Code: 4990; CIP Code 48.0508)

Nursing - Registered Nurse, A.A.S.

Nursing is a rewarding and challenging career with an optimistic employment future. JCCC’s registered nurse program is fully accredited by the National League for Nursing Accrediting Commission and Kansas State Board of Nursing. It is designed with the assistance of a community advisory committee composed of men and women who work in the nursing health care fields and are aware of the requirements for a successful nursing career. Our faculty are well qualified and experienced in the practice and teaching of nursing.

Students receive clinical practice in a variety of settings, including hospitals, long-term care facilities and clinics. Experiences are offered in maternal child nursing, pediatric nursing, operating room nursing, medical-surgical nursing, mental health nursing and gerontology.
A registered nurse with an associate’s degree is a skilled health care provider who administers nursing care directly to patients and their families in a variety of settings. The job outlook is very positive. Employment of registered nurses is expected to grow faster than the average for all occupations.

This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

Students will be assessed fees for content mastery and assessment exams. These fees will be collected each semester as part of the tuition and fee structure and are non-refundable.

(Major Code 235A; CIP Code 51.1601)

Nursing

Associate of Applied Science Degree

Note: Kansas CNA certification is required for application to the nursing program.

PN to RN Transition, A.A.S

The LPN to RN bridge program provides those licensed practical nurses wanting
to become registered nurses the opportunity to do so. Admission to the program is
based on academic criteria.
All licensed practical nurses making application must have completed required
general education courses before being accepted.

Following successful completion of the summer transition courses, students are
admitted to the third semester of the program. At least 10 openings are available
each year. Successful completion of the third and fourth semesters of the program
allows the graduate to apply to take the national licensing examination for RNs.
The application deadline is Jan. 15.

This program requires a professional liability insurance fee. Students will be
notified via their JCCC student e-mail account if they are required to pay a $16
fee. The dollar amount for fees is subject to change.
(Major Code 235A; CIP Code 51.1601)

Nursing

Associate of Applied Science Degree

Note: LPN to RN Transition
Students must successfully complete NURS 136 and
NURS 228 and NURS 230 before advanced standing credits
for NURS 124 and NURS 126 will be granted.

Prerequisite: Prior to enrolling in NURS 228 and NURS 230

BIOL 144  Human Anatomy and Physiology.....................5
CHEM 122  Principles of Chemistry............................5
ENGL 121  Composition I*....................................3
Prerequisite: ENGL 106 or appropriate placement
test score or EAP 113 and EAP 117
PSYC 130  Introduction to Psychology.........................3
PSYC 218  Human Development*.............................3
Prerequisite: PSYC 130
Communications Elective.................................3
MATH 116  Intermediate Algebra or Higher*....................3
Prerequisite: MATH 115 with a grade of "C" or higher
or appropriate score on the math assessment test
Total Prerequisite Credit Hours.....................25

**Summer**

**NURS 136** LPN-RN Transition Course*.........................6
Prerequisites: Completion of LPN program, Current
Cardiopulmonary Resuscitation Certificate (CPR) for
Health Care Providers and CHEM 122 and MATH 116 or
higher and either BIOL 144 or BIOL 140
and BIOL 225 and ENGL 121 and
PSYC 130 and PSYC 218
Note: NURS 136 is not added into the total program hours.
Total Semester Credit Hours.........................6

**Third Semester**

**NURS 228** Nursing Care of the Childbearing Family*...........5
Prerequisites: ENGL 121 and PSYC 218 and NURS 126
Corequisites: BIOL 230 and either SOC 122 or SOC 125
and NURS 230
**NURS 230** Nursing Care of Children*.........................5
Prerequisites: ENGL 121 and PSYC 218 and NURS 126
Corequisites: BIOL 230 and SOC 122 or SOC 125 and
NURS 228
**SOC 122** Introduction to Sociology.............................3
or
**SOC 125** Social Problems.....................................3
**BIOL 230** Microbiology*.......................................3

TOTAL PROGRAM CREDIT HOURS..........................72
*Prerequisite/Corequisite required

Note: Total Program Hours include 18 hours APL
for NURS 124/126

**Practical Nursing Certificate**

The health care industry needs informed, skilled and dependable workers to
complete the care team. The licensed practical nurse assists registered nurses
and physicians in caring for physically or mentally ill clients. In the long-term care
setting and home health, the LPN may supervise other nursing care personnel.
Practical nursing offers employment in many health care settings. Long-term care,
physicians' offices, home care, hospitals and clinics provide opportunity for the
practical nurse to administer care to a variety of clients. Job outlook for the
Kansas City area is good, with an average starting salary of $35,152-$37,400.
Upon successful completion of the program, graduates are eligible to apply to
take the Practical Nursing Licensing exam. After completing the practical nursing
program, LPNs may continue their education to become a registered nurse.
The program, which can be completed in 10 months, provides approximately
1,100 hours of instruction. This includes classroom and clinical laboratory
experiences in many areas of nursing. The application deadline is March 15, 2009
for the August 2009 start date. Admission to this program requires successful
completion of several prerequisites.
This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.
(Major Code 366A; CIP Code 51.1613)

Health Occupations

Career Certificate

New Requirement Beginning FALL 2009--
All students will be required to take PSYC 218-Human Development before the second semester. Students accepted into the program beginning Fall 2009 may take PSYC 218 during the first semester.

Prerequisite for Required Courses

Kansas CNA certificate & admission to PN program
BIOL 144  Human Anatomy and Physiology.....................5
PSYC 130  Introduction to Psychology..........................3
MATH 111  Fundamentals of Mathematics*..........................3
Prerequisite:  Appropriate score on the math assessment test

Polysomnography/Sleep Technology, A.A.S.

Polysomnographic technologists perform sleep diagnostics working in conjunction with physicians to provide comprehensive clinical evaluations that are required for diagnosis of sleep disorders. By applying non-invasive monitoring equipment, the technologist simultaneously monitors EEG (electroencephalography), EOG (electro-occulography), EMG (electromyography), ECG (electrocardiography), multiple breathing variables and blood oxygen and carbon dioxide levels during sleep. Interpretive knowledge is required to provide sufficient monitoring diligence to recording parameters and the clinical events observed during sleep. Technologists provide supportive services related to the ongoing treatment of sleep related problems. The professional realm of this support includes guidance on the use of devices for the treatment of breathing problems during sleep and helping individuals develop sleeping habits that promote good sleep hygiene. PSG technologists are employed in Sleep Disorders Centers and Labs, which may be located in medical centers, hospitals, or clinic/office settings.

Application for program accreditation will be made to the Commission on Accreditation of Allied Health Education Programs (CAAHEP). Graduates of the program will enter the field as Polysomnographic Technicians and be prepared to sit the national exam given by the Board of Registered Polysomnographic Technologists (BRPT) to gain the Registered Polysomnographic Technician (RPSGT) credential.

This is a selective admission program with limited enrollment. Prospective students are encouraged to visit the program Web site at http://www.jccc.net/sleeptechnology or to contact JCCC program personnel for additional information and application materials at 913-469-7655.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers. Metropolitan Community College students should refer to Cooperative Program Information.
This program requires a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.
(Major Code 236A; CIP Code 51.0999)

Railroad Electronics, A.A.S.

The associate of applied science in railroad electronics degree program is a restricted access program for those students enrolled in the railroad electronics certificate program who wish to progress to a degree. The certificate program has been an active program on the JCCC campus since 1993, with a total enrollment to date of almost 400 students.

The certificate program consists of 33 credit hours of electronics courses, previously designated as ELEC courses, currently designated as RREL courses. The total program content is equivalent to the electronics degree program, but the delivery differs. Content is divided into courses differently. Examples tend to be railroad-related where possible, and courses are delivered in alternative format, combining distance learning (using a remote access server) and classroom presentations.

Electronics technology influences almost every aspect of modern life. Skilled electronics technicians are needed to support growth in the railroad industry. These technicians must be able to fabricate, test, install, operate and maintain highly technical systems, such as communications systems networks, medical delivery systems, computers and computer networks, and industrial process control systems. The program focuses on the underlying principles of electronic devices used extensively in railroad signaling, circuit analysis and digital electronics and will provide a broad systems view of electronics.

Students in the railroad electronics technology program will work with outstanding facilities and the latest laboratory equipment. Graduates of the program will have the opportunity for employment in today’s most challenging and exciting railroad
signal career field.
No new courses are required for this program. All RREL courses are offered as closed courses for BNSF Railway, with the railroad furnishing all equipment, trainers, computers and software.
For information visit the National Academy of Railroad Sciences (Major Code 2820; CIP Code 49.0299)

Associate of Applied Science Degree

First Semester

RREL 180 Introduction to Railroad Electronics*................1
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean

### Railroad Electronics Certificate

This certificate is a comprehensive program of study that covers the fundamental electronic principles used by railroad signal control systems technicians. Upon successful completion of this program, the student should be able to apply basic...
digital and analog theory required in the maintenance of right-of-way crossing and
train control systems.

Enrollment in the program is subject to the approval of the BNSF training director
and JCCC division administrator.

For information visit the National Academy of Railroad Sciences
(Major Code 4540; CIP Code 49.0299)

*Prerequisite/Corequisite required

Railroad Carman Welding Certificate

JCCC’s railroad industrial technology certificate program is OPEN ONLY TO
BNSF RAILWAY EMPLOYEES.

Enrollment is subject to the approval of the BNSF Railway training director and
JCCC division administrator.

The railroad carman welding vocational certificate is designed to provide students
with training in welding and cutting operations used by carmen employed in the railroad industry. Students completing the program should be able to demonstrate safe operating procedures for welding and cutting applications and perform skill competencies involving oxyacetylene cutting, shielded metal arc welding, gas metal arc welding and flux cored arc welding. Students should also be able to complete qualification tests according to industry standards.

(Major Code 4560; CIP Code 49.0299)

Railroad Machinist Welding Certificate

JCCC’s railroad industrial technology certificate program is OPEN ONLY TO BNSF RAILWAY EMPLOYEES.

Enrollment is subject to the approval of the BNSF Railway training director and JCCC division administrator.

The railroad machinist welding vocational certificate is designed to provide students with training in welding and cutting operations used by machinists employed in the railroad industry. Students completing the program should be able to demonstrate safe operating procedures for welding and cutting applications and perform skill competencies involving complete qualification tests according to industry standards.

Railroad Structural Welding Certificate

JCCC’s railroad industrial technology certificate program is OPEN ONLY TO BNSF RAILWAY EMPLOYEES.

Enrollment is subject to the approval of the BNSF Railway training director and JCCC division administrator.

This certificate is designed to address the training needs for railway structural welders. Upon successful completion of this program, you should be able to demonstrate safe operating procedures for welding applications, perform skill competencies involving a variety of processes and positions, pass code welding requirements according to AWS D1.5, and perform welding operations as needed.

(Major Code 4530; CIP Code 49.0299)

Railroad Track Welding Certificate

Enrollment is subject to the approval of the BNSF Railway training director and JCCC division administrator.

This certificate is designed to provide a concentrated program for industry-specific training in track maintenance and repairs. Upon successful completion of this program, you should have the ability to safely operate track welding equipment, perform basic and advanced welding operations, and complete specialized procedures as needed to perform the job of railway track welder.

(Major Code 4520; CIP Code 49.0299)

Railroad Operations - Conductor Option, A.A.S.

Conductors are responsible for supervising over-the-road operation of freight trains and are in demand throughout the railroad industry. They may choose career paths leading to locomotive engineer service or railroad management. The final phase of this program consists of six weeks of full-time training provided in cooperation with the National Academy of Railroad Sciences on the campus of JCCC.

For information visit the National Academy of Railroad Sciences

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers.

Metropolitan Community College students should refer to Cooperative Program Information.

(Major Code 2810; CIP Code 49.0299)

Locomotive Electrical Certificate

This 12 hour Locomotive-Electrical Vocational Certificate program is designed to
introduce the student to the basic electrical theory and concepts related to
locomotive electrical systems, including the operation, maintenance, and
troubleshooting of EMD Low Horsepower locomotive electrical systems. Also, it
includes the basic operation, maintenance, repair requirements and trouble
shooting of EMD diesel engines and support systems, and the GE Dash 8/9
locomotive systems.

For information visit the National Academy of Railroad Sciences

Railroad Operations - General Option, A.A.S.

JCCC's associate's degree program in railroad operations can prepare you for an
exciting and well-paying career. The more than 500 companies that make up the
U.S. railroad industry provide the country's freight and passenger transportation
service on a network of some 300,000 route-miles of track. Railroads employ a
substantial workforce to service, maintain and manage this extensive
transportation network. JCCC's program offers five options. The general option
requires 66 credit hours, the conductor option 65 credit hours, the mechanical
option 65 credit hours and the maintenance of way welding option 65 credit hours.
In general, this option is designed to provide the student with general knowledge
and skills for entry-level employment in the railroad industry. The student is
introduced to the history of railroading and the various railroad crafts. Railroad
operations, safety, environment and quality also are covered. The student will
choose from a list of business and technical electives in order to provide a basis
for possible employment and further post-employment training.
For information visit the National Academy of Railroad Sciences
(Major Code 2800; CIP Code 49.0299)

Railroad Operations - Mechanical Option, A.A.S.

Mechanical services include a variety of responsibilities for the maintenance, service and repair of locomotives, freight cars and other rolling stock. Skills include diesel engine repair, electrical and electronic system repair, freight car repair and inspection, and welding processes. The final phase of the program consists of training provided in cooperation with the National Academy of Railroad Sciences. Selective admission to the program is based upon various criteria.

Interested students should meet with a JCCC counselor as early as possible.

For information visit the National Academy of Railroad Sciences
(Major Code 2840; CIP Code 49.0299)

Associate of Applied Science Degree

Note: MFAB 120-MFAB Tools and Equipment or MFAB 127-Welding Processes are prerequisites/corequisites to MFAB 121.

Students who may have the skills needed for MFAB 120 or MFAB 127 may contact the career program facilitator for a waiver or may contact the Testing Center for prior learning credit.

## Railroad Operations - Welding Option, A.A.S.

Maintenance of way welding involves maintenance and repair of rail and track components. The final phase of this program consists of course work provided in cooperation with the National Academy of Railroad Sciences. Selective admission to the program is based on various criteria. Interested students should meet with a JCCC counselor as early as possible.

For information visit the National Academy of Railroad Sciences

Respiratory Care, A.A.S.

The respiratory therapist is involved in a variety of lifesaving and life-supporting situations. Respiratory therapists treat patients ranging in age from newborns to senior citizens in the prevention, treatment, management and rehabilitation of lung problems. Employment is typically in hospitals but is available in several other health delivery venues. The health care needs of an aging population will play a role in the future of respiratory care.

JCCC’s associate of applied science program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP* http://www.caahep.org ) in collaboration with the Committee on Accreditation for Respiratory Care (CoARC http://coarc.com ). Graduates are eligible to take the National Board for Respiratory Care examinations for both the certified (CRT) and registered (RRT) respiratory therapist.

Certain courses within this program require a professional liability insurance fee. Students will be notified via their JCCC student e-mail account if they are required to pay a $16 fee. The dollar amount for fees is subject to change.

This is a selective admission program with limited enrollment. Prospective students are encouraged to visit the program Web site at http://www.jccc.net/respiratorycare or to contact JCCC program personnel for additional information and application materials at 913-469-2583.

Note: Metropolitan Community College students should seek specific counsel from the JCCC program personnel for the appropriate course plan and numbers. Metropolitan Community College students should refer to Cooperative Program Information.

BIOL 230 Microbiology^.............................................3
  Prerequisite: CHEM 122 or one year of high school chemistry
BIOL 231 Microbiology Lab........................................2
  BIOL 231 students must be currently enrolled in BIOL 230 or have successfully completed BIOL 230 within the last three years.
Note: BIOL 231 is optional but strongly suggested.

EMS 121 CPR I - Basic Life Support for Healthcare Provider...1
HC 101 Introduction to Health Care Delivery**..................3
  Communications Elective........................................3
Total Semester Credit Hours..................11-16

Note: ^Indicates prerequisite courses that must be completed before the clinic-year. Electives not completed by the clinic-year will delay credentialing eligibility.

Note: **HC 101 is not a required course for the degree but is strongly encouraged. See the program application packet for details on how this course may be used to meet clinic-year eligibility requirements.

Summer (clinic-year)

RC 125 Beginning Principles of Respiratory Care*..............4
  Prerequisite: Admission to the respiratory care program
RC 130 Respiratory Care Equipment*............................4
  Prerequisite: Admission to the respiratory care program
RC 135 Cardiopulmonary Medicine I*..............................1
  Prerequisite: Admission to the respiratory care program
  (Current BCLS for Health Care Provider required)
Total Semester Credit Hours.........................9

Third Semester

RC 220 Cardiopulmonary Physiology*.............................2
  Prerequisite: Successful completion of the summer sequence of respiratory care courses
RC 230 Clinical Topics and Procedures I*....................4
  Prerequisite: Successful completion of the summer sequence of respiratory care courses
Veterinary Technology, A.A.S.

The Veterinary Technology, AAS degree program is granted by Metropolitan Community College, but coordinated at JCCC.

A degree in veterinary technology provides opportunities for employment with small and large animal veterinary clinics, emergency/referral hospitals, animal control agencies, biomedical research companies, zoos, pharmaceutical companies, and pet food companies.

The program features supervised intensive clinical study under the direction of a licensed veterinarian and is fully accredited by the American Veterinary Medical Association. Students study sanitation, animal care, equine medicine, laboratory animal medicine, food animal medicine, clinical diagnostic procedures, radiology, dentistry and surgical technology.

JCCC's veterinary technology program is offered to Johnson County residents in cooperation with MCC-Maple Woods Community College. You must be accepted as a student at JCCC and accepted into the program at MCC-Maple Woods Community College. Consult with a JCCC counselor for more information.

Program courses and credit hours are subject to change because of requirement changes at the degree-granting institution. Contact MCC-Maple Woods Community College at 816-437-3235 or www.mcckc.edu/vettech for an application packet, which includes deadlines, program prerequisites, admission requirements and performance standards.

Note: Johnson County Community College students should seek specific counsel from the MCC program personnel for the appropriate course plan and numbers.

Johnson County Community College students should refer to Cooperative Program Information.

Academic Achievement Center (AAC)

AAC 100
Study Skills (1 CR)
This self-instructional course is designed to improve students’ ability to study efficiently. Based on the results of a study skills survey administered during the student’s initial visit to the center, an individualized program is established. Using instructional material provided by the A.A.C., students will master a variety of
concepts, including time management, goal setting, textbook reading, note taking from textbook and from lecture, stress management, test taking and using college resources. An Academic Achievement Center instructor is available to work with the student to establish specific instructional goals, administer tests, and provide individualized instruction as it is needed to complete the student's program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 101
Study Skills Mini-Course (1 CR)
This class is designed to improve students' ability to study efficiently. The focus is on an array of skills the college student needs, i.e., test-taking skills and note-taking skills, using a textbook, critical reading and memory recall, and effective listening and classroom strategies. Also covered are services the college offers to facilitate the learning experience for the college student, i.e., the Writing Center, the Math Resource Center, the Academic Achievement Center, the Student Success Center and the Billington Library. The format includes reading, discussion and application activities. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 102
Basic Spelling (3 CR)
This self-instructional course is for students who wish to improve their spelling ability but who have not been successful in the traditional spelling program. This course provides a highly structured approach to spelling improvement through mastery of morphographs (units of meaning) and guidelines for combining morphographs. A limited number of spelling rules are taught in the course. This course is ideal for students for whom English is a second language. An Academic Achievement Center instructor is available to work with students to establish specific goals, administer tests, and provide individualized instruction as needed to complete the students' program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 103
Advanced Spelling (1 CR)
This self-instructional course is for students who need to learn or review the basic spelling concepts and to improve their level of spelling mastery. Based on the results of a pretest administered during the student's initial visit, an individualized program is established. Using instructional material provided by the AAC, students will master a variety of concepts, including the final-e rule, the doubling rule, the y-to-i rule, forming the plurals and using possessives. In addition, students will monitor misspellings that occur in their own writing and will master the correct spelling of those words. A post-test will be administered at the end of the program to measure progress. An Academic Achievement Center instructor is available to work with students to establish specific instructional goals, administer tests and provide individualized instruction as needed to complete the students' program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 104
Reading Comprehension (1 CR)
This self-instructional course is designed for students who wish to improve their understanding of written language. A pretest is administered to determine a baseline reading comprehension level. An individualized program of study will be developed for each student, which includes both instructional and practice material provided by the A.A.C. Textbooks, computer software and handouts are some of the materials used in this course. This course does not fulfill degree requirements. Students learn techniques for increasing reading comprehension,
which include previewing, questioning, careful reading with note taking, reciting and reviewing. An Academic Achievement Center instructor is available to work with students to establish specific goals, administer tests and provide individualized instruction as needed to complete the student's program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 105
Reading Rate (1 CR)
This self-instructional course is designed for students who demonstrate strong comprehension skills and wish to improve the rate at which they process written language. Students learn techniques for increasing reading rate and for improving skimming and scanning levels. A pretest will be administered to determine a baseline reading efficiency rate. An individualized program of study will be developed for each student, which includes both instructional and practice material provided by the A.A.C. Textbooks, computer software and handouts are some of the materials used in this course. An Academic Achievement Center instructor is available to work with students to establish specific instructional goals, administer tests and provide individualized instruction as needed to complete each student's program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 106
Vocabulary Development (1 CR)
This self-instructional course is designed for college students who wish to expand both their receptive and expressive vocabulary levels. College students are expected to be able to recognize and use vocabularies specific to specialized and changing contents, i.e., data processing, sociology and business. A vocabulary placement test will be administered to determine a starting level. Instructional material provided by the A.A.C. includes Latin and Greek derivatives, specialized vocabulary, stated and implied meanings as well as the process of acquisition (context clues, etymology and derivatives). An Academic Achievement Center instructor is available to work with the student to establish specific instructional goals, administer tests and provide individualized instruction as needed to complete the student's program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 112
Basic Math Review (1 CR)
This self-instructional course is designed for students who need to learn or review basic mathematical concepts. Based on the results of a pretest administered during the student's initial visit to the Center, an individualized program is established. While one student may begin the program with multiplication facts, another may begin with solving proportions or equations. Instructional material is provided by the A.A.C. An Academic Achievement Center instructor is available to work with the student to establish specific instructional goals, administer tests and to provide individualized instruction as needed to complete the student's program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $35.

AAC 113
Algebra Preparation (1 CR)
This self-instructional course is designed for students who possess basic math skills and want to learn basic concepts in algebra. Based on the results of a pretest administered during the student's initial visit to the center, an individualized program is established. Using instructional material provided by the A.A.C., students will master a variety of concepts, including the terminology of mathematics and algebra, simplifying open expressions, solving algebraic
equations and other concepts. An Academic Achievement Center instructor will be available to work with the student to establish specific instructional goals, administer tests and provide individualized instruction as needed to complete the student’s program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

**AAC 114**  
**Chemistry Preparation (1 CR)**

This self-instructional course is designed for students who need to learn or review the basic chemistry concepts. Based on the results of a pretest administered during the student’s initial visit to the center, an individualized program is established. Using instructional material provided by the A.A.C., students will master a variety of concepts, including chemical symbols and formulas, valences, chemical equations, the metric system, units and dimensions, temperature, numbers in exponent form, significant figures, electrical charges, acids, bases, salts and solubility. An Academic Achievement Center instructor is available to work with the student to establish specific instructional goals, administer tests and provide individualized instruction needed to complete the student’s program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

**AAC 115**  
**College Skills Development (1 CR)**

This course is designed to improve student self-awareness and institutional awareness. Focus is on strengthening the student’s ability to use campus resources and services, as well as improving self-awareness in terms of communication skills, aptitudes, interests, values pertaining to career/life decisions, and self-advocacy. This course does not fulfill degree requirements.

**AAC 120**  
**Individualized Study (1 CR)**

This self-instructional course is designed for students who want to improve in any of the following A.A.C. areas: study skills, reading comprehension, reading rate, vocabulary improvement, advanced spelling, basic math, algebra preparation or chemistry preparation. Once the area of study has been determined, a pretest will be administered by the instructor and a program of study will be developed using materials provided by the A.A.C. An Academic Achievement Center instructor is available to work with students to establish specific goals, administer tests, and to provide individualized instruction needed to complete the student’s program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

**AAC 121**  
**Individualized Study (2 CR)**

This self-instructional course is designed for students who want to improve in one or two of the following A.A.C. areas: study skills, reading comprehension, reading rate, vocabulary improvement, advanced spelling, basic math, algebra preparation or chemistry preparation. Once the areas of study have been determined, a pretest will be administered by the instructor in each of these areas, and a program of study will be developed using materials provided by the A.A.C. An Academic Achievement Center instructor is available to work with students to establish specific goals, administer tests, and to provide individualized instruction needed to complete the student’s program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.
Individualized Study (3 CR)
This self-instructional course is designed for students who want to improve in two or three of the following A.A.C. areas: study skills, reading comprehension, reading rate, vocabulary improvement, advanced spelling, basic math, algebra preparation or chemistry preparation. Once the areas of study have been determined, a pretest will be administered by the instructor in each of these areas, and a program of study will be developed using materials provided by the A.A.C. An Academic Achievement Center instructor is available to work with students to establish specific goals, administer tests, and to provide individualized instruction needed to complete the student's program. This course does not fulfill degree requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

AAC 130
Medical Terminology (3 CR)
This self-instructional course is designed for the student who wants to learn a systematic format for acquiring a medical vocabulary. The course begins with a study of suffixes and prefixes common to most of the body systems and guidelines for combining word parts and forming plurals. This is followed by a study of each body system and oncological terminology. Any student who is planning a career in any facet of the health care industry will find this course beneficial. An Academic Achievement Center instructor is available to work with students to establish specific goals, administer tests and provide individualized instruction as needed to complete the student's program.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $30.

AAC 135
Career and Life Planning (3 CR)
This course helps students make decisions about their college majors, careers and other life goals. It emphasizes career research as a tool for making current career decisions and meeting changes in the future workplace. Students learn a systematic approach for making career and life decisions based on their personalities, interest, skills and values.

AAC 150
Job Search Skills (1 CR)
This class presents the skills students need to conduct an effective job search, including locating job leads, writing resumes, employment interviewing and job correspondence. Additionally, students will explore the importance of adapting to changes in the workplace to ensure their job survival and success. The class consists of lectures, activities, discussion and exercises in the career planning and job search process.

Accounting (ACCT)

ACCT 109
Basics of Income Taxes (1 CR)
This course teaches the student federal income tax rules and the procedures for reporting federal income tax. Upon completion of this course, the student should be able to keep records that will provide appropriate information for use in preparing federal income tax. The student should also be able to prepare the basic individual federal income tax return. 1 hr. lecture/wk., 16 contact hours.

ACCT 111
Small Business Accounting (3 CR)
This course will introduce the basic accounting procedures needed to maintain daily records for a small business and the use of such records in the decision-making process. Upon successful completion of the course, the student will be able to maintain a set of financial records with the occasional help of an outside accountant. This course does not prepare the student for Accounting II. 3 hrs./wk.

ACCT 121
Accounting I (3 CR)
This course is an introduction to accounting fundamentals. Upon successful completion of this course, a student should be able to analyze transactions, use various journals and ledgers, prepare financial statements and summarize results at the close of the fiscal period for the sole proprietorship. 3 hrs./wk.

ACCT 122
Accounting II (3 CR)
Prerequisite: ACCT 121
This course is a continuation of ACCT 121. Upon successful completion of this course, the student should be able to prepare and use financial statements with increased emphasis on interpretation and use of accounting data peculiar to partnerships, corporations and manufacturing firms. 3 hrs./wk.

ACCT 131
Federal Income Taxes I (3 CR)
This course teaches the student federal income tax rules and the procedures for reporting federal income tax. Upon completion of this course, the student should be able to do short- and long-range tax planning and keep records that will provide appropriate information for use in preparing federal income tax. The student should also be able to prepare the standard individual federal income tax return. 3 hrs./wk.

ACCT 135
Computerized Accounting Applications (3 CR)
Prerequisite: ACCT 121 or ACCT 111
Upon successful completion of this course, a student will be able to use the microcomputer to create a chart of accounts, accounts receivable and payable subsidiary ledgers, transaction journals, general ledgers, financial statements, reports and forecasts. 3 hrs./wk.

ACCT 140
Computerized Accounting Problems (3 CR)
Prerequisite or corequisite: ACCT 122
The course will teach students how to use spreadsheet and database software to set up and solve accounting problems. 3 hrs/wk.

ACCT 215
Accounting for Nonprofit Organizations (3 CR)
Prerequisite: ACCT 121
This course is a three-hour survey course of not-for-profit accounting and its primary users: federal, state and local governments; hospitals; and schools. Upon successful completion of the course, the student should be able to describe the primary funds and accounting groups, assist in the budget process, and practice
variances among the major nonprofit organizations according to their authoritative pronouncements. 3 hrs./wk.

ACCT 221
Cost Accounting (3 CR)
Prerequisite: ACCT 122
Upon completion of this course, the student should be able to develop and use accounting information to plan and control operations, value inventory, determine income in a manufacturing environment, and evaluate subsequent results. 3 hrs./wk.

ACCT 222
Managerial Accounting (3 CR)
Prerequisite: ACCT 122
Upon completion of this course, the student should be able to develop and use accounting information as an instrument of management control. Students will recognize needed information, determine where it can be obtained and decide how this information can be used by managers to plan, control and make decisions. Material covered includes financial statement analysis, cost application and budgeting reports management. 3 hrs./wk.

ACCT 231
Intermediate Accounting I (3 CR)
Prerequisite: ACCT 122
The course will present the use of accounting theory in the preparation of financial reports. Upon successful completion of this course, the student should be able to solve problems that arise in the presentation of cash, receivables, inventories, tangible and intangible assets on the statement of financial position, and their related effect on the statement of income. 3 hrs./wk.

ACCT 232
Intermediate Accounting II (3 CR)
Prerequisite: ACCT 122
Accounting theory learned through the study of accounting concepts and technical procedures will be presented in this course. Upon completion, the student should be able to solve problems in the presentation of capital structures, long-term investments, debts, leases, pensions, the analysis of financial statements, and price-level, and fair value accounting and reporting. 3 hrs./wk.

ACCT 240
Fraud Examination (3 CR)
Prerequisite: ACCT 121 and ACCT 122 and ACCT 222
This course teaches the principles involved in the detection and prevention of fraud as it pertains to financial matters. The course will explore the vast body of knowledge gained by accounting practitioners and will utilize critical thinking to apply these factors to the prevention of financial statement and employee fraud. Upon completion of this course, the student should be able to describe how and why fraud is committed, to use creative ways to detect and prevent fraudulent conduct, and to understand how allegations of fraud should be investigated and resolved. 3 hrs. lecture/wk.
Accounting Internship (1 CR)
Prerequisites: ACCT 121 plus 12 additional ACCT hours beyond ACCT 121 and Assistant Dean’s Approval

The student will be able to gain work experience in an approved training station under instructional supervision in an accounting or an accounting-related occupation. This internship is designed to give students the opportunity to apply the skills they have acquired in accounting specialty courses. The internship will require an average of 12 hours of job training per week by arrangement.

ACCT 285
Accounting Capstone (3 CR)
Prerequisites: ACCT 121 and ACCT 122 plus 15 hours of accounting courses and Assistant Dean’s Approval

This course is designed as a capstone experience before entering the workplace. Students will maintain a complete set of books and related financial statements both manually and electronically through an accounting cycle. Students will use previously prepared financial statements to make informed judgments and solve problems, identify and apply ethical positions and effectively communicate this information to others both orally and in writing.

Administration of Justice (ADMJ)

ADMJ 121
Introduction to Administration of Justice (3 CR)

This course provides a detailed description of the components of the American criminal justice system: police, courts and corrections. Students utilize critical thinking skills to discern the balance between individual rights and public order as it pertains to the criminal justice process. Students demonstrate knowledge of criminal justice processes through examinations, assigned papers and reports. Additionally, students are required to participate in field and classroom experiences designed to explore the various career opportunities within the criminal justice system. 3 hrs. lecture/wk.

ADMJ 124
Criminal Justice and Corrections (3 CR)

This course will explore the correctional system and trace the evolution of criminal sanctions from early English common law to the present. An examination of local, state, and federal correctional systems will provide an overview of society's response to criminal behavior. Students will be introduced to a detailed examination of jails, prisons, and community corrections. 3 hrs. lecture/wk.

ADMJ 127
Criminology (3 CR)

This class will explore various explanations for criminal behavior including choice, biosocial, psychological, social structure and social process theories. Society's responses to crime will also be examined. 3 hrs. lecture/wk. ADMJ 127 and SOC 127 are the same course. Do not enroll in both.

ADMJ 130
Crime Prevention (3 CR)

Topics of special interest include the techniques public service agencies use to operate crime-prevention programs and provide technically accurate, cost-effective security recommendations to the community. 3 hrs. lecture/wk.
ADMJ 133  
**Juvenile Delinquency (3 CR)**  
This class will provide an analysis of detention procedures, disposition, custody and treatment of juvenile offenders throughout the United States with a specific interest in area systems. The origin and development of juvenile agencies, as well as the organization, functions, and jurisdiction of juvenile courts will be studied. 3 hrs. lecture/wk.

ADMJ 140  
**Constitutional Case Law (3 CR)**  
Constitutional Case Law is an exploration of those provisions of the U.S. Constitution that impact the way in which the criminal justice system operates. Students will learn through discussion of important U.S. Supreme Court cases that have shaped the way the Constitution is interpreted followed by analysis of hypothetical fact patterns that require the student to apply the knowledge they have gained. 3 hrs. lecture/wk.

ADMJ 141  
**Criminal Law (3 CR)**  
*Prerequisite: ADMJ 121 or LAW 121*  
After taking this course, the student will be able to state the two basic elements necessary for any crime and the philosophy behind these two elements. After a detailed exploration of common law crimes and selected Kansas and Missouri statutes, the student will be able to classify common law crimes and state the difference between a felony and a misdemeanor. The student will understand the significance of the separation of powers doctrine and its application to criminal law and the constant interplay of the U.S. Constitution in criminal law. 3 hrs. lecture/wk.

ADMJ 143  
**Crime Analysis (3 CR)**  
Students will learn crime profiling skills and specialized techniques of conducting research, analyzing data and producing crime analysis products. Students will survey existing computer applications and learn practical use and evaluation of these applications. Students will become familiar with the common written reports, charts and graphs used to describe crime analysis products. Students will survey the variety of customers served by crime analysts and the integral part crime analysis plays within the community. 3 hrs. lecture/wk.

ADMJ 145  
**Fundamentals Private Security (3 CR)**  
In addition to understanding the general field of private security, the student will be able to differentiate between the security needs of industry, private business, government and selected educational institutions. 3 hrs. lecture/wk.

ADMJ 146  
**Retail Security (3 CR)**  
This is a study of retail security supervision and management. Topics will include employment practices, employee dishonesty, controlling shoplifters, and building and perimeter protection. 3 hrs. lecture/wk.

ADMJ 148  
**Family Violence/Sexual Abuse (3 CR)**
A description and causal analysis of the different physical, psychological, and sexual abuse acts that may occur within the primary family unit will be provided in this course. The study will include possible causative factors; psychological and social effects on the various family members; psychological, social and legal implications; treatments; and the relationship between abuse and crime. 3 hrs. lecture/wk.

ADMJ 154
Fundamentals of Criminal Investigation (3 CR)
Prerequisite: ADMJ 124
This course is designed to give fundamental information that serves as an overview of the entire field as well as a solid foundation for specialized course work. The course focuses on investigation of property crimes, homicide investigation, crimes against children and sex-related offenses. 3 hrs. lecture/wk.

ADMJ 170
Introduction to Substance Use and Abuse (3 CR)
This course explores the relationship between drugs and crime. Students will become familiar with the effects of drugs on the body. Interventions for individuals harmfully involved with drug use will be explored. Local and federal laws regulating substance use will also be examined. 3 hrs. lecture/wk.

ADMJ 180
Correctional Casework (3 CR)
This course helps prepare students for positions in correctional agencies. Students will learn how parole officers, probation officers, facility based caseworkers and para-professional treatment providers perform their roles. Students will review casework in the classroom for all types of offenders, including adults and juveniles in facility and community-based environments. 3 hrs. lecture/wk.

ADMJ 201
Police Interrogation (3 CR)
Prerequisite: Suggested course: ENGL 121
This class will assist students in developing the specific verbal and written communication skills used in the criminal justice field. Emphasis will be placed on the development of interviewing, interrogation, and report writing skills. Course content will focus on interviewing victims, witnesses and suspects and utilizing the information to write accurate and complete narrative reports. 3 hrs. lecture/wk.

ADMJ 220
Writing for Criminal Justice (1 CR)
Prerequisites: ENGL 121 and ENGL 122
Writing for Criminal Justice is designed to complement the Administration of Justice program by emphasizing the types of writing required in a criminal justice career. Students are required to gather pertinent information and then record that information by writing a variety of report narratives representative of those prepared by individuals working in a profession within the criminal justice system. Students document criminal incidents depicted in videotaped scenarios as well as participate in active information gathering during incidents simulated in class. 1 hr. lecture/wk.
Introduction to Forensics (3 CR)
This course provides an overview of forensic science by focusing on the current technologies police rely on to apprehend criminal perpetrators and to link them through trace evidence to crime scenes. Emphasis is on crime scene investigation, physical evidence, organic and inorganic analysis, forensic toxicology and use of DNA in investigations. 3 hrs. lecture/wk.

ADMJ 224
Introduction to Terrorism (3 CR)
This course defines and describes for students and current police officers the following terms: terrorism, current terrorist organizations, which includes their history, their personnel and their capacity to threaten the security and interests of the United States. Within this context, students learn how law enforcement officials can predict patterns of terrorist activities. The course focuses especially on law enforcement’s methods for combating terrorism within multiple arenas, including deterrence, detection, prevention, and swift response. The course further addresses the challenges facing law enforcement and intelligence agencies in developing a coordinated response to terrorism. 3 hrs. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ADMJ 230
Criminal Behavior (3 CR)
Prerequisite: PSYC 130
This course explores the relationship between psychology, criminal behavior, and the criminal justice system. The foundation of the course will be a detailed examination of the various theories used to explain the causation of criminal behavior. Special emphasis will be placed on exploring how this understanding is applied in various settings within the criminal justice system; including police departments, the courts, and corrections. 3 hrs. lecture/wk.

ADMJ 235
Community Based Corrections (3 CR)
This course is a comprehensive examination of community based corrections. The history of probation and parole is discussed as a foundation for the expanded coverage of correctional services offered in the community. Emphasis is given to modern correctional paradigms including diversion, intermediate sanctions and restorative justice. Practical field experience will broaden the students understanding of this population and successful best practices of existing federal, state and county agencies will be examined. 3 hrs. lecture/wk.

ADMJ 265
Advanced Police Training
Prerequisite: Selective Admissions - open only to currently employed full-time police officers attending the Police Academy under sponsorship of a law enforcement agency
This course consists of 60 clock hours of law enforcement training provided in addition to the 540 hours required by the Kansas Minimum Standards Training Act for recruits attending the Police Academy. While the required 600-hour curriculum is provided without fee, enrollment in advanced training is required of all those attending the academy. The curriculum covers law, criminal investigations, patrol procedures, defensive tactics, report writing and specialized training required by local law enforcement agencies.

ADMJ 280
Criminal Justice and the Public (3 CR)
Prerequisites: ADMJ 121 and ADMJ 124 and ADMJ 127 and ADMJ 220 and at least five (5) additional credit hours of Administration of Justice coursework.

This capstone course for Administration of Justice majors assists students in preparing for a career in the field of criminal justice or an advanced program of study. The course is designed to integrate knowledge and skills acquired from prior ADMJ coursework. Additionally, students study concepts of ethics and professionalism as they relate to criminal justice professionals and the communities they serve. 3 hrs. lecture/wk.

**ADMJ 281**  
Readings in Police Science (3 CR)  
*Prerequisite: 15 credit hours in ADMJ courses*

The class will consist of selected readings in police science on topics such as police administration, criminal investigation, criminology, corrections, juvenile problems and evidence. By arrangement.

**ADMJ 285**  
Administration of Justice Internship (3 CR)  
*Prerequisites: Fifteen credit hours in ADMJ courses or program facilitator approval and a grade point average of 2.0 or higher*

Students augment their academic course work with an internship in an appropriate setting under instructional supervision. Internship projects are cooperative efforts between appropriate federal, state or local criminal justice agencies or not-for-profit organizations, and college staff and students. Internships give students the opportunity to participate in the real-world application of their academic studies. In addition, this synthesis of classroom study with practical experience provides students with skills and insights useful in selecting a career in the field of criminal justice. The student spends the equivalent of 12 hours per week for 14 weeks performing internship duties over the course of the semester or a total of 168 hours.

### American Sign Language (ASL)

**ASL 120**  
Elementary American Sign Language I (3 CR)  
*Prerequisite: INTR 120 or ASL 120 or FL 180 with a grade of "C" or higher*

This class will focus on the development of beginning American Sign Language communication skills. Comprehension skills and linguistic features of the language taught in context will be emphasized. A minimum grade of "C" is required to continue in the ASL program. 1 hr. lecture 4 hrs instructional lecture-lab/wk. ASL 120 and FL 180 are the same course. Do not enroll in both.

**ASL 121**  
Elementary American Sign Language II (3 CR)  
*Prerequisite: INTR 120 or ASL 120 or FL 180 with a grade of "C" or higher*

This course will focus on continued development of elementary American Sign Language skills beyond those taught in Elementary ASL I. Students will work on developing communication competencies, concentrating on comprehension and production skills. Information about the linguistic and cultural features will be included in the context of language learning experiences. 1 hr. lecture and 4 hrs. instructional lecture-lab/wk. ASL 121 and FL 181 are the same course. Do not enroll in both.

**ASL 122**  
Intermediate American Sign Language I (3 CR)
Prerequisites: INTR 121 or ASL 121 or FL 181 with a grade of "C" or higher

This course will focus on the development of intermediate American Sign Language communication skills. Comprehension skills and linguistic features of the language taught in context will be emphasized. 6 hrs. lecture-lab/wk. The daytime sections only are open to students in the interpreter training program. INTR 122, FL 270 and ASL 122 are the same courses; only enroll in one.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ASL 123
Intermediate American Sign Language II (3 CR)

Prerequisites: INTR 122 or ASL 122 or FL 270 with a grade of "C" or higher

The course will continue study of intermediate American Sign Language. It is designed to develop further intermediate communication skills in American Sign Language. Information about the linguistic and cultural features will be included in the context of language learning experiences. 6 hrs. integrated lecture-lab/wk. The daytime sections are open only to students in the interpreter training program. INTR 123, FL 271 and ASL 123 are the same courses; only enroll in one.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ASL 135
Intro to American Sign Language Linguistics (3 CR)

Prerequisites: INTR 122 or ASL 122 or FL 270 with a grade of "C" or higher

This course introduces students to the structural and grammatical principles of ASL. Students will explore concepts of equivalency between English and ASL 3 hrs. lecture/wk. The daytime sections are open only to students in the interpreter training program. INTR 135 and ASL 135 are the same course; do not enroll in both.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

ASL 145
Introduction to the Deaf Community (3 CR)

Prerequisites or Corequisite: INTR 120 or ASL 120 or FL 180 with a grade of "C" or higher

This course will prepare students to develop and recognize the diversity within the Deaf Community, significant events and figures in Deaf History, and basic norms and values of Deaf Culture. Students will examine and compare Deaf Culture and hearing culture in America. The daytime sections are open only to students in the interpreter training program. 3 hrs./wk. INTR 145 and ASL 145 are the same course; do not enroll in both.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

ASL 147
Fingerspelling I (2 CR)

Prerequisites: INTR 121 or ASL 121 or FL 181. with a grade of "C" or higher

Students will work on developing beginning expressive and receptive fingerspelling skills based on word recognition principles. 1 hr. lecture, 2 hrs. lab/wk. The daytime sections are open only to students in the interpreter training program. INTR 147 and ASL 147 are the same course; do not enroll in both.

ASL 150
American Sign Language Literature (3 CR)

Prerequisite: INTR 122 or ASL 122 with a grade of "C" or higher

This course will provide introduction, discussion, and demonstration of literature in American Sign Language (ASL). The literature involves ASL Poetry, ASL
Storytelling/Narratives, Deaf Humor, Deaf Folklore and other genres that have been passed on from one generation to another by culturally deaf people. Students will receive, analyze and retell a variety of ASL literature. 3 hrs. lecture/wk. INTR 150 and ASL 150 are the same course; do not enroll in both.

Animation (ANI)

ANI 120
Conceptual Art for Animation (1 CR)
Prerequisite: CDTP 135
In this basic concept art course designed specifically for the game artist, graphic artist and animator, students will study basic and advanced drawing elements and principles. Students will produce conceptual artwork used in animation, graphic arts and gaming, including realistic and cartoon character design, landscape environments, architecture, and vehicles. 2 hr. integrated lecture-studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ANI 145
Introduction to 3D Animation (3 CR)
Prerequisites: CDTP 135 and ANI 120
This introductory course will provide a historical background and general design and production issues for 3D animation and game art creation. The details of modeling dimensional objects and environments and a range of simple to complex rendering techniques will be covered. Issues associated with telling a story through moving pictures such as screenplay writing, storyboarding and techniques for bringing an animated character to life will be explored. 6 hrs. integrated lecture-studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ANI 245
Character Animation (3 CR)
Prerequisite: ANI 145
Students will continue to refine their skills in a variety of character animation media. The computer and cutting edge software has become an increasingly important tool in creating character animatics, 2D and 3D character animations. More principles and elements of character animation will be introduced to create more realistic, believable and engaging stories. Continued focus on the importance of plot, character development, key principles of animation and artistic skill will push students into realms of endless creativity and imagination. 6 hrs. integrated lecture-studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ANI 250
Game Art Assets (3 CR)
Prerequisite: ANI 145
This course provides an introduction to making game art assets and animations for next generation games. Students create gaming models of characters, land and air based vehicles, weapons, ammunition, health items, armor, power-ups and other model assets used in game play. Students create textures, light assets, and export them into an existing game. 6 hrs. integrated lecture-studio/wk.

ANI 255
Advanced Animation and Effects (3 CR)
Prerequisite: ANI 245
The Advanced Animation and Effects course exposes students to various Hollywood style effects, from viscous liquid to open ocean effects. Through hands-on tutorials students will simulate and render a variety of visual effects including fire, explosions, smoke, steam, lightning, rain, snow storms and tornados. These are just a few of the many limitless possibilities that are required by today’s demanding visual effects companies. The students will also explore compositing, combining CG (computer generated) and live video together to create stunning imagery. 6 hrs. integrated lecture-studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ANI 260
Animation Capstone (3 CR)
Prerequisite: ANI 255
In this course, the student will use all the knowledge attained in previous core animation courses and develop a finished 1-2 minute independent movie following a predetermined animation production process and schedule. Students will develop a portfolio including an auto-run DVD or VHS tape, and a hard copy portfolio including illustrations of characters, model sheets, storyboards, props, environments, textures and final rendered scenes created for the movie. 6 hrs. integrated lecture-studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ANI 272
Animation Internship (1 CR)
Prerequisite: Facilitator approval required
Students will work in an approved training situation under instructional supervision. The internship is designed to give the student the opportunity to use the skills learned in the interactive media program. Student interns will be required to complete a minimum of 180 hours of on-the-job training. ANI 272 and CIM 272 are the same course; do not enroll in both.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ANI 273
Career Preparation (4 CR)
Prerequisite or corequisite: ANI 260
This course will provide interactive media majors instruction in the presentation of his or her work in a digital portfolio format of professional quality. A printed and written resume will be produced. Self-promotion, networking, job searches and interview skills will also be covered. 3 hrs. lecture, 2 hrs. lab/wk. ANI 273 is the same course as CIM 273; do not enroll in both. This course is taught in the spring semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

Anthropology (ANTH)

ANTH 125
Cultural Anthropology (3 CR)
This introductory course will employ various anthropological theories, perspectives, and methodologies to critically and comparatively examine an array of cultural and social topics as they relate to selected Western and Non-Western cultures and societies. 3 hrs./wk.

ANTH 126
Physical Anthropology (3 CR)
This course is an introduction to selected concepts and principles important to an
understanding of evolutionary forces and their influence on the physiology and
behavior of humans. The importance of the scientific method will be explored.
Awareness of humans and their place in nature will be achieved by examining
basic genetics, micro- and macroevolution, primate ecology and behavior, the
paleoanthropological evidence for human evolution, and modern human
adaptation and variation. 3 hrs./wk.

ANTH 130
World Cultures (3 CR)
This introductory course will utilize an ethnographic approach to introduce
students to various cultural and social practices of Westernized and
non-Westernized cultures and societies from around the world. This course will
examine a wide range of topics including economic production, religion, world
view, kinship patterns and political and economic institutions. 3 hrs./wk.

ANTH 134
Native Americans (3 CR)
This ethnographic course will introduce students to the indigenous peoples and
First Nations of North, Central and South America, with particular attention being
paid to North America. This course will focus on selected First Nations cultures
and societies to examine a wide range of topics including arts, oral traditions,
religions, and Indian-White relations. 3 hrs. lecture/wk.

ANTH 135
American Indian Artistic Tradition (3 CR)
This course introduces students to many art forms of the various American Indian
nations of the United States, Canada, and Mexico. Mediums to be explored
include traditional and contemporary visual art, traditional and contemporary
music and dance, oral tradition, and film. In addition, social, political, economic,
and legal influences on art will be discussed. Lectures, discussions, readings,
and films will be utilized to accomplish this. 3 hrs. lecture/wk.

ANTH 142
World Prehistory (3 CR)
This course is an introduction to the variety and continuity of the prehistoric
human past. Through the archaeological record we will consider the evolution of
humans, the transition of foraging to farming economies, the rise of complex
societies, secondary state formation, and the collapse of complex societies. 3
hrs. lecture/wk.

ANTH 144
Archaeology (3 CR)
This course is an introduction to the basic concepts, methods, and findings in
archaeology. The historical origins of the discipline and modern approaches to
understanding the past will be presented. The course will describe the range of
archaeological evidence and techniques for locating, analyzing, and interpreting
these remains. 3 hrs. lecture/wk.

ANTH 150
People and Cultures of Mesoamerica (3 CR)
This course is a survey of Mesoamerican cultural beliefs, traditions, and practices
from the prehistoric era to the present day. Through the archaeological, historical, and ethnographic record we will adopt an anthropological perspective on the global, national, regional, and local forces on everyday life in Mesoamerica. 3 hrs. lecture/wk.

ANTH 205
Archaeological Field Methods (5 CR)
This course is a practicum of archaeological field methods and techniques. The fundamental principles of archaeological research will be considered. Students will create and implement their own research design in the context of on-going investigations. Emphasis will be placed on practicing the essential skills needed to conduct archaeological research. 160 integrated lecture lab hrs./semester.

Architecture (ARCH)

ARCH 120
Introduction to Architecture (3 CR)
This course is an introduction to the profession of architecture through a study of its history, vocabulary, theories and practices. The facets that make up the total architectural curriculum as well as the various professional roles that architects can be expected to perform will be covered. Architectural study is seen as both an art and a science. The interdisciplinary character of architectural practice is emphasized. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $100.

ARCH 123
Architectural Principles (3 CR)
Prerequisite: ARCH 120
This course will elaborate on the concepts first presented in introduction to architecture. General focus will be on the modern profession and architects dealing with past, present and emerging ideas as they relate to physical and social context including landscaping, buildings and cities. Unifying themes will be presented of formal architectural principles in relation to modernism and the impact on design, the site, landscaping, and site planning issues. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $30.

ARCH 127
Introduction to Architectural Graphics (4 CR)
This course is designed to build a conceptual and manual foundation for professional architectural education. Students will learn to apply a variety of media and drawing systems such as freehand drawing, architectural lettering and equipment usage. Students will also learn applied geometry including line, tone, texture and utilizing sun, shade and shadows. Multi-view, paraline, axonometric and oblique drawings will be taught and students will build models related to architectural forms. Emphasis will be on learning to think in spatial terms while introducing professional, conceptual and visual vocabulary. Graphic presentation skills will be developed using standard graphic conventions, basic computer skills, and basic material investigations. 8 hrs. integrated lecture, studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $125 to $200.

ARCH 131
Architectural Graphics (3 CR)
Prerequisite: ARCH 127 or ARCH 130

This course builds upon the conceptual and manual skills acquired in Introduction to Architectural Graphics. Students will expand their ability by learning to apply a variety of media and advanced drawing systems, such as design drawing techniques, model building, graphic diagramming, grid perspective drawing, projection perspective drawing, and shade and shadow studies. Emphasis will continue to be on learning to think in spatial terms as well as developing a new repertoire of graphic presentation skills. 6 hrs. integrated lecture, studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

ARCH 140
Architectural Design (3 CR)

Prerequisite: ARCH 127 or ARCH 130

This course introduces the student to the process and vocabulary of design. The purpose of the content is to develop the ability to solve two- and three-dimensional design problems with basic methods, vocabulary and media appropriate to the architectural profession. 6 hrs. integrated lecture, studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

ARCH 240
Architectural History: Ancient to Middle Ages (3 CR)

This course will trace the development of the built environment from Antiquity to the Middle Ages and explore pré-Columbian and Islamic architecture. Emphasis will be placed on how materials, technological advances and natural environment influence architecture. The shaping of architecture through cultural forces will be stressed. Fundamental design principles and analyses of the built form will also be covered. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $100.

ARCH 241
Architectural History: Renaissance to Enlightenment (3 CR)

This course will investigate the architecture of the Renaissance, Baroque and Enlightenment periods. A brief exploration into non-Western architecture will also be presented. The focus of this course will be on the principles of design, cultural forces and concept of the built environment within its historical context. The work of prominent architects from each period will be highlighted and analyzed. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $50.

Art (ART)

ART 124
Design 2D (3 CR)

Prerequisite or corequisite: CDTP 145

This is an introductory study of the principles of visual perception, two-dimensional space organization and the visual elements of line, shape, texture and space. Concepts, materials and processes necessary to an understanding of two-dimensional form are explored using traditional and digital tools and techniques. Working knowledge of Adobe Illustrator is required. 6 hrs. lecture and studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.
ART 127  
**Design 3D** (3 CR)  
*Prerequisite: ART 124*  
This is a study of the function of three-dimensional organization in the development of visual ideas. Concepts, materials and processes necessary to an understanding of the three-dimensional relationships of space, form, form evolution and the dynamics of structure are explored. 6 hrs. lecture and studio/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

ART 129  
**Design Color** (3 CR)  
*Prerequisite or corequisite: CDTP 135*  
This is a study of the nature of color, its physical properties and visual qualities. Basic theories, phenomena and their applications will be explored using pigment, colored paper and digital color systems. Working knowledge of Adobe Photoshop is required. 6 hrs. lecture and studio/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

ART 130  
**Drawing I** (3 CR)  
This is an introductory course with an emphasis on the development of fundamental drawing skills, increased power of observation and an awareness of the personally expressive and compositional aspects of drawing. 6 hrs./wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 131  
**Drawing II** (3 CR)  
*Prerequisite: ART 130*  
This course involves intermediate problems in drawing with emphasis on individual expression based on historical as well as contemporary concerns and approaches in art. Students will work from models, still-life, and conceptual presentations. A variety of media will be explored. 6 hrs./wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 135  
**Painting I** (3 CR)  
This course is an introduction to the basic elements of painting. Students will learn basic painting skills, color properties, color mixing, color relationships, applications and proper use of tools and equipment. 6 hrs./wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 136  
**Painting II** (3 CR)  
*Prerequisite: ART 135*  
This course involves intermediate problems in painting with emphasis on individual expression based on historical as well as contemporary concerns and approaches in art. 6 hrs./wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.
ART 138  
**Digital Imaging for Artists (3 CR)**

This course is an introduction to the use of the computer as a medium for making fine art. The course will emphasize developing the student’s skill in making expressive visual statements using computer technology. 6 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 142  
**Ceramics I (3 CR)**

This course is designed to build a conceptual and manual foundation for future ceramics education. Students will study the properties of clay, its preparation, hand and wheel techniques, surface design, firing methods, fundamental ceramic terms, principles of design, introductory ceramic history and orientation to safe practices for the ceramic artist. Emphasis will be on developing skills appropriate to the beginning student for the purpose of creative and technical expression. 6 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $250.

ART 143  
**Ceramics II (3 CR)**

*Prerequisite: ART 142*

This course covers more advanced methods and studio practices in creative ceramic wheel expression and glaze formation. Emphasis is on development of a sense of thrown form and creative decoration or optional creative non-wheel ceramic form development. The course focuses on advanced ceramic form production, aesthetic issues, investigative study and practice. Clay, glaze and firing techniques are investigated in depth. The student acquires a repertoire of studio skills, a deeper awareness of ceramic history and articulated criteria of judgment. Individual interpretation and conceptual development are expected.

The study of aesthetics of ceramic form is undertaken. 6 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $250.

ART 145  
**Sculpture I (3 CR)**

Students will explore and study natural and synthetic sculptural forms as they create work using traditional or contemporary media and techniques. Assignments require work in limestone, clay, wax, bronze, aluminum and steel, and involve carving, modeling and building up. 6 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $200.

ART 146  
**Sculpture II (3 CR)**

*Prerequisite: ART 145*

This continuation of ART 145 will focus on advanced methods and techniques with emphasis on materials, forms and the student’s selection of an individual direction with individual material choices. 6 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $200.
ART 148
Metal and Silversmithing I (3 CR)
This course is a basic introduction to the terms, tools and techniques involved in creating jewelry and other wearables as they relate to the human figure. Casting, fabrication and construction will be explored. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $200.

ART 149
Metal and Silversmithing II (3 CR)
Prerequisite: ART 148
Students will study advanced casting and construction techniques. Projects should show a higher degree of design and function. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $200.

ART 172
Watercolor Painting (3 CR)
This course is an introduction to transparent water media with emphasis on learning fundamental painting skills, the visual elements, composition, visual perception and an awareness of personal expression. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 231
Life Drawing I (3 CR)
Prerequisite: ART 130
This course is an introduction to the basic elements of drawing for students wanting a concentration in drawing the human figure. Students will acquire basic competence in developing drawings involving the human form. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 232
Life Drawing II (3 CR)
Prerequisite: ART 231
This course is an intermediate investigation of drawing from the human form. This class is for students wanting to concentrate on figure drawing beyond Life Drawing I. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 235
Studio Workshop I (3 CR)
Prerequisite: ART 131 or ART 136
This course involves advanced problems in painting (or drawing) with emphasis on individual expression based on historical as well as contemporary concerns and approaches in art. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.
ART 236
Studio Workshop II (3 CR)
Prerequisite: ART 235
This course involves advanced problems in painting (or drawing), above and beyond those experienced in Workshop I, with emphasis on individual expression. 6 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

ART 244
Ceramics Workshop I (3 CR)
Prerequisites: ART 143 and permission of the assistant dean
Students will have the opportunity to pursue advanced individual research under the direction of the instructor. Emphasis is on creative expression and development of technical skills as well as the further pursuit of technical studies that have relevance for emerging personal specializations. Students will conduct a personal program of study on one aesthetic issue that emerges as personally significant and present the outcomes in an appropriate and acceptable manner at the close of the semester. Students should initiate and pursue studies in directions that inform and further their individual professional and creative growth, which leads to invention, innovation and refinement of their personal semester work, as agreed upon with the instructor. This course enables further pursuit of technical studies that have relevance for these emerging personal specializations. Skill refinement, three-dimensional imagination, with increased creative expression and creative product generation are anticipated. 6 hrs. lecture, lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $250.

Art History (ARTH)

ARTH 180
Art History: Ancient to Renaissance (3 CR)
This course will acquaint students with the arts and ideas of world civilizations from the prehistoric period to the beginning of the Italian Renaissance. The course will examine the aesthetic elements that mark the styles of major periods in two-dimensional, three-dimensional and architectural works. Particular attention will be paid to the relationship between artistic elements and their various cultural and historical contexts. 3 hrs./wk.

ARTH 182
Art History: Renaissance to Modern (3 CR)
This course will acquaint students with the arts and ideas of Western cultures from the beginning of the Italian Renaissance to the present. The course will examine the aesthetic elements that mark the styles of major periods in two-dimensional, three-dimensional and architectural works. Particular attention will be paid to the relationship between artistic elements and their various cultural and historical contexts. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ARTH 184
Art History: Twentieth Century (3 CR)
This course introduces the student to the arts and ideas of Western Europe and the United States from the late 19th century to the present. The course will examine the aesthetic elements that mark the styles of major movements in two-dimensional, three-dimensional and architectural works. Particular attention will be paid to the relationship between artistic elements and their various cultural
and historical contexts. 3 hrs. lecture/wk.

ARTH 186
Art History: Introduction to Asian Art (3 CR)
This course will acquaint students with the arts and ideas that arose in India, China and Japan from the prehistoric to the early modern periods. The course will examine the aesthetic elements that mark the styles of major periods in two-dimensional, three-dimensional and architectural works. Particular attention will be paid to the relationship between artistic elements and their various cultural and historical contexts. 3 hrs. lecture/wk.

ARTH 188
History of Photography (3 CR)
This course provides an introduction to the history of photography. Students will examine the aesthetic and technological evolution of photography as an art form, as a visual tool for and influence upon other artistic disciplines, and as a statement of perceived reality. The course will examine the elements that distinguish various aesthetic movements, the styles of major periods and the influences of individual photographers. Attention will be paid to the relationship between photographic imagery and various cultural and historical contexts. Recommended prior course is PHOT 121. 3 hrs. lecture/wk.

Astronomy (ASTR)

ASTR 120
Fundamentals of Astronomy (3 CR)
This course is a study of the universe from the earth, moon and planets to the stars and the most distant galaxies. Topics include black holes, quasars, and the origin of the universe and the possibility of life on other planets. Current astronomical discoveries are discussed in class as they occur. Access to astronomical Web sites is available to students in this course. 3 hrs. lecture/wk.

ASTR 122
Astronomy (4 CR)
This course is a study of the universe from the earth, moon, and planets to the stars and the most distant galaxies. Topics include black holes, quasars, and the origin of the universe and the possibility of life on other planets. Current astronomical discoveries are discussed in class as they occur. Access to astronomical Web sites is available to students in this course. 3 hrs. lecture, 2 hrs. lab/wk., 5 nighttime telescope sessions are required.

Automotive Technology (AUTO)

AUTO 120
Basic Automobile Operation and Maintenance (3 CR)
This is a beginning level class for non-automotive majors, designed to introduce students to the basic function, operation and care of modern automobiles. Upon completion they should be able to discuss safe operation of a passenger car in everyday circumstances in including emergency situations. Students should be able to locate and understand information regarding repair and maintenance of modern automobiles. Safe practices while using basic hand tools, chemicals and jacks will be included in this course. After determining fair market costs and economic feasibility students will be able to determine whether to repair or replace
an automobile. Students should be able to decide whether to attempt repairs themselves or to have them performed by a professional. Also, the basic costs of insuring and operating an automobile will be discussed. 3 hrs. lecture/wk.

AUTO 121
Small Engine Service (3 CR)
Upon successful completion of this course, the student should be able to compare and contrast operating principles of two-stroke and four-stroke cycle engines. The student should be able to describe lubricating, cooling, fuel and governor systems; troubleshoot engine problems; inspect engine components; and service the fuel, cooling and exhaust systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $300.

AUTO 122
Introduction to Automotive Glass (3 CR)
Upon successful completion of this course, the student should be able to diagnose, service and repair various automotive glass problems, provide professional service to customers, and manage and supervise jobs and employees. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 1 1/2 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $300.

AUTO 123
Motorcycle Maintenance and Repair (2 CR)
Upon successful completion of this course, the student should be able to demonstrate the proper use of tools and equipment used in servicing motorcycles. Two-stroke and four-stroke cycle designs will be studied. Overhaul procedures will be demonstrated. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 1 hr. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $300.

AUTO 125
Introduction to Automotive Shop Practices (3 CR)
This is a beginning course that is appropriate for both the automotive major and other interested students. Upon successful completion of this course, the student should be able to develop shop safety habits and become proficient in tire, battery, cooling system, lubrication service and minor electrical diagnosis. This course is an introductory course required for all students in the Automotive Technology program. Emphasis will be placed on learning basic skills needed to enter advanced automotive classes. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $300.

AUTO 128
Automotive Parts Specialist (2 CR)
Upon successful completion of this course, the student should be able to demonstrate good communication and basic math skills. Ordering and maintaining
correct inventory, as well as displaying and selling automotive parts for a fair profit, will be studied. Lectures will be supported by parts specialists in the industry. 2 hrs. lecture/wk.

**AUTO 130**  
**Diesel Fundamentals (2 CR)**  
*Prerequisite or corequisite: AUTO 125*  
Upon successful completion of this course, the student should be able to identify diesel engine components and parts and troubleshoot and service all external components with emphasis on glow plugs, injectors and injector pumps. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 1 hr. lecture, 3 hrs. lab/wk. This course is taught in the spring semester.

**AUTO 163**  
**Automotive Steering and Suspension (3 CR)**  
*Prerequisite or corequisite: AUTO 125 or approval of program facilitator*  
Upon successful completion of this course, the student should be able to describe manual and power steering component operation, summarize construction and operation of front and rear suspension systems, perform four-wheel alignment on current vehicles and service steering and suspension components. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk. This course is taught in the fall semester.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $300.

**AUTO 165**  
**Automotive Engine Repair (4 CR)**  
*Prerequisite or corequisite: AUTO 125 or approval of the program administrator*  
Upon successful completion of this course, the student should be able to demonstrate an understanding of the four-stroke cycle internal combustion engine. Students should be able to diagnose and repair cylinder heads and cylinder block assemblies to include lubrication and cooling systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 6 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $1500.

**AUTO 167**  
**Automotive Brake Systems (2 CR)**  
*Prerequisite or corequisite: AUTO 125 or approval of program administrator*  
Upon successful completion of this course, the student should be able to summarize disc and drum brake construction and operation, service all brake system components and describe anti-lock brake system services. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 1 hr. lecture, 3 hrs. lab/wk. This course is taught in the spring semester.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $300.

**AUTO 168**  
**Automotive Manual Drivetrain and Axles (3 CR)**  
*Prerequisite or corequisite: AUTO 125 or approval of program administrator*  
Upon successful completion of this course, the student should be able to work
safely in the shop; service the typical manual transmission/transaxle; service
typical transfer cases; inspect, adjust and replace all clutch components;
disassemble, reassemble and set up a differential; and service all front- and
rear-wheel drive shaft components. The student will be required to provide ANSI
Z87 safety glasses and may be expected to provide other basic hand tools and/or
equipment. 2 hr. lecture, 3 hrs. lab/wk. This course is taught in the spring
semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $0 to $300.

AUTO 201
ASE Certification Seminar (1 CR)
This course will prepare students to take any of the eight basic National Institute
for Automotive Service Excellence (ASE) automotive certification tests. 1 hr.
lecture/wk.

AUTO 206
Automotive Retailing Sales (3 CR)
Prerequisite: MKT 133 or MKT 134
Upon successful completion of this course, the student should be able to
demonstrate the skills necessary for competency in automotive retailing. Student
awareness and understanding will be directed toward an introduction to
automotive retailing, past, present and future; professionalism in sales; the
components of sales transactions; a structured sales program and product
knowledge; customer satisfaction and follow-up; building a clientele; and success
through self-improvement. 3 hrs. lecture/wk.

AUTO 210
Advanced Engine Repair (3 CR)
Prerequisite: AUTO 165
Upon successful completion of this course, the student should be able to plan,
design, and build a performance engine. The student will also demonstrate
knowledge of the relationships between displacement, horsepower and torque;
regulations governing performance engines; and current trends in engine
modification. The student will be required to provide ANSI Z87 safety glasses and
may be expected to provide other basic hand tools and/or equipment. 1 hr.
lecture, 6 hrs. lab/wk. This course is taught in the fall semester
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $0 to
$3000.

AUTO 230
Automotive Heating and Air Conditioning (3 CR)
Prerequisite or corequisite: AUTO 125 or approval of program administrator
Upon successful completion of this course, the student should be able to operate,
service and diagnose automotive heating, ventilation and air conditioning
systems. The course will cover the theory and operation of these systems, major
components, testing, recycling and other service procedures. The student will be
required to provide ANSI Z87 safety glasses and may be expected to provide
other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk. This course
is taught in the spring semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $0 to $300.

AUTO 234
Automotive Electrical Systems (4 CR)
Prerequisite or corequisite: AUTO 125 or approval of program administrator
Upon successful completion of this course, the student should be able to service
starting and charging system components; describe the operation and construction of starters, alternators and controlling devices; describe various lighting systems used in current automotive vehicles; and repair electrical lighting and accessory systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk. This course is taught in the fall semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $300.

AUTO 250
Automatic Transmissions and Transaxles (4 CR)
Prerequisite or corequisite: AUTO 125 or approval of program administrator
Upon completion of this course, the student should be able to diagnose, service and repair various automatic transmissions and automatic transaxles, including computer-controlled systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture/demonstration, 3 hrs. lab/wk. This course is taught in the fall semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $300.

AUTO 254
Automotive Engine Performance (5 CR)
Prerequisites or corequisites: AUTO 165 and AUTO 234
Upon successful completion of this course, the student should be able to describe the operation of engine management systems to include: fuel systems, ignition systems, and emission control systems. The student should be able to diagnose and repair all drive ability and emission control systems on the automobile. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 6 hrs. lab/wk. This course is taught in the fall semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $300.

AUTO 260
Automotive Service Management (3 CR)
Prerequisite: AUTO 254
Upon successful completion of this course, the student should understand the automotive service manager's job. The manager's job includes planning for inevitable change, maintaining flexibility, site planning, customer satisfaction, employee practices, meeting financial goals, and managing time, conflict and stress. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk. This course is taught in the spring semester.

AUTO 261
Automotive Service Techniques (3 CR)
Prerequisite: AUTO 254
Upon successful completion of this course, the student should become proficient in ordering of parts, writing repair orders, presenting work orders to customers, questioning customers about automobile service problems, answering the telephone, and supervising workloads. Students will also diagnose and perform service work on student and staff vehicles. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 1 hr. lecture, 6 hrs. lab/wk. This course is taught in the spring semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $300.
AUTO 271  
Automotive Technology Internship (3 CR)  
Prerequisite: Program facilitator approval required  
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students on-the-job experience under the supervision of professionals in the industry. The work will be developed cooperatively with area employers, college staff and each student to provide a variety of actual job experiences directly related to the student’s career goals. 1 hr. lecture, 15 hrs. work min./wk.

Biology (BIOL)

BIOL 110  
Nutrition for Life (2 CR)  
Designed for students who wish to apply nutrition information to their lives, this course explores how food selection affects body size, body composition, performance, disease resistance and longevity. Students will analyze the composition of their diets and develop a plan of action to improve their eating behaviors. 2 hrs. lecture/wk.

BIOL 115  
Natural History of Kansas (3 CR)  
Natural History of Kansas describes physical and biological processes that have led to the present Kansas landscape. Physical science topics include geology, climate patterns and soil formation. Biological science topics include ecology and a survey of the plants and animals of Kansas. The course will consider how the physical and biological environment relates to past and present human resource uses. 3 hrs. lecture/wk. Two 7-hr. Saturday labs required.

BIOL 122  
Principles of Biology (3 CR)  
This course is an introduction to selected concepts and principles important to an understanding of how biological systems operate. The importance of scientific methods and processes will be explored. Biological organization will be studied by examining the chemical, cellular, organismal and ecological properties that are unique to life. The diversity and unity of life will be explained in terms of classical and molecular genetics. 3 hrs./wk. BIOL 122 students see Memory Strategies classes on pg.? - Optional Enrollment. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

BIOL 123  
Principles of Biology Lab (1 CR)  
Prerequisite or corequisite: BIOL 122 or consent of the assistant dean  
This introductory lab examines basic biological concepts by focusing on the structures and functions of plants and animals. 2 hrs./wk. BIOL 123 students must be currently enrolled in BIOL 122 or have successfully completed BIOL 122 within the last three years.

BIOL 124  
Oceanus: Essentials of Oceanography (3 CR)  
This course for beginning students focuses on the marine environment as a unique feature of the planet earth and investigates areas of intense scientific and public concern: the pervasiveness of the ocean and its effect on the earth's
weather, its stunning physical size and diversity of contained life forms, its contributions to the physical and historical development of man, its impact on geopolitical and economic matters, and the impact of oceanic pollutants and the potential exploitation of marine resources. 3 hrs. lecture/wk.

**BIOL 125**  
**General Botany (5 CR)**  
This is a survey of the life, growth and structure of plants. Divisions of the plant kingdom will be presented with emphasis on life cycles, anatomy, physiology and ecology of major groups. Students will do microscopic and macroscopic analysis of the major division. 3 hrs. lecture, 4 hrs. lab/wk.

**BIOL 127**  
**General Zoology (5 CR)**  
This is a survey of the life, structure, and growth of animals. Students will concentrate on identifying animals by their structural characteristics and looking at the role adaptation plays in anatomical and physiological features. Students will do dissections and microscopic analysis of the major phyla. 3 hrs. lecture, 4 hrs. lab/wk.

**BIOL 130**  
**Environmental Science (3 CR)**  
Environmental Science seeks to describe problems and solutions associated with human use of natural resources. Students will study the major physical and biological processes that govern the complex interactions in natural ecosystems. Major course topics include human population growth, resource use and pollution. Practical solutions aimed at sustainability will be identified and examined. This is an introductory, nonscience-major survey course. 3 hrs./wk. BIOL 131 students must be currently enrolled in BIOL 130 or have successfully completed BIOL 130 within the last three years. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

**BIOL 131**  
**Environmental Science Lab (1 CR)**  
Prerequisite or corequisite: BIOL 130  
In this lab, students will learn ecological principles that are necessary for understanding and solving environmental problems. Students will sample the local environment for various types of environmental pollution, conduct lab projects and computer simulations, and attend field trips. Field trips may include a visit to a local wastewater treatment plant, a stream ecosystem and a prairie ecosystem. 2 hrs. lab/wk, plus up to three field trips. BIOL 131 students must be currently enrolled in BIOL 130 or have successfully completed BIOL 130 within the last three years.

**BIOL 135**  
**Principles of Cell and Molecular Biology (4 CR)**  
This is an integrated lecture and laboratory course for biology majors and students planning to take additional courses in biology. Subjects covered include basic biochemistry, cell structure and function, cellular metabolism, Mendelian and molecular genetics, natural selection and evolution, cell physiology and development of plants and animals from the single-celled stage to the embryonic stage. 3 hrs. lecture, 2 hrs. lab/wk.
Human Anatomy (4 CR)
Students will study gross and microscopic aspects of cells, tissues and organ systems of the human body. They will concentrate on a detailed analysis of the structure of each body system. 3 hrs. lecture, 3 hrs. lab/wk. The Open Anatomy Lab, 311 CLB, is available for students enrolled in Human Anatomy and Human Anatomy and Physiology classes at JCCC. Contact your professor, check the schedule outside of 311 CLB or call 913-469-8500, ext. 4124, for hours. A current student ID is required for using the Open Anatomy Lab.

BIOL 144
Human Anatomy and Physiology (5 CR)
This course provides basic knowledge on human structures and their function. Students will study the relationship of structures to function in the organ systems of the human body. Emphasis will be on the identification of the anatomical features and their functions. This course is integrated lecture and laboratory. 3 hrs. lecture, 4 hrs. lab/wk. The Open Anatomy Lab, 311 CLB, is available for students enrolled in Human Anatomy and Human Anatomy and Physiology classes at JCCC. Contact your professor, check the schedule outside of 311 CLB or call 913-469-8500, ext. 4124, for hours. A current student ID is required for using the Open Anatomy Lab.

BIOL 145
Human Anatomy and Physiology Dissection (1 CR)
Prerequisites: BIOL 144 and Assistant Dean’s Approval
Students will dissect the cat and study the relationship of structures to function in the organ systems of the cat. In this laboratory course, they will also dissect the cow kidney, heart, brain and eye. Students will compare and contrast these structures and functions with the organ systems of the human body. 2 hrs. lab/wk. Students enrolling in BIOL 145 should have completed BIOL 140 or BIOL 144 and have the approval of the assistant dean.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $35.

BIOL 150
Biology of Organisms (5 CR)
Prerequisite: BIOL 135 or consent of the assistant dean
This is a survey of the five kingdoms of life. Monera, fungi, protista, plant and animal kingdoms will be presented, with emphasis on life cycles, anatomy, physiology and ecology of the major groups. 4 hrs. lecture, 3 hrs. lab/wk.

BIOL 155
Introduction to Bioethics (3 CR)
Prerequisite: BIOL 122 or BIOL 135 or equivalent, or permission of the assistant dean
This course is an introductory course in ethics with an emphasis on the ethical content raised by the discipline of biology. The student will examine the major ethical theories, including deontology, act utilitarianism, rule utilitarianism, along with select others. Study of the theories will enable the analysis of case studies involving such issues as human populations problems, reproductive technologies, genetic engineering of humans and other organisms, stem cells and their use, beginning/ending of life, the human genome project, environmental impact of humans, cloning, medical and non-medical genetic interventions, and biological ethics. 3 hrs. lecture/wk.

BIOL 205
General Genetics (4 CR)
Prerequisite: BIOL 122 or BIOL 135 or the equivalent introductory college-level course. All prerequisites require a grade of "C" or higher.

This introductory course emphasizes human heredity using concepts from classical and modern genetics. Themes of advancing technologies and bioethical issues are interwoven in the basic background fabric of the course. 3 hrs. lecture, 2 hrs. lab/wk.

BIOL 225
Human Physiology (4 CR)
Prerequisites: CHEM 122 and either BIOL 140 or BIOL 144

This is an introduction to the dynamic functions of the human organism from the chemical and molecular mechanisms that sustain cellular processes through the control systems responsible for homeostasis and the influence of these systems on the cellular function of organ and systems operation. Laboratory investigation using selected biochemical and physiological preparations allows correlation of theory with experimental observations. 3 hrs. lecture, 3 hrs. lab/wk.

BIOL 227
Human Pathophysiology (4 CR)
Prerequisite: BIOL 144 or BIOL 225

This introduction to the physiology of disease covers common disorders of the body from the cellular to the systemic level. Topics include causes, symptoms, diagnostic tests and treatments of disease. 4 hrs. lecture/wk.

BIOL 230
Microbiology (3 CR)
Prerequisite: CHEM 122 or one year of high school chemistry

This is a general introductory course in microbiology. It provides a background in many areas of microbiology with an emphasis on medical aspects. The structure, physiology, antimicrobial agents, immunology and host-parasite relationship of microorganisms will be studied, with an emphasis on bacteria. 3 hrs./wk.

BIOL 231
Microbiology Lab (2 CR)

BIOL 231 students must be currently enrolled in BIOL 230 or have successfully completed BIOL 230 within the last three years.

Students will learn aseptic techniques and apply them in the isolation of pure cultures of bacteria. Students will also perform various staining techniques and chemical tests to identify these bacteria. The response of bacteria to changes in environmental conditions will also be examined. Various life stages of medically important parasites will also be observed. 4 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $35.

BIOL 235
General Nutrition (3 CR)
Prerequisites: CHEM 122 and BIOL 144 or CHEM 122 and BIOL 140 and BIOL 225

This introductory course provides a basic knowledge of human nutrition. Students will learn the sources and functions of the various nutrients. They will also explore the interaction of diet, disease prevention and treatment. Through the use of a computerized nutrition program, students will analyze their diets for nutritional deficiencies and excesses. 3 hrs. lecture/wk.
BIOL 240
General Pharmacology (3 CR)
Prerequisite: BIOL 225
This course provides a basic understanding of the science of drugs-how they work
and what they do. Students will study various drug concepts including mechanism
of action, pharmacologic class, pharmaco-kinetics, pharmacodynamics and
clinical implications. 3 hrs. lecture/wk. Spring.

BIOL 250
Ecology (4 CR)
Prerequisites: BIOL 122 and BIOL 123 or BIOL 130 and BIOL 131 or equivalent
courses or consent of the assistant dean
Major topics in this course will include population dynamics, competition,
predation, mutualism, community structure, ecological succession, energy flow,
nutrient cycling, and biogeography. Students will also review the major features of
terrestrial, freshwater, and marine ecosystems. Field and laboratory experiments
will introduce students to several different habitat types, various techniques
commonly used in ecology, and engage students in collecting, analyzing and
evaluating ecological data. Lab reports emphasize critical evaluation of ecological
concepts and data and effective scientific communication. 3 hrs. lecture, 3 hrs.
lab/wk.

Biotechnology (BIOT)

BIOT 160
Introduction to Biotechnology (2 CR)
Prerequisites: CHEM 122 and prerequisite or corequisite BIOL 135 or CHEM 124
and CHEM 125 and prerequisite or corequisite: BIOL 135 All prerequisites and
corequisites require a grade of "C" or higher
This course is an introduction to biotechnology, including career exploration,
history and applications of DNA/RNA technology, molecular biology, and
bioethics. Topics include cloning, DNA, antibodies, gene therapy, plant
biotechnology, the human genome project, DNA fingerprinting, genetic testing,
diverse products made through biotechnology, and the ethical implications of this
technology. The course is intended for those interested in pursuing a career in an
industrial, academic, or biomedical research laboratory. 2 hrs. lecture/wk.

BIOT 165
Laboratory Safety (1 CR)
Prerequisite: CHEM 122 and prerequisite or corequisite BIOL 135 or CHEM 124
and CHEM 125 and prerequisite or corequisite BIOL 135 All prerequisites and
corequisites require a grade of "C" or higher
This course will emphasize laboratory safety and procedures. Additionally,
regulations that govern the biotechnology laboratory will be discussed. Biological,
chemical and radiation safety will all be handled through lectures, videotapes,
demonstrations and field trips. There will also be exposure to good manufacturing
practices (GMP), quality assurance and control procedures (QA/QC), and OSHA
and FDA regulations. 1 hr. lecture/wk.

BIOT 230
Microbiology for Biotechnology (5 CR)
Prerequisites: BIOL 135 and BIOT 160 and BIOT 165 All prerequisites require a
grade of "C" or higher
This is an introductory course in microbiology for biotechnology students. It
provides a background in many areas of microbiology with an emphasis on
molecular aspects and applications for biotechnology. Industrial and food microbiology will also be examined. The structure, physiology, antimicrobial agents, immunology and host-parasite relationship of microorganisms will also be studied, with an emphasis on bacteria. Students will learn aseptic techniques and apply them in the isolation, growth and maintenance of pure cultures of bacteria. Students will also perform various molecular and genetic techniques as well as chemical tests to identify these bacteria. The growth phases of bacteria and response of bacteria to changes in environmental conditions will be examined. 3 hrs lecture, 4 hrs lab /wk.

BIOT 260
Biotechnology Methods (5 CR)
Prerequisites: Either BIOT 160 or BIOL 160 and either BIOT 165 or BIOL 165 and Prerequisite or corequisite: BIOL 230 or BIOT 230 All prerequisites and corequisites require a grade of "C" or higher

This course is an introduction to the theory and laboratory techniques in molecular biology, protein biochemistry and immunology with an emphasis on gene expression and regulation, recombinant DNA, RNA transcription, and protein translation. Laboratory emphasis will be on molecular biological techniques utilized in modern research and industrial laboratories. Techniques include growth and maintenance of E. coli, gene cloning, DNA and protein electrophoresis protein purification and enzymatic and immunology assays. Lecture and laboratory exercises on the principles and practices of initiation, cultivation, maintenance, preservation of cell culture lines and applications will also be covered. 6 hrs. lab/wk.

BIOT 265
Biotechnology Internship (4 CR)
Prerequisites: BIOT 260 and either BIOT 160 or BIOL 160 and either BIOT 165 or BIOL 165 and assistant dean's approval

The internship will provide advanced students the opportunity to develop job and career-related skills while in a work setting. Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The work will be developed cooperatively with academic, industrial and private institutional biotechnology laboratories. 20 lab hrs./wk.

Business (BUS)

BUS 120
Management Attitudes and Motivation (3 CR)
Upon successful completion of this course, the student should be able to assess personal strengths and weaknesses and set goals for personal and professional life, define communication and listening skills, analyze human relations problems, apply problem-solving strategies to human relations issues in the workplace, and define and compare management styles. Class meets for 48 hrs.

BUS 121
Introduction to Business (3 CR)
Upon successful completion of this course, the student should be able to explain the basic principles of the American free enterprise economic system. In addition, the student should be able to explain the fundamentals of starting a business and the interrelationship among the four functional areas: accounting, finance, management and marketing. 3 hrs./wk.
BUS 123
Personal Finance (3 CR)
Upon successful completion of this course, the student should be able to define the role of a consumer in the economy; develop a basic financial plan; apply budgeting procedures in a daily and monthly spending plan; calculate principal and interest; define the types of consumer credit; identify the types of housing mortgages; and explain the important considerations in buying, selling and renting. In addition, the student should be able to calculate individual insurance needs in the areas of life insurance, health insurance, property and liability insurance, automobile insurance and other types of special insurance and be able to explain employee and retirement benefits, including tax-sheltered plans. 3 hrs./wk.

BUS 140
Principles of Supervision (3 CR)
Upon successful completion of this course, the student should be able to define the supervisor's role within a company and identify the skills necessary to successfully fulfill that role. In addition, the student should be able to determine the supervisor's role in supervising employees on an individual basis and as a group. The student should also be able to apply the principles of supervision in simulated work situations. 3 hrs./wk.

BUS 141
Principles of Management (3 CR)
Upon successful completion of this course, the student should be able to state the basic functions of management, explain the nature of organizations and organizational theories and types, explain the importance of effective communication within the organizational structure, develop and define the techniques for directing and motivating employees, explain the effects of change on an organization, and develop techniques for coping with those effects. In addition, the student should be able to explain and discuss the application of business ethics in managerial decision-making. 3 hrs./wk.

BUS 145
Small Business Management (3 CR)
Upon successful completion of this course, the student should be able to demonstrate an understanding of management techniques vital to small business. In addition, the student should be able to apply decision making skills in the areas of business start-up choosing the form of ownership, marketing, financial planning and managing the small business.

BUS 150
Business Communications (3 CR)
Prerequisite: ENGL 121
Upon successful completion of this course, the student should be able to explain the role of communication in the business environment and identify the most effective methods for creating, sending and receiving messages. In addition, the student should be able to use effective oral and written communication skills in business; write and evaluate business documents, including letters, memos, and reports using the principles of correct style, organization and format; and prepare an effective oral business presentation. 3 hrs./wk.

BUS 215
Savings and Investments (3 CR)
Upon successful completion of this course, the student should be able to define,
analyze and evaluate types of savings instruments and other investments. In addition, the student should be able to determine which instruments are desirable for a personal financial plan. The student should also be able to demonstrate an understanding of basic financial-planning concepts and tax-planning procedures. 3 hrs./wk.

**BUS 225**  
**Human Relations** (3 CR)  
Upon successful completion of this course, the student should be able to evaluate the impact of human relations as it relates to the social system, technical system and administrative system of a work environment. In addition, the student should be able to analyze these systems and their effects on individual group and organizational performance. 3 hrs./wk.

**BUS 230**  
**Marketing** (3 CR)  
Upon successful completion of this course, the student should be able to explain the concepts of production, consumption and distribution in relation to a free enterprise economy; list the basic channels of distribution available to the manufacturer of consumer and industrial products; explain and compare the distribution functions of the manufacturer, wholesaler and retailer; and state the procedures necessary to develop a total marketing plan for a given product, service or product line. In addition, the student should be able to discuss the fundamental principles of consumer behavior in the buying process and apply those principles to target market strategies. 3 hrs./wk. BUS 230 is the same course as MKT 230; do not enroll in both.

**BUS 235**  
**Introduction to International Business** (3 CR)  
This course is designed to introduce the student to the global economy. Differences in political, economic and cultural forces within countries will be analyzed and national competitiveness assessed. Cross-border trade and investment and the global monetary system will be introduced and analyzed. Competition and a firm's international business strategy in the global marketplace will be examined. Ethical issues in international business will also be discussed. 3 hrs./wk.

**BUS 240**  
**Legal Environment of International Business** (3 CR)  
*Prerequisites: BUS 235 and BUS 261 and BUS 263*  
This course provides an introduction to the legal aspects of contracts for international sale of goods. Topics include multinational enterprises, sovereignty, international finance, international transportation, international marketing, protection of intellectual property, international dispute resolution, negotiation and diplomacy. 3 hrs. lecture/wk.

**BUS 243**  
**Human Resource Management** (3 CR)  
Upon successful completion of this course, the student should be able to state the principles of human resource management; describe the human resource function as an integral part of management; differentiate between roles of the personnel and line manager in the management of human resources; define and evaluate strategic planning, recruitment, selection and training; define the primary methods of human resource development; employ methods of employer appraisal; and state the major components and coverages of the Equal Employment Opportunity Act and other personnel/human resource-related laws. 3 hrs./wk.
BUS 261  
Business Law I (3 CR)  
This course is designed to introduce the students to the American legal system. Principles of legal ethics in business will be introduced. Principles of common law of contracts will be discussed. Sections of Uniform Commercial Code as applied to the law of sales and law of negotiable instruments will be introduced. 3 hrs./wk.

BUS 263  
Business Law II (3 CR)  
Prerequisite: BUS 261  
A continuation of Business Law I, this course will introduce the student to the principles of Uniform Commercial Code as applied to secured transactions. The law of bankruptcy, principles of agency and business organizations such as partnerships, limited partnerships, joint ventures, corporations, and sole proprietorships will be discussed. Principles of real property, personal property, bailments, estate and trusts will be introduced. 3 hrs./wk.

Business Logistics Management (KSCL)  
KSCL 210  
Logistics Management (3 CR)  
Logistics management is an integrated systems approach involving a variety of environments within a global marketplace. The course explores the logistic system from inbound movement of material and freight into the organization through physical distribution of the completed product to the consumer. Hands-on applications, activities and simulations. IAW Council of Logistics Management's guidelines will be emphasized. 3 hrs. lecture/wk. Course taught at MCC-Blue River Community College, 20301 East 78 Highway, Independence, MO. Students should contact the Blue River coordinator of supply chain logistics about the class meeting times and beginning and ending dates of classes. Call 816-220-6532.

KSCL 211  
Operations Management (3 CR)  
This course covers the central role and importance of the operations function in both service and product organizations. Strategy, design, scheduling, materials handling, inventory, production, MRP and distribution are covered. 3 hrs. lecture/wk. Course taught at MCC-Blue River Community College, 20301 East 78 Highway, Independence, MO. Students should contact the Blue River coordinator of supply chain logistics about the class meeting times and beginning and ending dates of classes. Call 816-220-6532.

KSCL 212  
Transportation Operations and Management (3 CR)  
This course covers the significance of an integrated, well-organized transportation system to a market-driven economy. The development of the transportation system of the United States from both historic and economic perspectives is included. 3 hrs. lecture/wk. Course taught at MCC-Blue River Community College, 20301 East 78 Highway, Independence, MO. Students should contact the Blue River coordinator of supply chain logistics about the class meeting times and beginning and ending dates of classes. Call 816-220-6532.

KSCL 213  
Warehousing and Distribution Centers (3 CR)  
This is an integrated systems approach involving a variety of environments within a global marketplace. The course covers the organization and operations of warehouses and distribution centers. The major components are warehousing
and distribution center paradigms, system design, locations, technology and financial dimensions. 3 hrs. lecture/wk. Course taught at MCC-Blue River Community College, 20301 East 78 Highway, Independence, MO. Students should contact the Blue River coordinator of supply chain logistics about the class meeting times and beginning and ending dates of classes. Call 816-220-6532.

Business Office Technology (BOT)

BOT 101
Computerized Keyboarding (1 CR)
Upon successful completion of this course, the student should be able to operate a computer keyboard by touch to enter data with speed and accuracy. 1 hr./wk.

BOT 103
Business English (3 CR)
Upon successful completion of this course, the student should be able to demonstrate the basic rules of English, develop correct sentence structure and use accurate English grammar and mechanics when writing documents. Students also will be able to proofread written work using standard proofreading symbols. 3 hrs. lecture/wk.

BOT 105
Keyboarding and Formatting I (3 CR)
Upon successful completion of this course, the student should be able to develop speed and accuracy by learning to use the alphabetic, numeric and symbol keys by touch; identify and operate the basic machine parts and special purpose keys; and format and type personal correspondence and business documents - letters, reports, tables and memos. Microsoft Word will be used in this class to complete and format documents. 3 hrs./wk.

BOT 106
Intro to Business Computer Applications (3 CR)
Prerequisite or corequisite: BOT 105
Upon successful completion of this course, the student should be able to use the beginning features of an operating system and word processing, spreadsheet, database management, presentation graphics, and e-mail programs to prepare and manage documents simulating legal, medical and general business office applications. Proficiency will also be attained in selecting appropriate applications to use and to integrate all of the business computer application programs to complete projects. Document formatting and proofreading will also be introduced. Hands-on, practical projects will be performed to reinforce the concepts taught. 3 hrs. lecture/wk.

BOT 110
Skillbuilding I (1 CR)
Prerequisite: BOT 105
Upon successful completion of this course, the student should be able to use a diagnostic approach to develop typing speed and accuracy. Specific problems will be identified, and the student should be able to complete specialized drills and activities tailored to the student's own typing needs to improve or eliminate deficiencies. 1 hr./wk. Students attempting to take the short-term classes BOT 110 Skillbuilding I and BOT 118 Skillbuilding II in the same semester, should contact Kathy at 913-469-8500 ext 3145, and provide their student ID number and the CRN for the specific BOT 118 section.
BOT 115
Electronic Calculators (1 CR)
Upon successful completion of this course, the student should be able to review basic arithmetic, operate the electronic calculator by touch to build speed and accuracy, use basic calculator functions and operating controls, and solve business application problems. 1 hr./wk.

BOT 118
Skillbuilding II (1 CR)
Prerequisite: BOT 110
Upon successful completion of this course, the student should further develop speed and accuracy. The student should be able to improve keyboard skills through diagnostic evaluation and by completing individualized drills and activities. 1 hr. lecture/wk. Students attempting to take the short-term classes BOT 110 Skillbuilding I and BOT 118 Skillbuilding II in the same semester, should contact Kathy at 913-469-8500 ext 3145, and provide their student ID number and the CRN for the specific BOT 118 section.

BOT 122
Medical Keyboarding (1 CR)
Prerequisite: BOT 105
Upon successful completion of this course, the student should be able to develop keyboarding speed and accuracy in medical formats. The student should also be able to improve keyboard skills by completing drills and activities pertaining to the transcription of medical reports. 1 hr. lecture/wk.

BOT 125
Document Formatting (1 CR)
Prerequisite: BOT 155
Upon successful completion of this course, the student should be able to type business letters with special features, memorandums, reports, tables and a variety of administrative documents. The student should also be able to use Microsoft Word to complete these activities. 1 hr./wk.

BOT 130
Office Systems Concepts (3 CR)
Upon successful completion of this course, the student should be able to understand and apply technological factors of contemporary office systems. Implementation of office automation concepts will be examined as they relate to people, technology and organizations. These concepts will be applied to organizational and strategic planning to enhance productivity in the office. 3 hrs./wk.

BOT 150
Records Management (3 CR)
Methods for developing and controlling an office records management program will be discussed. Selection of equipment for active and inactive records will be covered, along with procedures for document, card and special records; microrecords; mechanized and automated records; and records storage, retention and transfer. Upon successful completion of this course, the student should be able to file documents using alphabetic, subject, consecutive numeric, terminal digit numeric and geographic filing systems using requisition charge out and transfer procedures. The student should be able to create a computer database for records management; enter, modify and delete records; print reports; and
determine disposition of records filed alphabetically, numerically, by subject and geographically. The course will cover the identification of evaluation methods and standards for both staff and programs in a records management department. 3 hrs./wk.

BOT 155  
**Word Processing Application I** (2 CR)  
*Prerequisites:* BOT 105 and BOT 106  
Upon successful completion of this course, the student should be able to demonstrate skill in creating, saving, opening, closing, printing and editing documents. The student should be able to use beginning and intermediate features of Microsoft Word. The student should be able to demonstrate file maintenance procedures. 2 hrs. lecture/demonstration/wk.

BOT 160  
**Legal Transcription** (3 CR)  
*Prerequisite:* BOT 155  
Upon successful completion of this course, the student should be able to demonstrate skill in spelling, defining, pronouncing and using legal terms in proper context. The student should also be able to use legal reference resources and transcribe legal documents from dictation using proper formatting rules. 3 hrs./wk.

BOT 165  
**Medical Transcription** (3 CR)  
*Prerequisites:* AAC 130 and BOT 155  
Upon successful completion of this course, the student should be able to transcribe medical reports using proper formats and transcription rules. These reports concern in-patients with a specific medical problem. Reports include history and physical examinations, radiology reports, operative reports, pathology reports, requests for consultation, death summaries, discharge summaries and autopsy reports. Students should be able to spell, define, pronounce and use medical terms in proper context and be able to use medical reference books. 3 hrs./wk.

BOT 170  
**Medical Coding and Billing** (3 CR)  
*Prerequisite:* AAC 130  
This course is designed to give the student an overview of the medical insurance billing process. This includes becoming acquainted with ICD-9, HCPCS and CPT procedural coding systems as well as Blue Cross/Blue Shield, Medicaid, Medicare and Champus/Champva programs. Students will be given hands-on coding advice for optimal insurance reimbursement. 3 hrs. lecture/wk.

BOT 180  
**Business Spreadsheet Applications** (1 CR)  
*Prerequisite:* BOT 106  
Upon successful completion of this course, the student should be able to demonstrate competencies in using advanced formatting techniques, advanced features and advanced functions of Microsoft Excel. The following topics will be covered: working with templates, workbooks and lists; using Excel's analysis tools; managing and auditing worksheets; collaborating with workgroups; creating and editing macros; and importing and exporting data. 1 hr. lecture/wk.
**BOT 185**  
**Business Database Applications** (1 CR)  
*Prerequisite: BOT 106*  
Upon successful completion of this course, the student should be able to demonstrate database development skills by effectively identifying the types of projects that should be developed using Microsoft Access rather than a spreadsheet; build tables that can be related to each other in order to eliminate data entry duplication; customize forms and reports; create basic and advance queries; and define relational integrity between tables. The student should also be able to create basic and advanced queries with single and multiple tables using Boolean logic. The student should be able to identify and implement methods of troubleshooting and explain ways of getting additional help. 1 hr. lecture/wk.

**BOT 205**  
**Professional Image Development** (1 CR)  
Upon successful completion of this course, the student should be able to develop work habits and self-management skills that will affect performance on the job by reducing stress, conflict and miscommunication. 1 hr. lecture/wk.

**BOT 220**  
**Pharmacology Terminology** (2 CR)  
*Prerequisite: AAC 130 This course is offered in the spring semester only.*  
Upon successful completion of this course, the student should be able to use pharmacological terminology in an appropriate context. This course includes an investigation of medication actions, dosage forms, routes of administration and uses. The course emphasizes the terminology necessary for transcription of medical reports. This course is taught in the spring semester. 2 hrs. lecture/wk.

**BOT 255**  
**Word Processing Applications II** (2 CR)  
*Prerequisite: BOT 155*  
Upon successful completion of this course, the student should be able to demonstrate word processing skills using such features as macros, styles, tables of contents and indexes, graphics, master and subdocuments, and other advanced features of Microsoft Word. 2 hrs. lecture-demonstration/wk.

**BOT 260**  
**Desktop Publishing for the Office** (3 CR)  
*Prerequisite: BOT 155*  
Upon successful completion of this course, the student should be able to use desktop publishing skills using Microsoft Publisher to produce publications such as fliers, newsletters, brochures, operating manuals, price lists and bulletins. 3 hrs. lecture/demonstration/wk.

**BOT 265**  
**Computerized Office Applications** (3 CR)  
*Prerequisites: BOT 106 and and BOT 255 and BOT 130 (This capstone course should be taken near the end of the degree or certificate program) This course is offered in the spring semester only.*  
Upon successful completion of this course, the student will be able to use the basic features of word processing, database, spreadsheet and presentation applications. The student will also use advanced features to complete simulated office applications and to perform multitasking projects. This course is taught in
the spring semester. 3 hrs./wk.

**BOT 270**  
**Advanced Medical Transcription** (3 CR)  
*Prerequisite: BOT 165*  
Upon successful completion of this course, the student will develop medical transcription skills with emphasis on additional speed and accuracy. Students will apply language skills, decision-making skills and "common-sense" skills during the transcription process. Students will become familiar with the medical transcription profession, employment opportunities, the important role of the medical transcriptionist in the health care team, and personal attributes, knowledge and skills required to produce error-free documents according to the employer’s and AAMT standards. 3 hrs. lecture/wk.

**BOT 275**  
**Office Internship I** (1 CR)  
*Prerequisite: Admission to the business office technology program. This course should be taken near the end of the BOT degree or certificate program.*  
The student should be able to gain work experience in an approved training station under instructional supervision in Administrative Assistant, Medical, Legal, or Certificate Programs. The course will provide practical experience in the use of skills acquired in Business Office Technology specialty courses. The internship will require a minimum of 185 hours of job training.

**BOT 280**  
**Office Internship II** (1 CR)  
*Prerequisite: BOT 275*  
The student should be able to gain work experience in an approved training station under instructional supervision in Administrative Assistant, Medical, Legal, or Certificate Programs. The course will provide practical experience using skills acquired in Business Office Technology courses. The internship will require a minimum of 185 hours per semester job training.

**Chemistry (CHEM)**

**CHEM 120**  
**Chemistry in Society** (4 CR)  
This course is designed for non-science majors who seek an understanding of the concepts of chemistry. Historical foundations of chemistry, applications to society and daily life, controversies of contemporary concern and current research topics are explored. Inquiry-based laboratory experiments will illustrate chemical principles. 3 hrs. lecture, 2 hrs. lab/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $60.

**CHEM 122**  
**Principles of Chemistry** (5 CR)  
This course is an introduction to the fundamentals of chemistry, with emphasis on general concepts of inorganic chemistry and sufficient study of organic chemistry to introduce the student to biochemistry. The student will learn basic definitions and theories of chemistry, solve numerical problems related to chemical principles and apply chemical concepts in laboratory work. 4 hrs. lecture, 3 hrs. lab/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $60.
CHEM 124
General Chemistry I Lecture (4 CR)
Prerequisite or corequisite: MATH 171 or assessment test and Corequisite: CHEM 125
Students will relate atomic structure to chemical systems, calculate the amount of material used in chemical reactions, use the periodic table as an aid to understanding chemical systems and interpret chemical reactions. 5 hrs. lecture/wk.

CHEM 125
General Chemistry I Lab (1 CR)
Prerequisite or Corequisite: CHEM 124 Students who withdraw from GENERAL CHEMISTRY I LECTURE must also withdraw from the corresponding laboratory GENERAL CHEMISTRY I LABORATORY Students may not withdraw from the laboratory course GENERAL CHEMISTRY I LABORATORY without withdrawing from CHEMISTRY I LECTURE.
Experiments of a qualitative and quantitative nature that support topics from General Chemistry I Lecture will be carried out. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $60.

CHEM 131
General Chemistry II Lecture (4 CR)
Prerequisites: CHEM 124 and CHEM 125 and Corequisite: CHEM 132
Chemistry 131 is the second semester of a two-semester course in general chemistry in which the student will develop a working knowledge of some of the fundamental concepts and quantitative relationships involved in the study of chemical reactivity. Topics include solutions, chemical kinetics, chemical equilibrium, acid-base chemistry, chemical thermodynamics, electrochemistry, and nuclear chemistry. 4 hrs./wk. CHEM 131 students are required to enroll concurrently in CHEM 132.

CHEM 132
General Chemistry II Lab (1 CR)
Prerequisites: CHEM 124 and CHEM 125 and Corequisite: CHEM 131 Students who withdraw from GENERAL CHEMISTRY II LECTURE must also withdraw from the corresponding laboratory GENERAL CHEMISTRY II LABORATORY Students may not withdraw from the laboratory course GENERAL CHEMISTRY II LABORATORY without withdrawing from CHEMISTRY II LECTURE.
The laboratory consists of qualitative and quantitative experiments designed to parallel and support General Chemistry II Lecture. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $60.

CHEM 140
Principles of Organic & Biological Chemistry (5 CR)
Prerequisites: BIOL 135 and CHEM 122 or permission of the assistant dean
This course covers nomenclature, theory and applications of basic organic chemistry and biochemistry in the area of carbohydrates, lipids, proteins and enzymes. The lab activities reinforce the topics presented in the lecture. 4 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $80.

CHEM 220
Organic Chemistry I (5 CR)
Prerequisites: CHEM 131 and CHEM 132

Organic Chemistry I is an introduction to the theories and principles of the chemistry carbon compounds. The student will develop an understanding of organic chemistry, which will be useful in the studies of chemistry and related fields such as medicine, engineering and pharmacy. The laboratory is supportive in nature, with a strong emphasis on developing laboratory techniques. Representative compounds will be prepared and used to introduce the student to instrumental analysis. 3 hrs. lecture, 6 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $80.

CHEM 221
Organic Chemistry II (5 CR)
Prerequisite: CHEM 220

Organic Chemistry II is a continuation of Organic Chemistry I, the nomenclature, principles and theories of organic chemistry, with emphasis on electronic theories and reaction mechanisms. Laboratory is supportive in nature with emphasis on developing laboratory techniques and preparation of representative compounds. Organic Chemistry II completes the study of organic chemistry designed to prepare the student for continued work in chemistry and related fields. 3 hrs. lecture, 6 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $80.

CHEM 250
Biochemistry (4 CR)
Prerequisites: CHEM 131 and CHEM 132 and CHEM 140 or CHEM 220

This course is an introduction to the major topics in biochemistry. Topics include the major classes of biological molecules, such as proteins, lipids and nucleic acid; an overview of the major metabolic pathways; and developments and topics relating to molecular biology. 4 hrs. lecture/wk.

CHEM 251
Biochemistry Laboratory (2 CR)
Prerequisites: CHEM 131 and CHEM 132 and CHEM 140 or CHEM 220
Corequisite: CHEM 250

The laboratory will consist of qualitative and quantitative experiments using biological molecules. Particular emphasis upon biochemistry laboratory techniques, including chromatography and spectroscopy, will be used. 3 hrs. lab, 1 hr. recitation/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $60.

Civil Engineering Technology (CET)

CET 105
Construction Methods (3 CR)

This course introduces the student to the terms, methods, procedures, sequences of operation, and types of construction and planning in civil and building construction. This course is typically offered the first half of each semester. 3 hrs./wk.

CET 120
Engineered Plumbing Systems I (3 CR)

Upon successful completion of this course, the student should be able to use codes and engineering principles and design engineering practices to analyze and
design basic plumbing systems. Topics covered include codes, materials, hangers, supports, and expansion and contraction. Plumbing systems covered include fuel gas, domestic water and soil waste/vent. The student should also be able to interpret drawings related to plumbing technology. 3 hrs. lecture/wk.

CET 122  
**Engineered Plumbing Systems II (3 CR)**

Upon successful completion of this course, the student should be able to describe storm water, industrial wastes, compressed air and irrigation and fire sprinkler systems. Topics include water treatment, noise control, decorative pools, pumps, estimating, specifications and field inspection. 3 hrs. lecture/wk.

CET 125  
**Construction Specifications (2 CR)**

*Prerequisite or corequisite: CET 105 or equivalent*

Upon successful completion of this course, the student will be able to describe the phases of a project, identify the bidding requirements, explain contractual relationships between parties, categorize the drawings, write specifications, list warranties and explain contract modifications. 2 hrs. lecture/wk.

CET 129  
**Construction Management (3 CR)**

This course is intended for students interested in learning management principles for construction projects. Upon successful completion of this course, the student should be able to perform many processes associated with construction projects and complete forms typically used in project management. Topics include contract documents, scheduling, job costs and management issues. Project management software will be used to schedule and track project resources and progress. 2 hrs. lecture, 3 hrs. lab/wk.

CET 133  
**Concrete Testing (2 CR)**

This course covers the principles of making and testing concrete. The emphasis will be on allowing concrete to reach the highest level of durability through proper mix design, placing and finishing techniques, and curing methods. This course will help prepare the student for ACI National Certification exam. 1.5 hrs. lecture, 1 hrs. lab/wk.

CET 140  
**Civil Engineering Materials (3 CR)**

*Corequisite: MATH 133*

Upon successful completion of this course, the student will be able to analyze materials commonly used in civil engineering construction projects. Common properties of soil, concrete and asphalt will be studied for classification as engineering materials. Students will learn to perform typical materials tests in accordance with ASTM guidelines. This course is typically offered in the spring semester. 2 hrs. lecture, 3 hrs. lab/wk.

CET 150  
**Construction Safety (3 CR)**

This course introduces the student to construction safety policies, procedures, and standards. Topics include safety theories and concepts, OSHA (Occupational Safety and Health Administration) construction standards for safety
and health, and safety application on the job site. Special emphasis is placed on those areas that are the most hazardous, using OSHA standards as a guide. Upon successful completion of the course, the student will receive the 30-hour OSHA Construction Safety Completion certificate. 3 hr. lecture/wk.

CET 211
Technical Statics and Design (3 CR)
Prerequisite: MATH 134 or MATH 172 or MATH 173 or MATH 241
Upon successful completion of this course, the student should be able to evaluate and design force systems in equilibrium. Topics include truss analysis, stress and strain, shear, loading conditions, steel member selection, and connection design. Computer applications are included. This course is typically offered in the fall semester. 3 hrs. lecture/wk.

CET 227
Construction Cost Estimating (3 CR)
Prerequisites: CET 105 and CET 125 or permission of program administrator and CET 125 or permission of program administrator
This course adds to the student's knowledge of the construction process by covering the principles of construction estimating. Topics include estimating quantities of material using reference books, tables and the Construction Specifications Institute (C.S.I.) format and preparing estimating reports. Students will use industry-standard software for construction estimating. The student needs a basic knowledge of spreadsheet software to be successful in this course. This course is typically taught on campus in the fall and online in the spring. 2 hrs. lecture & 3 hrs lab/wk.

CET 270
Fluid Mechanics (3 CR)
Prerequisites: MATH 172 or MATH 134
Upon successful completion of this course, the student should be able to analyze fluid systems using the fundamental properties of pressure, hydrostatic force, buoyancy, flow in pipes, open channel flow and hydrology. The student should also be able to solve practical problems related to engineering technology. Computer applications will be included. This course is typically offered in the spring semester. 3 hrs. lecture/wk.

Computer Desktop Publishing (CDTP)

CDTP 135
Desktop Photo Manipulation I: Photoshop (1 CR)
In this career-related short course, students will manipulate digital photographs and images using a variety of basic techniques on either the Macintosh or PC computer platform. Students will apply techniques to correct, repair, retouch, create selections, and work with layers on a variety of digital photographs and images, including basic scanning techniques. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $20.

CDTP 140
Desktop Publishing I: InDesign (1 CR)
In this career-related course, students will create page layout documents using a variety of basic techniques on either the Macintosh or PC computer platform. Students will produce text material with complex tabs and indents and style attributes. Upon successful completion of the course, students will also be able to
group and distribute multiple elements and demonstrate a basic proficiency with drawing tools, multiple document work, drop caps, text rotation, locking items and threading text blocks. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $90.

CDTP 145
Desktop Illustration I: Illustrator (1 CR)
In this career-related course, students will create basic computer-generated illustrations using a variety of techniques on either the Macintosh or Windows PC computer platform. Students will draw simple paths and shapes, create layers, import graphics and add typographic elements in rows and columns with runarounds, baseline shifts and conversion to outlines. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $90.

CDTP 155
Desktop Photo Manipulation II: Photoshop (1 CR)
Prerequisite: CDTP 135
In this career-related short course, students will manipulate digital photographs and images using a variety of introductory to intermediate techniques on either the Macintosh or PC computer platform. Students will apply techniques to edit masks and channels, process and enhance multiple image file formats, group and apply adjustments to layers, automate common tasks, create composite images, learn and apply intermediate scanning techniques, and apply multiple creative and adjustment filters on a variety of digital photographs and images. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CDTP 160
Desktop Publishing II: InDesign (1 CR)
Prerequisite: CDTP 140
In this career-related course, students will create intermediate-level page layout documents using a variety of techniques on either the Macintosh or PC computer platform. Students will learn how to work with type styles, threads, columns, special characters, hanging indents, vertical spacing and tables as well as exploring PDF files. Students will also be able to master several aspects of working with graphic images: placing images, linking, clipping paths, libraries, grids, Bezier drawing, compound paths and reflections. Finally, students will work with advanced framing techniques to nest frames within shapes. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $90.

CDTP 165
Desktop Illustration II: Illustrator (1 CR)
Prerequisite: CDTP 145
In this career-related course, students will create intermediate-level computer-generated illustrations using a variety of techniques on either the Macintosh or PC computer platform. Students will trace an object, create complex gradients with custom blends, create complex objects receding toward a vanishing point, and create an orthogonal projection to simulate depth. 1 hr. lecture /wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $90.

CDTP 168
Desktop Publishing III: InDesign (1 CR)
Prerequisite: CDTP 160
In this career-related course, students will create advanced-level page layout documents using a variety of techniques on either the Macintosh or PC computer
platform. Students will learn how to work with advanced color specifications, transparency blending modes, long document organization, and brochure layout production art. 1 hr. lecture/wk.

CDTP 175
Desktop Photo Manipulation III: Photoshop (1 CR)
Prerequisite: CDTP 155
In this career-related short course, students will manipulate digital photographs and images using a variety of beginning, intermediate and advanced techniques on either the Macintosh or PC computer platform. Students will apply techniques to create and design typographic elements, use vector drawing techniques, prepare images for print, optimize images for web output, and use a digital photo preparation workflow on a variety of digital photographs and images, including scanned images. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CDTP 180
Photoshop for the Web: Photoshop (1 CR)
Prerequisite: CDTP 155
This course is designed to explore the preparation of digital photographs and images for the Web using a variety of techniques and tools. Optimizing images for the Web, creating Web graphics using slices and rollovers, and creating animated images for the Web will be covered. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $90.

CDTP 185
Desktop Illustration III: Illustrator (1 CR)
Prerequisite: CDTP 165
In this career-related course, students will create advanced computer-generated illustrations using a variety of techniques on either the Macintosh or PC computer platform. Students will create charts, autotrace scanned images, fill objects with various pen-and-ink filter effects and create an image map for the Web. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $90.

Computer Digital Image Editing (CDIE)

CDIE 145
Digital Image Editing I (3 CR)
Prerequisites: CPCA 105 or CPCA 106 or CIS 124 or CPCA 128 or an appropriate score on an assessment test
This course is designed to present the skills and provide the hands-on experience required for digital image production and manipulation using the industry-standard Adobe Photoshop for both Macintosh and Windows OS users. Topics covered include: image correction, repair and adjustment; composite images; raster and vector graphics and type; print and screen graphical file formats; basic color management; layer, channel and mask manipulation; Web graphic preparation; editing 3D and motion-based content; image analysis; actions and other presets; and filters. In this course, students will complete several complex original Photoshop documents that demonstrate skills to effectively scan images, restore and repair photographs; correct image tone and color; optimize the quality of onscreen and printed materials and study the topics covered on the Adobe Photoshop certified expert exam in Adobe Photoshop (ACE). 3 credit hours lecture, discussion, demonstration per week.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.
Computer Forensics (CFOR)

CFOR 150
Introduction to Computer Forensics (3 CR)
Prerequisites: CIS 134 and CPCA 139 and assistant dean's approval
In this course, students are introduced to computer forensics and incident response essentials. This course shows the student how to collect and analyze the digital evidence left behind in a digital crime scene. Computer forensics, the newest branch of computer security, focuses on the aftermath of a computer security incident. The goal of computer forensics is to conduct a structured investigation to determine exactly what happened and who was responsible and to perform the investigation in such a way that the results are useful in a criminal proceeding and to lay the foundation for further study of computer forensics. 3 hrs. lecture/wk.

CFOR 180
File Structure & Residual Artifacts (3 CR)
Prerequisite: CFOR 150
This course provides the basic understanding of how computers 'see' data and manage its storage. While covering physical device concepts, students will learn the boot process of a computer. The FAT file system will then be described in terms of system areas created during the format process, the File Allocation Table and its function and detailed information regarding saving files and directories - to include a full breakdown of directory entries. In addition, concepts of clusters and file slack space will be covered and led into how to identify the affects of deleting files and forensic issues surrounding their recovery. The students will learn how to use hardware and software write protection tools to create duplicate images of hard disk drives, USB thumb drives and other alternate media. Mastery of technical knowledge will be combined with problem-solving skills to aid students in developing creative and adaptive responses to future changes in technology. This course meets for two hours of lecture and two hours of laboratory each week. 2 hrs. lecture 2 hrs. lab/wk.

Computer Information Systems (CIS)

CIS 124
Introduction to Computer Concepts and Applications (3 CR)
In this introductory, nontechnical computer course, students study computing concepts, terminology, issues and uses. Extensive hands-on experience with the microcomputer is provided using business applications and the operating system to reinforce the concepts. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $15.

CIS 134
Programming Fundamentals (4 CR)
At the completion of this course, the student should be able to use the elementary concepts of computers, including several number systems. In addition, students will design, develop and write modular programs on a microcomputer in a structured programming language using standard structured concepts. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 138
Visual Basic .Net (4 CR)
Prerequisite: CIS 134
Upon successful completion of this course, students should be able to describe the Visual Basic programming environment, identifying the controls and objects available for creating .NET applications. Students should be able to define the basic terminology used by Visual Basic. They will create forms, draw the controls for each form, design menu bars, set form and control properties, write event and general procedures, and test and debug their applications. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 162
Database Programming (4 CR)
Prerequisite: CIS 134 or the equivalent
This course covers the use of an interactive environment and programming language to create, maintain and manipulate databases using Access as the RDBMS. The use of a command-level database programming language to customize business systems and selectively retrieve information using single or multiple database tables also will be studied. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 201
Introduction to Information Systems (3 CR)
Prerequisite: ACCT 121
This course is an introduction to the use of computers in management, concepts of computer software, hardware, and systems analysis. Applications will include electronic spreadsheets, database management software, graphics and presentation tools, and other special purpose tools. Word processing tools will be used for most graded assignments. Programming will be studied in the context of spreadsheet macros. 3 hrs. lecture/wk.

CIS 204
UNIX Operating System (3 CR)
Prerequisites: CS 200 or CS 205 or CS 201 and CPCA 139
This course will cover the concepts and principles of the multi-user, multi-tasking UNIX operating system. Students will complete projects in UNIX ranging from using simple commands to writing shell scripts automating repetitive tasks. 3 hrs. lecture/wk.

CIS 206
Programming in PERL (4 CR)
Prerequisites: CS 200 or CS 205 or CS 201 and CPCA 139
This course is an in-depth introduction to the Perl scripting language. Students successfully finishing the course should be familiar with the most common operations and language idioms used in Perl programs and should be able to produce useful Perl scripts. In addition, students will have been introduced to the more powerful and rich elements of the language. Lectures and lab projects will cover the many features of the Perl language. 3 hrs. lecture, 1.5 hrs. lab/wk.

CIS 223
Law Office Computing (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program and either CIS 124 or CPCA 128 or three hours of CPCA 108 and CPCA 110 and CPCA 114
Upon successful completion of this course, the student should be able to evaluate and use legal software to perform customary law office procedures including computer litigation support, drafting and editing of specific legal documents,
document and file management, time-keeping and billing, docket control, and forms generation. This course is only open to LAW students. 3 hrs. lecture/wk. CIS 223 and LAW 223 are the same course.

CIS 235
Object-Oriented Programming Using C++ (4 CR)
Prerequisite: CS 200 using C++
This course is intended to prepare students to apply the object-oriented programming paradigm to solve typical business problems. The student should work with container classes such as Linked Lists, Trees, Stacks and Queues as tools in their program solutions. Students will be building application-oriented objects using the concepts of inheritance, function overloading and polymorphism. Students will also apply techniques of dynamic memory to build arrays and objects that can adjust memory requirements at run time. Students will be exploring the object-oriented and I/O capabilities as well as the string processing capabilities of the object-oriented language. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 238
Visual Basic Intermediate Topics (4 CR)
Prerequisite: CIS 138
Upon successful completion of this course, students should be able to write and test a Visual Basic program that uses the ADO.NET to access a local database. They will identify the commands necessary to open, display and maintain the database. They will correctly use Visual Basic keystroke events to edit and control input to the database. Students will use the Try Catch Error trapping structures to create robust projects. Students will generalize code for reuse. They will create a .Net component to coordinate a TextBox and ListBox that can be deployed from the ToolBox. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 240
Advanced Topics in JAVA I (4 CR)
Prerequisite: CS 250 or CIS 235 or CS 255
At the completion of this course, the student should be able to create Java applications and applets appropriate for implementation on the Internet and World Wide Web. The student will complete projects using Java's built-in features. The course will include graphics, graphical user interfaces, exception handling, multi-threading and interactive media. 3 hrs. lecture, 2 hrs. lab/wk.

CIS 242
Introduction to System Design and Analysis (3 CR)
Prerequisite: CIS 138 or CS 200 or CS 201 or CS205
Students will study the basic philosophy and techniques of developing and using business information systems. The emphasis will be on the human involvement necessary in systems design and implementation. The course will address the use of specific technical approaches available in information processing. 3 hrs. lecture/wk.

CIS 243
Object-Oriented Analysis and Design (4 CR)
Prerequisite: One programming course using an object-oriented programming language or equivalent experience
This course includes information and materials that will introduce the student to an object-oriented analysis and design methodology suitable for designing systems.
CIS 244
**Advanced Topics in C# I** (4 CR)
*Prerequisite: CS 250 or CIS 235 or CS 255*

At the completion of this course, the student should be able to create C# applications appropriate for implementation on the .NET platform. The student will complete projects using C#'s built-in features. The course will include graphics, graphical user interfaces, exception handling, multi-threading and database access. 3 hrs. lecture and 1.5 hrs lab/wk.

CIS 254
**UNIX System Administration** (4 CR)
*Prerequisite: CIS 204*

This course is designed to present the skills and provide the hands-on experience required to be a Unix system and Web administrator. Typical system administration duties to be covered include installation, backup, restoration and routine maintenance, including adding/removing users, managing system resources, monitoring and optimizing system activity, and automating activities. Typical Web administration duties to be covered include installation and management of a relational database management system, installation and management of a Web server and an FTP server, kernel recompiling relevant to Web technology, and audio/video streaming. 3 hrs. lecture, 2 hrs. lab/wk.

CIS 258
**Operating Systems** (3 CR)
*Prerequisite: CIS 138 or CIS 162 or CS 200 or CS 201 or CS 205*

The basic concepts and principles of a digital computer operating system will be explained. Also explored through a study of a typical digital computer operating system will be the relationships between hardware and software. 3 hrs. lecture/wk.

CIS 260
**Database Management** (4 CR)
*Prerequisite: CS 250 or CS 255 or CIS 235 or CIS 238 or CIS 248*

Characteristics and objectives of database management systems (DBMS) versus traditional file management systems are discussed. Topics include relational, hierarchical and network models; data modeling using entity-relational model; normalization to avoid modification anomalies; and operational considerations of a relational database. Students will create and use a relational DBMS (currently Oracle) and a Standard Structured Query Language (SQL). SQL*Plus and embedded SQL will be used in programs. 3 hrs. lecture, 2 hrs. lab/wk.

CIS 262
**Project Management** (3 CR)
*Prerequisite: CIS 242*

This course will prepare students to effectively manage projects, with a focus on information systems (IS) projects. Topics include project management terminology, project manager roles, project success factors, integration, scope, time, cost, quality, human resources, communications, risk, professional responsibility and procurement management. Using case studies, students will plan, schedule, execute and control projects, modifying their timelines and
CIS 264
Application Development and Programming (4 CR)
Prerequisites: CIS 242 and either CIS 260 or CIS 162 Prerequisites or Corequisites: CIS 238 or CIS 253 or CIS 269 or CIS 240 and CIS 262
This course is designed for students to apply the foundations of systems analysis and design, database design and programming to a significant information system. Students should work within a team to analyze a problem, develop and present a proposed information system solution, build a demonstrable prototype of the system and develop a significant portion of the system. Students should also develop a project schedule and present progress information to the class. Students should also develop job search skills and both written and oral communication skills. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 269
GUI Programming (4 CR)
Prerequisites: CIS 235 or CS 250
Upon completion of this course, students should be able to demonstrate applications in the graphical user interface (GUI) programming language and use the appropriate GUI library. Techniques of object-oriented programming developed in CIS 235 will be applied to problems involving user interaction. The common user access (CUA) standards of GUI programming will be used throughout the course. The message queue and ordered linked lists objects used in CIS 235 will be applied to problems involving user selection and updating information in a database. Students will make extensive use of the application framework for the GUI environment provided by the GUI language compiler. It is strongly recommended that students be familiar with common user programs that run under the chosen operating system (Windows, OS/2, X-Windows) before taking this course. 3 hrs. lecture, 2 hrs. lab by arrangement/wk.

CIS 270
Information Systems Internship (3 CR)
Prerequisites: CS 250 or CS 255 or CIS 235 or CIS 238 or CIS 248 and program facilitator approval
Students will work in an approved training situation under instructional supervision. The internship is designed to give the student the opportunity to use the skills learned in information systems courses. Fifteen hours on-the-job training per week will be the usual workload for the student.

CIS 275
Web-Enabled Database Programming (4 CR)
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162 and either CPCA 139 or CIS 204 and either CPCA 161 or CPCA 158
At the completion of this course, the student should be able to create dynamic Web pages containing information accessed from a database for implementation on the Internet and World Wide Web. The student will complete projects using Dynamic HTML and a scripting language that can interface with a database. The course will include graphics, graphical user interfaces, exception handling, database and interactive media. 3 hrs. lecture, 2 hrs. lab/wk.

CIS 277
Active Server Pages.Net (4 CR)
Prerequisites: CS 200 or CS 201 or CS 205 or CIS 162 and either CPCA 139 or CIS 204 and either CPCA 161 or CPCA 158
At the completion of this course, the student should be able to create dynamic Web pages containing information accessed from a database for implementation on the Internet and World Wide Web. The student will complete projects using ASP.Net objects, dynamic HTML and a scripting language that can interface with a database. The course will include graphics, graphical user interfaces, exception handling, database and interactive media. 3 hrs. lecture, 2 hrs. lab/wk.

CIS 279
Enterprise GUI Programming in C++ (4 CR)
Prerequisite: CIS 243 and CIS 269 and CIS 260
Students will learn advanced programming techniques for Windows, including enterprise software tools, advanced user-interface techniques, multimedia, ActiveX and Internet programming. The course project provides students with real-world development experience covering analysis, design and implementation of a large-scale development project using an object-oriented software development methodology, version control technique, advanced testing techniques, defect-tracking and technical documentation. 3 hrs. lecture, 2 hrs. lab/wk.

CIS 280
Advanced Topics in JAVA II (4 CR)
Prerequisite: CIS 240
At the completion of this course, the student should be able to create Java applications and applets that link to databases and provide the security and advanced GUI features appropriate for implementation on the Internet and World Wide Web. The student will complete projects using Java's built-in features. The course will include techniques for graphics optimization, building components for graphical user interfaces, client-server database connections in Java, handling security managers, building JAR files, using Java's remote objects and linking to other applications. 3 hrs. lecture, 2 hrs. lab/wk.

Computer Personal Computer App (CPCA)

CPCA 105
Introduction to Personal Computers: Windows (1 CR)
This introductory course is designed to give the beginning computer user an overview of the personal computer. The student will gain confidence in basic computer skills and concepts through a hands-on approach while becoming familiar with a microcomputer and its primary uses. Topics include computer software, hardware and terminology; an introduction to microcomputer operating systems; and the graphical user interface. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 106
Introduction to Personal Computers: Macintosh (1 CR)
This introductory course is designed to give the beginning computer user an overview of the Macintosh personal computer. The student will gain confidence in basic computer skills and concepts through a hands-on approach while becoming familiar with a Macintosh computer and its primary uses. Topics include computer software, hardware and terminology; as well as an introduction to the Macintosh operating system, word processing, drawing, spreadsheets and database management. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.
CPCA 108
Word Processing I: MS Word (1 CR)
Prerequisites: CPCA 105 or CPCA 106 or CIS 124 or CPCA 128 or appropriate score on a waiver test
Students will learn concepts and use of word processing software on the personal computer. Concepts covered will include creating, saving, printing and editing word processing files; searching and replacing text; creating headers and footers; inserting and resizing graphic images; setting up tables; creating and applying styles; and creating mail merge letters. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 110
Spreadsheets I: MS Excel (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CIS 124 or CPCA 128 or appropriate score on a waiver test
Students will learn concepts and uses of spreadsheet software on the personal computer. Business decision-making worksheet models will be created and modified by entering labels, functions and formulas. Various formatting techniques will be applied to enhance the appearance of printed worksheets. Students will also learn to display the worksheet data graphically with the charting capabilities of the software. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 111
Spreadsheets II: MS Excel (1 CR)
Prerequisite: CPCA 110 or CPCA 128
This course is a continuation of CPCA 110, Spreadsheets on the Microcomputer I, and will provide the student with intermediate level of spreadsheet concepts. Using typical business scenarios, the student will perform manual and automated "what-if" analyses, manage data in worksheets with tables and database functions, and use multiple worksheets to build consolidated statements. Basic macros will be introduced. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 114
Databases I: MS Access (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on a waiver test
This course provides an introduction to the concepts and real-world applications of microcomputer relational database software. Foundational database competencies, including building tables, defining fields, relating tables, entering and editing data, filtering, and sorting will be covered. Students will query the database to select, calculate and summarize information. Students will build and customize forms and reports. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 115
Databases II: MS Access (2 CR)
Prerequisite: CPCA 114
Upon completion of this course, the student should be able to design and define a relational database; create custom forms and reports for data entry, updating and presentation; and build the necessary queries to support these objects. The student should be able to transfer data into and out of the database from various file formats; use database software to develop Web pages and hyperlinks; and manipulate the data and database with introductory macro, query language and programming skills. The course contains a capstone project in which the student
uses all the skills learned to create a working database for a client based on a real-world situation. 2 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 117
Databases III: MS Access (1 CR)
Prerequisite: CPCA 115

Upon successful completion of this course, the student should be able to analyze an existing database solution that is not working properly, import the data into Access and use action queries and SQL to normalize the database into an effective rational database. A case study emphasis will cover different database design and documentation issues. Students will also build complex forms and reports using Visual Basic for Applications programming code. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 118
Groupware: Outlook (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on a waiver test

This course provides an introduction to the concepts and applications of today’s robust email systems. Students will use the application to compose, send and receive e-mail; post and organize discussion messages; manage calendars, appointments, tasks, to-do lists; use contact management features; and work with instant messaging. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 121
Introduction to Project Management (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate score on a waiver test

Upon completion of this course, the student should be able to effectively manage projects using project management software. Students will learn about project management goals and terminology, create a project schedule and use project management methodologies and tools such as the Gantt chart, critical path method (CPM) and program evaluation review technique (PERT) chart to update a project and communicate project progress to others. Students will use other project management techniques such as applying resources, leveling overallocations, evaluating constraints and analyzing planned versus projected schedule and budget variables. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 122
Assistive Technology (1 CR)

This introductory course is designed to give the student with or without disabilities an overview of the personal and the adaptive hardware and software available. The student will gain confidence in basic computer skills and concepts through a hands-on approach while becoming familiar with the adaptive software and hardware available on the campus. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 123
E-Presentation: MS PowerPoint (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CIS 124 or CPCA 128 or an appropriate score on a waiver test

Upon completion of this course, students should be able to organize and produce
an effective on-computer or slide-generated presentation, complete with printed
speaker notes and handouts plus overhead transparencies, using the basic
features of a presentation graphics program. Students will use master pages,
template files, text formatting, color schemes, various drawing tools, the
automated outline feature and animation dissolve sequence and incorporate
graphs. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CPCA 125  
Word Processing II: MS Word (1 CR)  
Prerequisite: CPCA 108  
This is a continuation of CPCA 108, Word Processing on Micros I. After
completing this course, students should be able to use advanced concepts and
applications of word processing software. The applications will include importing
graphics, creating reports, newsletters, footnotes and endnotes, styles, columns,
templates, macros, creating a Web page, on-screen forms, and linking and
embedding an object. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CPCA 128  
PC Applications: MS Office (3 CR)  
Upon successful completion of this course, the student should be able to use
Windows to create and organize files and folders and perform essential file
management procedures such as copying, moving, deleting and renaming files
and folders. An in-depth proficiency will also be attained with the use of word
processing, spreadsheet, presentation graphics and Internet browser applications.
Hands-on, practical projects will be performed to reinforce the concepts taught. 3
hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CPCA 134  
Managing Your Macintosh (1 CR)  
Prerequisite: CPCA 106 or an appropriate score on an assessment test
In this career-related course, students will be introduced through lecture material
and hands-on practical projects to the essential concepts of file organization,
utility software installation and use, font management and backup techniques. 1
hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CPCA 138  
Windows for Microcomputers (1 CR)  
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or an appropriate
score on an assessment test
At the completion of this course, the student will be able to discuss the
components of the Windows desktop, use the Windows Help system, create and
organize a folder system on a disk, perform file management commands,
customize the Windows desktop environment, use the Search tool to locate files
and folders, and perform file backup and disk maintenance procedures. The
student will also be able to use performance monitoring tools, add hardware and
software to the system, and use basic MS DOS directory and file management
commands.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CPCA 139  
UNIX (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or assessment test
This course will introduce students to the major commands of the Unix operating system. E-mail, the VI editor and Telnet will be covered. Basic file and disk management projects will be completed in this course. 1 hr. lecture/wk.

CPCA 141
Internet I (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or appropriate score on an assessment test
This course will introduce the student to the commands and techniques required to effectively access the resources of the Internet. Windows applications to browse the Internet, locate and retrieve information and send and receive electronic mail will be covered. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 151
Internet II (1 CR)
Prerequisite: CPCA 141 or an appropriate score on an assessment test
This course will cover the commands and techniques required to effectively use various Internet application tools. The student will also use Windows and non-Windows applications to locate information, download and upload files, and create a Web page. Additionally the course will cover basic LINUX commands and publish a Web page to a Web server. 1 hr. lecture/wk.

CPCA 158
Internet Application and Utilities (3 CR)
Prerequisite: CPCA 141 or an appropriate score on an assessment test
This course will introduce the student to the commands and techniques required to effectively access the resources of the Internet. Windows and non-Windows applications will be used to locate, retrieve and disseminate essential information. This course will cover the techniques required to create and publish World Wide Web pages using HTML. 3 hrs. lecture- demonstration/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CPCA 161
Introduction to Web Pages using HTML (1 CR)
Prerequisite: CPCA 151 or an appropriate score on an assessment test
This course will cover the commands and techniques required to create and publish World Wide Web pages using HyperText Markup Language. Topics covered will include basic text layout, background colors, formatting, ordered and unordered lists, tables, frames that include graphic images in a page and linking to other Web pages. 1 hr./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

Computer Science (CS)

CS 180
Introduction to Artificial Intelligence (3 CR)
Prerequisite: CIS 145 or CIS 148 or CIS 150 or CS 200
Upon successful completion of this course, students should be able to understand simple computer programs illustrating introductory concepts in artificial
intelligence, define terms and application areas in the field and describe
knowledge representation and problem-resolution techniques used in artificial
intelligence. 3 hrs. lecture/wk.

CS 200
Concepts of Programming Algorithms Using C++ (4 CR)
Prerequisite: CIS 134 or ENGR 171 or equivalent experience
This course emphasizes programming methodology and problem solving.
Algorithm design and development, data abstraction, good programming style,
testing and debugging will be presented. An appropriate block-structured
high-level programming language will be studied and used to implement
algorithms. 3 hrs. lecture, 2 hrs. lab by arrangement/wk. Four-credit-hour CS
courses have two hours of open lab per week.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $20 to $50.

CS 201
Concepts of Programming Algorithms using C# (4 CR)
Prerequisite: CIS 134 or ENGR 171 or equivalent experience
This course emphasizes programming methodology and problem-solving using
C#. Algorithm design and development, data abstraction, good programming
style, testing and debugging will be presented. 3 hrs. lecture, 1.5 hrs. lab/wk.
Four-credit-hour CS courses have two hours of open lab per week.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $20 to $50.

CS 205
Concepts of Programming Algorithms using JAVA (4 CR)
Prerequisite: CIS 134 or ENGR 171 or equivalent experience
This course emphasizes programming methodology and problem-solving using
Java. Algorithm design and development, data abstraction, good programming
style, testing and debugging will be presented. 3 hrs. lecture, 1.5 hrs. lab/wk.
Four-credit-hour CS courses have two hours of open lab per week.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $20 to $50.

CS 210
Discrete Structures I (3 CR)
Prerequisites: MATH 171 or both MATH 116 and CIS 134 or appropriate math
assessment scores
Upon successful completion of this course, the student should be able to use
fundamental discrete mathematics as it relates to computers and computer
applications. The student will be exposed to a variety of discrete mathematical
topics. The course will include fundamental mathematical principles, combinatorial
analysis, mathematical reasoning, graphs and trees, and Boolean logic circuits. 3
hrs. lecture/wk.

CS 211
Discrete Structures II (3 CR)
Prerequisite: CS 210
Upon successful completion of this course, the student should be able to use
fundamental discrete mathematics as it relates to computers and computer
applications. The student will experiment with a variety of discrete mathematical
topics. The course will include fundamental mathematical principles, combinatorial
analysis, mathematical reasoning, graphs and trees, and Boolean logic circuits. 3
hrs. lecture/wk.
CS 250
Basic Data Structures using C++ (4 CR)
Prerequisite: CS 200 Prerequisite or corequisite: CS 210 for students transferring to most four-year computer science programs
This course will cover advanced programming topics using C++. Files, recursion, data structures and large program organization will be implemented in projects using object-oriented methodology. Students will write programs using the concepts covered in the lecture. 3 hrs. lecture, 2 hrs. lab/wk. Four-credit-hour CS courses have two hours of open lab per week.

CS 255
Basic Data Structures using JAVA (4 CR)
Prerequisite: CS 205
This course will cover advanced programming topics using Java. Files, recursion, data structures and large program organization will be implemented in projects using object-oriented methodology. Students will write programs using queues, stacks, lists and other concepts covered in the lecture. 3 hrs. lecture, 1.5 hrs. lab/wk. Four-credit-hour CS courses have two hours of open lab per week.

Computer Web (CWEB)

CWEB 101
Introduction to the Web using Internet Explorer (1 CR)
Prerequisites: CPCA 105 or CPCA 106 or CPCA 128 or CIS 124 or appropriate score on an assessment test
This course will introduce the student to commands and techniques required to effectively use the resources of the World Wide Web. Topics to be covered will include how to browse, search and retrieve information on the Internet using Internet Explorer, how to create and manage "favorites", how to protect computers from viruses, how to send and receive electronic mail, and how to create a basic home page. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 105
Introduction to Web Pages: Dreamweaver (1 CR)
Prerequisite: CWEB 101
This course will cover the commands and techniques required to create and revise Web pages using Dreamweaver. Topics to be covered will include basic text layout, viewing and identifying basic HTML tags, creating a site map, formatting a Web page, applying background color, inserting images and sounds, creating ordered and unordered lists, inserting files, and creating links on Web pages. 1 hr. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 106
Introduction to Microsoft FrontPage (1 CR)
Prerequisite: CWEB 101
This course will cover the commands and techniques required to create and revise World Wide Web pages using Microsoft FrontPage. Topics to be covered will include basic text layout, viewing and identifying basic HTML tags, formatting a Web page, inserting background color, adding pictures and sounds, creating ordered and unordered lists, inserting files and creating links to other Web pages. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CWEB 107
Web Tools: Microsoft Office (1 CR)
Prerequisites: CWEB 101 and CPCA 110 or CPCA 114
Upon successful completion of this course, the student should be able to create static and dynamic Web-based documents, Excel spreadsheets, PowerPoint presentations and Access databases. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 111
Intermed Web Concepts/Techniques using Explorer (1 CR)
Prerequisite: CWEB 101
This course is a continuation of CWEB 101, Introduction to the Web using IE, and will cover intermediate commands and techniques required to use various Web-based tools and programs. Topics to be covered will include using complex search strategies; finding people, businesses and e-mail addresses on the Web; accessing and using Newsgroups; joining and leaving mailing lists; using a Web-based chat facility; locating and downloading freeware and shareware programs; and identifying online backup and storage options. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 115
Intermediate Web Pages: Dreamweaver (1 CR)
Prerequisite: CWEB 105
This course will cover intermediate-level commands and techniques required to create and enhance a Web page using Dreamweaver. Topics to be covered will include tracing images, layers, converting layers to tables, custom tables, cascading style sheets, templates and libraries, and publishing a Web site. 1 hr. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 116
Intermediate Microsoft FrontPage (1 CR)
Prerequisite: CWEB 106
This course is a continuation of CWEB 106, Introduction Web Pages: FrontPage, and will cover intermediate-level commands and techniques required to create and enhance a FrontPage Web site. Topics to be covered will include shared borders and themes, publishing a Web site, new Web site creation on a Web server, database integration and using office components and styles. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 120
Internet Applications: Fireworks I (1 CR)
Prerequisite: CPCA 105 or CPCA 106 or waiver test scores
This course is an introduction to the fundamentals, tools and techniques of Web imaging using Macromedia Fireworks. Students will gain an understanding how to import, manipulate, optimize and animate Web graphics. Students will combine graphics with HTML and JavaScript creating image slices, navigation menus and hotspots. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.
CWEB 125
Introduction to Dynamic Web Pages: Dreamweaver (1 CR)
Prerequisites: CWEB 115 and CPCA 114
This course explores the Dreamweaver database environment and dynamic site concepts. Students will learn how to create, sort and display recordset content in a Web page. Students will create search applications, allowing movement between master and detail record pages, and to display the results of database searches. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 130
Introduction to Flash (1 CR)
Prerequisite: CPCA 161 or CWEB 105 or CWEB 106
This course will cover the commands and techniques available to add Flash content to Web pages and CD-ROMs. Topics covered will include using drawing tools, manipulating text with text tools, adding and modifying sound, creating animation and publishing work. This class will be taught in a classroom with both Macintosh and Windows computers. 1 hr. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 136
Introduction to PHP (1 CR)
Prerequisites: CWEB 101 and CPCA 114
This course covers the commands and techniques available to add functionality to Web pages using PHP (Hypertext Preprocessor). Students will build client-side PHP scripts with variables, functions, expressions, methods, and events to validate forms and enhance Web page functionality. The basics of server-side scripting are introduced. 1 hr. integrated lecture/lab wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 140
Intermediate Flash (1 CR)
Prerequisite: CWEB 130
This course will build on the fundamental skills learned in CWEB 130, Introduction to Flash. Topics will include complex animation techniques; interactivity with simple frame actions; and interactivity using objects such as buttons, hot spots and movie clips. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 146
PHP with MySQL (1 CR)
Prerequisite: CWEB 136
This course covers the commands and techniques required to connect a Web page to a relational database using PHP (Hypertext Preprocessor) and MySQL (database management system). Students define and build a relational database using MySQL, then use PHP scripts as well as SQL in a Web page to connect to the database to edit, delete, and enter records. 1 hr. integrated lecture lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 150
Advanced Flash (1 CR)
Prerequisite: CWEB 140

This course will build on the skills learned in CWEB 131, Intermediate Flash. Students will do projects to control movie clips, sound, external data, multiple timelines and text fields. Some ActionScripting will be introduced. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 160
Introduction to JavaScript (1 CR)
Prerequisite: CWEB 105 or CWEB 106 or CPCA 161

This course will cover the commands and techniques available to add functionality to Web pages using JavaScript. Topics to be covered include integrating JavaScript into an HTML file, creating pop-up windows, adding scrolling messages, validating forms and enhancing the use of image and form objects. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 165
Introduction to Adobe Acrobat (1 CR)

This course will introduce students to the Adobe Acrobat software program. Students will be presented with the basics of Adobe Acrobat and will be shown how to create and edit PDF files using Acrobat and Distiller. Topics will include how to gather Web page content for off-line viewing and how to use JavaScript inside a PDF document to make it interactive. Projects will include how to add navigation, multimedia elements and data forms to PDF files. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 170
Intermediate JavaScript (1 CR)
Prerequisite: CWEB 160

This course builds on the skills learned in CWEB 160, Introduction to Web Scripting: JavaScript. Students will learn to use JavaScript in their Web pages to build menus and navigational structures. They will also learn to use intermediate techniques for cookie manipulation and storage. Complex use of operators (Bitwise, Assignment, Comparison, Arithmetic and Boolean) will be explained. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 180
E-Commerce Using JavaScript (1 CR)
Prerequisite: CWEB 170

This course builds on the skills learned in CWEB 160, Introduction to Web Scripting: JavaScript, and CWEB 161, Intermediate JavaScript. The student will build a complete e-commerce site that will support online ordering and payment with JavaScript. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 190
ActionScript for Flash (1 CR)
Prerequisite: CWEB 150

This course will teach the basic skills needed to use ActionScripts in Flash movies. Students will build interactivity into their movies using ActionScript. They will also manipulate data and control Flash objects such as movie clips. ActionScript logic and functions will be explained. 1 hr. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $20.

CWEB 200
Podcasting I (3 CR)
Prerequisite: CWEB 101
Podcasting is a web-based broadcast medium. Audio files (most commonly in MP3 format) are made available online in a way that allows software to automatically detect the availability of new files (generally through RSS [Really Simple Syndication]), and download the files for listening at the user's convenience. This course will cover how to create sound, use the appropriate software, develop a show, distribute a podcast, and build an audience. Students will begin by learning the basics of blogging and develop their blogs into audio and/or video podcasts. More advanced topics include audio editing, podcasting on the go, and videocasting. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $35.

CWEB 205
Search Engine Optimization (1 CR)
Prerequisites: CWEB 105 or CWEB 106
This course will cover how to optimize a Website to maximize search engine ranking. Upon completion of the course students will be able to identify and implement effective Web site designs and strategies for search engine optimization. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 230
Introductory E-Commerce Applications (1 CR)
Prerequisite: CWEB 101 or CPCA 141
This course will introduce students to e-commerce in a software-driven, hands-on way. It will use software tools to discuss and explore a variety of e-commerce activities. Students will examine an extensive list of e-commerce sites, such as those that support purchasing, delivery, support, auction, business-to-business, virtual community and Web-portal business goals. They will examine e-commerce stores that incorporate advertising, marketing, branding, and business efficiency goals. They will explore how to populate a store catalog, create site-wide navigation links and publish a store. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

CWEB 240
Intermediate E-Commerce Applications (1 CR)
Prerequisite: CWEB 230
This course will use software tools such as Internet Explorer and Netscape Communicator to discuss and explore a variety of intermediate e-commerce activities. For example, students will examine e-commerce security issues, such as cookies, privacy risks and property threats, including copyright issues, viruses, security policies, encryption, digital signatures and transaction integrity. Students will study electronic payment systems, including script, electronic checks, credit card purchases, electronic wallets, smart cards and electronic cash. Students will explore international and legal issues, such as language and custom barriers, laws and regulations, and tax considerations. They will also explore ethical issues, such as trust and defamation issues. Finally, they will explore careers in electronic commerce. 1 hr. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

Cosmetology (AVCO)
AVCO 102
Nail Technology (17 CR)
This course provides skill instruction in determining nail disorders and care as well as the artistic application of tips, overlays and sculptured nails. Upon successful completion, students are prepared to take the Kansas State Board of Cosmetology onychology examination. In-state tuition and fees $700.00 total.
Out-of-state tuition and fees $2,870 total. Beginning summer 2009, the in-state tuition and fees will total $816 and the out-of-state tuition and fees will total $3,315. 350 contact hrs. For enrollment and tuition information, call 913-469-8500 ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $145 to $150.

AVCO 110
Introduction to Cosmetology (21 CR)
Prerequisite: Selective Admission Approval
This course provides skill instruction in shampooing, cutting, shaping, curling and coloring. Also included is curriculum from Nail Technology and Cosmetology Technician I and II. The first 500 contact hours are in the basic lab and the classroom without client contact. The in-state tuition and fees total $1,058, and the out-of-state tuition and fees total $4,145. 500 contact hrs. For enrollment and tuition information, call 913-469-8500 ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $28 to $38.

AVCO 112
Clinical Cosmetology (12 CR)
Prerequisite: Selective Admission Approval
This course provides continuing skill instruction in shampooing, cutting, shaping, curling and coloring. Included is an introduction to client relations skills and sales promotion techniques. Instruction includes classroom and salon. In-state tuition and fees $955 total. Out-of-state tuition and fees $4,055 total. 500 contact hrs. For enrollment and tuition information, call 913-469-8500, ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

AVCO 114
Advanced Cosmetology (12 CR)
Prerequisites: AVCO 110 with a min grade of "C" or higher and selective admission approval
This course provides advanced instruction in shampooing, cutting, shaping, curling and coloring. This course prepares the student for the Kansas State Board of Cosmetology examination. In-state tuition and fees $955 total. Out-of-state tuition and fees $4,055 total. 500 contact hrs. For enrollment and tuition information, call 913-469-8500, ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $159.
AVCO 115
Cosmetology with Nail Technology License (12 CR)
Prerequisites: AVCO 110 and current Kansas nail technology license
This course provides continuing skill instruction in shampooing, cutting, shaping, curling and coloring hair, as well as skin care and nail technology. Included is an introduction to client relations skills and sales promotion techniques. Instruction includes classroom and salon. Current Kansas Nail Technology license required. In-state tuition and fees $631. Out-of-state tuition and fees $2615. Lecture hrs. 30 lab hrs. 205 clinical hrs. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

AVCO 116
Cosmetology with Esthetics License (12 CR)
Prerequisites: AVCO 110 and current Kansas Esthetics license
This course provides continuing skill instruction in shampooing, cutting, shaping, curling and coloring, as well as skin care and nail technology. Included is an introduction to client relations skills and sales promotion techniques. Instruction includes classroom and salon. Current Kansas Esthetics license required. In-state tuition and fees $685. Out-of-state tuition and fees $2855. 85 hrs. lecture, 30 lab, 235 clinical. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

AVCO 118
Esthetics (26 CR)
Prerequisite: selective admission approval
This course provides skill instruction in skin care. Topics include sanitation, skin sciences, waxing, skin treatments, makeup and business practices. This course prepares the student for the Kansas State Board of Cosmetology esthetician examination. In-state tuition and fees $1,241 total. Out-of-state tuition and fees $5,271 total. Beginning summer 2009, the in-state tuition and fees will total $1,348, and the out-of-state fees and tuition will total $5,170. 650 contact hrs. For enrollment and tuition information, call 913-469-8500 ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $174 to $190.

AVCO 212
Cosmetology Instructor Training (9 CR)
Prerequisites: Current Kansas Cosmetology and Esthetics or Nail Technology License. Minimum of one year of practice in trained area and selective admission approval
This 300 contact hour course is design to meet the educational requirements for licensure by Kansas Board of Cosmetology for instructors in the cosmetology sciences. Students will attend 40 hours of lecture and participate in 260 hours of observation, clinic supervision, and classroom teaching. Topics covered include instructor characteristics, student motivation, methods and evaluation. In-state tuition $540 total. Out-of-state tuition $2,400 total. 300 contact hrs. For enrollment information call 913-469-8500 ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75.
AVCO 218
Advanced Esthetics Training (6 CR)
Prerequisite: Must possess current esthetics license granted by the Kansas Board of Cosmetology, a current cosmetology license, or the minimum of 500 hours of esthetics training from another institution.

This 100-contact-hour course is designed to meet the education requirements for licensure by the Missouri Board of Cosmetology for estheticians in the cosmetology sciences and meet the needs of students who desire exposure to advanced esthetics techniques. Students will attend 44 hours of lecture/demonstration, practice 48 hours of integrated lecture/clinical, and participate in eight hours of community service. Topics covered include body treatments, theory on the day spa, airbrush makeup, microdermabrasion and manual lymphatic drainage. In-state tuition is $1,100. Out-of-state tuition is $1,720. 100 contact hrs. For enrollment information, call 913-469-8500 ext. 2390. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15.

Dental Assisting (KDA)

KDA 100
Introduction to Dental Assisting (1 CR)
This course is a prerequisite for admission to the dental assisting program. Dental terminology, roles of dental assistant and scope of dentistry. 1 hr. lecture/wk. Course taught at Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting and beginning and ending dates of classes. Call 816-759-4000.

KDA 101
Body Structure and Function (2 CR)
Prerequisite: Admission to dental assisting program
Admission to dental assisting program is required. Basic anatomy and physiology for the dental assistant, 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting and beginning and ending dates of classes. Call 816-759-4000.

KDA 102
Head & Neck Anatomy (2 CR)
Prerequisite: Admission to the dental assisting program
Admission to dental assisting program is required. Utilizes a systems approach to the gross anatomy of the head and neck with emphasis on the maxilla and mandible and oral tissues, neuromuscular and circulatory function, supporting structures and the temporomandibular joint also study of oral embryology and histology, 1.5 hr lecture and 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting and beginning and ending dates of classes. Call 816-759-4000.

KDA 103
Dental Anatomy (2 CR)
Admission to dental assisting program is required. Introduces to students a detailed study of crown and root morphology of both primary and permanent dentition. Eruption Schedule and Numbering System, 4 hrs. lab/wk. Course taught at Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO.
Students should contact the Penn Valley coordinator of dental assisting about the class meeting and beginning and ending dates of classes. Call 816-759-4000.

KDA 104

Dental Emergencies & Pharmacology (1 CR)
Admission to dental assisting program is required. An overview of emergencies common to the dental office setting. Students will gain knowledge in emergency drugs, allergic reactions and drug related emergencies. Also emphasized are specific medical conditions related to treatment; management of medical emergencies, pharmacology related to dental. 1 hr. lecture/wk. Course taught at Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting and beginning and ending dates of classes. Call 816-759-4000.

KDA 105

Dental Materials I (2 CR)
Admission to dental assisting program is required. Basic knowledge and manipulation of waxes, temporary crowns, custom trays, alginate materials, impression materials, bite registration materials, cements, varnishes, bases and liners. 2 hr. lecture, 4 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 108

Oral Microbiology & Infection Control (2 CR)
Admission to dental assisting program is required. An overview of microbiological aspects of health and disease with emphasis on sterile process and disinfection techniques. 1 hr lecture, 2 hrs. lab/wk. Course taught at Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 110

Chairside Assisting I (5 CR)
Admission to dental assisting program is required. Dental terminology and responsibilities of the dental assistant in the dental operatory to include patient preparation and utilization of rubber dam, matrix, anesthetics, fluoride, wedge, amalgam and composite procedure and coronal polishing techniques. 3 hrs. lecture, 4 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 115

Dental Radiology I (4 CR)
Prerequisite: KDA 102
Admission to dental assisting program is required. Radiography history, characteristics of radiation production, film composition, x-radiation terminology, effects of radiation exposure, and protection. Exposing, processing, and mounting of radiographs taken on a radiographic manikin. 2 hr. lecture, 4 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 125

Clinical Experience I (2 CR)
Prerequisite: Admission to the Dental Assisting Program and completion of CPR for healthcare workers.

Admission to dental assisting program is required. Clinical experience in operative and preventive dental procedures utilizing four-handed dentistry in the clinic at the University of Missouri-Kansas City School of Dentistry. 6 hrs. clinic/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 205

Dental Materials II (3 CR)
Prerequisite: KDA 105
Advanced manipulation of dental cements, amalgam, esthetic restoratives (composites), alginate and gypsum products, sealants and various impressions materials. 6 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 210

Chairside Assisting II (5 CR)
Prerequisite: KDA 110
Specialty area of dentistry to include orthodontics, periodontics, prosthodontics, oral surgery, endodontics, pediatric dentistry and geriatric dentistry. Includes procedures, instruments and current concepts of assisting in these areas. 1 hr. lecture, 8 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 215

Dental Radiology II (2 CR)
Prerequisite: KDA 115
Radiographic techniques, procedures and infection control emphasized. Practical experience in exposing, processing, and mounting radiographs taken on patients at the University of Missouri-Kansas City School of Dentistry and in private practice offices (general and specialty). 4 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 225

Dental Office Management (2 CR)
Prerequisite: Enrollment in the Dental Assisting Program
Admission to the dental assisting program is required. Principles of business management in the dental office. Control of the appointment book, filing, financial management, insurance forms, supply inventory and recall systems by conventional and computerized methods. Dental computer applications and use. Hands-on experience in private practice offices and/or clinic KDA 250. 1 hr. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 230

Oral Pathology (1 CR)
Prerequisites: KDA 108 and KDA 110
An overview of diseases of the human body, including basic cell tissues, with specific emphasis on diseases of the face and mouth. 2 hrs. lab/wk. Course taught at Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes.

KDA 250
Clinical Experience II (4 CR)
Prerequisite: KDA 125
Advanced clinical experience in the front office, at chairside, in radiographic and laboratory assisting techniques in general and in specialty dental offices and clinics, 16 hrs. clinic/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 260
Dental Assisting Seminar (2 CR)
Prerequisite: KDA 125
Preparation for the Dental Assisting National Board Examination (DANB) and for successful employment. Clarification of prior material by discussion and dialogue between students and instructors. Preparation of personal resume and job applications. Demonstrate interview techniques. 2 hr. lecture/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 270
Expanded Functions in Restorative Dentistry (1 CR)
Prerequisite: Student must meet one of the following: 1) Certified dental or orthodontic assistant through the Dental Assisting National Board, Inc. 2) Graduate of an ADA-accredited dental assisting or dental hygiene program 3) Completion of KDA 106 Basic Dental Techniques and successful completion of Basic Skills Mastery Exam given by the Missouri Dental Association
Dental restorative materials with emphasis on placing and carving amalgam and composite restorations and palliative care of dental emergencies. 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 271
Expanded Functions in Orthodontics
Prerequisite: Student must meet one of the following: 1) Certified dental or orthodontic assistant through the Dental Assisting National Board, Inc. 2) Graduate of an ADA-accredited dental assisting or Dental hygiene program 3) Completion of KDA 106 Basic Dental Techniques and successful completion of Basic Skills Mastery Exame given by the Missouri Dental Assistants Association
Orthodontic procedures with emphasis on impressions, bending archwires, placement and removal of orthodontic bands and brackets, and palliative care of orthodontic emergencies. .5 credit hour, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 272
Expanded Functions in Periodontics

Prerequisite: Student must meet one of the following: 1) Certified dental or orthodontic assistant through the Dental Assisting National Board, Inc. 2) Graduate of an ADA-accredited dental assisting or dental hygiene program 3) Completion of KDA Basic Dental Techniques and successful completion of Basic Skills Mastery Exam given by the Missouri Dental Assistants Association

Periodontal procedures with emphasis on air-brasive coronal polishing and placement of periodontal dressings. Credit hours .5. 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KDA 273

Expanded Functions in Prosthetic Dentistry (1 CR)

Prerequisite: Student must meet one of the following: 1) Certified dental or orthodontic assistant through the Dental Assisting National Board, Inc. 2) Graduate of an ADA-accredited dental assisting or dental hygiene program 3) Completion of KDA 106 Basic Dental Techniques and successful completion of Basic Skills Mastery Exam given by the Missouri Dental Assistants Association

Prosthodontic procedures with emphasis on prosthodontic impression techniques, cementation of dental appliances, extra-oral adjustment of fixed and removable prostheses, placement of soft-tissue liners. 2 hrs. lab/wk. Course taught at Penn Valley Community College, 3201 Southwest Trafficway, Kansas City, MO. Students should contact the Penn Valley coordinator of dental assisting about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

Dental Hygiene (DHYG)

DHYG 121
Clinical Dental Hygiene I: Pre-Clinic (5 CR)

Prerequisites: Admission to the Dental Hygiene Program, a minimum 2.0 GPA in curriculum courses and CHEM 122 and ENGL 121 and BIOL 140 and PSYC 130 and BIOL 230 Corequisites: DHYG 125 and DHYG 138 Prerequisite or corequisite: DHYG 135 and SOC 122

This course will includes information and techniques relating to the history, development, current status and future of the profession of dental hygiene. Students will be introduced to fundamental dental hygiene services, instrumentation, patient assessment, preventive treatment, transmissible diseases, exposure barriers and infection control. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 2 hrs. lecture, 13 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $3300 to $3350.

DHYG 125
Developmental Dentistry (2 CR)

Prerequisites: Admission to Dental Hygiene Program and CHEM 122 and ENGL 121 and BIOL 140 and PSYC 130 and BIOL 230 and Corequisites: DHYG 121 and DHYG 138 and Prerequisites or corequisites: SOC 122 and DHYG 135

This course will include a study of embryology; oral histology; developmental disturbances of the face, oral cavity and related structures; and dental morphology and occlusion. 1 hr. lecture, 3 hrs. lab/wk.

DHYG 135
Dental Materials (2 CR)
Prerequisites: CHEM 122 and ENGL 121 and PSYC 130 and BIOL 140 and BIOL 230 and Prerequisite or corequisite: SOC 122 Corequisites: DHYG 121 and DHYG 125 and DHYG 138

This course is designed to provide students with a knowledge base of the science and physical properties of dental materials. Through laboratory exercises, students will have hands-on experience with dental materials used in dental hygiene and dentistry while applying their knowledge of dental material sciences. 1 hr. lecture, 2 hrs. lab/wk.

DHYG 138
Head and Neck Anatomy (2 CR)
Prerequisites: BIOL 230 and CHEM 122 and ENGL 121 and PSYC 130 and BIOL 140 and admission to the Dental Hygiene Program and Prerequisites or corequisites: SOC 122 and DHYG 135 Corequisites: DHYG 121 and DHYG 125

This course is designed to provide dental hygiene students with the basic anatomical foundations to support clinical course work. Topics to be covered include embryonic development of the head and neck, along with identification of the bones in the skull. Muscles of the head and neck will be identified along with their functions, insertion and origins. The vascular, lymphatic and nervous systems of the head and neck will be discussed along with the anatomical basis of the spread of infection. 3 hrs. lecture and lab/wk.

DHYG 140
Clinical Dental Hygiene II (4 CR)
Prerequisite: DHYG 121 Corequisites: DHYG 142 and DHYG 146 and DHYG 148 and prerequisites or corequisites: BIOL 225 and DHYG 135

The course will include clinical application of dental hygiene techniques and instrumentation, oral health products, patient motivation and educational techniques, preventive strategies including use of an intraoral clinic camera and an introduction to selected dental specialties. Students will be prepared for medical and dental emergencies, which may be encountered in various practice settings. An introduction to the dental hygiene process (ADPIE) and working with special-needs patient populations will be provided. 2 hrs. lecture & 8 hrs. clinic/wk. Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $35.

DHYG 142
Dental Radiology (2 CR)
Prerequisites: DHYG 121 Corequisites: DHYG 140 and DHYG 146 and DHYG 148 and Prerequisites or corequisites: BIOL 225 and DHYG 135

This class will concentrate on the theory and clinical practice of exposing, processing, mounting and evaluating oral radiographs with emphasis on radiation protection and infection control for the patient and operator. 1 hr. lecture, 3 hrs. lab/wk.

DHYG 146
Periodontics (3 CR)
Prerequisite: DHYG 121 Corequisites: DHYG 140 and DHYG 142 and DHYG 148 Prerequisites or Corequisites: BIOL 225 and DHYG 135

This course will include recognition of the etiology and clinical signs and symptoms of periodontal diseases. The inflammatory process, treatment planning and nonsurgical therapy are discussed. 3 hrs. lecture/wk.
Dental Health Education (2 CR)
Prerequisite: DHYG 121  Corequisites: DHYG 140 and DHYG 142 and DHYG 146
Prerequisites or Corequisites: BIOL 225 and DHYG 135
Students will study health and apply educational methods for individuals and groups, with special emphasis on behavior modification, compliance, communication and motivation. Exercises in the research process and evaluation research articles are included. 1 hr. lecture, 2 hrs. lab/wk.

DHYG 221
Clinical Dental Hygiene III (6 CR)
Prerequisites: DHYG 140 and BIOL 235 Corequisites: DHYG 225 and DHYG 230 and DHYG 240
Students will continue development in the areas of patient management, preventive dental hygiene treatment and proficiency in clinical techniques through practical application. Current advances in dental hygiene services will also be introduced. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 2 hrs. lecture, 16 hrs. clinic/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $250 to $275.

DHYG 225
Pathology (3 CR)
Prerequisites: DHYG 140 and BIOL 235 Corequisites: DHYG 221 and DHYG 230 and DHYG 240
This course will introduce the students to concepts related to general systemic and oral pathology. General principles of pathology include inflammation, immunity, neoplasia and wound healing. Basic pathological processes of oral conditions, their etiologies and treatments will be discussed. 3 hrs. lecture/wk.

DHYG 230
Dental Therapeutics (3 CR)
Prerequisites: DHYG 140 and BIOL 235 Corequisites: DHYG 221 and DHYG 225 and DHYG 240
This course will introduce the basic principles of drug actions, emphasizing dental-related therapeutics and drugs associated with common systemic disorders, information on the selection of professional products, and principles necessary in administering local anesthesia. 2 hrs. lecture, 2 hrs. lab/wk.

DHYG 240
Community Dental Health (2 CR)
Prerequisites: DHYG 140 and BIOL 235 Corequisites: DHYG 221 and DHYG 225 and DHYG 230
Topics will include public health agencies, statistical procedures for critiquing scientific literature, identifying dental needs of different groups and planning dental health education programs. Preventive techniques, health promotion, consumer advocacy and the role of the dental hygienist in public health will be emphasized. Field experience will be included. 1 hr. lecture, 3 hrs. lab/wk.

DHYG 245
Nitrous Oxide Analgesia (1 CR)
Prerequisite: DHYG 221 Corequisite: DHYG 250
This course will concentrate on the principles of administering and monitoring
nitrous oxide analgesia. Upon completion of the course, didactic and clinical proficiency in nitrous oxide analgesia will meet certification standards set by state dental boards. 1 hr. lecture, lab/wk.

**DHYG 250**  
Clinical Dental Hygiene IV (6 CR)  
**Prerequisite:** DHYG 221 **Corequisite:** DHYG 245  
This course will offer continued development of proficiency in clinical techniques and current procedural practices of the dental hygienist with emphasis on self-evaluation. Topics will include ethics, jurisprudence, office management, current dental hygiene issues and preparation for board exams. 2 hrs. lecture, 16 hrs. clinic/wk., 1 hr. board review for first 8 wks.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $125.

**Drafting/CAD/AutoCAD (DRAF)**

**DRAF 120**  
Introduction to Drafting (2 CR)  
This course should be taken by students without prior drafting experience. Upon successful completion of this course, the student should be able to identify and apply the essential basic skills necessary to proceed through the drafting program, including lettering, measuring, geometric construction, sketching, isometrics, orthographic views, dimensioning and auxiliary view. 1 hr. lecture, 3 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $45 to $60.

**DRAF 123**  
Interpreting Machine Drawings (2 CR)  
**Prerequisite or corequisite:** DRAF 120 or approval of the program assistant dean  
This course is a required course in the computer-aided drafting and design technology program. Upon successful completion of this course, students should be able to interpret graphics used to fabricate, assemble, maintain and operate the equipment and products of industry. General detail and assembly prints will be evaluated for title block information, general notes, dimensioning, tolerance specification and symbology. Specialized drawings will include cams, gears, numerical control, plastics, sheet metal and instrumentation. 2 hrs. lecture/wk.

**DRAF 129**  
Interpreting Architectural Drawings (2 CR)  
This beginning course will explain the fundamentals of interpreting (reading) architectural drawings. Upon successful completion of this course, students should be able to understand plan and elevation views, sections, details, schedules, specifications, symbols and abbreviations found on most residential and commercial construction drawings. 2 hrs./wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.

**DRAF 130**  
Introduction to CAD Concepts - AutoCAD: 2008 (3 CR)  
**Prerequisite:** DRAF 120 or approval of the program assistant dean  
This course provides a basic knowledge of AutoCAD. Students will learn to use CAD equipment, including input/output devices and microcomputers as drafting tools. Emphasis will be on a basic understanding of CAD terms and concepts as
they are applied in industry. Students will be provided an overview of many of the key features of a major microcomputer CAD package with hands-on experience at a workstation. Basic instruction will be provided on drawing setup, drawing commands, editing commands and screen control. The important concepts of layering, standard symbols and dimensioning will be introduced. 2 hrs. lecture, 3 hrs. lab/wk. Drafting classes that have additional lab have either the time and room listed or TBA (to be announced) with the room number listed.

**Associated Costs**
In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $15.

**DRAF 132**
**Introduction to AutoCAD LT (3 CR)**
This course provides a basic knowledge of computer-aided drafting (CAD). Students will learn basic AutoCAD LT commands and the use of CAD equipment, including input/output devices as drafting tools. The latest version of AutoCAD LT, student version, will be used to cover topics including creating and setting up a drawing, using blocks and wblocks, editing a drawing, saving completed drawings, developing template drawings, printing from paper space, dimensioning, layering, drawing defaults and hatching. This course is for beginning AutoCAD users. 2 hrs. lecture, 3 hrs. lab/wk.

**DRAF 135**
**Graphic Analysis (3 CR)**
*Prerequisites: DRAF 120 and DRAF 130 or approval of the program assistant dean*
This course expands on introductory knowledge in drafting and CAD. Upon successful completion of this course, the student should be able to solve descriptive geometry problems, locate intersections of geometric shapes and produce developments of geometric shapes. Most assignments in this course will be completed using AutoCAD software. 2 hrs. lecture, 3 hrs. lab/wk.

**Associated Costs**
In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $15.

**DRAF 140**
**Topics in CAD I (2 CR)**
This course provides training for a specific design application software. Students will learn software commands and terminology. Students will be provided with in-depth coverage of the selected software and be given hands-on experience. Emphasis will be placed on the application of software to industry projects. 2 hrs. lecture, lab/wk.

**DRAF 164**
**Architectural Drafting/Residential Interior Design (3 CR)**
Upon completion of this course the student should be able to interpret residential drawings, draft architectural drawings and use industry references. Drawings studied include floor plans, elevations, sections, details and schedules. In addition to lab assignments, students will draft on coldpress board, vellum and plastic film. This course is required in the Interior Design, Interior Entrepreneurship and Interior Merchandising AAS programs. 2 hrs. lecture, 3 hrs. lab/wk.

**Associated Costs**
In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $140 to $160.

**DRAF 222**
**Mechanical Drafting (3 CR)**
*Prerequisites: DRAF 123 and DRAF 230 Prerequisite and/or corequisite: MATH 134*
Students successfully completing this course should be able to draw details and
assembly views of mechanical parts. The types of parts discussed in this class include castings, sheet metal pieces, jigs and fixtures, and gauges. Important concepts include dimensioning, form and position tolerancing, coordinate tolerancing, and calculations related to material allowances and manufacturing. Project assignments will be completed using computer-aided drafting software. This course is typically taught in the fall semester. 2 hrs lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40.

DRAF 225
Civil Drafting (3 CR)
Prerequisite: DRAF 230 or ENGR 131 Corequisite: MATH 134
Upon successful completion of this course, the student should be able to apply drafting techniques used in civil engineering offices. The student will learn to draw civil engineering plans from surveying and engineering data. The student will be able to produce plan and profile drawings, roadway cross sections, earthwork calculations, topographic maps and property maps. The student will use CAD in drawing projects. This course is typically taught in the spring semester. 2 hrs. lecture, 3 hrs. lab/wk.

DRAF 228
Industrial Design Applications (3 CR)
Prerequisites: CET 211 and DRAF 222 and DRAF 250 and DRAF 252
This course examines industrial systems. Topics include interdisciplinary considerations of manufacturing processes, machine elements, electrical controls and structural design. Systems will include pumping systems or material handling systems. Team project/protocol will be used to develop graphic, ISO and ANSI-approved solutions. Job books and journals for a project are required from all students. This course is typically taught in the spring semester. 2 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $75.

DRAF 230
Intermediate CAD: AutoCAD (3 CR)
Prerequisite: DRAF 130 or approval of the program assistant dean
This course provides an increased knowledge of AutoCAD as it is used in today's industries. Students will build on their CAD experience by learning new commands and techniques that increase system productivity. Special emphasis will be on developing construction techniques and command usage to increase CAD proficiency. Additional study of standard symbols, layers and editing functions will occur. Concepts covered will include dimensioning variables and styles, attributes and external referencing, as well as paper space and model space, as used in multiple-view drawings. 2 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.

DRAF 231
CAD 3-D (3 CR)
Prerequisite: DRAF 230
In this course students will explore the use of computer-aided drafting and design software for the construction of three-dimensional computer models. Emphasis will be on using 3-D software to produce multiple-view drawings. Visualization commands and techniques will be discussed and developed. Topics will include view commands and wire-frame and surface construction, as well as solid modeling. 2 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.
DRAF 232
CAD Applications Workstation Environment (2 CR)
Prerequisite: DRAF 230 or approval of the program assistant dean
This course provides instruction for customizing the CAD workstation and handling files in a network environment. Students will receive instruction in software commands and terminology and be provided with in-depth coverage of customizing the CAD environment and managing CAD data files in a production environment. Emphasis will be on hands-on application of the covered topics. 2 hrs. lecture, lab/wk.

DRAF 233
CAD Administration (2 CR)
This course covers topics necessary for an individual to manage a CAD department in a production environment. Topics include managing CAD data, selecting types of equipment/software and establishing drafting policies and procedures. Also discussed are personnel issues for CAD employees/employers. 2 hrs. lecture/wk.

DRAF 238
Architectural Drafting (3 CR)
Prerequisites: DRAF 129 and DRAF 230
This course is an introduction to the production of architectural drawings for residential and commercial construction. Upon successful completion of this course, the student will be able to draw floor plans, sections, elevations, dimensions and schedules and use industry standards. Projects will be completed using CAD software. This course is typically taught in the spring semester. 2 hrs. lecture, 3 hrs. lab/wk.

DRAF 240
Introduction to AutoLISP (2 CR)
Prerequisite: DRAF 230
This course covers techniques for automation of AutoCAD drafting procedures through the use of the AutoLISP programming language. The scope of this course will include basic AutoLISP functions, creation of AutoLISP expressions and program files. It covers basic techniques and concepts needed to begin using AutoLISP effectively. 1 1/2 hrs. lecture, 1 hr. lab/wk.

DRAF 242
Topics in CAD II (2 CR)
Prerequisite: DRAF 230 or approval of the program assistant dean
This course provides training for a specific CAD-related software. Students will learn software commands and terminology. Students will be provided with in-depth coverage of the selected software and be given hands-on experience. Emphasis will be on the application of the selected software to industry projects. 2 hrs. lecture, lab/wk. Drafting classes that have additional lab have either the time and room listed or TBA (to be announced) with the room number listed.

DRAF 243
Architectural Desktop: Revit (2 CR)
Prerequisite: DRAF 230 or ENGR 131 or approval of the program assistant dean
This course introduces the student to the Architectural Desktop software used by many architectural and engineering design firms. Topics include software commands, project setup and the design process. Emphasis will be placed on the
hands-on application of software to industrial projects. It is recommended that students have previous architectural design knowledge or have taken DRAF 238, Architectural Drafting. 2 hrs. lecture and lab/wk.

**DRAF 244**  
Land Development Desktop/CIVIL 3D (2 CR)  
*Prerequisite: DRAF 230 or ENGR 131 or approval of the program assistant dean*  
This course introduces the student to the Land Development Desktop software used by many land planning, civil engineering and surveying firms. Topics include software commands, project setup and the design process. Emphasis will be placed on the hands-on application of the software to industrial projects. It is recommended that students have previous civil engineering design knowledge or have taken DRAF 225, Civil Drafting. 2 hrs. lecture and lab/wk.

**DRAF 245**  
Mechanical Desktop: Inventor (2 CR)  
*Prerequisite: DRAF 230 or ENGR 131 or approval of the program assistant dean*  
This course introduced the student to the Mechanical Desktop software used by many industrial and mechanical design firms. Topics include software commands, project setup and the design process. Emphasis will be placed on the hands-on application of the software to industrial projects. It is recommended that students have previous mechanical engineering design knowledge or have taken DRAF 222, Mechanical Drafting. 2 hrs. lecture and lab/wk.

**DRAF 250**  
Electrical Drafting (3 CR)  
*Prerequisites: MATH 133 and DRAF 230 or ENGR 131*  
Upon successful completion of this course, the student should be able to identify drafting techniques applicable to industrial lighting, motor controls, power distribution and generation. Emphasis will be on the use of tables, catalogs and applications software as aids to decision making required on electrical drawings. Project assignments will be completed primarily using CAD. This course is typically taught in the fall semester. 2 hrs. lecture, 3 hrs. lab/wk.

**DRAF 252**  
Structural Drafting (3 CR)  
*Prerequisite: DRAF 230 or ENGR 131 Corequisite: MATH 134*  
Upon successful completion of this course, the student should be able to produce structural drawings and details of steel, concrete and wood structures for manufacturing, construction, engineering and architectural firms. Project work will be done using CAD. This course is typically taught in the spring semester. 2 hrs. lecture, 3 hrs. lab./wk.

**DRAF 264**  
CAD:Interior Design (3 CR)  
*Prerequisites: ITMD 122 or ITMD 123 and ITMD 129 both with a grade of C or higher, or approval of the program assistant dean*  
This course is an introduction to the use of computer-aided drafting (CAD) as used in the interior design field. Upon successful completion of this course, the student should be able to draw floor plans and elevations of interiors using a computer-aided drafting system. AutoCAD LT software will be used. 2 hrs. lecture, 3 hrs. lab/wk. Drafting classes that have additional lab have either the time and room listed or TBA (to be announced) with the room number listed. Note: Prerequisites ITMD 123 and ITMD 129 require a grade of "C" or higher.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $15.

DRAF 266
Graphic Communications II for Interior Design (3 CR)
Prerequisite: DRAF 261
Upon successful completion of this course, the student should be able to draft three-dimensional representations of interior spaces, furniture, window treatments and decorative accessories. One-point and two-point perspective drawing, isometric drawing and perspective grids are covered. Student will draft in pencil on vellum and ink on mylar. 2. hrs. lecture, 3 hrs. lab/wk.

DRAF 271
Drafting Internship I (3 CR)
Prerequisite: assistant dean’s approval
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students the opportunity to develop job- and career-related skills while in a work setting. The work will be developed cooperatively with area employers, college staff and each student to provide a variety of actual job experiences directly related to the student’s career goals. 15 hrs. min./wk. Drafting classes that have additional lab have either the time and room listed or TBA (to be announced) with the room number listed.

DRAF 272
Drafting Internship II (3 CR)
Prerequisites: DRAF 271 and assistant dean’s approval
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students the opportunity to develop job- and career-related skills while in a work setting. The work will be developed cooperatively with area employers, college staff and each student to provide a variety of actual job experiences directly related to the student’s career goals. 15 hrs. min./wk. Drafting classes that have additional lab have either the time and room listed or TBA (to be announced) with the room number listed.

Economics (ECON)

ECON 132
Survey of Economics (3 CR)
Upon successful completion of this course, the student should be able to explain basic macroeconomic and microeconomic theory, fiscal and monetary policies, the role and significance of international economics and government trade and regulatory policies. In addition, the student should be able to describe the characteristics and consequences of the differing business units in the economy, as well as the functioning of the labor market and how national income is distributed. The course is primarily for students who desire a one-semester, nontechnical overview of the basic components of macroeconomic and microeconomic theory and the functioning of the United States economy. 3 hrs. lecture/wk.

ECON 230
Economics I (3 CR)
Upon successful completion of this course, the student should be able to use economic terminology and principles to explain and discuss basic macroeconomic
concepts, including supply of and demand for products, national income
determination, money and banking, and monetary and fiscal policy. The student
enrolling in this course should have successfully completed one year of high
school algebra or the equivalent. (Macro) 3 hrs./wk.

ECON 231
Economics II (3 CR)
Upon successful completion of this course, the student should be able to use
economic terminology and principles to explain and discuss basic microeconomic
concepts, including extended analysis of product supply and demand and theory
of the firm and product and resource market structures. Students enrolling in this
course should have successfully completed one year of high school algebra or the
equivalent. (Micro) 3 hrs./wk.

Education and Early Childhood (EDUC)

EDUC 121
Introduction to Teaching (3 CR)
Note: For possible future elementary/secondary educators
Teaching concepts and practices as they apply to today’s elementary and
secondary schools will be introduced. Topics will include the roles and
responsibilities of the teacher, various modes of instruction, specialized areas in
teaching, and professional requirements and concerns. Twenty hours of
observation in a school setting are required. 3 hrs./wk.

EDUC 130
Foundations of Early Childhood Education (3 CR)
This introductory survey course is designed to provide students with current
information on topics relevant to employment in early childhood programs. The
course explores the historical and philosophical roots of early childhood
education, general principles in child development, the teacher’s role, values and
ethics in early childhood education, curriculum design, and classroom
management. Twenty hours of observation in a group childcare setting are
required. Enrollment in certain courses may require a professional liability fee of
$16.00. 3 hrs. lecture/wk.

EDUC 131
Early Childhood Curriculum I (3 CR)
Prerequisite or corequisite: EDUC 130
This methods course is designed for students who are, or will be, working in an
early childhood education setting and parents or others who desire to develop an
intellectually challenging environment for young children. The focus of the course
is curriculum areas that deal with language and physical development. 3 hrs.
lecture/wk.

EDUC 205
Concepts in Early Childhood Education (3 CR)
Prerequisite or corequisite: EDUC 130 for certificate only
This course will provide early childhood care and education professionals, and
those aspiring to the profession, with the opportunity to apply early childhood
education experience and continuing professional education to college credit.
Students will gain and apply knowledge in many aspects of teaching young
children in child-care and educational settings. The student will spend seven
hours a week (105 clock hours total) in a supervised practical experience at the

Hiersteiner Child Developments Center at JCCC and will complete 1.5 CEUs in early childhood education. Credit for prior experience may be substituted for completing this course. The program facilitator must assess the documents (i.e., CDA) provided by the student and/or arrange and evaluate the practical experience before offering credit for this course. Completion of an application for this credit is required and may be obtained from the program facilitator. For certificate only. 3 hrs. lecture/wk.

EDUC 210
Creative Experiences for Young Children (3 CR)
Prerequisites: EDUC 130 and one of the following: PSYC 215 or PSYC 218 or EDUC 270
This course is a study of constructing and maintaining an environment for young children that fosters aesthetic sensitivity and creativity. The course includes the young child’s developmental stages in art, music, movement, language, and creative and dramatic play; methods and materials that nourish developmentally appropriate creative experiences and support an inclusive, anti-bias curriculum; integration of creative experiences in the whole curriculum; the use of technology; and helping families understand the creative experience. 3 hrs. lecture/wk.

EDUC 215
Young Children with Special Needs (3 CR)
This course is a study of creating and maintaining a developmentally appropriate inclusive environment for young children with special needs. The course includes the history of education and care for young children with special needs, federal and state legislation, types of differing abilities, developmental stages and capabilities of all young children, an inclusive approach to early education, and curriculum development for young children with special needs. Health, safety and nutrition; screening and assessment; interaction techniques; the role of the educator specific to the child’s special needs; partnering with the family, other disciplines and community; and advocating for children are presented. The laboratory will include demonstration of the subject matter. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 2 hrs. lecture, 3 hrs. lab/wk.

EDUC 220
Survey of the Exceptional Child (3 CR)
This course is an overview of the field of special education geared to those who are preparing to work with students with special needs. The course provides fundamental information on the identification and exceptionality, laws and legal cases affecting the delivery of services to individuals with exceptionalities and the principles of effective educational approaches for each exceptionality. Categories of exceptionality presented include learning disabilities, mental retardation, behavior disorders, gifted and talented, communication disorders, autism, traumatic brain injury, physical disabilities, sensory impairments, other health impairments and multiple and severe disabilities. 3 hrs./wk.

EDUC 225
Infant and Toddler Education and Care (3 CR)
Prerequisite: EDUC 130
This course is a study of creating and maintaining a developmentally appropriate environment for infants and toddlers. The course will include the history of education and care, theories of child development, developmental stages and capabilities of the very young child, and curriculum development for infants and toddlers. Health, safety and nutrition; assessment; interaction techniques; the role of the educator specific to the needs of the infant and toddler; partnering with family and community; and advocating for the very young are presented. The
laboratory will include demonstration of the subject matter. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 2 hrs. lecture, 3 hrs. lab/wk.

EDUC 231
Early Childhood Curriculum II (3 CR)
Prerequisite: EDUC 131
This methods course is designed for students who are, or will be, working in an early childhood education setting and parents or others who desire to develop an intellectually challenging environment for young children. The focus of the course is on curriculum areas that deal with the physical and social aspects of the world. Included in this inquiry curriculum are mathematics, science, social studies and nutrition. 3 hrs. lecture/wk.

EDUC 235
Parenting (2 CR)
Prerequisite or corequisite: PSYC 215 or PSYC 218 or EDUC 270
This course is a study of effective parenting. The course is designed for teachers of young children and parents and guardians who desire to provide an environment that reflects sensitivity to the unique needs of the individual child and family. Topics covered during the course are the history of child-rearing methods, an overview of child development, types of families, parent/guardian fears and concerns, purposes of child behavior, and effective communication techniques. Problem prevention and resolution, nurturing self-esteem in children and building effective, collaborative relationships between teachers and families are also covered. 2 hrs. lecture/wk.

EDUC 240
School-Age Programs and Curriculum I (3 CR)
Prerequisite: EDUC 130
This methods course is designed for students who are, or will be, working in an early childhood education setting and parents and caregivers who desire to develop an intellectually challenging environment for school age children. The focus of the course is on curriculum areas for the school-aged child and extended day and summer programs. 3 hrs. lecture/wk.

EDUC 243
Issues and Skills for Paraeducators (3 CR)
Students will explore the issues, skills and challenges specific to working as a paraeducator. In particular, students will be introduced to the issues relating to the inclusion of students with special needs into the mainstream educational environment. Students will review and practice those skills necessary to being an effective member of an instructional team, including collaboration, problem solving, decision making, team building and parent outreach. 3 hrs./wk.

EDUC 245
School-Age Programs and Curriculum II (3 CR)
Prerequisite: EDUC 240
The student will study the creation and maintenance of a developmentally appropriate environment for school-age children in extended school day and summer programs. The student will acquire the skills and characteristics of effective educators. The student will explore types of programs and how to plan, implement and evaluate these programs. Also, staff supervision and development, record keeping, relevant state regulations and laws will be discussed.
Collaboration with family and community, public relations and contributing to the profession will be studied. The lab will include demonstration of the subject matter. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 2 hrs. lecture, 1 hrs. lab/wk.

EDUC 246
Multicultural Issues in Education (2 CR)
In this course students will explore the changing demographics of students in public schools. The course will also explore the ways in which a student’s culture can affect the student’s learning style, communication skill and behavior. The course will also describe strategies that take into account cultural differences, values and child-rearing practices when educators seek to create a safe and accepting environment for all students. 2 hrs. lecture/wk.

EDUC 250
Child Health, Safety and Nutrition (3 CR)
This course is a study of the basic health, nutrition and safety management practices for young children. Information on establishing and maintaining a physically and psychologically safe and healthy learning environment appropriate for the needs of young children will be included. The interrelation of health, safety and nutrition is stressed, with emphasis on appraisal procedures, prevention and protection, services and educational experiences for young children and their families. 3 hrs. lecture/wk.

EDUC 260
Observing and Interacting with Young Children (3 CR)
Prerequisite: EDUC 130 and Prerequisite or corequisite: PSYC 215 or PSYC 218 or EDUC 270
This course is a study of the role of observation to assess and monitor the development and learning of children, birth through age 8, and the appropriate techniques for interacting with young children, considering their individual differences. Included will be the purposes and types of observation procedures, interpretation and use of findings, reporting techniques, and legal and ethical responsibilities. Expected age-related child behavior, fundamental principles of and theoretical approaches to child guidance, guidance techniques, working with families, and issues of diversity are presented. The laboratory will include demonstration of the subject matter. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 2 hrs. lecture, 3 hrs. lab/wk.

EDUC 270
Early Childhood Development (3 CR)
This course is a comprehensive account of human development from conception through age 8. The course integrates genetic, biological, physical and social influences with psychological processes affecting the development of young children. 3 hrs. lecture/wk.

EDUC 280
Administration of Early Childhood Program (3 CR)
This course is a study of the organization and administration of early childhood programs. The topics include the skills and characteristics of effective administrators; types of programs; planning, implementing and evaluating programs; policy development; staff supervision and development; finances and budget; record keeping; relevant state regulations and laws; developing,
equipping and maintaining a facility; organizing a developmentally appropriate environment; collaboration with family and community; public relations; and contributing to the profession. The lab will include demonstration of the subject matter. 2 hrs. lecture, 3 hrs. lab/wk.

EDUC 283  
Prof. Competencies: Early Childhood Education (1 CR)  
Prerequisite: Program Facilitator Approval  
This course focuses on the conduct and responsibilities of the early childhood professional. Topics include early childhood education codes, laws and regulations; child development; experience planning and curriculum development; observation and guidance of young children; authentic assessment; responsibilities to the young child's family, to the community, and to the teaching profession; employability skills; self-assessment; and job seeking skills. Completion of this course is required to obtain the One Year Post-Secondary Certificate in Early Childhood Education. 1hr. lecture/wk.

EDUC 284  
Seminar: Early Childhood Education (3 CR)  
Prerequisite: Program Facilitator Approval Corequisite: EDUC 285  
The course will focus on conduct and responsibilities of the intern; early childhood codes, laws and regulations; child development; activity planning and curriculum development; observation and guidance of young children; authentic assessment; responsibilities to the young child's family and community and to the teaching profession; employability skills; self-assessment; and job-seeking skills. The student's practical application of information in the internship will be discussed, and a portfolio will be developed. 3 hrs. lecture/wk.

EDUC 285  
Student Teaching: Early Childhood Education (3 CR)  
Prerequisite: Program Facilitator Approval Corequisite: EDUC 284  
This supervised field experience in early childhood education is designed for students to apply their knowledge of teaching young children. The student will be participating in curriculum design and presentation; observing and interacting with young children; providing for the health, safety and nutrition of young children; managing the program setting; and working with families and the community. A self-assessment and a professional development plan are completed. The student will spend 20 hours a week (320 clock hours total) in at least two different early childhood settings, serving children of two different ages. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

EDUC 290  
Leadership in Early Childhood Education (3 CR)  
Prerequisite: Program Facilitator Approval  
The student will study how early childhood education program directors lead programs and create quality environments for children, families and staff. The leadership topics include: leadership styles; developing mission statements, program philosophies, procedures, manuals and handbooks; assessing and planning for program improvements; recruiting and retaining qualified early childhood teachers; creating professional growth opportunities; developing effective staff meetings; implementing a shared decision making process; utilizing conflict resolution strategies; and developing partnerships with families and community agencies. 3 hrs. lecture/wk.
ELTE 122
National Electrical Code I (4 CR)
This is an introductory course on the use and interpretation of the current National Electrical Code. Students should develop a working knowledge of the code that will permit them to apply it to everyday applications. Upon successful completion of this course, the student should be able to use the code to design service entrances, feeders and branch circuits and discern between wiring methods used in difference occupancies. 4 hrs. lecture /wk.

ELTE 123
Electromechanical Systems (4 CR)
Upon successful completion of this course, the student should be able to identify electrical components and their relationships to the various repair and troubleshooting techniques. The materials in this course will prove useful to service technicians whose background in electricity is limited. The course includes material from basic electrical theory to troubleshooting complex electrical circuits. This course will provide practice in the application of electrical theory as well as in the interconnection of components of heating and cooling systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. This is a beginning course in electrical theory that is required for HVAC, electrical and power plant technology but is appropriate for all interested students. Common components found in the HVAC industry are used to develop these skills. 3 hrs. lecture, 3 hrs. lab/wk.

ELTE 125
Residential Wiring Methods (4 CR)
Prerequisite or corequisite: HVAC 123 or ELTE 123
This is an introductory course on residential wiring methods that includes practical application and hands-on experience in implementing the code requirements. Upon successful completion of this course, the student should acquire the necessary skills to wire a residence to meet the minimum requirements as set forth in the current National Electrical Code for residential occupancies. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk. Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $125 to $300.

ELTE 200
Commercial Wiring Methods (4 CR)
Prerequisite or corequisite: HVAC 123 or ELTE 123
This course covers commercial wiring methods. Upon successful completion of this course, the student should be able to read commercial blueprints and apply the current National Electrical Code to commercial wiring systems. The student will gain working knowledge and hands-on experience with commercial wiring techniques. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk. Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $125 to $300.

ELTE 202
Electrical Estimating (3 CR)
Prerequisites: ELTE 122 and ELTE 125 or ELTE 200 or permission from program facilitator
Upon successful completion of this course, the student should be able to manually and electronically (using industry standard computer software) develop an electrical estimate for a residential and commercial design. Emphasis will be placed on compiling a take-off list of materials from blueprints, completing a bill of material and completing the final bid process. This includes a bid accuracy analysis to determine the job's selling price. The student will be able to determine material cost, labor cost, the proper application of direct cost, overhead and profit. Also, to conclude the estimate, the student will be able to write bid proposals and change orders. 2 hrs. lecture, 3 hrs. lab/wk.

ELTE 205
Industrial Electrical Wiring (4 CR)
Prerequisite: ELTE 122 or ELTE 125 or ELTE 200

This advanced course covers industrial wiring methods. Upon successful completion of this course, the student should be able to read industrial blueprints and apply the current National Electrical Code to industrial wiring systems. The student will gain working knowledge and hands-on experience with industrial wiring techniques. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $125 to $300.

ELTE 210
Code Certification Review (3 CR)
Prerequisite: ELTE 122

Upon successful completion of this course, the student should be able to use the current National Electrical Code to do calculations involving loads, lighting and circuit sizing. The course will cover typical load calculations used in both residential and commercial settings. The student should also be able to interpret and apply the National Electrical Code rules to special wiring systems including Hazardous Locations, Elevators, Remote-control circuits and Fire Alarm systems. 3 hrs. lecture/wk.

ELTE 215
Generators, Transformers and Motors (4 CR)
Prerequisites: ELTE 123 and one of the following: ELTE 122 or ELTE 125 or ELTE 200 or equivalent experience and division administrator's approval

This is an advanced course on the use of generators, transformers and motors. Upon successful completion of this course, the student should be able to interpret and apply the rules of the current National Electrical Code to wiring systems composed of these electrical components. Also, the student will gain a working knowledge of the theory of these single-phase and 3-phase electrical components and their practical applications in everyday use in the electrical industry. 4 hrs. lecture/wk.

ELTE 271
Electrical Internship I (3 CR)
Prerequisite: program facilitator approval

Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students with on-the-job experience under the supervision of professionals in the industry. The work will be developed cooperatively with area employers, college staff and each student to provide a variety of actual job experiences directly related to the student’s career goals. 1 hr. lecture, minimum 15 hrs. on-the-job training/wk.
ELEC 120

Introduction to Electronics (3 CR)

This is a beginning course in electronics technology that is appropriate for both electronic majors and other interested students. An overview of basic electronic theory, principles and components is presented. In addition, the laboratory exercises will emphasize the operation and use of the primary pieces of electronic test equipment and the fabrication of selected circuits. 2 hrs. lecture, 2 hrs. lab-lecture, 2 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ELEC 122

Circuit Analysis I (3 CR)

Prerequisites: ELEC 120 and MATH 133 or MATH 172

This course covers resistive circuits having DC sources. Analysis topics include Ohm's law, Kirchoff's law, the superposition theorem, Thévenin's theorem and Norton's theorem. The current, voltage and resistance relationships in series, parallel and combination circuits will be studied. 3 hrs. lecture/wk.

ELEC 123

Smart House Technology (3 CR)

This course is a general introduction to the rapidly growing field of home technology and its integration and use. Lectures, demonstrations and lab work will be used to teach the types of home technology being sold and installed. This course is designed to assist new users to implement this technology in their own homes and as an introduction for students wanting to proceed further into the field as contractors or installers. 3 hrs. lecture/wk.

ELEC 125

Digital Electronics I (4 CR)

This is a beginning course in which students will study and practice the basic concepts of digital electronics. Topics will include digital number systems, logic gates, logic circuits, flip-flops, digital arithmetic, counters and registers. 3 hrs. lecture, 3 hrs. lab/wk.

ELEC 126

Microcomputer A+ Preparation (4 CR)

This course is designed to be a general introduction to personal computer hardware and operating system software. The course teaches the operation, installation and upgrade of all the major components of a typical PC. The course also provides the basic knowledge to prepare the student for passing the A+ test, which is the industry standard certification for personal computer technicians. Since A+ Certification is based upon the Windows Operating System and Intel/AMD-type microprocessors, these will be the basis of the course. The course will cover both of the A+ Certification testing areas: PC Hardware (Core Test) and Operating Systems (OS Test). 3 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.

ELEC 127

Robots for Humans (4 CR)

This course is a general introduction to the rapidly growing field of robotics. The class will use lectures, demonstrations and lab work to teach the basics of robotics. This course is designed to assist new users in making use of this
technology in their own lives and as an introduction for students wanting to proceed further into the field. 3 hrs lecture, 2 hrs open lab/wk.

**ELEC 130**  
Electronic Devices I (4 CR)  
*Prerequisite or corequisite: ELEC 140*  
This is the first course in electronic devices. Topics include diodes and transistors, special purpose diodes and diode application circuits. Both bipolar junction transistors (BJTs) and field effect transistors (FETs) are examined and application circuits for both transistor types are constructed. 3 hrs. lecture, 3 hrs. lab/wk.

**ELEC 131**  
Introduction to Sensors and Actuators (3 CR)  
This course examines types and uses of industrial sensors and actuators. Topics include temperature, pressure, optical, position and flow sensors. Operation of AC and DC motor drives will also be covered. The course will also include wiring and troubleshooting of sensors and actuators. Lecture topics will be supported by hands-on lab projects. 2 hrs. lecture, 3 hrs. lab/wk.

**ELEC 133**  
Programmable Controllers (3 CR)  
This is an introductory course in programmable logic controllers. The course is designed for individuals without extensive electrical or controller backgrounds. Hardware aspects and programming aspects of controller operation are covered. The foundational controller logic symbols and controller logic operations necessary to interpret and write ladder logic programs are taught in this class. Students will enter, edit and test controller programs through assigned laboratory projects. 2 hrs. lecture, 3 hrs. lab/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.

**ELEC 140**  
Circuit Analysis II (3 CR)  
*Prerequisites: ELEC 122 and MATH 134 or MATH 172 or MATH 173*  
The analysis techniques presented in Circuit Analysis I will be applied to complex circuits driven by AC and pulsed sources. The responses of circuits having resistance, inductance and capacitance will be analyzed. Other topics include transformers and electrical filters, 3 hrs. lecture/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $30.

**ELEC 150**  
Introduction to Telecommunications (3 CR)  
This is an introductory-level course in telecommunications principles that includes both voice and data communications. An examination of the communications industry and its regulatory environment will be provided. Topics include voiceband communications, digital transmission, switching and signaling, and emerging technologies. 3 hrs. lecture/wk.

**ELEC 165**  
Advanced Programmable Controllers (3 CR)  
*Prerequisite: ELEC 133*  
This course is a continuation of ELEC 133. Principle topics include sequences, file and block transfers, analog control and PID functions. In addition, methods of
networking of PLCs and advanced user interfaces will be covered. Lecture topics will be supported by laboratory projects. 2 hrs. lecture, 3 hrs. lab/wk.

ELEC 175
Telecommunications (3 CR)
Prerequisite or corequisite: ELEC 130
This course studies hardware and software functions of telecommunication systems. Topics include both voice and data aspects of telecommunication systems, including terminology, interfaces, protocols, transmission media, networks and networking technologies. 2 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 TO 30.

ELEC 185
LAN Cabling and Installation (3 CR)
This course is designed to provide specialized skills for installing and testing local area network cabling and wireless installation. Twisted-pair, coax and fiber cables will be introduced and contrasted based on their characteristics and applications. Laboratory exercises for terminating and testing network cables and installing wireless systems will accompany the lectures. Students will be trained how to use common wiring tools and testing instruments. Methods of documenting LAN systems will also be introduced. 2 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ELEC 195
Introduction to Wireless LANs (3 CR)
This course will introduce the student to the subject of wireless local area networks. The course will cover the types of equipment and their uses, correct configuration of equipment, types of security methods used, how to determine the physical lay-out of the access points and other equipment and procedures that can be used to administrate the network. 3 hrs. lecture, 2 hrs lab./wk.

ELEC 225
Digital Electronics II (3 CR)
Prerequisite: ELEC 125
Students will continue their study of digital concepts and will learn how to build digital circuitry using digital integrated circuit chips and basic concepts of computer organization. In additional, emphasis will be placed on learning how to troubleshoot digital circuits and digital systems. Each student will build a digital computer through a series of laboratory projects. 2 hrs. lecture, 3 hrs. lab/wk.

ELEC 230
Electronic Devices II (3 CR)
Prerequisite: ELEC 130
This class is a continuation of the electronic devices sequence. Topics include operational amplifiers, thyristors and voltage regulators. Operational amplifier applications include comparators, summing amplifiers, integrators, differentiators and active filters. 2 hrs. lecture, 3 hrs. lab/wk.

ELEC 240
Electronic Communication Systems (4 CR)
Prerequisite or corequisite: ELEC 230
This course provides a study of electronic communication systems. Topics include
the electromagnetic spectrum, decibels, noise, amplitude modulation, antennas, transmission lines and the global positioning satellite system. 3 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $30.

ELEC 245
Microprocessors (3 CR)
Prerequisite: ELEC 225
This course provides students with a basic knowledge of microprocessors and how microprocessors interface with other devices to create microcomputer systems. Students will learn how to write assembly language and machine language programs for a microprocessor as well as how to interface memory, input devices and output devices to a microprocessor. Additionally, emphasis will be placed on learning how to troubleshoot microprocessor-based systems. 2 hrs. lecture, 3 hrs. lab/wk.

ELEC 250
Microcomputer Maintenance (3 CR)
Prerequisite: ELEC 126
This course is a continuation of the study of personal computers and will further the student's ability to maintain and repair them. In addition, this course will assist the student in preparing for computer-maintenance certification. Topics will include interaction of hardware and operating systems, resource conflicts, networking capabilities, common hardware and software problems, hardware differences of portable computers, and upgrading computers. The course topics will be supported by laboratory projects. 2 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.

ELEC 271
Electronics Internship I (1 CR)
Prerequisite: assistant dean's approval
This course affords the student the opportunity to apply classroom knowledge to an actual work environment. It will provide selected advanced electronics technology students with appropriate on-the-job experience with area employers, under instructional oversight, that will promote the student's career goals. 18 hrs. approved and appropriate work activity/wk.

ELEC 272
Electronics Internship II (1 CR)
Prerequisites: ELEC 271 and approval of the program assistant dean
This course is a continuation of ELEC 271. It affords the student the opportunity to apply classroom knowledge to an actual work environment. It will provide selected advanced electronics technology students with appropriate on-the-job experience with area employers, under instructional oversight, that will promote the student’s career goals. 18 hrs. of approved and appropriate work activity/wk.

Emergency Medical Science/MICT (EMS)

EMS 121
CPR I - Basic Life Support for Healthcare Provider (1 CR)
This course provides an overview of the cardiovascular and respiratory systems, a discussion of medical and environmental emergencies leading to the need for CPR, and an introduction to diagnostic signs and triage, as well as insight into the
structure and function of the emergency medical services system. The most current practical CPR skills will be taught, including CPR, AED, and airway obstruction techniques for adults, children and infants. Upon successful completion of all American Heart Association standards, the student will receive affirmation at the Healthcare Provider level. 4 hrs. lecture, lab/wk. for 5 wks.

EMS 125
CPR II-Basic CPR Instructor (1 CR)

Prerequisite: Successful completion of EMS 121 and/or current certification by AHA as Basic Rescuer

This class will include a review and affirmation of Basic Rescuer techniques, practice in the design and implementation of CPR courses, demonstration of manikin maintenance and decontamination procedures, and mini-lectures. Upon successful completion of this class, students will be eligible for affirmation by the American Heart Association as a BLS instructor. Each participant must teach or co-teach a CPR class while being monitored by an AHA faculty member before the instructor affirmation card will be issued. 2.5 hrs. lecture, lab/wk. for 8 wks. (average).

EMS 128
EMS First Responder (5 CR)

This course is designed to provide training in emergency medical care for those who are apt to be the first persons responding to an emergency incident. Fire, police, civil defense personnel, school bus drivers, day-care providers, utility workers and industrial workers are a few examples of those persons who would benefit from this training. The student will receive both didactic and psychomotor skills training in CPR, patient assessment, fracture management, airway management and trauma management. Successful completion of this course with a minimum grade of "C" will enable the student to sit for the First Responder certification exam administered by the Kansas Board of Emergency Medical Services. 6 hrs. lecture, 6.5 hrs. lab/wk. for 8 wks. (average).

EMS 130
Emergency Medical Technician (9 CR)

Prerequisite: EMS 128 or equivalent, or be an active member in a health-related occupation (firefighter, rescue, ambulance, law enforcement, industrial first-aid personnel or other health-related field), or attained the minimum of an associate's degree

This program is designed for individuals interested in providing medical care to patients in the pre-hospital setting. It will provide the participants with opportunities to gain information, skills and attitudes necessary for certification and practice as an emergency medical technician (EMT) in the state of Kansas. This program has been approved by the Kansas Board of Emergency Medical Services (BEMS). It addresses information and techniques currently considered the responsibility of the EMT according to the United States Department of Transportation, National Standard Curriculum. The program consists of didactic instruction, practical skill training and clinical experience. Students are also required to attend Saturday session(s) as necessary. Saturday dates and times will be announced during the first class session. Classroom instruction includes anatomy, physiology, recognition and care of medical emergencies, and trauma-related injuries. CPR, bandaging, splinting, childbirth techniques and airway management are among the skills taught. An extrication session will give students hands-on experience with automobile accident situations. Upon instructor recommendation, students will participate in clinical and field observation. All transportation to and from off-campus sites is the responsibility of the student. Students completing this course with a minimum grade of "C" will be allowed to sit for the Kansas EMT State Certification Examination administered by the BEMS. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 7 hrs. lecture, 5 hrs. lab/wk. (average)
EMS 133
Emergency Medical Technician Practicum (3 CR)

Prerequisites: EMS 130 or equivalent and a copy of current EMT-B card

EMT Practicum is designed to give the newly certified EMT-B the additional skills and confidence needed to successfully compete for a position as an EMT-B with an EMS service. Skills will include ambulance operation, driving, map reading, insurance billing and unit maintenance. This course will also provide high-fidelity scenario training in all aspects of the EMS call as well as extensive field lab time with a local EMS service. Students will participate in realistic medical emergency scenarios with "actors" playing life-like patients and bystanders as well as numerous field internship shifts on a licensed ambulance. Students will work through all phases of an ambulance call. They will be presented with complex patient care situations that require the development of critical thinking and decision-making skills. Students will be tested on their ability to lead a team of pre-hospital caregivers in the diagnosis, proper treatment and evacuation of a patient. Scenario simulations will be set up to be as life-like as possible. 2 hrs. lecture, 10 hrs. lab/wk.

EMS 140
Basic Cardiology and EKG Recognition (3 CR)

Prerequisites: Prospective students should be certified in a health profession, i.e., EMT, RN, LPN, EMT-P. Permission of the assistant dean is required.

The health care worker with an understanding of ECG tracing will function more effectively when providing care for the cardiac patient. Increasing numbers of professionals are being called upon to utilize ECG tracing in their work settings, but without adequate knowledge of its use. This course will serve as both continuing education and the preparation for the job entry and/or job advancement. During the course, students will learn to apply monitoring and 12-lead electrodes, diagnose ECG dysrhythmias and infarct locations, treat ECG dysrhythmias, and defibrillate ventricular fibrillation. 3 hrs. lecture/wk.

EMS 203
KS EMT - Intermediate/Defibrillator (11 CR)

Prerequisites: EMT-B and additional prerequisite and/or documentation requirements. See assistant dean for details.

This course will cover selected advanced emergency medical care concepts and practices. This intermediate-level course advances the basic emergency medical technician's knowledge and skills in patient assessment, airway management, intravenous cannulation and manual defibrillation. The KS EMT-I/D's knowledge and skills are intermediate between the EMT-Basic and the EMT-Paramedic. Upon successful completion of this course, the student will be able to utilize the assessment findings to formulate a field impression and implement the treatment plan for the patient suffering a medical or trauma emergency. As the KS-EMT-I/D demonstrates cognitive and motor skill competency in the classroom and skills laboratory, his or her training will proceed to the clinical and field environments, where the knowledge, skills and attitudes necessary for professional practice will be practiced, synthesized and perfected. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 7 hrs. lecture, 5 hrs. lab, 10 hrs. clinical/field experience/wk.

EMS 206
Training Officer I (1 CR)

Prerequisites: Kansas Board of EMS certification at the Emergency Medical Technician - Basic (EMT-B) level or above and approval of the course instructor

This course is a requirement for the Kansas Board of Emergency Medical Services (KSBEMS) certification as a Training Officer (TO). The course is intended to prepare the student to plan, implement, coordinate, teach and evaluate continuing education programs. The course is a prerequisite for Training Officer II. 15 hrs. lecture, 5 hrs. lab total.
EMS 207
Training Officer II (2 CR)
Prerequisites: Kansas Board of Emergency Medical Services certification at the provider level the student wishes to teach, completion of EMS 206 Training Officer I and approval of the course instructor
This course is a requirement for the Kansas Board of Emergency Medical Services (KSBEMS) certification as a Training Officer (TP). The course is intended to prepare the student to plan, implement, coordinate, teach and evaluate continuing education programs. As a TOII a student will also be qualified to plan, implement, coordinate, teach and evaluate Initial Instruction Programs for the First Responder level of certification in Kansas. 33 hrs. lecture, 7 hrs. lab total

EMS 210
Emergency Medical Services Instructor Coordinator (5 CR)
Prerequisites: Prospective students must meet all the requirements for selection as set forth by the Kansas Board of Emergency Medical Services, which includes certification as a care provider, documentation of pre-hospital experience and successful completion of the BEMS pre-selection process
This course covers the basic tenets of adult education as they apply to teaching emergency medical services provider courses. Students are oriented to all Kansas requirements for conducting initial courses of instruction for ambulance attendants. Successful completion will be the first step toward certification as a Kansas EMS instructor coordinator. This program has been approved by the Kansas Board of Emergency Medical Services (BEMS). It addresses information and techniques currently considered the responsibility of the EMT-IC according to the United States Department of Transportation, National Standard Curriculum. 5 hrs. lecture-demonstration/wk. for 8 wks.

EMS 220
MICT I (10 CR)
Prerequisite: Admission to the MICT program
MICT I is the first of four courses in advanced out-of-hospital emergency medical care leading to the opportunity to sit for the National Registry Examination for Paramedics. In this narrowly focused but intense foundational course, the paramedic student will gain a significant knowledge of patient assessment, pharmacology and medication administration techniques, electrocardiography, advanced airway management, and paramedic scope of practice. Much material will be covered rapidly, and emphasis is on organization, internalization and synthesis of the basic knowledge of the discipline in this 9-week course. Additionally, during the initial psychomotor teaching labs, students will gain the ability to assess patients, administer medications, treat dysrhythmias and manage the airway through manikin practice. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 24 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $700 to $1,000.

EMS 225
MICT II (10 CR)
Prerequisite: EMS 220 with a grade of "C" or higher
MICT II is the second of four courses in advanced out-of-hospital emergency medical care leading to the opportunity to sit for the National Registry Examination for Paramedics. This course builds on the foundational knowledge developed in MICT I and covers advanced management of medical and trauma emergencies in the out-of-hospital environment. Much material will be covered rapidly, and emphasis is on organization, internalization, synthesis and application of the basic knowledge of the discipline in this 9-week course. Students demonstrate competency at motor skill performance, and extensive simulation practice is afforded. Students begin field observation with a paramedic ambulance crew and
complete an Advanced Cardiac Life Support Course. 24 hrs. avg. lecture/wk., 12 hrs. lab/field observation avg./wk.

EMS 230
MICT III Clinicals (12 CR)
Prerequisite: EMS 225 with a grade of "C" or higher
MICT III is the third of four courses in advanced out-of-hospital emergency medical care leading to the opportunity to sit for the National Registry Examination for Paramedics. During MICT III, paramedic students have the opportunity to take the knowledge and skills gained in MICT I and II and apply them in actual supervised clinical practice. MICT III represents a brief, intense 14-week course in which knowledge and skills are synthesized and applied to patients under supervision of physicians and nurses in clinical practice in the emergency department, critical care unit, surgery/ recovery room, labor/delivery room, pediatric emergency department and burn center. Field observation lab and classroom and laboratory review are included as well. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. lecture avg./wk., 44 hrs. clinical/lab/field avg./wk.

EMS 271
MICT IV Field Internship (15 CR)
Prerequisite: EMS 230 with a grade of "C" or higher
MICT IV is the final of four courses in advanced out-of-hospital emergency medical care leading to the opportunity to sit for the National Registry Examination for Paramedics. During MICT IV, paramedic students have the opportunity to take the knowledge and skills gained in MICT I, II and III and apply them in an actual practice environment. MICT IV represents an intense 4-month course in which knowledge, skills and professional behaviors are synthesized and applied to victims of sudden trauma or medical emergencies under supervision of paramedic preceptors at the emergency scene and in the ambulance. Entry-level competence into the profession is demonstrated as the student demonstrates the ability to assess the scene and the patient, develop a plan for therapeutic intervention as well as scene management, and effectively lead the out-of-hospital resuscitation team's effort. Classroom and laboratory review are included. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. lecture avg./wk., 56 hrs. clinical/lab/field avg./wk.

Engineering (ENGR)

ENGR 121
Engineering Orientation (2 CR)
Upon successful completion of this course, the student should be able to describe careers in engineering and use fundamental concepts in engineering problem solving. Topics include engineering disciplines, aptitude and academic requirements, professional responsibilities, problem definition and solution, engineering design, and terminology. Students will meet professional engineers during field trips to engineering companies and work sites. The primary intent of this course is to introduce students to the engineering problem-solving process and to help each student make the best career decision. 2 hrs. lecture/wk.

ENGR 131
Engineering Graphics I (4 CR)
Corequisite: MATH 133 or MATH 171 or MATH 172 or MATH 173 or MATH 241
Upon successful completion of this course, the student will be able to apply graphic principles used in the engineering design process. The student will master graphics concepts using computer-aided drafting (CAD) software. Topics include 2-D and 3-D CAD commands, geometric construction, multi-view, orthographic projection, sectional views, isometrics, dimensioning, and descriptive geometry. 3 hrs. lecture, 4 hrs. lab/wk.

ENGR 171
Programming for Engineering and Science (3 CR)
Prerequisite: MATH 171
At the completion of this course, the student should be able to design algorithms for the solution of engineering and science problems using pseudocoding and flowcharting techniques; code the solution in the FORTRAN programming language; and compile, test and debug the program. Programming concepts covered will include data input from the keyboard and data files, formatted output, sequence, selection and iteration structures, function and subroutine subprograms and array processing. Proficiency with conversions and math in the decimal, binary and hexadecimal numbering systems will also be attained. This is a beginning course that will prepare students for more advanced studies in engineering and science computer applications. 2 hrs. lecture, 2 hrs. lab/wk.

ENGR 180
Engineering Land Surveying I (3 CR)
Corequisite: MATH 134 or MATH 172
Upon successful completion of this course, the student should be able to identify the basic applications of plane surveying procedures; measurement of horizontal distances, directions, angles, leveling, traversing, curves and stadia coordinates; computations with the aid of a computer; and topographical property and construction surveying. Students will take part in field operations using equipment such as auto levels, theodolites, EDM, GPS, and total station. 2 hrs. lecture, 3 hrs. lab/wk.

ENGR 251
Statics (3 CR)
Prerequisite: MATH 242 and Prerequisite or Corequisite: PHYS 220
Upon successful completion of this course, the student should be able to describe and predict the conditions of rest and motion of bodies under the action of forces. The principles used will include vectors, force systems, equilibrium, free body diagram, centroids, moments of inertia, trusses, frame, and shear and moment diagrams. This course is typically offered in the summer and fall semesters. 3 hrs. lecture/wk.

ENGR 254
Dynamics (3 CR)
Prerequisite: ENGR 251
Upon successful completion of this course, the student should be able to apply the principles of dynamics, the branch of engineering mechanics that studies objects in motion. Topics covered will include unbalanced force systems (Newton’s second law), displacement, velocity and acceleration, work and energy, and impulse and momentum. Computer applications will be included. This course is typically offered in the spring semester. 3 hrs. lecture/wk.

English (ENGL)
ENGL 102
Writing Strategies (3 CR)
Prerequisite: Appropriate placement test score

This course assists the student in developing strategies for sentence writing. The course is designed to meet a variety of learning styles, levels and needs. Students will develop strategies for self-monitoring errors in written products. Students are taught strategies for writing a variety of sentence formats and have extensive practice in writing sentences as a means of implementing new information. 3hrs./wk. This course does not fulfill degree requirements. Students must take the JCCC writing assessment test before enrolling. For more information, see a JCCC counselor.

ENGL 103
Practical Writing Skills (1 CR)

At the completion of this course, the student should be able to recognize and write complete sentences. The student will write a variety of sentences using strategies for building sentences with phrases and clauses as well as editing sentences through coordination and subordination. The student will then practice developing paragraphs in various organizational modes. Along with writing the student will read selected prose and write responses to these readings. The course is designed specifically to aid non-native speaking students in acquiring writing skills through individualized instruction. The aim of this course is to enhance/supplement the English as a Second Language program already offered at JCCC. Also, because hearing-impaired students have similar difficulties with the English language as ESL students, this course addresses the challenges often faced by this student population. This course meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student should contact the Writing Center.

ENGL 105
Basic English Grammar (3 CR)

The aim of English 105 is to introduce the student to the basic structures in English grammar: parts of speech, sentence types, phrases and clauses. Students learn to use correct punctuation. Moving from joining short phrases to the basic sentence, students learn to combine ideas to form a variety of sentence structures. Students practice skills, working in class (often in pairs or groups) and making use of computer programs in the Writing Center. Grammar games are used to help prepare students for a test. 3 hrs./wk. This course does not fulfill degree requirements.

ENGL 106
Introduction to Writing (3 CR)
Prerequisite: ENGL 102 or appropriate score on assessment test

Beginning with a review of basic sentence skills, this course focuses on paragraph development, including subject selection, topic sentences, methods of development, transitional devices and effective introductions and conclusions. The last part of the course will focus on developing multi-paragraph essays. 3 hrs./wk. This course does not fulfill degree requirements. Students must take the JCCC writing assessment test. For more information, see a JCCC counselor.

ENGL 107
Sentence Pattern Skills (1 CR)

At the completion of this course, the student should be able to identify the parts of speech, elements of a sentence and basic sentence patterns. Emphasis is on sentence combining and sentence composing. Students are told that grammar in isolation will not improve writing skills, and they are encouraged to practice writing. This course meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student
should contact the Writing Center.

**ENGL 108**  
**Composing Skills** (1 CR)  
After completing Composing Skills, students will be able to choose a topic, narrow the topic, and organize and develop with supporting evidence a variety of paragraph modes. The student will be able to achieve paragraph unity, coherence and emphasis. Also, the student will learn revision and editing strategies. Course meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student should contact the Writing Center.

**ENGL 109**  
**Proofreading Skills** (1 CR)  
This 1-credit module is designed to provide students with strategies and rules that will help them recognize and repair common grammar, usage and mechanical errors in their writing. This course focuses on the major and minor errors as set forth in the English program objectives (available in the Writing Center). Students will learn to recognize and correct these errors, not only on exercise sheets, but also in their own writing. This class meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student should contact the Writing Center.

**ENGL 110**  
**English Grammar Review** (1 CR)  
English Grammar Review helps students to review the parts of speech, elements of a sentence, basic sentence patterns, major sentence level errors, agreement errors and punctuation. Students are encouraged to practice writing. Course meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student should contact the Writing Center.

**ENGL 112**  
**Research Skills** (1 CR)  
Research Skills is a review of the various aspects of the research process, beginning with limiting the subject and moving to revising the finished product. Emphasis is on the gathering of resource materials, synthesizing the information and developing an essay in which the resource information is used to support a thesis and is documented in an approved academic form. This course meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student should contact the Writing Center.

**ENGL 115**  
**Revision Skills** (1 CR)  
Revision Skills is designed to instruct the practicing writer in skills needed to revise all writing, including business, college and personal writing. Students will use computer programs and self-paced materials. Revision Skills is intended to complement courses in which writing is assigned. Students will be encouraged to bring in business communication or college assignments to apply the learned skills. Course meets by arrangement in the Writing Center. This course does not fulfill degree requirements. After registering for this course, the student should contact the Writing Center.
ENGL 120
Writing in the Disciplines (1 CR)
This course is designed to complement and/or support classes in which writing is intrinsic to the curriculum and provide students with a process that can be applied to the variety of written assignments typically assigned in classes other than composition. Students will practice writing a variety of short papers using a prescribed process for each assignment. The course is individualized. Students enrolled in this class must come to the Writing Center, LIB 308, to make arrangements for their class schedule, to pick up a syllabus and other materials, and to be assigned an instructor. The course is a combination of written material and software. All completed work will be kept in a folder in the Writing Center. Students should anticipate approximately 20 hours of work to complete the course. This course does not fulfill degree requirements.

ENGL 121
Composition I (3 CR)
Prerequisite: ENGL 106 or appropriate placement test score or EAP 113 and EAP 117
Composition I focuses on writing nonfiction prose suitable in its expression and content to both its occasion and its audience. Students will have an opportunity to improve in all phases of the writing process: discovering ideas, gathering information, planning and organizing, drafting, revising and editing. Each essay written in the course should clearly communicate a central idea or thesis, contain sufficient detail to be lively and convincing, reflect the voice of the writer and use carefully edited standard written English. 3 hrs./wk. Students must take the JCCC writing assessment test or submit an ACT score of 19 or higher before enrolling. For more information, see a JCCC counselor. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ENGL 122
Composition II (3 CR)
Prerequisite: ENGL 121
Because so much writing is required in college and in the workplace demands the ability to synthesize information gathered from various sources, Composition II will focus on skills essential to gathering, comprehending, analyzing, evaluating and synthesizing information. Composition II also emphasizes organizing and polishing steps important in composing expository, evaluative and persuasive prose. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ENGL 123
Technical Writing I (3 CR)
Prerequisite: ENGL 121
This course provides a basic knowledge of technical writing. Students will learn the writing process (prenwriting, writing and rewriting) to follow when constructing correspondence, including memos, letters, e-mail, reports, instructional manuals and Web pages. Students also will learn seven key traits of effective technical writing: clarity, conciseness, document design, organization, audience recognition, audience involvement and accuracy. Accuracy specifically entails the need for students to adhere to rules of grammar and mechanics. Students will learn how to create computer-generated graphics and learn word processing skills. Finally, the students will learn how to work in teams, modeling Total Quality Management skills. 3 hrs./wk.

ENGL 130
Introduction to Literature (3 CR)
Prerequisite: ENGL 121

Students will read, discuss and analyze works from three literary genres: the short story, the poem and the play. Students will learn and apply the technical vocabulary used in the criticism of these literary forms. Students will be introduced to representative works from various literary traditions and cultures, including numerous works from contemporary writers. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ENGL 140
Writing for Interactive Media (3 CR)
Prerequisite: ENGL 121

This course teaches students to apply the writing process as well as fundamental rhetorical and composition skills to various interactive media including Web pages, CD-ROMs/DVD, e-mail, kiosks, computer program packages and other electronic media. The instruction will focus on skills essential to selecting, evaluating and synthesizing information from primary and secondary sources; in addition, it will emphasize the different approaches to organization that these media require as well as the variety of discourse styles used in informative, instructional, persuasive and entertainment media texts. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ENGL 150
Digital Narratives (3 CR)
Prerequisite: ENGL 121

Games, particularly Role-Playing Games (RPGs) and other participatory narratives, share many properties with traditional narratives, yet differ significantly from their linear counterparts. This course focuses on the elements of narrative as well as the principles that drive virtual or alternative possible worlds (both fictive and reality-based), and it will provide students with practice writing and designing artifacts that demonstrate an understanding of plot, character, setting and the impact of structure and purpose in game development. This course is taught in the fall semester only. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $30.

ENGL 210
Technical Writing II (3 CR)
Prerequisite: ENGL 123

This course provides an advanced knowledge of technical writing. Students will learn the writing process (prewriting, writing and rewriting) to follow when constructing correspondence. Types of technical writing covered in this course include memos, letters, e-mail, short reports, long reports, instructional manuals, Web pages, PowerPoint presentations, brochures, newsletters, journal articles, resumes and online resumes. Students also will learn seven key traits of effective technical writing; clarity, conciseness, document design, organization, audience recognition, audience involvement and accuracy. Accuracy specifically entails the need for students to adhere to rules of grammar and mechanics. Students will learn how to create computer-generated graphics and learn word-processing skills. Finally, the students will learn how to work in teams, modeling Total Quality Management skills. 3 hrs./wk.

ENGL 215
U.S. Latino and Latina Literature (3 CR)
Prerequisite or corequisite: ENGL 122

This course introduces students to texts by U.S. writers of Hispanic descent or origin. Written primarily in English, the texts may include fiction, non-fiction, poetry, drama, and/or film. The readings, discussions, and related writing projects
will emphasize the relationship between mainstream America and borderland writers; explore the cultural and artistic context of the writers and their works; recognize and assess the use of major narrative and rhetorical strategies; and stimulate consideration of issues surrounding assimilation, identity formation, code-switching, and cultural hybridity. 3 hrs. lecture/wk.

ENGL 217
Literature by Women (3 CR)
Prerequisite or corequisite: ENGL 122
This survey course introduces students to a representative sample of texts created by women from the mid-seventeenth century to present. Using the lens of gender, students will explore the social, historical, political, and cultural contexts relevant to the literature. Further, students will identify significant literary devices and genres as employed by these authors. The course will emphasize the dynamic relationship between the literature and its contexts. 3 hr. lecture/wk.

ENGL 222
Advanced Composition (3 CR)
Prerequisite: ENGL 122
This course offers challenging insights into the act of writing. We will move beyond Composition I and Composition II, focusing on writing persuasively to a select audience: working together to anticipate and defuse objections; supply convincing evidence; synthesize the ideas of others to support our ends; look critically at all sources; and perfect a mature, polished style that is suitable to audience and occasion. 3 hrs./wk.

ENGL 223
Creative Writing (3 CR)
Prerequisite: ENGL 122
Students will study and practice writing in two or three of the major literary modes of writing: poetry, fiction, and possibly drama. The reading assignments are based on the premise that, to be a good writer, students must have knowledge of literary techniques and be perceptive readers and critics. Students will examine techniques of two or possibly three of the literary genres and then apply their knowledge to write in each genre. In addition, they will read other students' work and provide useful feedback on that work. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

ENGL 224
Creative Writing Workshop (3 CR)
Prerequisite: ENGL 223
In this class, students will build upon the knowledge and skills learned in ENGL 223. In addition to studying writing techniques, they will produce a body of written work in one or more literary genres of their choice: poetry, fiction, and/or drama. They will also read other students' work and provide useful feedback on that work. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $15 to $25.

ENGL 227
Introduction to Poetry (3 CR)
Prerequisite: ENGL 122
This course emphasizes close reading and analysis of poetry by writers from different time periods, countries, and ethnic backgrounds. Students will study terms, patterns, and forms that are useful for an understanding and appreciation
of poetic verse. The course will cover major literary, historical, and cultural movements as they relate to poetry. Students will be introduced to major classical and contemporary American and English poets, along with contemporary foreign-language poetry in translation. 3 hrs. lecture/wk.

ENGL 230
Introduction to Fiction (3 CR)
Prerequisite: ENGL 122
This course features significant opportunities to write about the literature and the reader's response to it. Students will learn the historical fictional precedents of the short story; the similarities and differences between the short story and other narrative forms, such as the novel; the differences between the short story and its historical precedents, between short stories and film adaptations of them, and between commercial and literary short stories. Students will discover the place of short stories in major literary movements, the key elements of short stories and interpretive approaches to short stories. 3 hrs./wk.

ENGL 231
American Prose (3 CR)
Prerequisite: ENGL 122
American Prose presents a series of literary works by American writers that reflects the attitudes and identity of our national literature and culture. By grappling with the ideas and characterizations presented in each literary work, the student develops meaningful insights into the attitudes and human conditions that influence America's national literary identity. 3 hrs./wk.

ENGL 232
Children's Literature (3 CR)
Prerequisite: ENGL 122
Children's Literature is meant for all students interested in bringing children and books together but is especially suited for those who are students with English or education majors; teachers already in the elementary school classroom; parents; those working with children in preschools, day-care centers and libraries; and grandparents and prospective parents. The course would also benefit those exploring the field of writing and illustrating for children. Students will identify children's needs and interests, list the criteria for choosing books for children, and demonstrate the means by which we can bring children and books together. Students will read, examine and critique a variety of children's literature selected by author, genre and historical time period. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

ENGL 235
Drama as Literature (3 CR)
Prerequisite: ENGL 122
This course introduces students to the analysis of plays as literature. Beginning with the Greek dramatists and ending with the contemporary scene, students will read full-length plays and the comments of playwrights, directors, actors and critics. They will analyze drama from psychological, historical, philosophical, structural and dramatic perspectives. Students will write essays demonstrating their understanding of the works studied. This course is taught in the fall semester only. 3 hrs./wk.

ENGL 236
British Literature I (3 CR)
Prerequisite: ENGL 122
In this survey course, the student will study British literature written up to 1800, ranging from the Anglo-Saxon to the Augustan eras, including works by major authors, such as Chaucer, Shakespeare, Milton, and Swift. The course will emphasize the relationships among influential writers, their lives and times. Additionally, the student will explore the literary differences between the British culture and one other culture that was governed by the British Empire. Such non-British literary works may be from Australia, India, Asia, and various regions of Africa, or the Middle East. 3 hrs. lecture/wk.

**ENGL 237**  
**British Literature II (3 CR)**  
*Prerequisite: ENGL 122*  
In this survey course, the student will study British literature written from 1800 to the present. Major authors from the Romantic, Victorian and Modern eras, such as Austen, Blake, Wordsworth, the Shelleys, Dickens, Tennyson, the Brownings, Eliot, and Woolf, will be included. The course will emphasize the relationships among influential writers, their lives and times. Additionally, the student will explore the literary differences between the British culture and one other culture that was governed by the British Empire. Such non-British literary works may be chosen from the traditions of Australia, India, Asia, various regions of Africa, or the Middle East. British Literature I is NOT a prerequisite for this course. 3 hrs. lecture/wk.

**ENGL 243**  
**Literature of Science Fiction (3 CR)**  
*Prerequisite or corequisite: ENGL 122*  
This course examines the literature of science fiction, especially from 1960 through the present. Students explore the unifying concepts of science and technology, depicted through imaginative narratives of the past, present and future. Students read short stories and/or novels, view science fiction films and discuss key science fiction concepts. 3 hrs. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

**ENGL 245**  
**Writing Literature for Children (3 CR)**  
*Prerequisite: ENGL 232*  
Writing Literature for Children is a continuation of Introduction to Children's Literature aimed primarily at those students interested in writing and publishing literature for children. The students will review children's needs and interests, research topics and collect data for possible books. Then students will write and assemble a variety of children's literature. Students will critique their own work and that of their peers and revise their work accordingly. Finally, students will compose all correspondence typically required by publishers. 3 hrs./wk.

**ENGL 250**  
**World Masterpieces (3 CR)**  
*Prerequisite: ENGL 122*  
World Masterpieces introduces students to literary study using major literary works composed from the times of Homer to Shakespeare that have been influential in shaping and expressing values of Western culture. Students will read selections representative of the epic, tragic, comic and lyric traditions primarily to gain knowledge of the works assigned. In addition, students will analyze the assigned texts as literary works and as cultural artifacts and influences. Finally, students will compare and contrast contemporary understandings of the individual and society with those expressed in the works studied. In completing the course objectives, students will learn the conventions of writing about literature and become familiar with general reference materials useful in studying literature. 3
ENGL 254
Masterpieces of the Cinema (3 CR)
Prerequisite: ENGL 122
This course examines the development of cinema from the early experiments in the late 1800s up to the present day, presenting the history and art of both American and international cinema. Students read the textbook, view short and full-length films, and discuss important cinematic techniques and concepts. Students verify their judgments by summarizing and analyzing these important concepts, using discussions, and writing effective, well-organized essays in response to cinematic presentations and explanations. 3 hrs./wk.

ENGL 256
American Poetry (3 CR)
Prerequisite: ENGL 122
American Poetry presents a planned reading schedule and directed discussion of poems that reflect the attitudes of American poets and American culture. By grappling with the ideas and characterizations presented in these poems, students can develop meaningful insights into the attitudes and human conditions that have influenced America’s national literary identity. 3 hrs./wk.

English for Academic Purposes (EAP)

EAP 091
Reading/Vocabulary I and Writing/Grammar I (6 CR)
Prerequisite: Appropriate assessment test score
This course, which pairs three credit hours of reading/vocabulary with three credit hours of writing/grammar, provides students who are English Language Learners (ELL) with an integrated communicative experience on the high beginning college level. Students will develop their skills in reading, writing, grammar and vocabulary in a learning community setting. Students who successfully complete EAP 091 will be awarded three hours of credit for EAP 101 Writing and Grammar I and three hours of credit for EAP 120 Reading and Vocabulary I. The teaching of this course will be shared by two instructors. This is the first reading-writing course in the English for Academic Purposes (EAP) program. This course does not fulfill degree requirements.

EAP 092
Reading/Vocabulary II and Writing/Grammar II (6 CR)
Prerequisites: Appropriate assessment test score or EAP 091 (EAP 101 and EAP 120) and EAP 105
This course, which pairs three credit hours of reading/vocabulary with three credit hours of writing/grammar, provides students who are English Language Learners (ELL) with an integrated communicative experience on the low intermediate college level. Students will develop their skills in reading, writing, vocabulary and grammar in a learning community setting. Students who successfully complete EAP 092 will be awarded three hours of credit for EAP 103 Writing and Grammar II and three hours of credit for EAP 121 Reading and Vocabulary II. The teaching of this course will be shared by two instructors. This is the second reading-writing course in the English for Academic Purposes (EAP) program. This course does not fulfill degree requirements.

EAP 093
Reading/Vocabulary III and Writing/Grammar III (6 CR)
Prerequisites: Appropriate assessment test score or EAP 092 (EAP 103 and EAP 121) and EAP 107
This course, which pairs three credit hours of reading/vocabulary study with three credit hours of writing/grammar, provides students who are English Language Learners (ELL) with an integrated communicative experience on the intermediate level. Students will further develop their skills in reading, writing, vocabulary, and grammar in a learning community setting. Writing activities will focus on paragraph and multi-paragraph writing. Students who successfully complete EAP 093 will be awarded three hours of credit for EAP 111 Writing and Grammar III and EAP 122 Reading and Vocabulary III. The teaching of this course will be shared by two instructors. This is the third reading-writing course in the English for Academic Purposes (EAP) program. This course does not fulfill degree requirements.

EAP 101
Writing and Grammar I (3 CR)
Prerequisite: Appropriate assessment test score Corequisite: EAP 120
This course, which is paired with EAP Reading and Vocabulary I, provides English as a Second Language students an integrated communicative experience at the beginning college level. As part of a Learning Community, students will learn effective writing techniques for using American English at the sentence and basic paragraph level. The course will also focus on basic study and learning strategies to aid writing. This course is the first writing and grammar course in the sequence of courses for English for Academic Purposes. 3 hrs lecture/wk. This course does not fulfill degree requirements.

EAP 103
Writing and Grammar II (3 CR)
Prerequisites: Appropriate assessment test score or EAP 091 (EAP 101 and EAP 120) and EAP 105 Corequisite: EAP 121
This course, which is paired with EAP Reading and Vocabulary II, provides English as a Second Language students an integrated communicative experience. As part of a Learning Community, students will focus on using American English in writing at the paragraph level. The course will also focus on learning and study strategies to enhance writing. This course is the second writing and grammar course in the sequence of courses for English for Academic Purposes. 3 hrs. lecture/wk. This course does not fulfill degree requirements.

EAP 105
Speaking and Pronunciation I (3 CR)
Prerequisite: Appropriate assessment test score
This course provides English as Second Language students the opportunity to develop their speaking and pronunciation skills. Focus will be on effective techniques for using American English in academic, career, and personal settings. 3 hrs. lecture/wk. This course does not fulfill degree requirements.

EAP 107
Speaking and Pronunciation II (3 CR)
Prerequisites: Appropriate assessment test score or EAP 091 (EAP 101 and EAP 120) and EAP 105
This course provides English as Second Language students the opportunity to expand fluency in speaking and pronunciation. The course covers techniques for listening with accuracy and speaking with the stress, rhythm, and intonation of American English. Personal communications and group interactions in academic, career, and community settings are included. The course concludes with applications to individual life goals. 3 hrs lecture/wk. This course does not fulfill
EAP 111
Writing and Grammar III (3 CR)
Prerequisites: Appropriate assessment test score or EAP 092 (EAP 103 and EAP 121) and EAP 107 or appropriate COMPASS ESL score Corequisite: EAP 122
This course, which is paired with EAP Reading and Vocabulary III, provides English as a Second Language students an integrated communicative experience at the intermediate level. As part of a Learning Community, students will focus on developing fluency in writing using American English at the paragraph and multi-paragraph level. The course includes study strategies and writing assignments related to the reading Learning Community component. This course is the third writing and grammar course in the sequence of courses for English for Academic Purposes. This course does not fulfill degree requirements. 3 hrs. lecture/wk.

EAP 113
Writing and Grammar IV (3 CR)
Prerequisites: Appropriate assessment test score or EAP 093 (EAP 111 and EAP 122) and EAP 115
This course provides English as a Second Language students the opportunity to improve fluency in American English in writing at the high intermediate to advanced level. Students will engage in writing tasks that relate to the academic disciplines. The course includes reading activities from the academic disciplines and study strategies appropriate for academic tasks. This course is the fourth writing and grammar course in the sequence of courses for English for Academic Purposes. This course does not fulfill degree requirements. 3 hrs. lecture/wk.

EAP 115
Speaking and Pronunciation III (3 CR)
Prerequisites: Appropriate assessment test score or EAP 092 (EAP 111 and EAP 122) and EAP 107
This course provides English as a Second Language students the opportunity to enhance fluency in speaking, pronunciation, and listening at the upper intermediate level. Students apply standard American communication patterns to understand lectures, speak in academic settings, and communicate in group interactions. Informal and formal projects include oral reports in specific fields of study and academic debates. The course concludes with analysis of individual goals and assessments to enhance academic success. This course does not fulfill degree requirements. 3 hrs. lecture/wk.

EAP 117
Speaking and Pronunciation IV (3 CR)
Prerequisites: Either (EAP 111 and EAP 122 and EAP 115) or (EAP 093 and EAP 115) or appropriate COMPASS ESL score
This course offers English as a Second Language students the opportunity to master speaking, pronunciation, and listening at an advanced level. Pronunciation performance will be enhanced for accent reduction and communication of precise meanings of standard American English. Students apply advanced strategies to process knowledge from specific fields of study and give presentations with idiomatic vocabulary from classical literature, media, and other research sources. The course concludes with expansion of sociolinguistic and cultural competencies for group interactions and large audiences. Pre- and post-assessments measure progress in exit competencies. This course does not fulfill degree requirements. 3 hrs. lecture/wk.
EAP 120
Reading/Vocabulary I (3 CR)
Prerequisite: Appropriate assessment test score Corequisite: EAP 101
This course, which is paired with EAP 101 Writing and Grammar I, provides English Language Learner students an integrated communication experience on the high beginning college level. As part of a Learning Community, students will learn effective techniques for reading, studying and using American English in an academic setting. This is the first reading course in the English for Academic Purposes (EAP) series. This course does not fulfill degree requirements.

EAP 121
Reading/Vocabulary II (3 CR)
Prerequisites: Appropriate assessment test score or EAP 091 (EAP 101 and EAP 120) and EAP 105 Corequisite: EAP 103
This course, which is paired with EAP Writing and Grammar II, provides English Language Learner (ELL) the opportunity to develop reading fluency, comprehension and vocabulary on the low intermediate college level in a Learning Community setting. Reading, writing, speaking and listening will be integrated, and students will learn effective techniques for studying and using American English in an academic setting. This is the second reading course in the English for Academic Purposes (EAP) series. 3 hrs. lecture/wk. This course does not fulfill degree requirements.

EAP 122
Reading and Vocabulary III (3 CR)
Prerequisites: Appropriate assessment test score or EAP 092 (EAP 103 and EAP 121) and EAP 107 Corequisite: EAP 111
This course, which is paired with EAP Writing and Grammar III, provides English Language Learner (ELL) an integrated communicative experience at the intermediate college level. Students will develop reading fluency, comprehension, and vocabulary in a Learning Community setting. Reading, writing, speaking, and listening will be integrated, and students will learn effective techniques for using American English to read and study in an academic setting. This course is the third reading course in the English for Academic Purposes (EAP) series. This course does not fulfill degree requirements.

Entrepreneurship (ENTR)

ENTR 120
Introduction to Entrepreneurship (2 CR)
The student will understand the role of entrepreneurial businesses in the United States and the impact on our national and global economy. The student will evaluate the skills and commitment necessary to successfully operate an entrepreneurial venture. Additionally, the student will review the challenges and rewards of entrepreneurship as a career choice as well as entrance strategies to accomplish such a choice. 2 hrs. lecture/wk.

ENTR 131
Financial Management for Small Business (2 CR)
Prerequisite: ACCT 111 or ACCT 121
Upon successful completion of this course, the student should be able to identify and evaluate the various sources available for funding a small business; demonstrate an understanding of financial terminology; read, prepare and analyze a financial statement; and write a loan proposal. In addition, the student should be able to explain the importance of working capital and cash management. The
student should also be able to identify financing needs, establish credit policies, and prepare sales forecasts. This course is required for a vocational certificate and associate of applied science degree in business entrepreneurship. 2 hrs./wk.

**ENTR 142**  
*Fast Trac Business Plan* (3 CR)  
Upon successful completion of this course, the student will be able to evaluate a business concept and write a sound business plan. In the process of doing so, students will be able to assess the strengths and weaknesses of a business concept; collect and organize market research data into a marketing plan; and prepare the financial projects for their business concept. In addition, students will be able to identify and evaluate various resources available for funding small businesses. The course is required for the business plan certificate, the vocational certificate in business entrepreneurship and the associate of applied science degree in business entrepreneurship. 3 hrs. lecture/wk.

**ENTR 160**  
*Legal Issues for Small Business* (2 CR)  
Upon successful completion of this course, the student should be able to identify the forms of business ownership and the legal and tax implications for each. In addition, the student should be able to explain laws covering issues such as personnel, contracts and protection of intellectual property. The student should also be able to explain the reporting requirements for local, state and federal agencies. This course is required for the associate of applied science degree and the vocational certificate in business. 2 hrs./wk.

**ENTR 180**  
*Opportunity Analysis* (2 CR)  
Upon successful completion of this course, the student should be able to assess the current economic, social and political climate for small businesses. In addition, the student should be able to explain how demographic, technological and social changes create opportunities for small business ventures. This course is required for the associate of applied science degree in business entrepreneurship. 2 hrs./wk.

**ENTR 190**  
*Small Business Analysis* (2 CR)  
*Prerequisites: BUSE 131 or ENTR 131 and BUSE 160 or ENTR 160 and BUS 230 or permission of division administrator*  
Upon successful completion of this capstone course, the student should be able to identify problems that frequently arise in small business and use problem-solving skills to formulate solutions. In addition, the student should be able to apply the knowledge of business concepts and techniques in the analysis of cases and actual business situations. This course is required for an associate of applied science degree and a vocational certificate in business entrepreneurship. 2 hrs./wk.

**ENTR 195**  
*Franchising* (3 CR)  
*Prerequisite: BUS 230*  
In this course, the student should be able to research the franchising method of doing business from the perspective of both the franchisor and the franchisee. The student will analyze independent management efforts necessary for a successful franchise business venture as well as understand the interdependent contractual obligations that are legally binding between the franchisor-franchisee. 3 hrs. lecture/wk.
ENTR 210  
Entrepreneurship Internship I (1 CR)  
*Prerequisite: Career program facilitator or assistant dean approval*

Upon the successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course consists of supervised work experience in an approved training situation. A minimum of 240 hours of on-the-job training is required. This course is required for an associate of science degree in business entrepreneurship. Either ENTR 210 or BUSE 210, Entrepreneurship Internship I, or ENTR 215 or BUSE 215, Entrepreneurship Internship II, is required for a vocational certificate in business entrepreneurship.

ENTR 215  
Entrepreneurship Internship II (1 CR)  
*Prerequisites: ENTR 210 and Assistant Dean's Approval*

Upon the successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. A minimum of 240 hours of on-the-job training is required. This course is required for an associate of applied science degree in business entrepreneurship. Either BUSE 210 or ENTR 210, Entrepreneurship Internship I, or BUSE 215 or ENTR 215, Entrepreneurship Internship II is required for a vocational certificate in business entrepreneurship.

ENTR 220  
Entrepreneurial Marketing (2 CR)  
*Prerequisite: BUS 230*

In this course, the student will gain insights essential for marketing an entrepreneurial venture utilizing innovative and financially responsible marketing strategies. The student will analyze marketing philosophies implemented by key successful entrepreneurs. Additionally, the student will prepare a marketing plan to launch the entrepreneurial venture and a marketing plan to implement during the first two years of business operation. 2 hrs. lecture/wk.

ENTR 225  
Family Business (3 CR)  

Upon successful completion of this course, the student will gain the knowledge and skills needed for the successful management and leadership of a family enterprise by exploring a diverse set of family firms, examining the interrelationships among the owners, the family, and the management team. The student will analyze the management and family practices that ensure success while recognizing the advantages and challenges facing family enterprises. Emphasis is placed on positioning the family enterprise for sustained growth and continuity through generations. 3 hrs. lecture/wk.

ENTR 240  
Funding Acquisition for Entrepreneurs (2 CR)  
*Prerequisite: ENTR 142*

Upon successful completion of this course, the student will understand the importance and impact of funding sources for their entrepreneurial venture. This will be accomplished by reviewing the impact of venture capital in every phase of the business venture from idea to exit including planning, team building, protecting intellectual capital, identifying funding sources, raising money, writing funding agreements, and managing through to an IPO or merger and acquisition. Additionally, the student will develop and present a funding proposal. 2 hrs. lecture/wk.
FASH 121  
**Fashion Fundamentals (3 CR)**
Upon successful completion of this course, the student should be able to define appropriate fashion terminology and explain the structure of the industry, including the design process and marketing of the fashion product. 3 hrs./wk.

FASH 123  
**Apparel Construction I (4 CR)**
Upon successful completion of this course, the student should be able to apply clothing construction principles, techniques and skills in apparel construction. The class will use lecture, demonstration and hands-on experience to teach the skills needed to plan and construct four garments during this class. 2 hrs. lecture, 4 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

FASH 124  
**Apparel Construction II (4 CR)**
Prerequisite: FASH 123 or two years of high school apparel construction training or division administrator approval
Upon successful completion of this course, the student should be able to apply intermediate apparel construction principles, techniques and skills in the production of various garments. This continuation of FASH 123 will focus on the planning and construction of an ensemble of intermediate complexity made from muslin fitting samples, with emphasis on precise fitting alteration. This course is suggested for the Fashion Merchandising program. 2 hrs. lecture, 4 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

FASH 125  
**Visual Merchandising (3 CR)**
Upon successful completion of this course, the student should be able to explain and apply the principles of design in visual merchandising. In addition, the student should be able to identify and explain the use of mannequins and other forms, display fixtures and lighting systems; apply color theory; and present merchandise effectively in visual displays. The student should also be able to demonstrate the use of appropriate types of displays for in-store promotions. This course is required for the Fashion Merchandising program. 3 hrs./wk.

FASH 127  
**CAD: Pattern Design I (4 CR)**
Prerequisite: FASH 123
Upon successful completion of this course, the student should be able to apply the use of flat pattern methods in developing patterns for original apparel designs. Basic slopers and the CAD (computer-assisted design) Pattern Design System will be used to develop and manipulate patterns. The class will use lecture, demonstration and hands-on experience to teach skills needed in manual and computer-assisted pattern design. The student will plan and create patterns in this class. 2 hrs. lecture, 4 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $80.
FASH 128  
**CAD: Pattern Design II** (4 CR)  
*Prerequisite: FASH 127*  
Upon successful completion of this course, the student should be able to apply advanced methods of flat pattern design in developing patterns. This class is a continuation of FASH 127, CAD: Pattern Design I. Lecture, demonstration and hands-on experience will be used to teach techniques needed in computer-assisted and manual advanced pattern design. Industry standards will be used for sloper manipulation. Each student will create advanced flat patterns in this class. This is a suggested elective for the Fashion Merchandising program.  
2 hrs. lecture, 4 hrs. lab/wk.

FASH 130  
**Fashion Illustration I** (3 CR)  
Upon completion of this course, students should be able to create fashion illustrations for their portfolios. In addition, the student should be able to apply color, mood, detail and form using various media. 3 hrs./wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

FASH 132  
**Marketing Communications** (3 CR)  
Upon successful completion of this course, the student should be able to explain advertising and promotion from an integrated marketing communications perspective that combines theory with planning, management and strategy. In addition, the student will be able to explain advertising, sales promotion, direct marketing and publicity/public relations and the need for integration of these promotional mix elements in an overall marketing communications program. 3 hrs./wk. This course is typically taught in the fall semester.

FASH 135  
**Image Management** (1 CR)  
Upon successful completion of this course, the student should be able to conduct an extensive wardrobe inventory. In addition, the student should be able to apply principles of personal grooming, elements of design and fabric, and accessory knowledge to the development of an individual professional wardrobe plan based on individual budget constraints. 1 hr./wk.

FASH 140  
**Garment Design I** (3 CR)  
*Prerequisite: FASH 123*  
Upon successful completion of this course, students should be able to produce a first pattern and prepare it for production. This includes translating garment ideas from color sketches (croquis); continuing the design process through fabric selection and pattern drafting; figuring yardage, notions and wholesale cost; and constructing a finished garment. 6 hrs. lecture, lab/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

FASH 141  
**Garment Alterations I** (3 CR)  
*Prerequisites: FASH 123 and Prerequisite or Corequisite: FASH 124*  
Upon successful completion of this course, the student should be able to apply garment construction principles, techniques and skills in apparel construction and tailoring to garments in need or resizing or repair. The class will use lecture,
demonstration and hands-on experience to teach the skills needed to plan and execute the adjustments necessary to resize the garment to a particular body. 4 hrs. integrated lecture/lab per week.

**Associated Costs**: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

**FASH 142**
**Garment Alterations II** (3 CR)
*Prerequisite: FASH 141 and Prerequisite or Corequisite: FASH 143*
Upon successful completion of this course, the student should be able to apply garment construction principles, techniques and skills in apparel construction and tailoring to formalwear and evening garments in need or resizing or repair. The class will use lecture, demonstration and hands-on experience to teach the skills needed to plan and execute the adjustments necessary to resize the garment to a particular body. 4 hrs. integrated lecture/lab per week.

**Associated Costs**: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

**FASH 143**
**Tailoring** (4 CR)
*Prerequisite: FASH 124*
Upon successful completion of this course, the student should be able to apply advanced construction principles, techniques and skills in the production of tailored garments. This course is a continuation of FASH 124, Apparel Construction II. The class will use lecture, demonstration and hands-on experience as the student completes a trial muslin for a jacket or coat plus a finished three-piece ensemble of advanced complexity during this class. 2 hrs. lecture, 4 hrs. lab/wk.

**Associated Costs**: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

**FASH 150**
**Textiles** (3 CR)
Upon successful completion of this course, the student should be able to differentiate fibers and fabrics according to their specific characteristics and to select fibers and fabrics for specific applications. In addition, the student should be able to identify properties and characteristics of natural and man-made fibers, the properties and characteristics of yarns, fabric construction methods including weaving and knitting and various finishing processes including printing and dyeing. 3 hrs./wk.

**FASH 220**
**CAD Apparel Design** (3 CR)
Upon successful completion of this course, the student should be able to apply the elements and principles of design in evaluating and designing women’s, men’s and children’s apparel. A project of designing a line will apply the student’s aesthetic knowledge, the relationship of apparel design to the current socioeconomic conditions and apparel production knowledge. Projects use computer-aided design software. 3 hrs./wk.

**Associated Costs**: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $30.

**FASH 224**
**History of Costume** (3 CR)
Upon successful completion of this course, the student should be able to identify the political, economic, technological and sociological factors that have influenced Western costume worn by women, men and children from ancient Egyptian times...
to the present. 3 hrs./wk.

FASH 225
Store Planning (3 CR)
Prerequisite: FASH 125

Upon successful completion of this course, the student should be able to demonstrate the skills needed to plan and execute the display methods and store planning concepts for promoting merchandise within a large or small store interior. These plans will use the student’s understanding of design, fixtures, traffic patterns, floor sets, graphics/signage and materials. This course is a requirement for the visual merchandising certificate. 3 hrs. lecture/wk. This course is typically taught in the spring semester.

FASH 230
Fashion Illustration II (3 CR)
Prerequisite: FASH 130

Upon successful completion of this course, the student should be able to produce refined fashion illustrations to enhance the portfolio. Fashion Illustration II is a continuation of Fashion Illustration I. Greater emphasis is placed on development of a personal illustration style and presentation of a professionally executed portfolio. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

FASH 231
Merchandising Planning and Control (3 CR)
Prerequisite: MATH 120

Upon successful completion of this course, the student should be able to describe the management structure of retail merchandising operations, contrast merchandising functions among various types of retail operations, explain the buying process, explain the financial operations of retail merchandising and apply these principles in computer-simulated case situations. 3 hrs./wk. This course is typically taught in the spring semester.

FASH 242
Consumer Product Evaluation (3 CR)

Upon successful completion of this course, the student should be able to evaluate a wide range of textile and nontextile products, from lingerie to china, on the basis of specialized product knowledge. In addition, the student should be able to prepare research projects on selected products. 3 hrs./wk. This course is typically taught in the spring semester.

FASH 268
Field Study: The Market Center (3 CR)
Prerequisite: FASH 121

Upon successful completion of this course, the student should be able to identify and distinguish between national, regional and local retail market centers. In addition, the student should be able to explain the importance of market centers, analyze the marketing mix of selected retailers and describe uses of fashion auxiliary services. This is a suggested course for the Fashion Merchandising program. 3 hrs./wk. This course is typically taught in the spring semester.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $900.
FASH 277  
**Fashion Seminar: Career Options** (2 CR)  
Upon successful completion of this course, the student should be able to define individual career goals after a thorough examination of five career areas within the fashion industry. In addition, the student should be able to explain strategies for success in the workplace. 2 hrs./wk.

FASH 279  
**Fashion Portfolio Development** (2 CR)  
**Prerequisites:** FASH 121 and FASH 124 and FASH 127 and FASH 130 and FASH 150 and FASH 220 **Prerequisites or corequisites:** FASH 280 and FASH 140  
Students will compile, select and create new material for their portfolio as well as evaluate their own competencies and strengths. In addition, students will create a resume and perform a mock interview to be reviewed by faculty and peers. 2 hrs. lecture/wk. This course is typically taught in the spring semester.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $80.

FASH 280  
**Capstone: Industry Topics** (3 CR)  
**Prerequisites:** FASH 283 and FASH 284 **Corequisite:** FASH 231  
Upon successful completion of this course, the student should be able to exhibit knowledge and work-based skill inherent to fashion retailing, wholesaling and manufacturing. The student will have opportunities to apply knowledge gained in prior courses analyzing industry topics. This capstone course will review and evaluate competencies that are essential for employment in the fashion industry. This course is required for the Fashion Merchandising program. 3 hrs. lecture/wk. This course is typically taught in the spring semester.

FASH 283  
**Fashion Internship I** (1 CR)  
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course offers work experience under instructional supervision in an approved training situation designed to provide practical experience in the fashion industry. A minimum of 15 hours on-the-job training/wk.

FASH 284  
**Fashion Internship II** (1 CR)  
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The student will receive 225 hours of work experience in an approved training situation designed to provide practical experience in the fashion industry. An average of 15 hours on-the-job training/wk.

FASH 285  
**Fashion Internship III** (1 CR)  
Upon successful completion of this course, the student should be able to demonstrate the skills required to advance to an entry-level management position. The student will receive 225 hours of work experience in an approved training situation designed to provide practical experience in the fashion industry. An average of 15 hours on-the-job training is required/wk.
FASH 286
Fashion Internship IV (1 CR)
Prerequisites: FASH 283 and FASH 284 and FASH 285 and 45 hours toward degree in Fashion Merchandising
Upon successful completion of this course, the student will have received 225 hours of work experience in an approved training environment. The student should be able to demonstrate the skills required in an entry level management position. An average of 15 hours on the job training/wk. is required.

FASH 298
European Fashion Emphasis (3 CR)
Upon successful completion of this course, the student will be able to compare American and European retail merchandising, advertising and visual presentation. This travel-for-credit course includes visits to selected European cities.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $3000.

Fire Services Administration (FIRE)

FIRE 110
Essentials of Fire Fighting (9 CR)
Prerequisite or corequisite: HPER 240
This course provides cognitive, psychomotor and affective instruction for those students seeking certification as a fire fighter in the state of Kansas. The class covers hazardous materials (first responder; operations level), fire department communications, fire ground operations, rescue operations and prevention, preparedness and maintenance. Upon successful completion of the cognitive examinations and all psychomotor skills evaluations, students will be allowed to sit for the Kansas Fire Fighter II state certification examination, which is administered by the University of Kansas, Fire and Rescue Training Institute. 5 hrs. lecture 7 hrs. lab/wk. This course is typically taught in the fall and spring semesters only.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200.

FIRE 130
Fire Investigation (1 CR)
Prerequisite: FIRE 110
This course provides instruction in basic fire investigation. Students will learn basic cause and origin determination, scene and evidence security techniques, and report-writing skills. This course meets the job performance requirements pertaining to fire investigation identified in NFPA 1021, Fire Office Professional Qualifications. 1 hr./wk. This course is typically taught in the spring semester only.

FIRE 135
Building and Fire Codes (3 CR)
Prerequisite: FIRE 110
This course entails application and interpretation of codes and ordinances, especially the Life Safety Codes used extensively in fire prevention. 3 hrs./wk. This course is typically taught in the spring semester only.

FIRE 162
Fire Tactics and Strategy (3 CR)
Prerequisite: FIRE 110
Fire control through manpower, equipment and extinguishing agents will be explored, including theoretical models and practical applications. 3 hrs./wk. This course is typically taught in the fall semester only.

FIRE 220
Fire Administration (3 CR)
Prerequisite: FIRE 110
Techniques and methods used in managing fire departments are explored, including budgeting processes, administrative functions and types of political systems that affect a fire department. 3 hrs./wk. This course is typically taught in the fall semester only.

FIRE 222
Fire Science Law (3 CR)
Prerequisite: FIRE 110
The law as it pertains to the fire service will be explained, along with tort law and business law. 3 hrs./wk. This course is typically taught in the fall semester only.

FIRE 224
Incident Command Systems (3 CR)
Prerequisite: FIRE 110
This is a course in basic incident command. Disaster control, disaster management, communications for disaster management and types of disasters are presented. 3 hrs./wk. This course is typically taught in the spring semester only.

FIRE 250
Fire Service Science Instructional Methodology (3 CR)
Prerequisite: FIRE 110
This course is designed to provide the instructional skills and knowledge necessary to develop, conduct and evaluate formal training programs in in-service and classroom formats. This course meets NFPA 1041 standards for fire service instruction. This course is typically taught in the spring semester only.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

Floriculture (FLR)

FLR 130
Principles of Traditional Design (3 CR)
This course teaches the guidelines and basics of floral design. These principles are known as balance, composition, harmony, focal point, proportion, line, rhythm, texture, form, space, and color. The course will help the students develop an eye for color combinations, flow of lines, perspectives and the post-harvest care of floral materials. Recommendations are made that pertain to receiving, unpacking and processing the flowers. Methods of conditioning, hardening, and forcing flowers and use of preservatives are illustrated. 2 hrs. lecture 3 hrs. instructional lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.
FLR 150  
**Contemporary Design Styles** (3 CR)  
This course will focus on contemporary, Asian, and current trends in floral design. The course will help students develop their skills in asymmetrical balance, negative space, focal point, dramatic lines. Also included is the history of oriental design, cutting edge design, twigs, branches, pods to be used for textures, bold color schemes, and further discussion of the "less is more" concept. 2 hrs lecture, 3 instructional lab hrs/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

FLR 200  
**Plants for Interior Design** (3 CR)  
This course discusses the basic aspects of healthy plant growth, including the functions of the root system and the leaf. Photosynthesis, respiration, and transpiration are explained, and the factors that affect these processes are discussed. Students will also learn Plant Nomenclature (common names and scientific names) for many plants. Students will be able to diagnose an unhealthy plant and determine the necessary steps needed to take to bring it back to health. The course will help students obtain a greater appreciation of foliage and blooming plants and understand their role in improving the interior environment. 2 hrs lecture and 3 hrs instructional lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

FLR 220  
**Wedding Design** (3 CR)  
*Prerequisites: FLR 130 and FLR 150*  
This course will focus on traditional and contemporary wedding designs. Because weddings often constitute a large portion of a florist's business, it is imperative that students become proficient in various wedding designs, and be trained in many specialized arranging techniques. The course covers steps in creating the bridal bouquet, including round, crescent, cascade, triangle, and hand tied. Corsage construction, hair pieces, and other accessories will be discussed. Marketing and promotional efforts to build the wedding business will also be discussed. 2 hrs. lecture 3 hrs instructional lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

FLR 250  
**Sympathy Flowers** (3 CR)  
*Prerequisites: FLR 130 and FLR 150*  
This course will focus on the basic concepts of design for funeral bouquets, wreaths, and casket sprays. The student will learn how to combine flowers using texture, shape and color for different effects. Interesting ways to use foliage, twigs, mosses and other accessory materials will be presented along with different uses of ribbon. Topics of discussion will also include the best use of sympathy cards and how to develop a good working relationship with your funeral directors. 2 hrs. lecture and instructional 3 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

FLR 270  
**Retail Flower Shop Operations** (3 CR)  
*Prerequisites: FLR 200 and FLR 220 and FLR 250*  
This course will focuses on the actual retail operation of a flower shop. Students will explore the various types of flower shops. Topics will include marketing strategies, advertising and promotion, develop selling skills, and merchandising. In addition, students will learn about employee relations, delivery services, public relations, management, florist computer software, buying and pricing. 2 hrs. lecture, 3 hrs. integrated lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

Foreign Language (FL)

FL 116
Elementary Latin I (3 CR)
Students will have the opportunity to learn the basic vocabulary and structural patterns, or grammar, of Latin. Emphasis will be on fundamental grammar concepts, extensive word study for English vocabulary growth and the lasting contributions Roman society made to Western civilization. 3 hrs./wk. This course is not offered in the spring semester.

FL 117
Elementary Latin II (3 CR)
Prerequisite: FL 116 or one year of high school Latin
This course will complete the presentation of basic Latin vocabulary and grammar. Fundamental grammar concepts, extensive word study for English vocabulary growth and the lasting contributions of Roman society to Western civilization will be emphasized. 3 hrs./wk. This course is taught in the spring semester.

FL 120
Elementary German I (5 CR)
This course presents the sounds, vocabulary and basic structural patterns of German, focusing on the development of listening comprehension, speaking, reading and writing skills. Cultural material will be integrated into the course. 5 hrs./wk.

FL 121
Elementary German II (5 CR)
Prerequisite: FL 120 or one year of high school German
This course will continue the presentation of the vocabulary and basic structural patterns begun in Elementary German I with continued emphasis on the development of listening comprehension, speaking, reading and writing skills. 5 hrs./wk.

FL 130
Elementary Spanish I (5 CR)
In this basic course, students will study Spanish grammar conversation, composition and the culture of Spanish-speaking countries. 5 hrs./wk.

FL 131
Elementary Spanish II (5 CR)
Prerequisite: FL 130 with a grade of C or higher or two years of high school Spanish; or the appropriate score on the placement test
This course will continue the presentation of the material introduced in Elementary Spanish I. Graded reading selections will be added as a basis for conversation and composition in discussion periods. Placement test recommended: can be taken at the Testing Center. 5 hrs./wk.
FL 133  
**Basic Spanish for Hospitality Management** (2 CR)
In this basic course, students will be introduced to terminology related to the hospitality industry, basic Spanish grammar and phrases related to work. 2 hrs./wk.

FL 140  
**Elementary French I** (5 CR)
Areas covered in this basic course include vocabulary building, grammar study, conversation and an introduction to French culture and civilization. The emphasis is on conversation. 5 hrs./wk.

FL 141  
**Elementary French II** (5 CR)
*Prerequisite: FL 140 or one year of high school French*
This course continues the presentation of the material introduced in Elementary French I. Graded reading selections will be used as the basis for conversation. Placement test recommended. Go to the Testing Center or the Language Resource Center. 5 hrs./wk.

FL 145  
**Field Study in Russian Language & Culture** (2 CR)
This field study course is open to students with any level of Russian language proficiency - from beginning to advanced. The course combines orientation sessions in Russian language and culture at JCCC with two weeks of study in Russia. During their stay in Russia, students will attend a Russian university, take classes in Russian language and culture and participate in excursions to sites of historical and cultural significance. Students will be placed in Russian language classes that are commensurate with their proficiency level in the Russian language. 10 hrs. lecture & 80 hrs. field study in Russia. FEES: Students are responsible for all expenses incurred during this field study, including costs for travel documents, insurance and all travel expenses. Students should contact instructor for cost estimate.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2300 to $2500.

FL 150  
**Elementary Russian I** (5 CR)
In this course, students will learn the basic sounds, vocabulary and structural patterns of Russian. Emphasis will be on listening comprehension, speaking, reading and writing skills. Cultural material will be included. 5 hrs./wk.

FL 151  
**Elementary Russian II** (5 CR)
*Prerequisite: FL 150 or one year of high school Russian*
This course completes the presentation begun in Elementary Russian I. Students will gain listening comprehension, speaking, reading and writing skills appropriate to a second-level course. This course is taught in the spring semester. 5 hrs./wk.

FL 155  
**Elementary Arabic I** (5 CR)
In this basic course, teacher and student activities are geared toward developing
functional abilities to use Arabic accurately and fluently in listening, speaking, reading, and writing. This course requires intensive classroom interaction and out-of-class assignments. 5 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10.

FL 156
Elementary Arabic II (5 CR)
Prerequisite: FL 155
This course will continue the presentation of vocabulary and basic structural patterns begun in Elementary Arabic I. There will be a continuation of comprehension, listening, reading, writing from an everyday use emphasis. This course is taught in the spring semester. 5 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10.

FL 160
Elementary Italian I (5 CR)
Students will be introduced to the sounds, vocabulary and basic structural patterns of Italian, with primary focus on the development of listening comprehension, speaking, reading and writing skills. Integrated throughout the course will be an introduction to the culture of Italy. 5 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $8 to $20.

FL 161
Elementary Italian II (5 CR)
Prerequisite: FL 160 or one year of high school Italian
A continuation of the presentation of the vocabulary and basic structural patterns of Italian, this course will emphasize the development of listening comprehension, speaking, reading and writing skills. Cultural material also will be integrated into the course. This course is taught in the spring semester. 5 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $8 to $20.

FL 165
Elementary Chinese I (5 CR)
This course will introduce students to the basic sounds, vocabulary, grammar and usage, characters and reading of the Chinese language. The emphasis will be on developing basic conversational skills. Students will develop an understanding and appreciation of Chinese culture. 5 hrs./wk.

FL 166
Elementary Chinese II (5 CR)
Prerequisite: FL 165 or equivalent college-level course with a grade of "D" or higher or one year of high school Chinese with a grade of "D" or higher
This course offers a continuation of Elementary Chinese I, emphasizing the sounds, vocabulary, grammar, usage, characters and reading of the Chinese language. Students will develop more advanced conversational skills and cultural understanding. 5 hrs./wk.

FL 170
Elementary Japanese I (5 CR)
This course is an introduction to the sounds, vocabulary, grammar, usage and readings of the Japanese language. The emphasis will be on developing basic conversational skills. Cultural materials will be included. This course is typically
taught in the fall semester. 5 hrs./wk.

**FL 171**
**Elementary Japanese II** (5 CR)
Prerequisite: FL 170 or one year of high school Japanese
A continuation of Elementary Japanese I, this course will emphasize the sounds, vocabulary, grammar, usage and reading of the Japanese language. Focus is on developing more advanced conversational skills and cultural understanding. This course is typically taught in the spring semester. 5 hrs./wk.

**FL 175**
**Elementary Brazilian Portuguese I** (5 CR)
In this basic course, students will study Portuguese grammar, conversation, composition and the culture of Brazil. 5 hrs./wk.

**FL 176**
**Elementary Brazilian Portuguese II** (5 CR)
Prerequisite: FL 175
This course will continue the presentation of the material introduced in Elementary Brazilian Portuguese I. Graded reading selections are added as a basis for conversation and composition in discussion periods. This course is taught in the spring semester. 5 hrs. lecture/wk.

**FL 178**
**Intermediate Russian I** (3 CR)
Prerequisite: FL 151 or two years of high school Russian
This course will emphasize vocabulary development and more advanced study of Russian grammar. Students will practice reading, listening comprehension, speaking and writing at the intermediate level. 3 hrs./wk.

**FL 179**
**Intermediate Russian II** (3 CR)
Prerequisite: FL 178 or three years of high school Russian
Students will study Russian language and culture that would prepare them to travel in a Russian-speaking country and engage in simple conversation with the citizens. 3 hrs./wk.

**FL 180**
**Elementary American Sign Language I** (3 CR)
This class will focus on the development of beginning American Sign Language communication skills. Comprehension skills and linguistic features of the language taught in context will be emphasized. 6 hrs. integrated lecture-lab/wk. FL 180 and INTR 120 are the same course. Do not enroll in both.

**FL 181**
**Elementary American Sign Language II** (3 CR)
Prerequisite: FL 180 or INTR 120 with a grade of "C" or higher
This course will focus on continued development of elementary American Sign Language skills beyond those taught in Elementary ASL I. Students will work on
developing communication competencies, concentrating on comprehension and production skills. Information about the linguistic and cultural features will be included in the context of language learning experiences. 6 hrs. integrated lecture-lab/wk. FL 181 and INTR 121 are the same course. Do not enroll in both.

FL 182
Intermediate Japanese I (5 CR)
Prerequisite: FL 171 or two years of high school Japanese and approval of the instructor
This course continues the study of Japanese language and culture, emphasizing the sounds, vocabulary, grammar, usage and readings of the Japanese language. The course concentrates on developing further advanced conversational skills by increasing vocabulary and variety of sentence patterns. Cultural understanding will also be stressed. This course is typically taught in the fall semester. 5 hrs. lecture/wk.

FL 183
Intermediate Japanese II (5 CR)
Prerequisite: FL 182 or three years of high school Japanese and approval of the instructor
This course is a continuation of FL 182, the study of Japanese language and culture, emphasizing the sounds, vocabulary, grammar, usage and readings of the Japanese language. The course concentrates on developing further advanced conversational skills by increasing vocabulary and variety of sentence patterns. Cultural understanding will be stressed also. This course is typically taught in the spring semester. 5 hrs. lecture/wk.

FL 192
Intermediate Chinese I (3 CR)
Prerequisite: FL 166 or equivalent
This course is a continuation of study of the Chinese language and culture, emphasizing the sounds, vocabulary, grammar, usage and readings of the Chinese language. Focus will be on developing more advanced conversational skills by increasing vocabulary and variety of sentence patterns. Cultural understanding will also be stressed. 3 hrs./wk.

FL 193
Intermediate Chinese II (3 CR)
Prerequisite: FL 192 or equivalent
This course is a continuation of study of the intermediate Chinese language and culture, emphasizing the sounds, vocabulary, grammar, usage and readings of the Chinese language. Focus will be on developing more advanced conversational skills by increasing vocabulary and variety of sentence patterns. Cultural understanding will also be stressed. 3 hrs. lecture/wk.

FL 195
Intermediate Arabic I (3 CR)
Prerequisite: FL 156
This course is an in-depth study of Arabic grammar and vocabulary. The four skills of speaking, reading, writing, and listening will be covered. This course aims to develop an intermediate level of proficiency in Arabic. 3 hrs. lecture/wk.
FL 196
Intermediate Arabic II (3 CR)
Prerequisite: FL 195
An in-depth study of Arabic grammar and vocabulary. The four skills of speaking, reading, writing, and listening will be covered. This course aims to develop an intermediate level of proficiency in Arabic. 3 hrs. lecture/wk.

FL 205
Conversational Japanese (2 CR)
Prerequisite: FL 171 or two years of high school Japanese
This course is designed to enhance the ability of students to express themselves orally in Japanese through vocabulary building and reiteration of essential grammatical structures. The vocabulary will stress everyday situations. 2 hrs. lecture/wk.

FL 220
Intermediate German I (3 CR)
Prerequisite: FL 121 or two years of high school German
This class will emphasize vocabulary building and grammar review primarily through extensive reading of German texts. There will be additional practice in listening comprehension, speaking and writing. Placement test recommended. Go to the Testing Center or to the Language Resource Center. 3 hrs./wk.

FL 221
Intermediate German II (3 CR)
Prerequisite: FL 220 or three years of high school German
This class will further expand the mastery of German vocabulary and structure through extensive reading of more advanced texts with additional practice in listening comprehension, speaking and writing. Placement test recommended. Go to the Testing Center or to the Language Resource Center. 3 hrs./wk.

FL 223
Conversational German (2 CR)
Prerequisite: FL 121 or two years of high school German
By applying vocabulary and structures presented in the text and handouts and by applying knowledge gained in a systematic review of German, the successful student will be able to communicate in German in situations that typically arise while traveling in a German-speaking country. Placement test recommended. Go to the Testing Center or to the Language Resource Center. 2 hrs./wk.

FL 230
Intermediate Spanish I (3 CR)
Prerequisites: FL 131 with a grade of C or higher or three years of high school Spanish or the appropriate score on the placement test
This course refines grammar, builds vocabulary, increases understanding of Hispanic culture, and provides practice designed to improve speaking fluency. It includes composition and conversation. Placement test recommended: can be taken in the Testing Center or the Language Resource Center. 3 hrs./wk.

FL 231
Intermediate Spanish II (3 CR)
Prerequisite: FL 230 with a grade of C or higher or or four years of high school Spanish or the appropriate score on the placement test

This course refines grammar, builds vocabulary, increases understanding of Hispanic culture, and provides practice designed to improve speaking fluency. It includes more advanced readings as a source for composition and conversation. Placement test recommended; can be taken in the Testing Center or the Language Resource Center. 3 hrs./wk.

FL 234
Conversational Spanish (2 CR)
Prerequisite: FL 230 with a grade of B or higher; or FL 231 with a grade of "C" or higher; or four years of high school Spanish; or the score equivalent to FL 231 on the placement test

This course enhances students' ability to express themselves orally in Spanish through vocabulary building and reiteration of essential grammatical structures. The vocabulary emphasizes everyday life situations and current events. Placement test recommended: can be taken in the Testing Center or the Language Resource Center. 2 hrs. lecture/wk.

FL 240
Intermediate French I (3 CR)
Prerequisite: FL 141 or two years of high school French

In this course, students begin a more in-depth study of French grammar and vocabulary as they improve their mastery of the four communicative skills (listening, speaking, reading and writing). Reading assignments (from literary, journalistic and Internet sources) will be more advanced and writing assignments will be more extensive at the Intermediate level. Placement test recommended. Go to the Testing Center or to the Language Resource Center. 3 hrs./wk.

FL 241
Intermediate French II (3 CR)
Prerequisite: FL 240 or three years of high school French

In this class, students continue their in-depth study of French grammar and improvement of vocabulary. All four communication skills (listening, speaking, reading, and writing) continue to be emphasized as reading assignments, compositions, listening comprehension exercises and class discussion become more complex. Placement test recommended. Go to the Testing Center or to the Language Resource Center. 3 hrs./wk.

FL 243
Conversational French (2 CR)
Prerequisite: FL 141 or two years of high school French

This course is designed to build spontaneous speaking ability. Everyday situations and current events will be discussed in class. Placement test recommended. Go to the Testing Center or to the Language Resource Center. 2 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $1 to $3.

FL 246
Conversational Russian (2 CR)
Prerequisite: FL 151 or two years of high school Russian

This course is designed to enhance students' ability to express themselves orally in Russian through vocabulary building and reiteration of essential grammatical structures. The vocabulary will stress everyday situations and current events. 2 hrs./wk. This course may be offered as a Learning Communities (LCOM) section,
see current credit schedule for LCOM details.

**FL 250**  
**Conversational French: Cinema (2 CR)**  
*Prerequisite: FL 141 or two years of high school French*  
This course is designed to build students' speaking and listening comprehension proficiencies in French through the viewing and discussion of French and francophone films. Students will study vocabulary and grammatical structures presented in the course textbook and/or handouts and will view films and discuss them. Most topics of discussion will relate to everyday life and social situations as well as basic personal information. Students will also learn to identify and discuss the main components of a film and key cinematic techniques and concepts. 4 hrs. lecture/wk.

**FL 270**  
**Intermediate American Sign Language I (3 CR)**  
*Prerequisite: FL 181 or INTR 121*  
This course will focus on the development of intermediate American Sign Language communication skills. Emphasis will be on teaching in context comprehension skills and linguistic features of the language. 6 hrs. lecture-lab/wk.  
INTR 122, FL 270 and ASL 122 are the same courses; only enroll in one.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $40.

**FL 271**  
**Intermediate American Sign Language II (3 CR)**  
*Prerequisite: FL 270 or INTR 122*  
The study of intermediate American Sign Language will continue in this course. It is designed to further intermediate communication skills in American Sign Language. Information about the linguistic and cultural features will be included in the context of language learning experiences. 6 hrs. lecture/wk.  
INTR 123, FL 271 and ASL 123 are the same courses; only enroll in one.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $40.

**FL 298**  
**French Culture and Civilization (3 CR)**  
In this travel-for-credit course, students will visit selected sites in France, where they will compare the French and U.S. languages, values, culture and institutions. Summer.

**Game Development (GAME)**

**GAME 101**  
**Computer Game Creation (4 CR)**  
This course is designed to present the skills and to provide the hands-on experience required to create computer games utilizing game development tools that require no programming. Typical game creation topics to be covered include 2D graphics, 3D modeling, music and sound effects. Typical tasks will include setting up a game development studio, manipulating graphic images, obtaining or creating sounds and music, installing and using various game development tools and working with pictures and animation. 3 hrs. lecture, 1.5 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.
GAME 102
The Business of Games (3 CR)
In this course, students are introduced to the business and process of game development, from the concept document to publishing. Students will learn the stages of game development within the context of the often complex relationship between developer, publisher and retailer. The course uses a participatory format emphasizing analytical thinking and problem solving, both key skills for persons seeking a career in the game development industry. 3 hrs lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

GAME 110
Flash Gaming (4 CR)
This course is designed to present the skills and to provide the hands-on experience required to create computer games utilizing Flash MX 2004. Typical topics to be covered include 2D coordinate systems, basic game physics, game trigonometry, motion techniques, collision detection, collision reaction, conservation of momentum and energy, and tile based worlds. Typical tasks include creation of angle conversion functions; projection functions; controlling speed, velocity, and acceleration; applying Newton’s three laws of motion, affecting gravity and friction; and creation of grid management systems. 3 hrs. lecture and 1.5 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

GAME 140
Game Programming I - 2D (4 CR)
Prerequisite: CS 200
This course is designed to present skills and provide hands-on experience required to create two-dimensional games utilizing C++. Typical game topics will include programming in a GUI (graphical user interface) environment, game libraries, sound, music and working with graphics. Typical tasks will include setting up the environment, creating several games, using music and sound in a game, and exercises that will highlight important game programming concepts. 3 hrs. lecture, 1.5 hrs. lab/wk.

GAME 180
Artificial Intelligence for Games (3 CR)
Prerequisite: CS 200
Upon successful completion of this course, students should be able to deconstruct simple computer programs illustrating introductory concepts in artificial intelligence as applied to computer games. They will define terms and application areas in the field, and describe game representation and implementation techniques used in artificial intelligence for games. 3 hrs lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

GAME 200
Game Design (3 CR)
Students will refer to the history of video games to describe the progression of development up to the modern forms of games available today. Students will critically analyze video games and identify and understand the thematic, visual, systematic, and geographical elements that contribute to making a fun user experience. Abstract systems will be introduced at the beginning of the course, and students will be invited to give their own examples. Models will be shown early as references for students when investigating specific video game structures later in the course. Students will develop a common lattice of “game design patterns” creating a common vocabulary and database. Creative habits and professional attitudes will be discussed. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $20 to $50.

GAME 230  
Game Programming II -3D (4 CR)  
*Prerequisite: GAME 140*  
This course will provide an opportunity for students to obtain the knowledge and skills necessary to create 3D multiplayer games. Topics include 3D models of players, vehicles, items, and structures; audio and music; graphical user interfaces and menus; UV wrapped textures and skins; environmental effects; and outdoor terrain. 3 hrs. lecture, 2 hrs. lab/wk.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

GAME 250  
Game Programming III-Capstone (4 CR)  
*Prerequisites: GAME 200 and GAME 230 and CIM 145 and ENGL 150 and Prerequisite or corequisite: GAME 180*  
This course is designed for students to apply the foundations of game design and game programming to a significant original game. Students should work within a team to analyze a problem, develop and present a proposed game design document, build a demonstrable prototype of the game and develop a significant portion of the finished product. Students should also develop a project schedule and present progress information to the class. Students should also develop job search skills and both written and oral communication skills. 3 hrs. lecture, 2 hrs. lab by arrangement/wk  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

GAME 255  
Mobile Game Programming (4 CR)  
*Prerequisites: GAME 140 and GAME 200*  
This course is designed for students who want to learn mobile device game programming. The students will learn the various limitations on mobile devices and the options available for programming them. They will create a 2D game for mobile devices. 3 hrs lecture, 2 hrs lab per week.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

Geographic Information Systems (KEOG)  

KEOG 120  
**Introduction to Geographic Information Systems** (3 CR)  
Fundamental concepts of geographic information systems (GIS), elements of GIS, analysis of spatial information, real-world applications, map creation and analysis. Primary objective is to investigate interactive GIS applications rather than develop expert users. Course taught at MCC-Longview Community College, 500 SW Longview Road, Lee’s Summit, Missouri 64081, 816-672-2549, and MCC-Maple Woods Community College, 2601 NE Barry Road, Kansas City, Missouri 64156, 816-437-3355.

KEOG 220  
**Geographic Information Systems Database & Design** (3 CR)  
*Prerequisite: KEOG 120*  
Concepts of Geo-database design and management in geographic information systems (GIS), SQL statements, geographic data types and functions, data entry, techniques of geographic information structure and indexing, querying techniques, searches, and spatial analysis, creation and use of metadata real-world applications. Course taught at MCC-Longview Community College, 500 SW Longview Road, Lee’s Summit, Missouri 64081, 816-672-2549, and MCC-Maple
KEOG 224
Applications in Geographic Information Systems (3 CR)
Prerequisites: KEOG 120 and KEOG 220
Applications in Geographic Information Systems. Data collection, incorporation of local and global data, and analysis of spatial information that can be used to investigate major application areas. This course is taught at MCC-Longview Community College, 500 SW Longview Road, Lee’s Summit, Missouri 64081, 816-672-2549, and MCC-Maple Woods Community College, 2601 NE Barry Road, Kansas City, Missouri 64156, 816-437-3355.

KEOG 228
Administrative Issues in Geographic Info Systems (3 CR)
Prerequisite: KEOG 120
Addresses issues unique to GIS operation such as implementation issues, decision making procedures, strategies for success, legal issues, involvement of management, NCGIA Guidelines, marking within an organization, strategic planning and industry outlook. 3 hrs. lecture/wk. 1-3 credit hour course. A three credit hour internship is required for a student with no GIS experience and 1 hour for someone already employed in the GIS field. This course is taught at MCC-Longview Community College, 500 SW Longview Road, Lee’s Summit, Missouri 64081, 816-672-2549, and MCC-Maple Woods Community College, 2601 NE Barry Road, Kansas City, Missouri 64156, 816-437-3355.

KEOG 230
Geographic Information Systems Internship (1 CR)
Prerequisites: KEOG 120 and KEOG 220
Internship in a Geographic Information System facility. Experience real-workplace requirements, complete assigned tasks by hosting facility such as GIS data entry, data retrieval, GPS field work, documentation, or general GIS facility duties. Arranged meetings with instructor includes work ethics, expectations, challenges, evaluation. 225-675 hours. This course is taught at MCC-Longview Community College, 500 SW Longview Road, Lee’s Summit, Missouri 64081, 816-672-2549, and MCC-Maple Woods Community College, 2601 NE Barry Road, Kansas City, Missouri 64156, 816-437-3355.

Geoscience (GEOS)

GEOS 130
General Geology (5 CR)
In this introductory course the students will survey the geologic processes that form and shape the earth over geologic time using the models of the rock cycle, the hydrologic cycle and the tectonic cycle. In the laboratory they will conduct hands-on activities designed to enhance and reinforce the geologic concepts they have studied. 4 hrs. lecture, 3 hrs. lab/wk.

GEOS 140
Physical Geography (3 CR)
This course is a survey of the physical and environmental topics of geography, including the methods used to study them. The Earth as a system and the subsystems of the atmosphere, hydrosphere, lithosphere and biosphere constitute the major units of study. Students will acquire basic terminology that they will use to explain the earth, the atmosphere, the landscape, and the processes that occur on earth to change the landscape. Topics may include mapping with topographic
maps and remote sensing; development and structure of the atmosphere; weather; water resources; climate; rock formation; mountain building; chemical and physical weathering; mass movement; soil formation; erosion, transportation and deposition by running water, wind, ice, currents, waves and tides; and the foundation that these processes build for the biosphere on earth. 3 hrs./wk.

**GEOS 141**  
**Physical Geography Lab** (2 CR)  
*Prerequisite or corequisite: GEOS 140 or the equivalent*  
Students in this course will practice their knowledge of physical geography through the collection and analysis of atmospheric data and the identification and interpretation of landforms and biological patterns as depicted on topographic maps and remotely sensed imagery. 4 hrs. lab/wk.

**GEOS 145**  
**World Regional Geography** (3 CR)  
In this introductory course, the student will first review the basic theories of the discipline of geography, the relationship of world population and resources and the factors affecting development. Next, the student will survey the major regions of the world to identify each region's distinguishing geographic characteristics, summarize its past development and explain the key issues affecting the region's future development. 3 hrs. lecture/wk.

### Graphic Design (GDES)

**GDES 120**  
**Introduction to Graphic Design** (3 CR)  
This course is designed to acquaint the student with the various aspects of the graphic design field. Topics include the ways in which visual messages are used in society, the skills needed by a graphic designer and the potential areas of specialization and employment. This class will have guest speakers from the field of graphic design. Emphasis will be on assisting the student to make an informed decision about graphic design as a career. 3 hrs. lecture/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $40 to $50.

**GDES 130**  
**Drawing and Media Methods 1** (3 CR)  
*Prerequisites: GDES 120 and ART 124 and CDTP 135 and CDTP 140 and CDTP 145*  
This course will provide instruction in perceptual techniques, perspective theory and drawing process methods that relate to the visual analysis of the three-dimensional forms drawn from life. Focus will be on the application of theory, processes and techniques to attain structural accuracy and the illusion of three-dimensional form on a two-dimensional surface. 6 hrs. lecture and studio/wk.  
*Associated Costs:* In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

**GDES 131**  
**Drawing and Media Methods 2** (3 CR)  
*Prerequisite: GDES 130*  
This course is a continuation of Drawing and Media Methods I, with emphasis on the creative application of perspective theory, perceptual skill and drawing methods. Drawing methods and rendering techniques will be applied to visual
problem-solving processes and the communication of design concepts. 6 hrs.
lecture studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $200 to
$400.

GDES 132
Typography (3 CR)
Prerequisites: ART 124 and GDES 120 and CDTP 135 and CDTP 140 and CDTP 145
This course will provide instruction in the basic principles of contemporary
typographic design. Information concerning typography, from traditional
letterpress through digital type design and typesetting, will be included. The
course content will emphasize effective methods of communicating to a mass
audience through the printed letter, word, line and page. Working knowledge of
QuarkXpress and Adobe InDesign required. 6 hrs. lecture and studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $200 to
$400.

GDES 134
Layout Design (3 CR)
Prerequisite: GDES 132
This course will provide a basic study of layout elements. Students will acquire the
skills necessary to produce layouts. These skills include photographic indication
techniques, comp lettering, advertising and editorial grid systems and electronic
page design. This course is typically offered in the spring semester only. 6 hrs.
lecture and studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $200 to
$400.

GDES 140
Technical Processes (3 CR)
Prerequisites: PHOT 121 and CDTP 135 and CDTP 140 and CDTP 145
This course covers digital prepress applications, scanning, image manipulation
and color output devices. The transition from conventional to digital production will
be covered. Analysis of output and file management and the understanding of
proofing systems will be covered. Proper usage of peripheral equipment will be
emphasized. 6 hrs. lecture and studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $200 to
$400.

GDES 230
Drawing and Media Methods 3 (3 CR)
Prerequisites: GDES 131 and GDES 132 and GDES 134
This course will provide an understanding of the application of illustration to
graphic design. Visual problem-solving processes acquired in Drawing and Media
Methods 2 will be further developed through problems in image composition
emphasizing expressive communication. Techniques in traditional and digital
media are explored. This course is typically taught in the fall semester only. 6 hrs.
lecture and studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $200 to
$400.

GDES 231
Advanced Typography (3 CR)
Prerequisite: GDES 134
This course is a continuation of Layout Design. Emphasis will be on typographic solutions that explore verbal/visual messages. Projects include designs for publication, such as posters, brochures, packaging and graphic campaigns. Typography as a functional and experimental medium will be stressed. Design problem-solving for a diverse range of specifications, including audience, client needs and budget constraints, are included. Traditional and digital tools will be incorporated to produce comprehensives. This course is typically offered in the fall semester only. Working knowledge of Macromedia Dreamweaver is required. 6 hrs. lecture and studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

GDES 235
Production Methods (3 CR)
Prerequisites: GDES 134 and GDES 140
This course will provide the fundamentals of preparing art for reproduction. Traditional camera-ready art techniques and digital prepress production methods will be emphasized. This course is typically offered in the fall semester only. 6 hrs. lecture and studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

GDES 236
Electronic Production (3 CR)
Prerequisites: GDES 230 and GDES 231 and GDES 235
This course is a continuation of the Production Methods course, providing experience in digital prepress and electronic production techniques. The student will apply production skills to problems of professional scope and complexity, including specialty processes, trapping and color separation. Preparation of graphic files for screen presentation and for the Web will be explored. This course is typically offered in the spring semester only. 6 hrs. lecture and studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

GDES 244
Communication Systems (3 CR)
Prerequisites: GDES 230 GDES 231 and GDES 235
This course will explore the scope and potential of graphic design as a vehicle for visual communication in contemporary society. Signs and symbols, as well as communicative power of typographic, hand graphic and photographic modes, will be studied. Traditional and electronic methods will be used to develop projects. This course is typically offered in the spring semester only. 6 hrs. lecture and studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

GDES 245
Advanced Design Practice (3 CR)
Prerequisites: GDES 230 and GDES 231 and GDES 235
This course will focus on the use of the student's total design capability and technical knowledge in solving graphic design problems of professional scope and complexity. Students will have the opportunity to work with three art directors and produce three professional projects for potential inclusion in their portfolios. This course is typically offered in the spring semester only. 6 hrs. lecture and studio/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.
GDES 272
Professional Preparation (3 CR)
Prerequisites: GDES 230 and GDES 231 and GDES 235 Prerequisite: The student must have completed all required studio courses in the graphic design program prior to the semester for which he or she is enrolling in this course or be co-enrolled in all fourth-semester studio courses.
This course will provide graphic design majors instruction in the organization and presentation of his or her work in a portfolio format of professional quality. A portfolio, digital portfolio archive, self promo, resume and business ensemble will be produced. Instruction in interviewing techniques and employment searches will also be provided. 6 hrs. lecture and studio/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $400.

GDES 275
Graphic Design Internship (1 CR)
Prerequisite: Graphic design faculty review committee approval
Students will work in an approved training situation under instructional supervision. The internship is designed to give the student the opportunity to use the skills learned in the graphic design program. Student interns will complete a minimum of 180 hours on the job and will be compensated with at least the minimum hourly wage.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $100.

Health Care (HC)

HC 101
Introduction to Health Care Delivery (3 CR)
This course is an introduction to the health care delivery system with an overview of health careers and the roles and responsibilities of members of the health care team. Emphasis will be on how to work within a health care team, effective communication skills, professional safety and workplace skills, and legal and ethical rights and responsibilities of patients and health care workers. 3 hrs. lecture/wk.

HC 125
International Awareness Field Study (2 CR)
This is a service-learning course. While partnering with a not-for-profit agency, teams of students will deliver service to a community in a developing country that suffers from extreme poverty. The service provided will vary depending on the identified needs of the community. While serving in the developing country, students will gain an understanding of the culture, language and health status of the people. Students will be exposed to the social, political and economic aspects of life that shape the community. Prior to travel, students are required to attend preparation meetings, fund raise and participate in a local service project. 16 hrs. lecture, 40 hrs. field study
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $450.

Health Care Interpreting (HCI)

HCI 110
Introduction to Interpreting (3 CR)

Prerequisites: Interview and permission of the facilitator. Potential indicators of proficiency may be required.

This course provides a practical and theoretical introduction to the field of bilingual interpreting. Students will study interpreter roles and skills, modes of interpreting and translating, ethical issues, professional standards of practices, cultural competence and applied linguistics. Upon completion, students should have a strong foundation of knowledge regarding the profession of interpreting and should be ready for specific skills training. This course is taught in English. 3 hrs. lecture/wk. This course is taught in the fall semester

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20.

HCI 120
Interpreting Skills I (3 CR)

Prerequisite or corequisite: HCI 110 with a grade of "C" or higher

This course develops students' skills in sight translation and consecutive interpreting. Listening and memory skills, communication strategies and intervention techniques also are emphasized. Upon completion, students should be able to sight translate short written texts and consecutively interpret non-technical, interactive messages between Spanish and English. This course is taught in English with some Spanish terminology and practice. 2 hrs. lecture and 2.5 hrs lab/wk. This course is taught in the fall semester.

HCI 130
Interpreting Skills II (3 CR)

Prerequisites: HCI 110 with a grade of "C" or higher and HCI 120 with a grade of "C" or higher

This course develops students' skills in simultaneous interpreting and written translation. In addition, through classroom, lab and field experiences, students practice the three interpretation modes they have learned in the program and improve all aspects of their interpreting while forming good professional habits. Self-assessment, professional growth and development of a personal philosophy of interpreting are stressed. This course is taught in English with some Spanish terminology and practice. 2 hrs lecture and 2.5 hrs lab/wk. This course is taught in the spring semester.

HCI 140
Spanish Medical Interpreting (3 CR)

Prerequisite: HCI 120 with a grade of "C" or higher and Prerequisites or corequisites: HCI 130 with a grade of "C" or higher and AAC 130 with a grade of "C" or higher

This course develops the knowledge, techniques, and practices needed to function as a bilingual interpreter in a medical environment. Students will be introduced to basic medical conditions, procedures, courses of treatment and equipment, with vocabulary and terminology in both English and Spanish. Upon completion, students should be able to apply medical interpreting and translating techniques in a variety of health care settings. This course is taught in English with some Spanish terminology. 3 hrs. lecture/wk. This course is taught in the spring semester.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20.

HCI 180
Medical Interpreting Practicum (2 CR)

Prerequisites: HCI 130 with a grade of "C" or higher and HCI 140 with a grade of "C" or higher and Prerequisite or corequisite: HC 101 with a grade of "C" or higher

Students will observe and interpret at assigned medical facilities, participate in organized class discussions about their interpreting experiences and develop a
personal philosophy of interpreting. Both classroom meetings and fieldwork are required for this class. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 1 hr. lecture, 3 hrs. practicum/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20.

Health Information Technology (KMRT)

KMRT 101

Introduction to the Health Information Technology Profession (2 CR)
Orientation to the health information management profession and the supporting professional organization. History and evolution of health care delivery, facilities, and practitioners. Supervisory functions of the health information management department. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 102

Health Records Systems, Analysis and Control (3.5 CR)
Content, storage, retrieval, control, and retention of medical records, especially hospital records. Forms design and control, microfilming, and computer applications for health record departments. 2.5 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 103

Medical Terminology for Health Records (3 CR)
Professional language of medicine. Analysis of medical terms by roots and combining forms. Disease processes, diagnostic and operative procedures for each system of the body. Selected medical specialties. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 106

Health Care Statistics (3 CR)
Prerequisite: KMRT 102
Vital health statistics, their uses and values. Abstracting and analysis of data from medical records, collection of data from other sources, and methods of presenting the information. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 108

Legal Aspects of the Health Information Technology Profession (2 CR)
Prerequisite: KMRT 102
Legal principles applied to the health care professions. Confidentiality of the medical record, informed consent, the medical record as a legal document, release of clinical information, response to subpoena, and testimony. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.
KMRT 109

Directed Practice I (2.5 CR)
Prerequisites: BIOL 144 and KMRT 102
Supervised on-the-job training in a medical records department. Supervised discussion of clinical experiences. 2 hrs. lab, 3 hrs. field studies/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 110

Pharmacology (1.5 CR)
Prerequisites: BIOL 144 and KMRT 103
Introduction to basic pharmacology with a body systems approach to disease. 1 hr. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 200

Introduction to Classification Systems (1 CR)
Classification systems used to organize clinical data in health care. The ICD-9-CM classification system will be introduced. 1 hr. lecture/wk. Course taught at Penn Valley Community College. Students should contact the MCC-Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 201

Quality Management (3 CR)
Prerequisite: KMRT 108
Methods of assessing and improving quality in a health care setting. Concept of continuous quality improvement. Compliance with guidelines of regulatory and accrediting agencies. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 202

Class. Systms/Nomenclatures/Indexes & Registers I (4 CR)
Prerequisite: KMRT 200
Nomenclatures and classification systems for coding and indexing diagnoses and procedures with special emphasis on ICD-9-CM. 2.5 hrs. lecture, 3 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 203

Directed Practice II (2 CR)
Prerequisites: BIOL 144 and KMRT 202 and KMRT 210 or BIOL 144 and concurrent enrollment in KMRT 202 and KMRT 210
Supervised learning experience in a medical records department under the direction of a credentialed professional involving a variety of procedures including coding and abstracting health information, medical transcription, and release of information. Supervised discussion of clinical experiences. 1 hr. lab, 3 hrs. field studies/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call
KMRT 206

Specialized Health Records Systems (2 CR)
Overview of specialized health care systems with an emphasis on record maintenance, requirements of accrediting and regulating agencies and specialized health information registers. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 207

Class. System/Nomenclature/Index & Register II (3 CR)
Prerequisites: BIOL 144 and KMRT 202
Nomenclatures and classification system for coding and indexing diagnoses and procedures with emphasis on healthcare facilities. Impact of DRGs on the coding function. 2 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 208

Directed Practice III (2 CR)
Prerequisite: KMRT 203
Supervised on-the-job instruction about health record systems in specialized health care facilities. Supervised discussion of directed practice experiences. 2 hrs. lab, 2 hrs. field studies. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 210

Classif Systems & Nomenclatures/Ambulatory Care (3 CR)
Prerequisites: KMRT 200 and BIOL 108/PVCC or concurrent enrollment in BIOL 108/PVCC
Outpatient coding, classification, and payment systems. Assignment of CPT-4 codes to procedures and services. Common outpatient procedures. Role of the health information technologist in ambulatory coding & billing. 2 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 211

Organization & Administration Health Information (3 CR)
Prerequisites: KMRT 201, KMRT 202, and KMRT 203
General principles of management and organization as applied to health information settings. Budget development and control, personnel recruitment and retention, performance appraisal, and progressive discipline. Office design, productivity monitoring, work simplification, job analysis and job descriptions, and quality management. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KMRT 212

Intro to Medical Insurance & Office Procedures (1.5 CR)
Prerequisites: KMRT 103, KMRT 202, KMRT 210 and BIOL 144
An overview of medical office systems and administrative procedures, with emphasis on insurance billing, compliance with regulatory agencies, and technology tools, including medical transcription. 1 hr. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of health information technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

Health Occupations (AVHO)

AVHO 102
Certified Nurse Aide (CNA) (5 CR)
Prerequisite: ENGL 121 with a grade of "C" or higher or Appropriate Compass reading test score. Documentation of current TB test and current CPR for Health Care Providers and a Social Security Card.

This course provides classroom and clinical instruction for the primary care of clients in long-term and acute-care facilities. Students learn skills for daily hygiene, bedside care, vital sign measurement, positioning and safe transfer of clients. The class prepares and schedules the student to take the Kansas CNA examination. In-state tuition and fees $280 total. Out-of-state tuition and fees $1015 total. 96 contact hrs. For additional information go to the jccc.edu web page: click on classes; click on credit class search; click the semester; course prefix is AVHO Health Occupations. Click on CRN number for information. The credit reflected in this course is for transcript reporting, recording and transfer only. For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CNA_Information-Requirements. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $50.

AVHO 103
Certified Nurse Aide Refresher Course (CNA) (1 CR)
Prerequisite: Kansas CNA Certification

This 21-hour CNA refresher course provides classroom and laboratory experience to update the inactive CNA. The student will discuss the nurse aide's responsibility in the current health care system and the importance of resident rights. The student will demonstrate safety measures, infection control procedures, personal care skills, measurement of vital signs and transfers, positioning and turning. 21 contact hours. In-state tuition and fees $48 total. Out-of-state tuition and fees $195 total. For additional information go to the jccc.edu web page: click on classes; click on credit class search; click the semester; course prefix is AVHO Health Occupations. Click on CRN number for information. The credit reflected in this course is for transcript reporting, recording and transfer only. For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CMA_Update_Info-Requirements

AVHO 104
Certified Medication Aide (CMA) (4 CR)
Prerequisites: Appropriate Compass reading test score, and proof of Kansas CNA certification or having completed the state CNA examination and awaiting results. If CNA examination results are not satisfactory, the student must withdraw from the CMA course. Documentation of current TB skin test - negative results within the last year. Current CPR for Health Care Providers and Social Security card.

This course includes the development of knowledge related to many commonly prescribed medications. Students will learn the classification, side effects and techniques of administration, including preparation and accurate distribution of medications. Safe administration of oral medications is discussed and
demonstrated. Students will be scheduled to take the Kansas CMA examination.
In-state tuition and fees $232 total. Out-of-state tuition and fees $820 total. 80
contact hrs. For additional information go to the jccc.edu web page: click on
classes; click on credit class search; click the semester; course prefix is AVHO
Health Occupations. Click on CRN number for information. The credit reflected in
this course is for transcript reporting, recording and transfer only. For more
information, go to
http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CMA_Infor-
mation-Requirements. Enrollment in certain courses may require a professional
liability fee of $16.00. Students will be notified via their JCCC student e-mail
account if the fee is due and instructions on how to pay the fee.

Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $20 to $50.

AVHO 106
Home Health Aide (1 CR)
Prerequisites: Proof of Kansas CNA certification and appropriate Compass
reading test score Requirements - copy of current TB test, current CPR for Health
Care Providers card, social security card

This course provides the student with information necessary for nutritional meal
planning, task modification, emotional support and personal service to clients and
families needing health care assistance at home. Students will be scheduled to
take the Kansas HHA certification examination. In-state tuition and fees $98 total.
Out-of-state tuition and fees $245 total. 21 contact hrs. For additional information
go to the jccc.net web page: click on classes; click on credit class search; click the
semester; course prefix is AVHO Health Occupations. Click on CRN number for
information. The credit reflected in this course is for transcript reporting, recording
and transfer only. For more information, go to
http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/HHA_Infor-
mation-Requirements. Enrollment in certain courses may require a professional
liability fee of $16.00. Students will be notified via their JCCC student e-mail
account if the fee is due and instructions on how to pay the fee.

AVHO 108
Certified Medication Aide Update (CMA) (1 CR)
Prerequisites: Proof of Kansas CMA certification and Proof of Kansas CNA
Certification

This course meets the continuing education requirements for licensed Certified
Medication Aides. The course includes review of commonly used drugs and their
interactions with foods and other drugs. Also included are discussions of legal
implications and regulations related to administration and record keeping,
biological effects of medications on the elderly and a review of basic safety
principles. 15 contact hours. In-state tuition and fees $48 total. Out-of-state
tuition and fees $195 total. For additional information go to the jccc.edu web page:
click on classes; click on credit class search; click the semester; course prefix is
AVHO Health Occupations. Click on CRN number for information. The credit
reflected in this course is for transcript reporting, recording and transfer only. For
more information, go to
http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/CMA_Updat-
e_Info-Requirements

Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $20.

AVHO 112
Rehabilitative Aide (2 CR)
Prerequisite: Proof of current Kansas CNA certification

This course includes both classroom and laboratory instruction for the aging
process as well as the role of the rehabilitative aide as a member of the health
care team. Students learn the skills required to enhance the mobility of elderly
residents in long-term care as well as the skills required to care for residents with
special needs. A certificate from the college will be issued. In-state tuition $104,
and out-of-state tuition $410. 32 contact hrs. For additional information go to the
jccc.edu web page: click on classes; click on credit class search; click the
AVHO 115  
**I V Therapy For LPNs** (3 CR)  
*Prerequisites: Proof of Kansas LPN licensure. Present evidence of personal liability insurance at the time of application for admission to the program and maintain it throughout the clinical practicum. Maintenance of current CPR certification for the duration of the course. Evidence of negative TB test or chest X-ray within the past year.*  
This course provides review of basic physiology of the circulatory system and instruction in principles of site selection for veins appropriate for I.V. therapy. This course meets the Kansas requirements for LPNs seeking certification in I.V. therapy. In-state tuition and fees $204 total. Out-of-state tuition and fees $645 total. 48 contact hrs.  For more information, go to http://www.jccc.net/home/depts/5104/site/newstudent/types/adm_avs/RA_Info -Requirements  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $100.

---

HVAC 121  
**Basic Principles of HVAC** (4 CR)  
*Prerequisite or corequisite: HVAC 123 or ELTE 123*  
This is a beginning course in heating, ventilation and air conditioning technology that is appropriate for HVAC majors and other interested students. Upon successful completion of this course, the student should be able to identify the function of the basic components of an air-conditioning system. Topics will include heat laws, refrigerants, oils and refrigeration cycles of residential and light commercial systems. In the lab, students will design, assemble and operate a working refrigeration system. Competencies will include brazing, wiring, evacuating and charging a system. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

---

HVAC 123  
**Electromechanical Systems** (4 CR)  
This is a beginning course in electrical theory that is required for HVAC, electrical and power plant technology, but is appropriate for all interested students. Common components found in the HVAC industry are used to develop these skills. Upon successful completion of this course, the student should be able to identify electrical components and their relationships to the various repair and troubleshooting techniques. The materials in this course will prove useful to service technicians whose background in electricity is limited. The course includes material from basic electrical theory to troubleshooting complex electrical circuits. This course will provide practice in application of electrical theory as well as in the interconnection of components of heating and cooling systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.
HVAC 124
Equipment Selection and Duct Design (4 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify techniques and procedures used in the residential construction industry to determine proper sizing of HVAC equipment and ducts to meet the requirements for a high-quality, comfortable climate in terms of heating, cooling, humidifying, dehumidifying, ventilation and air cleaning or filtering. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $10.

HVAC 125
Energy Alternatives (2 CR)
Upon successful completion of this course, the student should be able to identify diverse methods of alternate energy production. Some of the technologies that will be discussed are wind energy, photovoltaic energy, nuclear energy, hydroelectric energy, biomass and alternate fuel vehicles. Students will understand the advantages of using various alternate energy technologies, the effects or by-products of each and the problems that might be encountered. Some student research will be included in the context of the course. Emphasis will be on the most promising or effective alternate energy technologies available. 2 hrs. lecture/wk.

HVAC 127
Residential Systems: Heating (4 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify all the components and accessories and their relation to the functions of residential heating systems. Topics covered will be natural gas, propane, oil, forced air and hydronic-types of equipment. Emphasis will be on the electrical diagrams and mechanical principles of operation of these systems. Practical instruction in service diagnosis procedures and techniques for efficient operation, maintenance, troubleshooting and repair of these systems make up the lab portion of the course. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 137
Residential Systems: Air Conditioning (4 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify all the components and accessories and their relation to the functions of residential air conditioning systems. Topics covered will include electric and natural gas air conditioner condensing units, metering devices, evaporation coils, and refrigerants. Electrical diagrams, psychrometric charts and techniques for efficient operation, maintenance, troubleshooting and repair of these systems make up the laboratory portion of the course. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 143
Reading Blueprints and Ladder Diagrams (2 CR)
Upon successful completion of this course, the student should be able to identify all types of industrial plant blueprints. Included will be a discussion of machine parts and drawings as well as hydraulic, pneumatic, piping and plumbing, electrical, air conditioning and refrigeration drawings. Sketching used in industrial plants will be covered. A portion of the course will cover the types and use of ladder logic and various components such as input, output and diagrams. The structure, symbols and terminology of ladder logic diagrams will be introduced. Logic and decision-making functions are presented, along with practice in creating ladder logic diagrams. 2 hrs. lecture/wk.

HVAC 146
Plumbing Systems Applications (3 CR)
Upon successful completion of this course, the student should be able to demonstrate familiarity with many aspects of fuel gas piping, gas appliance venting, water heater installations, combustion air requirements and proper piping techniques. Classroom lectures center on methods for proper sizing of both fuel gas piping and vent sizing with emphasis on interpretation of both the Uniform Plumbing Code and the National Fuel Gas Code. There will be an emphasis on combustion air requirements. Laboratory competencies will include identification of materials and proper installation methods of fuel gas lines, vent piping systems and copper water line connections. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk.

HVAC 148
HVAC Installation and Start-up Procedures (3 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify techniques and procedures to install new systems, retrofit systems and do an initial start-up, check-out furnaces and air conditioners. Topics will include electrical requirements, flue appliance location, permit and inspections, combustion air, sheet metal ducts, and mechanical standards. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk.

HVAC 150
Refrigerant Management and Certification (1 CR)
Upon successful completion of this course, the student should have knowledge and confidence necessary to pass the EPA Refrigerant Certification exam and properly, efficiently and responsibly handle refrigerants as set forth in the Clean Air Act of 1990. 1 hr. lecture/wk.

HVAC 155
Workplace Skills (1 CR)
Upon successful completion of this course, the student should be able to identify the job skills necessary to have a successful career in the field of their choice. Topics included listening skills, oral communication, human relations, decision making/problem solving, how to work as a team, time and resource management, work ethics, career planning and resume building. 1 hr. lecture/wk.

HVAC 167
Sheet Metal Layout and Fabrication (3 CR)
Upon successful completion of this course, the student should be able to identify the components, equipment and operation for sheet metal layout and fabrication. Practice problems are included at the end of each unit in order to provide the student with an opportunity to apply the methods attained by sheet metal layout.
Shop facilities are available. The patterns will be fabricated and joined into a line of fittings. This gives the most complete test of pattern accuracy and also provides the experience needed by a competent layout person. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 221
Commercial Systems: Air Conditioning (4 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify cooling systems used in commercial, institutional and industrial applications. Types of equipment include reciprocating and centrifugal chillers, absorption systems, cooling towers, fans and air handlers. Topics also include psychrometrics, pressure-enthalpy diagrams and commercial load calculations, evacuation and charging. 3 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 223
Commercial Systems: Heating (4 CR)
Prerequisite: HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify large heating systems used in commercial, institutional and industrial applications. Types of equipment include hot water, low-pressure and high-pressure steam boilers; auxiliary, safety and flame safeguard controls; steam traps; condensate return; and water treatment systems. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools. 3 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 229
Advanced Control Systems (4 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify the components and theory in electronic, pneumatic and direct digital control systems as they apply to HVAC systems. This course will reinforce and build on those competencies learned in HVAC 123 and HVAC 121. Classroom lectures will center on components, wiring diagrams, calibration and sequences of operation, system components, theory of operation, wiring diagrams and installation methods. Laboratory competencies include identification, calibration, maintenance and problem diagnosis of pneumatic, electronic and DDC systems, thermostat controllers and their related sensors/transmitters. Students will program a complete building energy management system. Interactive instructional media will be used in this course. 3 hrs. lecture, 3 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 231
HVAC Rooftop Units (3 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Topics will include electrical controls and economizers of various rooftop units, roof curbs, installation, service, diagnosis, evacuation and charging of typical light commercial rooftop units. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 2 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 235
Residential Heat Pump Systems (4 CR)
Prerequisites: HVAC 121 and either HVAC 123 or ELTE 123
Upon successful completion of this course, the student should be able to identify the function of all components and accessories of all electric and dual heat pump systems. Topics will include electric heat and heat pump fundamentals, principles and applications; refrigerant flow controls; defrost cycle controls; heat pump thermostats; indoor air distribution; dual fuel controls; and change-overstats. Emphasis will be on the electrical diagrams and mechanical principles of operation. These systems, as well as practical instruction in service and diagram procedures and techniques for the efficient operation, maintenance, troubleshooting and repair of these systems, will make up the lab portion of the course. The student will required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 3 hrs. lecture, 3 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

HVAC 271
HVAC Internship (3 CR)
Prerequisite: Program facilitator approval Required
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students with on-the-job experience under the supervision of professionals in the industry. The work will be developed cooperatively with area employers, college staff and each student to provide a variety of actual job experiences directly related to the student’s career goals. 1 hr. lecture, minimum 15 hrs. on-the-job training/wk.

History (HIST)

HIST 120
Local and Kansas History (3 CR)
This course introduces students to the history of Kansas from the beginning of the Late Ceramic Period (1500) to the present. Emphasis will be on the examination of the living patterns of the various peoples who have inhabited the region during this time frame. This course will also analyze the social and economic factors and political objectives that transformed the central plains from the domain of the bison-hunting Plains Indian to a society based in a market-agricultural economy. 3 hrs./wk.

HIST 125
Western Civilization: Readings and Discussion I (3 CR)
The course explores the major developments, ideas and personalities that have shaped Western civilization. Organized around a readings and discussion format, students engage some of the world’s most provocative and influential literature. Western Civilization I begins with the ancient cultures of the Middle East, Greece and Rome and follows the development of Western thought from the medieval period to the Renaissance and Reformation. 3 hrs. lecture/wk. It is not necessary to take HIST 125 before HIST 126.
Western Civilization: Readings and Discussion II (3 CR)
The course explores the major developments, ideas and personalities that, for the past 500 years, have shaped Western civilization. Organized around a readings and discussion format, the course allows students to engage some of the world’s most provocative and influential literature. Western Civilization II begins with the three revolutions that define modernity - Scientific, French, and Industrial. The course also highlights the new ideologies of the 19th century and more recent themes of modernization and the cultural crisis of the 20th century. 3 hrs. lecture/wk. It is not necessary to take HIST 125 before HIST 126. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

HIST 128
Medieval History (3 CR)
Medieval History is a detailed survey of the period from late Roman Antiquity to the early Renaissance. Primary and secondary texts and visual resources will be used to illuminate the period that saw first the decline into relative stagnation caused by barbarian onslaughts, and then gradual reemergence of a powerful civilization that revitalized itself by renewing the insights of ancient times. 3 hrs. lecture/wk.

HIST 129
Early Modern Europe 1500-1789 (3 CR)
This course is an introduction to early modern European history, with emphasis on the economic, social and political developments that have shaped the modern world: the Renaissance; the Catholic and Protestant Reformations; the rise of nation-states; the new inter-cultural contact between Europe and the world; the Commercial Revolution and the Enlightenment. 3 hrs. lecture/wk.

HIST 130
European History Since 1789 (3 CR)
This course covers the major political, intellectual, and economic and social developments in Europe from the end of the 18th century to the present, including modern political ideologies, major wars, the growth of strong governments, the effect of modern science on social and political thought, the Industrial Revolution, the creation of large middle classes, and the effect of modern technology. 3 hrs./wk.

HIST 132
History of Africa (3 CR)
This course introduces students to the history of Africa until the present. It emphasizes the fundamental characteristics and long-term developments in the evolution of African political and socioeconomic institutions. 3 hrs./wk.

HIST 135
Eastern Civilization (3 CR)
This course is an introduction to the societies and cultures of Asia. Through lectures, readings and discussions, the course will focus on aspects of the history, politics, art, literature and economics of China, Japan and India. The major traditional themes and concepts of these civilizations will be stressed. 3 hrs./wk.

HIST 137
African American Studies (3 CR)
This course surveys the major themes and developments in African-American culture and history from the colonial period to the present. The course is divided into three five-week segments. Each segment relates to a historical period; slave, post-emancipation and contemporary. Each segment also permits a flexible, interdisciplinary approach that will include literature, fine arts and the social sciences. 3 hrs. lecture/wk.

HIST 140
U.S. History to 1877 (3 CR)
This survey course in U.S. history will emphasize developments and trends in American society from the early period of discovery and settlement through Reconstruction. Topics will include the Colonial era, the Revolutionary period, the Federalist era, the expansion of the Republic during the mid-19th century, and the Civil War and Reconstruction. The emphasis will be on analysis and interpretation of these developments. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

HIST 141
U.S. History Since 1877 (3 CR)
This survey course will emphasize developments and trends in American society from the 1870s to the late twentieth century. Topics will include the Reconstruction era, industrialization, immigration, reform movements, World Wars I and II, social and cultural trends, and foreign policy. Emphasis will be on analysis and interpretation of these developments. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

HIST 150
Islam: Religion & Civilization (3 CR)
This course covers the context in which Islam arose; the career of the Prophet Muhammad; the main teachings and practices of the religion; the Qur'an and other early Islamic literature; subsequent political developments in the religion and its spread; its main religious branches; its history during the Middle Ages; the Christian crusades and their consequences; the major components of Islamic civilization including law, the arts, literature, philosophy, science, and mathematics; Sufi; the effects of Western imperialism upon Islamic states; major developments in Islamic thought and practice since the seventeenth century; the Islamic diaspora; and Islam today. HIST 150 is the same course as REL 150 and HUM 150; enroll in one only. 3 hrs. lecture/wk.

HIST 151
World History I: Traditional World (3 CR)
This course provides students an introduction to the history of the major world civilizations up to approximately 1500. Upon successful completion of the course, students will be able to identify the major political, social, economic and technical developments in the histories of Egypt, Mesopotamia, other Near Eastern civilizations, Rome, Greece, India, China, sub-Saharan Africa, pre-Columbian America and medieval Europe. Students will be able to define the concept of a traditional, as opposed to a modern, society. They will be able to compare these societies with each another and with the modern society of the contemporary United States. 3 hrs. lecture/wk.

HIST 152
World History II: Modern World (3 CR)
This course provides students an introduction to the history of the world since approximately 1500. Upon successful completion, students will be able to
describe and analyze the development of modernism, which occurred first in the West, including the scientific revolution, secularism, industrialism and the rise of new political ideologies. They will be able to trace the expansion of modernization in both the Western and non-Western worlds and the response to modernism in non-Western countries. 3 hrs. lecture/wk.

HIST 160
Modern Russian History (3 CR)
This course examines Russian history within a Eurasian context. It is a study of three centuries of the social, political, economic and cultural forces that shaped Russian history, beginning with a survey of the events that place Russia outside the Western historical tradition. 3 hrs./wk. or online. Usually this course is offered in the fall semester either on-campus or online. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

HIST 162
Modern Latin America (3 CR)
This course is an examination of the economic, social, political and cultural history of Latin America since independence. Regional identities, such as Central America, and independent national states, such as Cuba and Mexico, are explored. Literary and intellectual trends together with contemporary popular culture are featured in the course. 3 hrs./wk.

HIST 164
Japan: Changing Tradition (3 CR)
Prerequisite: assistant dean approval
This self-paced course explores Japanese history, politics and economics from the early days of the Tokugawa regime from 1500 to the present. The thrust of the course is geared to exploring the themes that permeate the Japanese experience over the past two centuries.

HIST 195
History of the Middle East (3 CR)
This course introduces students to the environmental, political, economic, religious and ethnic landscape of the Middle East and Northern Africa. Though its focus is historical, the course prepares students for an understanding of the contemporary challenges faced by the region. Particular attention is paid to the Middle East and Northern Africa as the intersection of three monotheistic traditions, the central role of aridity and natural resources in its development, the interfacing of multiple cultures with Islam, the religious and ethnic diversity of the region today, and modern encounters with the nation-state system and western secularism. Students will also explore the contributions of the region to the larger world and the interactions of Middle Eastern and Northern African countries and people with Asia, Europe, and the United States. 3 hrs. lecture/wk.

Home Economics (HMEC)

HMEC 151
Nutrition and Meal Planning (3 CR)
This course covers the basic food groups, their use in meal planning, their functions and their nutritional values. In addition to the current trends in eating, this course covers diets and exercise, as well as fad diets, life-cycle nutritional needs, and the effects of nutrient intake on growth and development. This is a
required course for the food and beverage program and the chef apprenticeship program. 3 hrs./wk.

Honors Program (HON)

HON 250
Honors Forum: In Search of Solutions (3 CR)
This course will focus on two topics during the semester and how those topics affect the local, national and global communities. The course complements other courses in the curriculum by applying the dual emphases of specific content and skill development to the areas of interaction, analysis, synthesis and conflict resolution. Students will study each issue in a historical and contemporary context, develop a greater understanding of the issues, and take a position on the issues. This position will be subjected to further challenge and dialogue. In this course, the process of reflecting, researching, analyzing and evaluating are as important as content. As points of view concerning the issue are developed, the students must articulate and defend these viewpoints as they are challenged by others and make judgments among alternative options. The first topic is selected by the faculty members, then midway through the semester, the students will select the second topic. This course will require students to use many forms of research, including the Internet and electronic databases. In addition, students will be expected to use e-mail for sharing information with classmates and instructors.

Horticulture (HORT)

HORT 115
Home Horticulture (2 CR)
This course provides basic knowledge for the design and management of home lawns, flower and vegetable gardens, and landscape trees and shrubs. Students will learn basic plant anatomy and physiology concepts; how to recognize some common plant deficiency symptoms; the use of fertilizers and pesticides; identification of some common trees, shrubs and garden plants; and the major considerations of good landscape design. 1 hr. lecture, 2 hrs. lab/wk.

HORT 120
Introduction to Urban Agribusiness (3 CR)
This is a general survey course for students who wish to learn more about the broad field of agribusiness. Particular emphasis is on the many facets of landscape and grounds management. Career areas that will be covered are interior landscaping, greenhouse management, the position of pesticide applicators’ position and golf course management. 3 hrs. lecture/wk.

HORT 135
Landscape Design (3 CR)
The course is designed to familiarize students with aspects of landscape design. Students will analyze the site and preferences of the client and complete a landscape design following basic design principles. Students will learn presentation graphics, hand lettering techniques, and how to make a hand drawing to scale. Note: Plant material courses (HORT 214, HORT 215, HORT 220) could be helpful for this course but are not required. 2 hrs. lecture, 2 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30.

HORT 140
Turfgrass I (3 CR)
The basics of turfgrass identification, selection, use and care will be covered. The emphasis will be on efficient management of soil and turf on large or small grounds. Upon successful completion of this course, students should be able to demonstrate their ability to properly identify the major categories of turfgrass; establish and maintain turfgrass; identify turfgrass pests; and develop a pest control fertilizer program. Irrigation systems, their maintenance and repair will also be discussed. 2 hrs. lecture, 2 hrs. lab/wk.

HORT 150
Fruits, Vegetables and Herb Crops (2 CR)
This course is designed to familiarize garden center employees with the plant materials and production of crops many homeowners use and grow. This course will help the employee answer many homeowner questions about production, varieties and potential crop problems. Home hobbyists may also wish to enroll in this course. 1 hr. lecture, 2 hrs. lab/wk.

HORT 160
Garden Center Operations (3 CR)
This course is designed for garden center employees and provides background on the elements necessary for success in a competitive retail environment. The business organization is emphasized, including environmental monitoring, selling, inventory issues, merchandising, advertising, cost effectiveness, labor/team relationships and customer service. In addition, safety and legal issues are examined. 3 hrs. lecture/wk.

HORT 165
Arboriculture (3 CR)
This course will prepare the student to work with trees in Zones 5-6. In lecture and lab settings students will learn and demonstrate how to properly plant, prune and maintain trees, identify hazard trees and proper pruning and tree removal techniques. Emphasis will be placed on ANSI and OSHA safety requirements. At the end of this course the student will be prepared to take the test for arboriculture certification in Kansas. 2 hrs. lecture 3 hrs. lab/wk.

HORT 201
Introduction to Horticultural Science (4 CR)
This is an introduction to the principles and practices of horticultural plant systems. Plant structure and function will be discussed, along with the effects of environmental factors on plant growth. General cultural practices will be described, including pest control, mineral nutrition and plant propagation. 3 hrs. lecture, 2 hrs. lab/wk.

HORT 205
Plant Propagation (3 CR)
Prerequisite: HORT 201 or permission of assistant dean
This course provides basic knowledge of the art and science of sexual and asexual methods of propagating plants. Students study the processes of seed development, seed dormancy, germination, root initiation and grafting. Students will learn basic seed sowing, cutting and grafting skills. The students will be able to demonstrate the selection of appropriate propagation methods and choose the proper environmental conditions necessary to achieve successful propagation of seeds or cuttings. 2 hrs. lecture, 2 hrs. lab/wk.
HORT 210  
Concepts of Floral Design (3 CR)  
This is an introductory course for students to learn the design basics of flower arranging. The course will help the students develop an eye for color combinations, flow of lines, balance, geometric shapes and textures in materials used, mechanics of design, customer perspectives and the post-harvest care of floral materials. 2 hrs. lecture, 3 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $150.

HORT 214  
Woody Plants I, Deciduous (3 CR)  
The class places emphasis on identification, ornamental characters, site requirements, and use of woody ornamental deciduous trees and shrubs with special emphasis on the cultivated varieties in climatic zones 5 and 6. Plant uses and seasonal effects and influences that affect plant choices will be also be taught. This course will assist the grounds maintenance employee, landscaper, and garden center employee in identifying plant materials used in the landscape. 2 hrs. lecture, 3 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10.

HORT 215  
Woody Plants II, Evergreens (3 CR)  
This course places emphasis on identification, ornamental characteristics, site requirements and use of evergreen trees and shrubs and flowering shrubs with special emphasis on the cultivated varieties in climatic zones 5 and 6. Plant uses and seasonal effects and influences that affect plant choices will be taught. This course will assist the grounds maintenance employee, landscaper and garden center employee in identifying plant materials used in the landscape. 2 hrs. lecture, 3 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10.

HORT 220  
Herbaceous Plants (3 CR)  
This course will focus on the identification, ornamental characters, culture, propagation, and use of herbaceous perennials, bulbs, ground covers, vines and annuals. This course will assist the grounds maintenance employee, landscaper, and garden center employee in identifying and selecting herbaceous plant materials with additional emphasis on uses and maintenance of these plants when used in the landscape. 2 hrs. lecture, 3 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10.

HORT 225  
Plant Problems (3 CR)  
Prerequisites: HORT 214 and HORT 220 or permission of assistant dean  
This course is a broad-spectrum overview of plant insects, diseases and nutrition. Students will look at plants to identify the common characteristics found when diagnosing plant problems. Identification, treatment and treatment alternatives will be considered to help customers make diagnostic decisions for the use of chemicals and integrated pest management techniques (IPM). 2 hrs. lecture, 3 hrs. lab/wk.

HORT 235  
Landscape Maintenance and Techniques (3 CR)  
This course is designed to familiarize students with the principles and techniques
involved in landscape maintenance including pruning techniques, fertilization, irrigation, spray schedules and weed control. Installation and maintenance of annual and perennial plant material is examined. In addition, the student will learn to design preventive strategies and identify and examine disease and insect damage. The students will learn how to maintain good customer relations. 2 hrs. lecture, 2 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30.

HORT 240
Turfgrass II (3 CR)
Prerequisite: HORT 140
This course is a continuation of turfgrass I (HORT 140). Topics include green construction, top dressing, sprayer calibration, management programs (e.g., setting up a lawn care program) and the influence environment has on turfgrass growth. 2 hrs. lecture 2 hrs. lab/wk.

HORT 245
Commercial Crop Production (3 CR)
This course is designed to familiarize Market Farmers with the plant materials and production of crops grown in the Market Farming industry. This course will help answer questions about varieties of plants to grow, establishment, growth, harvesting and post-harvesting of crop, varieties of plants to grow. Students will become familiar with different marketing options and good record keeping. 3 hrs. lecture/wk.

HORT 255
Landscape Pest Control (3 CR)
This course will explore the general concepts of turf, ornamental, commercial crop and vegetable garden maintenance and pest control in the local area. The student will become familiar with federal and state regulations pertaining to horticulture chemical application. Upon completion of this course, the student should be prepared to take the Kansas or Missouri licensing examination to become a certified applicator of restricted horticultural pesticides and herbicides. 3 hrs. lecture/wk.

HORT 260
Horticulture Soils (3 CR)
This course covers soil components as well as the physical, chemical and biological properties of soils that affect plant growth. Emphasis will be placed on horticultural substrates and urban soils and their applications. 2 hrs. lecture, 2 hrs. lab/wk.

HORT 265
Landscape Construction (3 CR)
This course will cover the theories, principles and practices used in the interpretation and implementation of landscape construction. It will include site planning and preparation, safety principles, tool use and identification, landscape and construction materials, job bid development and project management. Construction projects in the class will vary by semester. 2 hrs. lecture, 2 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $235.
Horticulture Internship (3 CR)
Prerequisite: Approval of assistant dean
Student should be able to apply classroom knowledge to an actual work situation. The internship will provide students on-the-job experience under the supervision of professionals in the Horticultural industry. The work will be developed cooperatively with area employers, college staff and each student to provide a job experience in the area of their horticultural focus and career goals. 20 hrs field study

HORT 272
Sustainable Agriculture Fall Practicum (2 CR)
Through practical experience complemented by lectures and discussions, students will gain exposure to a broad range of tasks facing the market farmer during the fall and early winter seasons. This includes production and marketing of summer crops, planning, and production of fall crops in high tunnels and open field, and marketing these fall crops. Topics include production planning, planting, integrated crop management, harvest and postharvest practices, marketing through various channels, tools and equipment, soil fertility management, and record keeping. Practicum activities will integrate with other courses in this market farming certificate program. Students will learn both conventional and organic production techniques. Entrepreneurship will be emphasized throughout. 7 hrs. practicum/wk.

HORT 274
Sustainable Agriculture Spring Practicum (2 CR)
Through practical experience complemented by lectures and discussions, students will gain exposure to a broad range of tasks facing the market farmer during the winter and early spring seasons. This includes production and marketing of winter crops and planning and production of spring and summer crops in high tunnels and open field and marketing these spring crops. Topics include production planning, planting, integrated crop management, harvest and postharvest practices, marketing through various channels, tools and equipment, soil fertility management, and record keeping. Practicum activities will integrate with other courses in this market farming certificate program. Students will learn both conventional and organic production techniques. Entrepreneurship will be emphasized throughout. 7 hrs practicum/wk.

HORT 276
Sustainable Agriculture Summer Practicum (2 CR)
Through practical experience complemented by lectures and discussions, students will gain exposure to a broad range of tasks facing the market farmer during the summer season. This includes planning, production and marketing of spring and summer crops and planning and production of fall crops in high tunnels and open field. Topics include production planning, planting, integrated crop management, harvest and postharvest practices, marketing through various channels, tools and equipment, soil fertility management, and record keeping. Practicum activities will integrate with other courses in this market farming certificate program. Students will learn both conventional and organic production techniques. Entrepreneurship will be emphasized throughout. 7 hrs. practicum/wk.

Hospitality Management (HMGT)

HMGT 120
Food Service Sanitation (1 CR)
This course covers the basic principles of providing and serving safe food. It also provides the student with safe food-handling procedures necessary to manage a
sanitary and safe food service operation in compliance with the National Food code and the National Restaurant Association. The successful completion of the Serv Safe Sanitation exam will result in a national sanitation certification. 1 hr. lecture/wk.

HMGT 121
Perspectives of Hospitality Management (3 CR)
This introductory course is designed to provide students with current information on topics relevant to career exploration, employment and operational specifics of the various segments of the hospitality industry. The course includes exploration of the tourism, lodging, food and beverage and related industries, along with the operational characteristics unique to each and the critical concepts of service management. The identification of current events and trends will be included along with the evaluation of impact on the hospitality industry. This course also identifies and explores career opportunities and includes the professional profiles and job search materials directly related to the hospitality industry. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $50.

HMGT 123
Professional Cooking I (3 CR)
Prerequisite or corequisite: HMGT 120
This is the first of two courses in professional cooking methods for students enrolled in hospitality management programs. Upon completion of this course, the student should be able to demonstrate skills in basic cooking methods, recipe conversion, and professional food preparation and handling. Additionally, the student should be able to safely operate common food service equipment used in commercial kitchens. 1 hr. lecture, 2.5 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $200.

HMGT 126
Food Management (4 CR)
Prerequisites: HMGT 123 and HGMT 230 and HMGT 277 and admission to the hospitality management program
This course offers an overview of restaurant management practices used in the hospitality industry. Emphasis will be on demonstrating the components of menu planning and the styles of food service used for various occasions -- buffet service and French, Russian and American service. The student will participate in the operation of the campus restaurant, including food preparation, service, sales promotion, purchasing and costing. 7 hrs./wk.

HMGT 128
Supervisory Management (3 CR)
This course contains the basic supervisory management skills, management styles, motivation with emphasis on human relations, delegation, training, evaluation and communication. In addition, the hiring and firing functions within FLSA guidelines will be covered. 3 hrs./wk.

HMGT 130
Hospitality Law (3 CR)
This course offers an overview of product and dram shop liability as well as of the various areas of federal and state legislation that regulate the hospitality industry. Emphasis will be on familiarizing the hospitality manager with ways to avoid costly and time-consuming lawsuits. A manager’s or owner’s legal rights and responsibilities also will be discussed. Upon successful completion of this course,
the student should be able to recognize potential legal problems. 3 hrs./wk.

**HMGT 132**  
**Seminar in Housekeeping Operations** (3 CR)  
This course presents a systematic approach to managing housekeeping operations in the hospitality industry. The course will also include related health department and OSHA regulations. While enrolled in this class, a student must work a minimum of 15 hours a week in a lodging operation. The work experience is concurrent but does not necessarily concentrate on the subject being taught in the course. This course is typically offered in the fall semester. 2 hrs./wk.

**HMGT 145**  
**Food Production Specialties** (3 CR)  
**Prerequisite: HMGT 123**  
This course covers the fundamentals of convenience baking, hors d’oeuvre and cold kitchen preparation. It provides knowledge of and basic skills in the pastry kitchen, where the student can handle convenience products from the frozen or dried state and produce finished pies, cakes and dessert items. It provides further knowledge of and skill in the garde-manger kitchen, specifically making salads, cocktail hors d’oeuvres and cocktail sandwiches, as well as making economic purchases for gourmet food items. In addition, the student will learn how to make intermezzo ices, identify different types of cheese, and design and make a general plan for a buffet. 1 1/2 hrs. lecture, 2 hrs. lab/wk.

**HMGT 150**  
**Seminar: Food Service Sales and Marketing** (3 CR)  
This course includes detailed information in distinguishing the difference between marketing, sales, promotion, advertising and merchandising. In addition, development and quantifying the cost of a marketing plan by analyzing markets and developing a primary target market will be discussed. This course is a seminar course, and students are required to be employed 15 hours per week in a job related to the hospitality industry. 3 hrs. lecture, 15 hrs. internship/wk.

**HMGT 165**  
**Food Industry Compliance & Safety** (3 CR)  
Upon successful completion of this course, the student should be able to analyze and explain the basic legal compliance issues regarding food safety and the post-harvest handling of local food products. This course focuses on the legal compliance issues of market farming as well as the food safe handling principles necessary for an individual involved in market farming. It will provide students with practical methods of application involved with food safety and post-harvest marketing. 3 hrs. lecture/wk.

**HMGT 167**  
**Local Food Production** (3 CR)  
Upon successful completion of this course, the student should be able to analyze and explain the basic cooking methods, recipe conversion and professional food preparation and handling of local food products. Additionally, the student should be able to safely operate common food service equipment used in commercial kitchens. It will provide students with practical methods of application involved with safe handling and production of post-harvest local food products. 2 hrs. lecture, 1.5 hrs. instructional lab/wk.

**HMGT 203**
Hotel Sales and Marketing (3 CR)
Prerequisites: HMGT 121 and admission to the hospitality management program
This course will focus on practical sales and marketing techniques for the hotel industry. It will cover a marketing plan and advertising campaign for a hotel, including identifying target markets, prospecting for sales leads, and using sales techniques. This course is typically offered in the fall semester. 3 hrs. lecture/wk.

HMGT 207
Hospitality Human Resource Management (3 CR)
Prerequisite: HMGT 128
This course will examine hospitality human resource management from the global perspective as the rise of multinational hospitality corporations and a multicultural society place new requirements on managers with human resource responsibilities. Special emphasis will be placed on both the "soft skills" involved in counseling, interpersonal relations, and different management theories, as well as the "hard skills" involved in the legislative aspects of managing people. This course will concentrate on how to manage managers. 3 hrs. lecture/wk.

HMGT 220
American Regional Cuisine (3 CR)
Prerequisite: HMGT 230
This course introduces the student to regional American cooking from nine regional culinary traditions and two specialty traditions within American cuisine. Students will study the cuisine of New England; the Mid-Atlantic states; the Deep South; Florida and the Caribbean; Cajun and Creole; the Central Plains and Rocky Mountain states; Tex-Mex and the American Southwest; California and Hawaii; the Pacific Northwest, as well as vegetarian cuisine and kosher dietary laws. Upon completion of this course, the student should be able to demonstrate skills in cooking and presenting classic American dishes in their traditional forms within a restaurant setting. 1 hr. lecture, 2.5 hrs. lab/wk.

HMGT 221
Design and Facilities Management (3 CR)
Prerequisites: HMGT 123 and HMGT 271
This course includes detailed information about food service design that covers layout, design, and equipment specifications. In addition, facilities operations will be discussed regarding electrical, water, and transportation systems; refrigeration; waste disposal; energy management; and HVAC. Preventive maintenance will be emphasized. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $100.

HMGT 223
Fundamentals of Baking (3 CR)
This course covers bakeshop production as it relates to the basic principles of ingredients, measurements, mixing, proofing, baking, and final presentation. In addition, the student will be able to identify the various types of baking equipment used in the preparation of bakeshop products. The class includes lecture and participation. 1 hr. lecture, 2.5 hrs. lab/wk.

HMGT 226
Garde Manger (3 CR)
Prerequisite: HMGT 230
This course is designed for the student to learn cold food production and
charcuterie. The course will allow the student to develop fundamental principles of the cold kitchen and modernize traditional methods of salad preparation. 1 hr. lecture, 2.5 hrs. lab/wk.

HMGT 228
Advanced Hospitality Management (3 CR)
Prerequisite: assistant dean’s approval
This course includes detailed information about various components of menu planning, food service, supervision, design and beverage control. In addition, an understanding of the external factors affecting the hotel-restaurant industry will be discussed. Skills necessary to secure a position in management within the hospitality industry will be emphasized, and case studies and computer simulation (HOTS) will be used for critical thinking analysis. Business plans will be developed as part of the course project. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $50.

HMGT 230
Professional Cooking II (3 CR)
Prerequisites: HMGT 120 and HMGT 123
This is the second of two courses in professional cooking methods for students enrolled in hospitality management programs. Upon completion of this course, the student should be able to demonstrate advanced level skills in cooking methods, recipe conversion, and professional food preparation and handling. Additionally, the student should be able to safely operate advanced food service equipment used in commercial kitchens. This course consists of lecture, demonstration and participation in food preparation. 1 hr. lecture, 2.5 hrs. lab/wk.

HMGT 231
Advanced Food Preparation (4 CR)
Prerequisites: HMGT 230 and assistant dean’s approval
This course is designed to develop a student’s advanced culinary skills in preparation of international cuisine commonly served in today’s operations in Latin America, Europe, Asia, the Middle East, the Far East and the Pacific area. 4 hrs. lecture/wk.

HMGT 235
Seminar: Risk Management and Loss Prevention (3 CR)
This course explains the issues surrounding the need for individualized security programs, examines a wide variety of security and safety equipment and procedures, discusses guest protection and internal security for asset protection. It explores risk management and loss prevention issues and outlines OSHA regulations that apply to lodging properties. While enrolled in this class, a student must work a minimum of 15 hours a week in a lodging operation. The work experience is concurrent but does not necessarily concentrate on the subject being taught in the course. This course is typically offered in the spring semester. 2 hrs lecture, 15 hrs. work/wk.

HMGT 240
Advanced Baking (4 CR)
Prerequisites: HMGT 123 and HMGT 223
This course covers the principles needed to enter the baking and pastry industry. The course provides knowledge of specialty ingredients and techniques needed to make tortes, finished desserts and a wedding cake. The student will be instructed in the making of these items through lecture and will prepare a variety of such items in lab. 4 hrs. lecture, lab/wk.
HMGT 248  
Confectionery Arts (3 CR)  
This course covers the design and production of artistic centerpieces made from confections. It provides knowledge of and basic skills in making decorative dining table centerpieces using food products such as cooled and pulled sugar syrup, isomalt, pastillage, marzipan and chocolate. The student will be instructed in the preparation of these ingredients and will construct center and showpieces after viewing demonstrations. 4.5 hrs. lecture, lab/wk.

HMGT 250  
Introduction to Catering (3 CR)  
This course includes detailed information about the different types of catered events within the hospitality industry. Topics covered include the importance of marketing, contract writing, food production, room arrangements and required personnel relative to specific catered events. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $25.

HMGT 256  
Casino Management (3 CR)  
This course is designed to familiarize students with the unique conditions and management challenges associated with a casino property. An overview of game operation and rules will serve as a foundation. Management controls will be emphasized including how to compute statistical data to assist management in operations. The course is not intended to be a training exercise. Casino marketing and ways to develop effective player rating systems will be analyzed. The history of the casino industry and regulatory environment will also be examined. The course is not intended to be a training exercise for those interested in learning to deal games. 3 hrs. lecture/wk.

HMGT 265  
Front Office Management (3 CR)  
This course provides a full understanding of the flow of business from the front office, beginning with the reservations process to checkout and settlement. It also includes the night audit and statistical analysis of rates and revenue management. This course is typically offered in the spring semester. 3 hrs./wk.

HMGT 268  
Hospitality Managerial Accounting (3 CR)  
Prerequisites: MATH 120 and HMGT 121 and HMGT 273  
This course introduces the student to basic managerial accounting. This includes accounting concepts, processing data and the flow of financial information within a hospitality operation. The course provides a working knowledge of an income statement, balance sheet, statement of owner's equity and cash flows. 3 hrs. lecture/wk.

HMGT 271  
Seminar in Hospitality Management: Purchasing (3 CR)  
This course offers an overview of purchasing techniques and specification writing for commodities used in the hospitality industry. Emphasis will be on decision-making skills in the areas of quality, quantity, specifications and general value analysis. Two hours in class and a minimum of 15 hours a week are required in a supervised work situation in an approved area of the hospitality industry. Work experience is concurrent but does not necessarily concentrate on the subject being taught in the course.
HMGT 273
Hospitality Cost Accounting (3 CR)
Prerequisites: MATH 120 or higher and HMGT 121
This course includes detailed information on how to prepare operation statements for a food service operator, including inventory and control systems. Areas of concentration will be food cost controls, labor cost controls, purchasing controls and profit production. The practice set will be used to reinforce control systems. 2 hrs./wk.

HMGT 275
Seminar in Hospitality Management: Internship (3 CR)
Prerequisite: Admission to the hospitality management program
This course provides industry experience for students in cooperating businesses, agencies and organizations. While enrolled in this course, a student must work a minimum of 320 hours in an approved position in the hospitality industry. By arrangement.

HMGT 277
Seminar in Hospitality Management: Menu Planning (3 CR)
Prerequisite: HMGT 123
This course provides the basic knowledge of menu design and planning. Students will learn the components of menu design and planning for each concept category. The course will cover the topics of menu layout, selection and development, price structures and the theory of menu design. A minimum of 15 hours a week is required in a supervised work situation in an approved area of the hospitality industry. Work experience is concurrent but does not necessarily concentrate on the subject being taught in the course. 2 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $5 to $25.

HMGT 279
Beverage Control (3 CR)
This course covers the history of wines and their use and storage procedures. The students should gain an understanding of beverage control and how it is used in all types of operations. The course will also cover in-depth study of spirits, internal control systems and local/state alcoholic beverage control laws. 3 hrs./wk.

HMGT 281
Culinary Arts Practicum I (2 CR)
Prerequisite: Acceptance into the American Culinary Federation Chef Apprenticeship training program and hospitality management assistant dean's approval
A qualified chef who is a member of the American Culinary Federation will supervise this on-the-job apprentice training. Upon successful completion of this course, the student should be able to apply food preparation and presentation techniques and gain experience in all phases of food service operation.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $300.

HMGT 282
Culinary Arts Practicum II (2 CR)
Prerequisite: HMGT 281
A qualified chef who is a member of the American Culinary Federation will supervise this on-the-job apprentice training. Upon successful completion of this
course, the student should be able to apply food preparation and presentation techniques and gain experience in all phases of food service operation. This course is a continuation of Culinary Arts Practicum I.

HMGT 285
Culinary Arts Practicum III (2 CR)
Prerequisite: HMGT 282
A qualified chef who is a member of the American Culinary Federation will supervise this on-the-job apprentice training. Upon successful completion of this course, the student should be able to apply food preparation and presentation techniques and gain experience in all phases of food service operation. This course is a continuation of Culinary Arts Practicum II.

HMGT 286
Culinary Arts Practicum IV (2 CR)
Prerequisite: HMGT 285
A qualified chef who is a member of the American Culinary Federation will supervise this on-the-job apprentice training. Upon successful completion of this course, the student should be able to apply food preparation and presentation techniques and gain experience in all phases of food service operation. This course is a continuation of Culinary Arts Practicum III.

HMGT 287
Culinary Arts Practicum V (2 CR)
Prerequisite: HMGT 286
A qualified chef who is a member of the American Culinary Federation will supervise this on-the-job apprentice training. Upon successful completion of this course, the student should be able to apply food preparation and presentation techniques and gain experience in all phases of food service operation. This course is a continuation of Culinary Arts Practicum IV.

HMGT 288
Culinary Arts Practicum VI (2 CR)
Prerequisites: HMGT 287 and assistant dean's approval and approval of hospitality management assistant dean
A qualified chef who is a member of the American Culinary Federation will supervise this on-the-job apprentice training. Upon successful completion of this course, the student should be able to apply food preparation and presentation techniques and gain experience in all phases of food service operation. This course is a continuation of Culinary Arts Practicum V.

Hospitality Mgt Pastry Baking (HMPB)

HMPB 155
Pastry Shop Production I (4 CR)
Prerequisites: HMGT 120 and HMGT 123 Corequisites: HMPB 160 and HMPB 233 and HMPB 252
This course will provide hands-on instruction of techniques used to make basic pastry shop staples used in the production of items intended for retail sales in a professional pastry shop. This course is typically offered in the fall semester. 1 hr. lecture & 4 hrs. lab/wk.
HMPB 160
Pastry Shop Principles I (4 CR)
Prerequisites: HMGT 120 and HMGT 123 Corequisites: HMPB 155 and HMPB 233 and HMPB 252

This course will examine the fundamental baking concepts including sanitation, ingredient identification and usage, weights and measures, inventory and product ordering needed as it pertains to a professional pastry shop. Students will be operating a working bake shop. This course is typically offered in the fall semester. 1 hr. lecture 3 hrs. lab/wk.

HMPB 233
Patisserie (4 CR)
Prerequisites: HMGT 120 and HMGT 123 Corequisites: HMPB 155 and HMPB 160 and HMPB 252

This course will provide hands-on instruction of techniques to make finished pastry items such as tortes, tarts, pastries, cookies, candies and breads as well as how to present items in a professional manner. This course is typically offered in the fall semester. 1 hr. lecture 3 hrs. lab/wk.

HMPB 252
Pastry Shop Business Basics I (3 CR)
Prerequisites: HMGT 120 and HMGT 123 Corequisites: HMPB 155 and HMPB 160 and HMPB 233

This course will provide basic hands-on techniques used to market finished pastry items, customer service, setting up, restocking and maintaining a display case, as well as taking pastry orders. This course is typically offered in the fall semester. 1 hr. lecture 3 hrs. lab/wk.

HMPB 255
Pastry Shop Production II (4 CR)
Prerequisites: HMPB 155 and HMPB 160 and HMPB 233 and HMPB 252
Corequisites: HMPB 260 and HMPB 257 and HMPB 252

This course will provide hand-on instruction of advanced techniques used to make advanced staples used in the production of advanced pastries, cakes, tarts, and tortes intended for retail sales in a professional pastry shop. This course is typically offered in the spring semester. 1 hr lect. 3 hrs lab./wk.

HMPB 257
Sugar Basics (4 CR)
Prerequisites: HMPB 155 and HMPB 160 and HMPB 233 and HMPB 252
Corequisites: HMPB 255 and HMPB 260 and HMPB 262

This course will provide hands-on instruction of pulled and brown sugar techniques used for garnishing advanced pastry items. The student will learn how to cook, pull, blow and store sugar pieces used in a professional pastry shop. This course is typically offered in the spring semester. 3 hrs. lab and 1 hr. lab/wk.

HMPB 260
Pastry Shop Principles II (4 CR)
Prerequisites: HMPB 155 and HMPB 160 and HMPB 233 and HMPB 252
Corequisites: HMPB 255 and HMPB 257 and HMPB 262

This course will examine the advanced baking concepts including high dollar ingredient identification and usage, storage, advanced inventory control, costing and product sources and product availability as it pertains to a professional pastry shop.
shop. This course is typically offered in the spring semester. 1 hr. lecture, 3 hrs. lab/wk.

HMPB 262
Pastry Shop Business Basics II (3 CR)
Prerequisites: HMPB 155 and HMPB 160 and HMPB 233 and HMPB 252
Corequisites: HMPB 255 and HMPB 260 and HMPB 257
This course will provide advanced hands-on techniques used to market finished pastry items, execute excellent customer service, establishing operational guidelines, inventory and restocking, product ordering, product research, maintaining a display case, as well as taking pastry orders. This course is typically offered in the spring semester. 1 hr. lecture 2 hrs. lab/wk.

Humanities (HUM)

HUM 122
Introduction to Humanities (3 CR)
This interdisciplinary study begins with a look at artistic and technical elements of several art forms, including painting, sculpture, architecture, music, theater, film, dance and literature. Major themes expressed in the works and their reflection of the values of their culture are also examined.

HUM 137
Introduction to Russian Culture (3 CR)
This course is a survey of the cultural history of Russia from the ninth century to the present. The approach is interdisciplinary, examining representative examples of Russian art, architecture, music, theater, dance, literature and philosophy in their historical context. In addition to developing the students' appreciation of Russia's contribution to world culture, the course aims to enhance students' understanding of the contemporary world. 3 hrs. lecture/wk. When paired with Introduction to Literature, Russian emphasis, it includes an online component. Usually this course is offered in the spring semester. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

HUM 138
Introduction to Russian Culture, Field Study (1 CR)
Prerequisite: HUM 137 or approval of instructor
This course is the field study portion of the HUM 137, Introduction to Russia, course. Students study, on site, selected works of art, architecture, music, literature, theater, film for the various historical periods from the perspective of Russian experts in these fields. In addition, students enhance their knowledge of Russian history by visiting the sites of many of the major events that have shaped the development of Russia's culture. 2 hrs. lab/wk.

HUM 145
Introduction to World Humanities I (3 CR)
This course will acquaint students with the arts and ideas of the world's major civilizations, from antiquity through the Renaissance. The approach will be interdisciplinary, covering the artistic values embodied in painting, sculpture, architecture, literature, theater, music and dance as they have emerged out of their historical contexts. In addition to providing the fundamental principles, methodologies and theories used in the study of the humanities, the course aims to enhance students' understanding of the contemporary world. 3 hrs. lecture/wk.
HUM 146
Introduction to World Humanities II (3 CR)
This course will acquaint students with the arts and ideas of the world's major civilizations, from the Renaissance to the present. The approach will be both interdisciplinary and chronological, covering the artistic values embodied in painting, sculpture, architecture, literature, theater, music and dance as they have emerged out of their historical contexts. In addition to providing the fundamental principles, methodologies and theories used in the study of the humanities, the course aims to enhance students' understanding of the contemporary world. 3 hrs. lecture/wk.

HUM 150
Islam: Religion & Civilization (3 CR)
This course covers the context in which Islam arose; the career of the Prophet Muhammad; the main teachings and practices of the religion; the Qur'an and other early Islamic literature; subsequent political developments in the religion and its spread; its main religious branches; its history during the Middle Ages; the Christian crusades and their consequences; the major components of Islamic civilization including law, the arts, literature, philosophy, science, and mathematics; Sufi; the effects of Western imperialism upon Islamic states; major developments in Islamic thought and practice since the seventeenth century; the Islamic diaspora; and Islam today. HUM 150 is the same course as HIST 150 and REL 150; enroll in one only. 3 hrs. lecture/wk.

HUM 155
Classical Mythology (3 CR)
This course provides a systematic study of the myths and epic cycles of the Greeks and Romans in both literature and art and investigates their survival and metamorphosis in the literature and visual arts of Western Europe. In addition, this course provides several methodological frameworks with which to analyze several types of tales and their relation to history, religion, rituals and art.

HUM 164
Civilization (3 CR)
This course covers the major ideas and events of Western civilization communicated through the arts. The course begins after the fall of the Roman Empire and includes material to the 20th century.

Industrial Technology (INDT)

INDT 125
Industrial Safety (3 CR)
Upon successful completion of this course, the student should be able to identify various industrial safety and health considerations, list basic safety rules and regulations, identify the proper personal protective equipment needed for common industrial tasks and recognize the need for an ongoing safety program. 3 hr. lecture/wk.

INDT 140
Quality Improvement Using SPC (2 CR)
Upon successful completion of this course, the student should be able to describe and apply basic concepts of quality improvement. This course will examine the application of the "Transformation of America" concept to American businesses. Statistical process control will be introduced as a tool to improve quality. W.
Edwards Deming's 14 points and the management changes required to implement quality improvement also will be covered. 2 hrs. lecture/wk.

**INDT 155**  
**Workplace Skills** (1 CR)  
Upon successful completion of this course, the student should be able to identify the job skills necessary to have a successful career in the field of his or her choosing. Topics include listening skills, oral communication, human relations, decision making/problem solving, how to work as a team, time and resource management, work ethics and career planning. 1 hr. lecture/wk.

### Information Technology (IT)

**IT 200**  
**Networking Technologies** (3 CR)  
This course is designed to provide students with the fundamentals of networking technology. Concepts covered include network terminology and protocols, network standards, LANs and WANs, the layers of the OSI reference model, cabling practices, network topologies, and IP addressing.

**IT 203**  
**Voice over IP Fundamentals** (4 CR)  
*Prerequisite: IT 200*  
This course is designed to provide students with the fundamentals of Voice over IP (VoIP) networking technology. Concepts covered include an explanation of the national voice and data network, telephony terminology, VoIP protocol analysis and telephony survey techniques. 3 hrs. lecture, 2 hrs. lab/wk.

**IT 205**  
**Implementing Windows Client** (3 CR)  
The focus of this course is the use of Microsoft Windows as an operating system in a business environment. Planning a simple network system, installation and configuration of the software and hardware, resource management, connectivity, running application software under Windows, monitoring and optimizing system hardware, and troubleshooting all lead the student to a deeper understanding of local area network use and administration. 2 hrs. lecture, 3 hrs. lab/wk.

**IT 221**  
**Windows Server** (3 CR)  
*Prerequisites: IT 200 and ELEC 126 and IT 205*  
This course is designed to provide students with the knowledge and skills to perform competently in the role of a network administrator utilizing the Windows network operating system. Students completing this course will be able to accomplish basic fundamental network management tasks, including planning server roles and subsequent requirements, planning the network file system, implementing user accounts and file system security, implementing network printing, and managing the network servers. 2 hrs. lecture, 3 hrs. lab/wk.

**IT 225**  
**Windows Active Directory Services** (3 CR)  
*Prerequisite: IT 221*
The focus of this course is using Microsoft Windows Server or Advanced Server software to install, configure and troubleshoot Active Directory components, Domain Name Space (DNS) for Active Directory and Active Directory security solutions. The course also emphasizes the skills required to manage, monitor and optimize the desktop environment using Group Policy. 2 hrs. lecture, 3 hrs. lab/wk.

IT 227
SQL Server Administration (3 CR)
Prerequisite: IT 221
Upon successful completion of this course, the student should be able to administer an SQL server installation. Topics covered include installing, upgrading and configuring SQL servers using SQL utilities; working with databases and users; backing up and restoring databases and log files; automating maintenance tasks; managing, copying and moving data; replicating; tuning; and troubleshooting. 2 hrs. lecture, 3 hrs. lab/wk.

IT 228
Exchange Server (3 CR)
Prerequisite: IT 225
This course is designed to provide network administrators with information that enhances their ability to manage an Exchange server network. Included are topics related to server and client mail management and server performance, e-mail concepts and advanced Internet networking. 3 hrs. lecture, 2 hrs. lab/wk.

IT 230
UNIX Fundamentals (3 CR)
This course is designed to provide students with a fundamental understanding of the UNIX operating system environment. Students successfully completing this course will be able to execute common Unix commands and utilities; and accomplish basic system tasks such as navigating the file system, applying file system security, managing user accounts, installing and configuring user software, using the printing environment, and managing the resources of a basic Unix system. 2 hrs. lecture, 3 hrs. lab/wk.

IT 231
UNIX Administration (3 CR)
Prerequisite: IT 230
This course is designed to provide students with the necessary knowledge and skills to perform competently as a Unix system administrator. Students successfully completing this course should be able to perform basic system administration tasks including installing, configuring and troubleshooting a basic Unix system, managing devices, implementing the printing environment, creating and maintaining file systems, installing packages, and configuring the graphical user interface. 2 hrs. lecture, 3 hrs. lab/wk.

IT 232
UNIX Networking and Security (4 CR)
Prerequisite: IT 231
This course is designed to provide network administrators with information that enhances their ability to manage a Unix network in the enterprise. Included are topics that are related to Unix management of DNS, DHCP, NFS, and Samba. 3 hrs. lecture, 2 hr. lab/wk.
IT 245
Network Infrastructure (3 CR)
Prerequisite: IT 221
This course is designed to provide an in-depth understanding of the ability to install, manage, monitor, configure and troubleshoot DNS, DHCP, Remote Access, Network Protocols, IP Routing and WINS in a Windows 2000 network infrastructure. In addition, it will provide an in-depth understanding of the ability to manage, monitor and troubleshoot Network Address Translation and Certificate Services. Laboratory exercises will accompany the lectures. 2 hrs. lecture, 3 hrs. lab/wk.

IT 246
Introduction to Routers (3 CR)
Prerequisite: IT 200
This course is designed to provide students a fundamental understanding of network routing and the operation of routers. Topics include installing and configuring routers, OSPF and Link State routing protocols, working with metrics and route selection, and TCP/IP configuration. Programming and setup using Cisco routers will be conducted. Laboratory exercises will accompany lectures. 2 hrs. lecture, 3 hrs. lab/wk.

IT 247
Introduction to Wide-Area Networks (3 CR)
Prerequisite: IT 246
This course is designed to provide students a fundamental understanding of internetworking. Topics include local area network segmentation using switches and routers. Wide area network physical technologies will be studied. Configuring WAN protocols using PPP, ISDN and Frame Relay will be presented. Securing the network with standard and extended access lists will be performed. IP and IPX routing will be covered. Programming and configuration will be conducted using Cisco routers and switches. Laboratory exercises will accompany lectures. 2 hrs. lecture, 3 hrs. lab/wk.

IT 249
Advanced Routing (3 CR)
Prerequisite: IT 247
This course provides advanced instruction of Cisco routers found in medium to large networks. It is intended for students preparing for advanced Cisco certification. Upon completion of this course, the student will be able to select and implement the appropriate Cisco services required to build a scalable router network. Topics covered include extending IP addressing, implementing OSPF for a single area and multiple areas, configuring EIGRP, and implementing BGP. This course will follow semester five in the Cisco Networking Academy curriculum.

IT 250
Networking Seminar (3 CR)
Prerequisite: IT 225 and IT 247
This course is designed to teach advanced concepts in information technology. Topics covered are section specific and include e-mail servers, Web servers, database servers, routing, switching and advanced LAN design concepts. Prerequisites are posted for each section. Students may use this course as a capstone for applying concepts and procedures developed in previous courses using realistic business scenarios. 2 hrs. lecture, 3 hrs. lab/wk.
IT 251
Network Security Fundamentals (4 CR)
Prerequisite: IT 247
This course is designed to provide students with a fundamental understanding of network security principles and implementation. Topics covered include authentication, the types of attacks and malicious code that may be used against computer networks, the threats and countermeasures for e-mail, Web applications, remote access, and file and print services. A variety of security topologies will be discussed as well as technologies and concepts used for providing secure communication channels, secure internetworking devices, intrusion detection systems, and firewalls. Hands-on exercises will be used to reinforce the concepts. 3 hrs. lecture, 2 hrs. lab/wk.

IT 252
Firewall Security (4 CR)
Prerequisite: IT 247
This course is designed to teach students how to protect local area networks (LANs) using firewall security devices. It focuses on the overall security process based on a security policy with an emphasis on hands-on skills. It covers the basic functionality of the Cisco Private Internet Exchange (PIX) product family. Students will learn specific PIX configurations and settings designed to maximize security. This course is also intended to prepare students to pass the Cisco Secure PIX Firewall Certification exam. 3 hrs. lecture, 2 hrs. lab/wk.

IT 253
Advanced Switching (3 CR)
Prerequisite: IT 247
This course provides advanced instruction of Cisco switches found in medium to large networks. It introduces students to the deployment of the state-of-the art campus Local Area Networks (LAN). The course focuses on the selection and implementation of the appropriate Cisco Internetworking Operating System (IOS) services to build reliable scalable multilayer-switches LANs. Students will develop skills with Virtual LANs (VLAN), Virtual Trunking Protocol (VTP), Spanning Tree Protocol (STP), inter-VLAN routing, redundancy, Quality of Service (QoS) issues, campus LAN security, and transparent LAN services.

IT 254
Remote Access Networks (3 CR)
Prerequisite: IT 247
This is an advanced course that covers the techniques and features for enabling or enhancing Wide Area Network (WAN) and remote access solutions. It focuses on using one or more of the available WAN dialup or permanent connection technologies for remote access between enterprise sites. This course includes asynchronous modem connections, Point-to-Point Protocol (PPP) features, and network security using Virtual Private Networks (VPNs). Students will apply common remote access solutions including ISDN Basic Rate Interface and Primary Rate Interface (BRI and PRI), Dial-On-Demand Routing (DDR), Frame Relay, dial backup, Quality of Service (QoS), and Authentication Authorization Accounting (AAA). 3 hrs. lecture, 2 hrs. lab/wk.

IT 255
Wireless Security (4 CR)
Prerequisite: IT 247
This course is designed to teach the student how to build, maintain and configure security on a Wireless Local Area Network (WLAN). It provides the student with hands-on projects to reinforce WLAN concepts from LAN cabling and other
information technology and electronics courses. Upon completion of this course, students should be able to design, document and troubleshoot the security plan and operation of a WLAN. This course is also intended to prepare the student to pass the Cisco Wireless LAN Certification exam. 3 hrs. lecture, 2 hrs. lab/wk.

IT 271
Information Technology Internship I (3 CR)
Prerequisites: IT 210 or IT 221 or IT 230 and approval of the assistant dean
This course affords the student the opportunity to apply classroom knowledge to an actual work environment. It will provide advanced information technology students with appropriate on-the-job experience with area employers, under instructional oversight, which will promote the student’s career goals. Student will work a total of 300 hours a semester at an approved job site.

IT 272
Information Technology Internship II (3 CR)
Prerequisites: IT 271 and approval of the assistant dean
This course is a continuation of IT 271, Internship I. It provides the student additional opportunity to apply classroom knowledge to an actual work environment. Students will work a total of 300 hours per semester at an approved job site.

Interactive Media (CIM)

CIM 130
Interactive Media Concepts (2 CR)
This survey course introduces students to the interactive media field. Topics to be covered include the definition of interactive media, the basic stages of interactive media creation and project management fundamentals. Current and future trends in interactive media will also be covered. 2 hrs. lecture/wk.

CIM 133
Screen Design (4 CR)
Prerequisite: CDTP 135
This course will cover fundamental visual principles and the creation of graphic elements, as well as the layout of those visual elements, for the computer screen. Visual perception, composition, color and typographic principles will be covered as applicable to presentation graphics, Web graphics, CD-ROM and kiosk graphics. Cross-platform issues will be addressed. This course is intended to provide nondesigners with fundamental visual literacy. 3 hrs. lecture, 2 hrs. lab/wk.

CIM 135
Digital Imaging and Video (3 CR)
Prerequisite: CDTP 135 Recommended: PHOT 121
This course provides an introduction to electronically mediated photography, including digital video. The course covers basic concepts of photographic communication and design. The course covers basic techniques of electronic photography, including operation of input devices, two-dimensional and time-based computer imaging and digital video production software programs and output devices. Recommended prior courses are Fundamentals of Photography and Introduction to Photoshop. 6 hrs. integrated lecture, studio/wk.
CIM 140
Interactive Media Assets (4 CR)
Prerequisites: CDTP 135 and CDTP 145 and CWEB 105 and CWEB 130
Prerequisite or corequisite: CIM 130
This course explores the creation, acquisition and management of assets for use in the development of interactive media. Assets to be covered include digital graphics, digital sound, digital video and computer-based animation. 3 hrs. lecture, 2 hrs. lab/wk.

CIM 154
Interactive Authoring I: Director (4 CR)
Prerequisite: CIM 130 and Prerequisite or corequisite: CIM 140
This course will provide a hands-on approach to authoring/programming. Upon completion of this course, the student should be able to produce a Director interactive media or Internet presentation that includes text, graphics, sound, movies and animation. The student should have the skills needed to create both a linear presentation and an interactive presentation. Navigational strategies for CD-ROM and Internet will be discussed. 3 hrs. lecture, 2 hrs. lab/wk.

CIM 156
Interactive Authoring I: Web (4 CR)
Prerequisite: CIM 130 Prerequisite or corequisite: CIM 140
This course will focus on the front-end aspects of Web design, HTML, authoring, graphics production and media development. The course will introduce concepts about the way the World Wide Web works, which will orient students to the peculiarities of the Web and introduce them to new technologies that are destined to have an important effect on the Web's future but are currently in various stages of development. Students will examine specifications for each project, carefully analyze individual sites and, as a class, establish a set of criteria that define what works, what doesn't and why. 3 hrs. lecture, 2 hrs. lab/wk.

CIM 200
Interactive Communication Form (3 CR)
Prerequisite or corequisite: CIM 130
This course will focus on concepts and forms of human communication historically, currently and in the future of our culture. Immediated and mediated forms of communication, such as lecture, telephony, television, print and computer interaction, will be explored. Particular attention will be given to how communication forms affect content. Emphasis will be on the integration of communication forms as demonstrated by interactive media applications. 3 hrs. lecture/wk.

CIM 230
Interactive Media Development (4 CR)
Prerequisite: CIM 154 or CIM 156 and Corequisite: CIM 250
The course will provide a conceptual as well as a hands-on exploration of the development process for interactive media. Information design, interaction design and presentation design will be equally emphasized. Students produce a series of projects starting with the use of text and graphics and building toward more complex projects employing animation and video. 3 hrs. lecture, 2 hrs. lab/wk. This course is taught in the fall semester.

CIM 235
Advanced Digital Video (3 CR)
Prerequisite: CIM 135
This course provides advanced instruction in the production and applications of digital video. The course covers advanced concepts and techniques in video design and production, from the initial preproduction scripts and storyboards through actual shooting to nonlinear editing, mastering and output. The emphasis is on in-depth, advanced, practical experience in producing professional-level video products for a variety of applications, including education, corporate, documentary and entertainment. 6 hrs. integrated lecture studio/wk.

CIM 250
Interface Design (4 CR)
Prerequisite: CIM 154 or CIM 156 Corequisite: CIM 230
This course will specifically focus on the issues and complexity of interface design for interactive media applications. Students are provided an in-depth study of the use of the building blocks of interface design: backgrounds, windows and panels, buttons and controls, text, images, sound, video and animation. Through readings, critiques, exercises and discussions, students will explore what makes the interface of an interactive media application successful. 3 hrs. lecture, 2 hrs. lab/wk. This course is taught in the fall semester.

CIM 254
Interactive Authoring II: Director (4 CR)
Prerequisite: CIM 154
At completion of this course, the student should be able to create Director applications using Director’s scripting language and the Internet capabilities of Macromedia Director. The primary emphasis of the course is hands-on experience with the Lingo, Behaviors, Shockwave and scripts of Director. During the course, students will be involved in learning advanced Lingo. 3 hrs. lecture, 2 hrs. lab/wk.

CIM 270
Interactive Media Project (4 CR)
Prerequisites or corequisites: CIM 200 and CIM 230 and CIM 250
This project-oriented course will require students to actively participate in a group interactive media project, which will require each student to analyze the problem; write a project proposal; design, produce and gather assets for the project; prototype and create a project; and test and evaluate the final project. 3 hrs. lecture, 2 hrs. lab/wk. This course is taught in the spring semester.

CIM 272
Interactive Media Internship (1 CR)
Prerequisite: facilitator approval required
Students will work in an approved training situation under instructional supervision. The internship is designed to give the student the opportunity to use the skills learned in the interactive media program. Student interns will be required to complete a minimum of 180 hours of on-the-job training. ANI 272 and CIM 272 are the same course; do not enroll in both.

CIM 273
Career Preparation (4 CR)
Prerequisites: CIM 230 and CIM 250 and Prerequisite or corequisite: CIM 270
This course will provide interactive media majors instruction in the presentation of his or her work in a digital portfolio format of professional quality. A printed and written resume will be produced. Self-promotion, networking, job searches and
interview skills will also be covered. 3 hrs. lecture, 2 hrs. lab/wk. CIM 273 is the same course as ANI 273; do not enroll in both. This course is taught in the spring semester.

Interior Design (ITMD)

ITMD 121  
Interior Design/Tech Prep (3 CR)  
This course provides basic, introductory knowledge about interior design. Upon successful completion of this course, the student should understand the significance of interior design, complete projects using the elements and principles of design and color theory in interior spaces, use space planning skills to arrange furniture on a floor plan, and present the floor plan and its decorative scheme. 3 hrs./wk. 
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75 to $100.

ITMD 123  
Space Planning (3 CR)  
Prerequisites: ITMD 121 with "C" or higher and DRAF 164 with a grade of "C" or higher or DRAF 261 with "C" or higher

This is an advanced course focusing on space planning. Upon successful completion of this course, the student should be able to demonstrate an advanced level of furniture arrangement on a floor plan. 4 hrs. integrated lecture and lab/wk. 
Note: the prerequisites ITMD 121 and either DRAF 164 or DRAF 261 all require a grade of "C" or higher.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50.

ITMD 125  
Interior Textiles (3 CR)  
This course is a comprehensive study of textiles used in interior design. Upon successful completion of this course, the student should be able to differentiate fibers and textiles according to their specific characteristics and to select fibers and interior textiles for specific applications. Specific course content includes properties and characteristics of natural and man-made fibers; construction methods; and various finishing processes, such as weaving, knitting, felting, printing and dyeing. The course will concentrate on textiles designed for interior applications. 2 hrs. lecture, 2 hrs. lab/wk

ITMD 127  
Elements of Floral Design (1 CR)  
This course provides in-depth knowledge and hands-on application of floral design. Upon successful completion of this course, the student should be able to use the principles of floral design, develop a proficiency in the techniques of line and mass arrangements, possess a greater appreciation for flowers and other plant material, apply the mechanics and design considerations involved in working with silk and dried materials, and design and create silk and dried floral arrangements. 1.5 hrs. integrated lecture, lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $150.

ITMD 129  
Design Presentation (3 CR)  
Prerequisites: ITMD 121 with a grade of "C" or higher and DRAF 164 with a grade
of "C" or higher or DRAF 261 with a grade of "C" or higher

This is an intermediate course focusing on interior design presentation skills. Upon successful completion of this course, the student should be able to demonstrate visual communication skills including isometric, axonometric, oblique and perspective drawings as well as the use of rendering techniques and color to enhance drawings. Additionally, the student should be able to organize, mount and verbally present storyboards to communicate the design concept. 2 hrs. lecture, 2 hrs. lab/wk. NOTE: The prerequisite of ITMD 121 and either DRAF 164 or DRAF 261 require a grade of "C" or higher.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75 to $100.

ITMD 132
Materials and Resources (3 CR)
This course provides in-depth knowledge about materials used in interior spaces. Upon successful completion of this course, the student should be able to evaluate the quality of interior materials; demonstrate the ability to use catalogs and other product information resources; identify manufacturing and/or construction techniques used in products; use correct terminology to describe the various types of interior materials; and compare the design, use, durability and cost of materials. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ITMD 133
Furniture & Ornamentation/Antiquity to Renaissance (3 CR)
This course provides in-depth knowledge in the study of Western furniture and ornament. Upon successful completion of this course, the student should be able to analyze and compare the furniture, ornamentation, design motifs and textiles of historical periods from antiquity to the Renaissance. Additionally, the student should be able to define the religious, political and social influences on the ornamentation and furnishings of each period. The student should also be able to identify the craftsmanship and materials used in the furniture of each historical period and correctly use vocabulary related to each era. 3hrs./wk.

ITMD 140
Window Treatments (1 CR)
Prerequisites: ITMD 121 and ITMD 125 both with a grade of "C" or higher and Prerequisite or Corequisite: ITMD 271 or ITMD 275 both with a grade of "C" or higher
This course provides comprehensive knowledge about draperies and window treatments and their construction. Upon successful completion of this course, the student should demonstrate the use of correct vocabulary relating to drapery and window treatments, explain the equipment used in the drapery industry, distinguish appropriate textiles and hardware for specific window treatments, measure for window treatments, and describe and select the proper suspension system for specific window treatments. The student will measure, select and present the proper style, fabric and suspension system for a specific window treatment. 1 hr./wk. NOTE: The prerequisites of ITMD 121 and ITMD 125 both require a grade of "C" or higher and Prerequisites or Corequisites ITMD 271 or ITMD 275 both require a grade of "C" or higher.

ITMD 143
Accessory Fundamentals (1 CR)
Prerequisite: ITMD 121 with a grade of "C" or higher
This course provides in-depth knowledge about accessories and accessory placement. Upon successful completion of this course, the student should be able to identify the various principles and elements of design as they relate to accessories. Students should be able to identify and explain the
difference between functional and decorative accessories. Additionally, the student should demonstrate an understanding of the quality of different types of accessories, how to identify the client's personal style, and how to successfully place different types of accessories. 1 hr. lecture/wk. NOTE: The prerequisite of ITMD 121 requires a grade of "C" or higher.

**ITMD 145**  
Upholstered Furniture (1 CR)  
*Prerequisites: ITMD 121 and ITMD 125 both with a grade of "C" or higher and Prerequisite or corequisite: ITMD 271 or ITMD 275 both with a grade of "C" or higher*  
This course provides comprehensive knowledge about upholstery construction. Upon successful completion of this course, the student should be able to demonstrate the use of correct vocabulary relating to upholstery construction, explain the equipment used in the upholstery industry, identify appropriate textiles and materials for upholstery use, and describe the various suspension systems used in bench-constructed and mass-produced furniture. 1 hr./wk. NOTE: The prerequisites of ITMD 121 and ITMD 125 both require a grade of "C" or higher and Prerequisites and Corequisites ITMD 271 or ITMD 275 both require a grade of "C" or higher.

**ITMD 147**  
Lighting Basics (1 CR)  
*Prerequisite: ITMD 121 with a grade of "C" or higher or FASH 125*  
This course provides general knowledge about lighting design and planning. Upon successful completion of this course, the student should be able to define and use vocabulary relating to lighting design and planning. The student should be able to recognize and explain lighting application and technology used in the lighting industry. 1 hr. lecture/wk. NOTE: The prerequisites are FASH 125 and ITMD 121 which requires a grade of "C" or higher.

**ITMD 148**  
History of Asian Furniture and Design (2 CR)  
*Prerequisite: Program Facilitator Approval*  
This course provides in-depth knowledge in the study of Asian furniture and ornament. Upon successful completion of this course, the student will be able to analyze and compare furniture, ornamentation, design motifs and textiles of the Near East and Far East during historical periods from antiquity to modern times. The student should be able to identify the religious, political and social influences on the ornamentation and furnishings of each period. In addition, the student should be able to identify the craftsmanship and materials used in the furniture of each historical period and to demonstrate the use of correct vocabulary related to each era. 2 hrs./wk.

**ITMD 149**  
Casegoods (1 CR)  
*Prerequisite: ITMD 121 with a grade of "C" or higher*  
Upon successful completion of this course the student should be able to understand various construction techniques, describe different wood species and their properties, and explain the best functional and decorative uses for each wood species. The student will apply principles and elements of design when selecting casegoods, describe care and repair of casegoods, and understand current trends in the casegood industry. 1 hr. lecture/wk. NOTE: The prerequisite ITMD 121 requires a grade of "C" or higher.
ITMD 150
Asian Rugs and Carpets (1 CR)
This course provides in-depth knowledge in the study of Asian carpets and rugs. Upon successful completion of this course, the students will be able to analyze and compare materials, ornamentation, design motifs and textiles of the Near East and Far East during historical periods from antiquity to modern times. The student should be able to identify the religious, political and social influences on the ornamentation and furnishings. In addition, the student should be able to demonstrate the use of correct vocabulary. 1 hr./wk.

ITMD 175
Advanced Floral Design (1 CR)
Prerequisite: ITMD 127
This course is a continuation of Elements of Floral Design and provides the student with a more comprehensive application of floral design for home interiors. Upon successful completion of this course, the student will be able to determine the appropriate floral design for an existing home, design a variety of florals for specific placement, work with other students on a specific project and learn how to buy and price interior floral designs. 1 hr. lecture, 1.5 hrs. lab/wk.

ITMD 180
Leadership in Design (1 CR)
Prerequisite: ITMD 123 with a grade of "C" or higher
Upon successful completion of this course, the student should be able to identify leadership skills necessary to have successful involvement in the field of interior design and professional organizations. Topics include group communication methods, time management, team-building skills, and organizing and facilitating meetings. Students desiring leadership opportunities in professional organizations are encouraged to enroll. 1 hr. lecture/wk. NOTE: The prerequisite of ITMD 123 requires a grade of "C" or higher.

ITMD 189
Sustaining Design (1 CR)
Upon successful completion of this course the student should be able to understand and explain the concepts, terminology and global issues of the various ecological approaches to design and of the impact of design on the environment. The student will have an understanding of the cradle-to-cradle paradigm. Students will learn to identify the impact their selections will have on the environment and to consider ecological options when specifying products. 1 hr. lecture/wk.

ITMD 213
Lighting Design and Planning (3 CR)
Prerequisite: ITMD 121 with grade of "C" or higher or FASH 125
This course provides in-depth knowledge about lighting design and planning giving the student the ability to not only understand but to manipulate and create the lighting plan. Upon successful completion of this course, the student should be able to define and use vocabulary relating to lighting design and planning and to recognize and explain lighting application and technology used in the lighting industry. Additionally, the student should be able to identify and describe proper fixtures and equipment for lighting applications and demonstrate skills in selecting proper lighting designs for specific applications. 3 hrs. lecture/wk. NOTE: The prerequisite of ITMD 121 requires a grade of "C" or higher or FASH 125.

ITMD 219
Issues in Interior Design (3 CR)
Prerequisite: ITMD 221 with a grade of "C" or higher

This course is designed to educate the student on the current issues that affect the interior design profession such as environmental design, green/sustainable design and Universal Design. These topics may vary based on current industry concerns. Upon successful completion of this course, the student should be able to identify, explain and analyze ramifications to the industry that arise from the economy, politics and social culture. 3 hrs. lecture/wk. NOTE: The prerequisite of ITMD 221 requires a grade of "C" or higher.

ITMD 221
Residential Design (3 CR)
Prerequisites: DRAF 264 with a grade of "C" or higher and ITMD 123 with a grade of "C" or higher and ITMD 129 with a grade of "C" or higher or ITMD 122 with a grade of "C" or higher

This is an advanced course focusing on residential design. Upon successful completion of this course, the student should be able to demonstrate an advanced level of space planning and furniture arrangement on a floor plan. In addition, the student will develop color schemes that will solve specific assigned interior design problems and demonstrate the ability to coordinate fabrics, colors, texture, patterns and finishes in a complete floor plan for a residential unit. The student will produce floor plans and additional views enhanced by color and shadow. 2 hrs. lecture, 3 hrs. lab/wk. NOTE: The prerequisites of DRAF 264 and ITMD 123 and either ITMD 129 or ITMD 122 all require a grade of "C" or higher.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50.

ITMD 223
Commercial Design (3 CR)
Prerequisite: DRAF 264 with a grade of "C" or higher

This is an advanced course focusing on contract design. Upon successful completion of this course, the student will be able to define and use vocabulary related to contract design, identify and use proper architectural symbols common to contract floor plans and elevations, and explain the differences between residential and contract design. Additionally, the student should be able to demonstrate the skills necessary to convert, redesign and create contract design space; explain the concept of open office planning; and compare and analyze the costs and benefits of open planning versus closed planning. 2 hr. lecture, 3 hrs. lab/wk. NOTE: The prerequisite of DRAF 264 requires a grade of "C" or higher.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50.

ITMD 225
Interior Textiles II (3 CR)
Prerequisite: ITMD 125 with a grade of "C" or higher

This course is an advanced study of textiles used in interior design. Upon successful completion of this course, the student should be able to differentiate fibers and textiles according to their specific characteristics and to select fibers and interior textiles for specific applications. The course concentrates on textiles designed for residential and contract applications. 2 hrs. lecture 2 hrs. lab/wk. NOTE: The prerequisite of ITMD 125 requires a grade of "C" or higher.

ITMD 231
Furniture & Ornamentation Renaissance to 20th Century (3 CR)

This course provides in-depth knowledge in the study of Western furniture and ornament. Upon successful completion of this course, the student should be able to analyze and compare furniture, ornamentation, design motifs and textiles of historical periods from the Renaissance to the 20th century. Additionally, the student should be able to define the social, religious and political influences on the ornamentation and furnishings of each period. The student should also be able to identify the craftsmanship and materials used in the furniture of each historical
period and correctly use vocabulary related to each era. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

ITMD 234
Kitchen and Bath: Planning and Design (3 CR)
Prerequisites: DRAF 264 with a grade of "C" or higher and either ITMD 122 with a grade of "C" or higher or ITMD 123 with a grade of "C" or higher
This is a comprehensive course in kitchen and bath design and planning. Upon successful completion of this course, the student should be able to define and use proper vocabulary related to kitchen and bath design and construction, identify and use proper architectural symbols common to kitchen and bath plans and elevations, state the space relationships required for proper kitchen and bath usage, convert to metric measurements, and draw a kitchen and bath floor plan and elevation. 2 hrs. lecture, 1 hr. lab/wk. NOTE: The prerequisite of DRAF 264 and either ITMD 122 or ITMD 123 all require a grade of "C" or higher.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $75.

ITMD 237
Capstone: Merchandising and Entrepreneurship (2 CR)
Prerequisite: Approval of program facilitator
This course is designed as a capstone for the Interior Merchandising and Interior Entrepreneurship programs. It should be taken in conjunction with or after completion of the final interiors studio course or in the graduating semester. Upon successful completion of this course, the student should be able to select and rework portfolio materials for maximum visual potential and appeal. In addition, the student will prepare a resume, conduct a job search, and present written and oral presentations based on resource and product files from other classes. 2 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75 to $100.

ITMD 239
Capstone: Interior Design (2 CR)
Prerequisite: Program Facilitator Approval
This course is designed as a capstone for the Interior Design Program. It should be taken in conjunction with or after completion of the final Interiors studio course or in the graduating semester. Upon successful completion of this course, the student should be able to select and rework portfolio materials for maximum visual potential and appeal. In addition, the student will prepare a resume, conduct a job search, and present written and oral presentations based on resource and product files from other classes. 2 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75 to $100.

ITMD 250
20th Century Designers (1 CR)
This course provides in-depth knowledge in the study of the 20th-century designers. Upon successful completion of course, the student should be able to analyze and compare furniture, ornamentation, design motifs and textiles of various 20th-century designers. Recognition of periods and individual styles is stressed. The student will have an opportunity to study a specific designer in depth. 1 hr lecture /wk.

ITMD 271
Budgeting and Estimating (3 CR)
Prerequisites: ITMD 121 with a grade of "C" or higher and ITMD 125 with a grade of "C" or higher and MATH 120 with a grade of "C" or higher

Upon successful completion of this course, the student should be able to demonstrate a business-like approach toward job and work, explain and list methods of pricing interior design/merchandising materials and services, measure accurately for materials, utilize business math in interior design/merchandising applications, and accurately compute cost in cases. 3 hrs. lecture/wk. NOTE: The prerequisites of ITMD 121 and ITMD 125 and MATH 120 or higher all require a grade of "C" or higher.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20.

ITMD 273
Interiors Seminar: Practices and Procedures (2 CR)
Prerequisite: ITMD 122 with a grade of "C" or higher or ITMD 123 with a grade of "C" or higher

Upon successful completion of this course, the student should be able to demonstrate the use of proper interior design industry terminology, appropriate business forms and contracts, define the types of business legal structure, and solve business organizational and ethical problems through use of case studies. 2 hrs./wk. NOTE: The prerequisite of ITMD 122 or ITMD 123 both require a grade of "C" or higher.

ITMD 282
Interiors Internship I (1 CR)
Prerequisite: ITMD 121 with a grade of C or higher

Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course consists of supervised work experience in an approved training situation. It is designed to provide practical experience in the interiors industry. A minimum of 15 hours each week on-the-job training is required. NOTE: The prerequisite of ITMD 121 requires a grade of "C" or higher.

ITMD 284
Interiors Internship II (1 CR)
Prerequisites: ITMD 121 with a grade of C or higher and ITMD 282 with a grade of C or higher

Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course consists of supervised work experience in an approved training situation. It is designed to provide practical experience in the interiors industry. A minimum of 15 hours each week on-the-job training is required. NOTE: The prerequisite of ITMD 121 and ITMD 282 both require a grade of "C" or higher.

ITMD 295
Field Study: Design and Merchandising (3 CR)
Prerequisites: ITMD 121 and approval of the program facilitator

This travel-for-credit course consists of visits to manufacturing plants, a market showroom and a merchandise mart in a major market city.

ITMD 296
Interior Design: the Orient (3 CR)

Upon successful completion of this course, the student should be able to recognize and identify Asian furniture pieces and accessories from different countries; define and use vocabulary common to the art periods; and compare
and contrast furniture and accessory pieces observed in museums, temples, homes and antique stores. This course will include five 3-hour pre-departure seminars followed by a three-week field trip to Japan, Hong Kong and Thailand.

**Interpreter Training (INTR)**

**INTR 122**  
Intermediate American Sign Language I (3 CR)  
Prerequisite: INTR 121 or ASL 121 or FL 181 with a grade of "C" or higher and Corequisite: Students accepted in the interpreter training program must take corequisites of INTR 130 and INTR 126 and (INTR 147 or ASL 145) and (INTR 145 or ASL 145) all with a grade of "C" or higher

This course will focus on the development of intermediate American Sign Language communication skills. Comprehension skills and linguistic features of the language taught in context will be emphasized. 6 hrs. lecture-lab/wk. The daytime sections only are open to students in the interpreter training program. INTR 122, FL 270 and ASL 122 are the same courses; only enroll in one.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

**INTR 123**  
Intermediate American Sign Language II (3 CR)  
Prerequisite: INTR 122 or ASL 122 or FL 270 with a grade of "C" or higher and Corequisite: For students accepted in the interpreter training program: INTR 131 and INTR 135 and INTR 242 and INTR 248 all with a grade of "C" or higher

The course will continue study of intermediate American Sign Language. It is designed to develop further intermediate communication skills in American Sign Language. Information about the linguistic and cultural features will be included in the context of language learning experiences. 6 hrs. integrated lecture-lab/ wk. The daytime sections are open only to students in the interpreter training program. INTR 123, FL 271 and ASL 123 are the same courses; only enroll in one.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

**INTR 126**  
Classifiers in American Sign Language (2 CR)  
Prerequisites: INTR 121 or ASL 121 with grade of "C" or higher and acceptance in the interpreter training program Corequisites: (INTR 122 or ASL 122) and INTR 130 and (INTR 147 or ASL 147) and (INTR 145 or ASL 145)

The course will provide an in-depth analysis of classifiers in ASL through discussion and demonstration of the three different categories of classifiers in ASL: representative classifiers (noun and its action), descriptive classifiers (size-and-shape, extent, perimeter, pattern and texture), and instrumental classifiers (manipulative and handle). Students will learn to comprehend and produce classifiers from all three categories.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $400 to $500.

**INTR 130**  
Survey of the Interpreting Profession (3 CR)  
Prerequisites: INTR 121 or FL 181 or ASL 121 with a grade of "C" or higher and acceptance in the interpreter training program Corequisites: (INTR 122 or ASL 122) and INTR 126 and (INTR 147 or ASL 147) and (INTR 145 or ASL 145) all with a grade of "C" or higher

This course provides an introduction to interpreting as an occupation. Students will come to understand interpersonal communication skills, professional ethics, parameters of responsibilities, community resources and legal ramifications as they relate to the interpreter. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

**INTR 131**
**Interpreting Preparation Skills** (2 CR)
Prerequisites: INTR 130 with a grade of "C" or higher and acceptance into the interpreter training program
Corequisites: INTR 123 and INTR 135 and INTR 242 and INTR 248 with a grade of "C" or higher
This course provides students with a foundation in the theory of interpretation. Students will explore the Colonomos Model of interpreting and apply this model by first using pre-interpreting skills in isolation. Then students will progress from producing translations to interpreting consecutively. 4 hrs. integrated lecture-lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

**INTR 135**
**Intro to American Sign Language Linguistics** (3 CR)
Prerequisite: INTR 122 or ASL 122 or FL 270 with a grade of "C" or higher
Corequisites: for students accepted in the interpreter training program enroll in: INTR 123 and INTR 242 and INTR 131 and INTR 248 with a grade of "C" or higher
This course introduces students to the structural and grammatical principles of ASL. Students will explore concepts of equivalency between English and ASL. 3 hrs. lecture/wk. The daytime sections are open only to students in the interpreter training program. INTR 135 and ASL 135 are the same course; do not enroll in both.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

**INTR 145**
**Introduction to the Deaf Community** (3 CR)
Prerequisite: Acceptance to interpreter training program and Prerequisite or corequisite: ANTH 125 and SPD 120 for Interpreter Training Program
Corequisites for Interpreter Training Program: INTR 122 and INTR 126 and INTR 130 and INTR 147 all with a grade of "C" or higher
Note: Prerequisite or corequisite of INTR 120 or ASL 120 or FL 180 required for students in the American Sign Language Studies Certificate
This course will prepare students to develop and recognize the diversity within the Deaf Community, significant events and figures in Deaf History, and basic norms and values of Deaf Culture. Students will examine and compare Deaf Culture and hearing culture in America. The daytime sections are open only to students in the interpreter training program. 3 hrs./wk. INTR 145 and ASL 145 are the same course; do not enroll in both.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

**INTR 147**
**Fingerspelling I** (2 CR)
Prerequisite: INTR 121 or FL 181 or ASL 121 with a grade of "C" or higher and Corequisites: For students accepted in the interpreter training program, enroll in: (INTR 122 or ASL 122) and INTR 126 and INTR 130 and (INTR 145 or ASL 145) all with a grade of "C" or higher
Students will work on developing beginning expressive and receptive fingerspelling skills based on word recognition principles. 1 hr. lecture, 2 hrs. lab/wk. The daytime sections are open only to students in the interpreter training program. INTR 147 and ASL 147 are the same course; do not enroll in both.

**INTR 150**
American Sign Language Literature (3 CR)
Prerequisite: INTR 122 with a grade of "C" or higher
This course will provide introduction, discussion, and demonstration of literature in American Sign Language (ASL). The literature involves ASL Poetry, ASL Storytelling/Narratives, Deaf Humor, Deaf Folklore and other genres that have been passed on from one generation to another by culturally deaf people. Students will receive, analyze and retell a variety of ASL literature. 3 hrs. lecture/wk. INTR 150 and ASL 150 are the same course; do not enroll in both.

INTR 181
Interpreting Practicum I (1 CR)
Prerequisite: INTR 130 with a grade of "C" or higher Corequisites: (INTR 145 or ASL 145) and INTR 223 and INTR 226 and INTR 250 all with a grade of "C" or higher
Students will observe skilled interpreters in various interpreting situations in a variety of settings during the semester. 2 hrs. lab, field work/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

INTR 223
Advanced American Sign Language (3 CR)
Prerequisite: INTR 123 or ASL 123 or FL 271 with a grade of "C" or higher Corequisites: INTR 250 and INTR 226 and INTR 181 all with a grade of "C" or higher
This course is a continuation of Intermediate American Sign Language II. Students will learn about culturally significant topics related to the Deaf community, more complex ASL grammatical features and conversational skill development. Comprehension skills and linguistic features of ASL will be taught to a variety of contexts in simulated, typical interaction. Students will have opportunities to utilize what they learn about advanced ASL through class activities, dialogues, short stories, general conversations and class discussions. Sign comprehension and production skills will be emphasized. This course meets for six hours of internship/week.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $25.

INTR 226
Specialized and Technical Vocabulary (2 CR)
Prerequisite: INTR 123 or ASL 123 with a grade of "C" or higher Corequisites: INTR 181 and INTR 250 and INTR 223 all with a grade of "C" or higher
This course will expand the interpreter training students’ vocabulary related to specialized and technical contexts. Students will discuss vocabulary use in a variety of contexts to include socially restricted terms and phrases Deaf people use; colloquialisms; varying registers; terminology in medical, mental health, religion, sex, drugs; and strong language in ASL. Students' development of comprehension and production skills in common formal and informal settings will be emphasized. Students will also discuss Signing Exact English (SEE II) and the differences from American Sign Language (ASL). 3 hrs. integrated lecture-lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

INTR 242
Fingerspelling II (2 CR)
Prerequisite: INTR 147 with a grade of "C" or higher Corequisites: INTR 123 and INTR 131 and INTR 135 and INTR 248 all with a grade of "C" or higher
This course focuses on continued development of expressive and receptive fingerspelling skills based on word and phrase recognition and expression. 1 hr. lecture, 2 hrs. lab/wk.
INTR 248
Deaf Community Ethnography (3 CR)
Prerequisite: INTR 145 or ASL 145 with a grade of "C" or higher
Corequisites: (INTR 123 or ASL 123) and INTR 131 and (INTR 135 or ASL 135) and INTR 242 all with a grade of "C" or higher
This advanced course will provide students the opportunity to explore power and oppression issues experienced by d/Deaf people. Specific attention will be given to society's views of the d/Deaf community and the influence of various media on these views. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $25.

INTR 250
Interpreting I (6 CR)
Prerequisite: INTR 131 with a grade of "C" or higher
Corequisites: INTR 181 and INTR 223 and INTR 226 all with a grade of "C" or higher
In this introduction to interpreting principles, emphasis will be on English-to-ASL and ASL-to-English skills. Students will participate in sequential drills and apply these skills in class. 2 hrs. lecture, 8 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

INTR 251
Interpreting II (2 CR)
Prerequisite: INTR 250 with a grade of "C" or higher
Corequisites: INTR 262 and INTR 282 and AAC 150 all with a grade of "C" or higher
A description is not available for this course.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

INTR 262
Seminar on Interpreting (3 CR)
Prerequisite: INTR 250 with a grade of "C" or higher
Corequisites: INTR 251 and INTR 282 and AAC 150 all with a grade of "C" or higher
This course provides students with knowledge of stress management as applied to both the physical demands and mental conditions of sign language interpreting. Students will learn and apply decision-making techniques in regard to the Interpreter (RID) Code of Ethics. Additionally, the course provides students with knowledge of career development theory, career decision-making and the job-search process. 3 hrs. lecture/wk.

INTR 282
Interpreting Practicum II (6 CR)
Prerequisite: INTR 181 with a grade of "C" or higher
Corequisites: INTR 251 and INTR 262 and AAC 150 all with a grade of "C" or higher
This course provides students with an opportunity to observe and interpret in an off-site setting with the supervision of an experienced interpreter. Students will actively engage in discussions relating to the difficulties and rewards of working in a realistic interpreting environment. The fieldwork totals 270 hours a semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $50.

Journalism/Media Communication (JOUR)

JOUR 120
Mass Media and Society (3 CR)
Via books, newspapers, magazines, recordings, movies, radio, television, new technologies and the related areas of advertising and public relations, each of us is exposed to and affected by the mass media on a daily basis. This course will increase student awareness of the various media and help them understand the influence of the media on their daily activities, beliefs, decisions and goals. As a result, the student will become a more astute critic of the messages delivered by the mass media. 3 hrs./wk.

**JOUR 122**  
**Reporting for the Media (3 CR)**  
Reporting for the Media is structured for students interested in the basics of writing and reporting. Writing for print, broadcast, and online media are included. Information gathering and story writing are conducted under strict deadlines to prepare students for a professional position. Basic news writing and style principles will be gained by writing stories for JCCC student media, including the student newspaper, The Campus Ledger. 3 hrs./wk.

**JOUR 125**  
**Fundamentals of Advertising (3 CR)**  
Fundamentals of Advertising introduces the student to the contemporary advertising process. Research, planning, creativity, production, media placement and sales are discussed, along with individual mediums and their forms, functions and roles in society. Major emphasis is placed on the areas of advertising/marketing research, planning and creativity, including integrated marketing communications. 3 hrs./wk.

**JOUR 127**  
**Introduction to Broadcasting (3 CR)**  
This course serves as a general introduction to students interested in pursuing knowledge of or a career in radio and television broadcasting. The course includes a study of the industry’s development, its form and function, job responsibilities, basic production techniques, audience measurement, FCC regulations and ethics. Class time will include discussion of current trends and issues in the field, with students developing an understanding of broadcast media. Productions in the college’s audio booth and TV facilities offer an opportunity to experience the field of broadcasting. These experiences will allow students to evaluate broadcasting as a possible career choice. 3 hrs./wk.

**JOUR 130**  
**Principles of Public Relations (3 CR)**  
This course is intended to provide the student with an overview of the history, principles and real-life functions of public relations. Public relations is a rapidly growing field. The ability to work with the public is essential in business, education, health care and numerous other fields. This course is designed to give students the background to develop their PR skills, both verbally and in writing. 3 hrs./wk.

**JOUR 202**  
**Broadcast Performance (3 CR)**  
Students will learn how to improve their speaking voices and body language as well as the techniques necessary to effectively communicate messages through basic announcing skills. Interviewing, radio and television news, and commercial announcing are some of the topics covered in this course, which will allow students to polish their skills through performances in the college’s television studio and audio booth. 3 hrs./wk.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $10 to $15.

JOUR 222
Advanced Reporting (3 CR)
Prerequisite: JOUR 122
This is an advanced newsgathering and reporting course designed to sharpen the discernment, critical thinking and writing skills of student journalists. Specific English language rules and principles plus AP news writing style will be emphasized in the production of incisive, well-defined news stories, features, profiles, editorials and personal columns. Professional writings in various media will be examined and critiqued, and class members will have the opportunity to participate in hands-on editing and layout. Students will gain additional experience by preparing for and participating in news conferences and events, as well as interacting with area media writers. 3 hrs/wk.

JOUR 225
Promotional Writing (3 CR)
Prerequisite: JOUR 125 or JOUR 130
Students will study the elements of layout and copywriting for promotional purposes, with emphasis on advertising, direct mail and public relations writing. 3 hrs/wk.

JOUR 227
Basic Video Production (3 CR)
This course provides students with the fundamentals of video production. The goal is to teach students basic video techniques. Topics covered include technology, lighting, camera operations, audio and editing. Students will gain hands-on experience in the college's Media Production Services Department. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

JOUR 242
Advanced Broadcast Performance: TV (3 CR)
Prerequisite: JOUR 202
Students will produce news, feature, sports, and interview programming for airing on the college's cable station. The development of news packages, event reporting, breaking news, and extended coverage of news events will be included. Learning composure, focus, and detail in a team information-gathering operation will be emphasized. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $15.

JOUR 247
Advanced Video Production (3 CR)
Prerequisite: JOUR 227
Students will direct, produce, and edit programming for distribution via the college's media outlets. Students will develop the technical skills involved in both studio production and field production as well as advanced skills in camera operations, multi-camera directing, lighting, audio production, and graphics. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $30.

JOUR 271
Journalism Internship (3 CR)
Prerequisites: Instructor approval; completion of six credit hours in journalism/media communications at JCCC or another college with a minimum grade of "C" in those 6 hours.

A journalism/media internship allows students to gain work experience at an approved training center under staff supervision. Emphasis is on learning new skills related to a particular program or department at a media facility. Students may learn the application of writing techniques needed to produce and broadcast news, and produce advertising or public relations promotional copy. On-the-job training involves approximately 15-20 hrs./wk. by arrangement.

Land Surveying (KSRV)

KSRV 120
Introduction to Geographic Information Systems (3 CR)
Fundamental concepts of Geographic Information Systems (GIS), elements of GIS, analysis of spatial information real-world applications, map creation and analysis. Primary objective is to investigate interactive GIS applications rather than develop expert users. 3 hrs. lecture/wk.

KSRV 137
Subdivision Planning and Layout (3 CR)
Prerequisites: ENGR 180 MCC’s and DRAF 152
Physical elements of designing land subdivisions including traffic circulation, sewer and drainage systems, soils and earthwork, grading considerations, erosion control, lot and block arrangement, topography and existing land use factors, geometric analysis, laws and codes affecting land subdivisions, environmental considerations, site analysis procedures. 3 hrs. lecture/wk. Courses taught at MCC-Longview Community College, 500 SW Longview Rd., Lee’s Summit, MO. Students should contact the Longview coordinator of land surveying about the class meeting times and beginning and ending dates of classes. Call 816-672-2510.

KSRV 152
Engineering Graphics & CADD I (5 CR)
Prerequisite: MATH test
Introduction to engineering communications and basic computer-aided drafting/design (CADD). Emphasis on sketching, orthographic projections, drawing layout, drafting and CADD standards and conventions, dimensioning, sectioning, annotation and basic design principles. Foundation for computer aided drafting/design including file management, basic drawing commands, basic editing commands, layering conventions, blocks, dimensioning, polylines, sectioning, and drawing layout, hatching and plotting. 3 hrs. lecture, 4 hrs lab.

KSRV 220
GIS Database and Design (3 CR)
Prerequisite: KSRV 120
Concepts of Geo-database design and management in Geographic Information Systems (GIS), SQL statements, geographic data types and functions, data entry, techniques of geographic information structure and indexing, querying techniques, searches, and spatial analysis, creation and use of metadata real-world applications. 3 hrs. lecture.

KSRV 235
Advanced Surveying (3 CR)
Prerequisite: ENGR 180
This course is a continuation of surveying skills introduced in ENGR 180 with an
emphasis on advanced techniques beyond plane surveying such as geodetic control networks, practical astronomy, state plane coordinates, photogrammetry and the US Public Land Surveys System. 3 hrs. lecture/wk. Course taught at MCC-Longview Community College, 500 SW Longview Rd., Lee’s Summit, MO. Students should contact the Longview coordinator of land surveying about the class meeting times and beginning and ending dates of classes. Call 816-672-2510.

KSRV 236
Boundary Control & Legal Principles (3 CR)
Prerequisite: ENGR 180
A study of the legal principles of land boundaries, section corners, area; interpretations of land descriptions; identification of land parcels; legal principles of boundary locations; and the United States land survey system. 3 hrs. lecture/wk. Course taught at MCC-Longview Community College, 500 SW Longview Rd., Lee’s Summit, MO. Students should contact the Longview coordinator of land surveying about the class meeting times and beginning and ending dates of classes. Call 816-672-2510.

KSRV 237
Evidence and Procedures for Boundary Locations (3 CR)
Prerequisite: ENGR 180
A study of the land survey practice of retracement and creation of new parcels as it relates to the lot survey, the sectional survey, and the water boundary survey. Discussion of further standard business practice. 3 hrs. lecture/wk. Course taught at MCC-Longview Community College, 500 SW Longview Rd., Lee’s Summit, MO. Students should contact the Longview coordinator of land surveying about the class meeting times and beginning and ending dates of classes. Call 816-672-2510.

KSRV 244
Fundamentals of GPS Surveying (3 CR)
Prerequisite: ENGR 180
The purpose of this course is to introduce the student and practitioner to the modern practices of satellite surveying with an emphasis on its origins in physical geodesy. 3 hrs. lecture

KSRV 269
Computer Aided Design II (4 CR)
Prerequisites: DRAF 152 or 169 (MCC)
Advanced Computer Aided Drafting and design (CADD). Advanced dimensioning and tolerancing techniques, attributes, advanced drawing aids, file management and basic customization. Effective use of model space, paper space and viewports. An introduction to three-dimensional wire frames, surface models, solid models and rendering tools. 2 hrs. lecture, 4 hs. lab/wk.

Leadership (LEAD)

LEAD 120
Leadership Development Seminar (3 CR)
This seminar course is designed for individuals who are interested in exploring the concepts of leadership using discussion, film, exercises and works of classic literature. The course will lead to the development of a personal leadership philosophy. 3 hrs./wk.
LEAD 130
Leadership & Civic Engagement (3 CR)
This course is designed to help students develop the capacity and confidence for leadership in their personal, professional, and civic activities. The course focuses on the study of essential components and concepts of leadership, examination of characteristics and skills of effective historic and contemporary leaders, analysis of leadership skills and responsibilities in community settings, identification of personal leadership goals and standards, and development of competencies needed to meet community and global challenges in an informed, innovative, and responsible manner. 3 hrs. lecture/wk.

Learning Communities (LCOM)

LCOM 126
Composition II and U.S. History to 1877 (6 CR)
Prerequisite: ENGL 106 or appropriate placement score
Students earn 6 transferable credit hours in general education requirements (3 for ENGL 122, Composition II, and 3 for HIST 140, U.S. History to 1877). The philosophy behind joining these two courses together is to encourage students to think critically and write effectively with American history providing unifying themes. Writing instruction works best when students can focus sustained attention on one particular discipline. Writing in college and the workplace demands the ability to synthesize often conflicting information gathered from various sources. The discipline of American history provides ample opportunities for students to develop skills in composing various types of prose.

LCOM 127
Composition II and US History Since 1877 (6 CR)
Prerequisite: ENGL 106 or appropriate test score
Students earn 6 transferable credit hours in general education requirements (3 for ENGL 122, Composition II, and 3 for HIST 141, U.S. History Since 1877). The philosophy behind joining these two courses together is to encourage students to think critically and write effectively with American history providing unifying themes. Writing instruction works best when students can focus sustained attention on one particular discipline. Writing in college and the workplace demands the ability to synthesize often conflicting information gathered from various sources. The discipline of American history provides ample opportunities for students to develop skills in composing various types of prose.

LCOM 128
Art History: Renaissance to Modern/Furniture and Ornamentation: Renaissance to Modern (6 CR)
Students earn 6 credit hours (3 for ARTH 182, Art History: Renaissance/Modern, and 3 for ITMD 231, History of Furniture & Ornamentation/Renaissance-20th Century). NOTE: This learning community will meet on campus on Tuesdays and the Nelson-Atkins Museum of Art on Thursdays. In a traditional curriculum the history of the visual arts and architecture and the history of furniture and ornamentation are taught separately. In this learning community the two courses will be thoroughly integrated, thus providing students with a more accurate and meaningful way to learn. The class will meet once a week on the JCCC campus and once a week at the Nelson-Atkins Museum of Art in Kansas City, MO. Students, therefore will have the unique opportunity to study paintings, sculpture, furniture and the decorative arts from the Renaissance to the present using historically significant objects and art works. The class will involve such activities as oral presentations about art works in the museum and researching and writing about furniture and ornamentation. Students should have reliable transportation for the weekly drive to the Nelson-Atkins and should NOT enroll in an 11 a.m.-12:15 p.m. class.
LCOM 132
Composition II/Literature of Science Fiction (6 CR)
Prerequisite: ENGL 121
Students earn 6 credit hours (3 for ENGL 122, Composition II, and 3 for ENGL 243, Literature of Science Fiction). Students in this learning community will integrate their work in Composition II with their work in Literature of Science Fiction. Science fiction literature will be read and evaluated and will act as the subject matter for the writing inherent in the Composition II course objectives: we'll read and summarize science fiction stories and criticism; we'll critique and synthesize definitions of science fiction, its development, and its key concepts; and we'll explore the translation of text to screen.

LCOM 135
Social Issues: Appomattox-9/11 (6 CR)
Students earn 6 transferable credit hours in general education requirements (3 for SOC 122, Introduction to Sociology, and 3 for HIST 141, U.S. History Since 1877). Come explore American society in a learning community combining U.S. History since 1865 with Introduction to Sociology. Examine historical events with sociological eyes and understand how we created this society in which we live. We'll cover everything from A to Z: Appomattox to Z-Boys, Economics to Ecology, Family to Feminism, Media to the Moral Majority, Religions to Race, Social Class to Sexuality, Technology to Terrorism and Wealth to World War II.

LCOM 140
Selling Interior Products (6 CR)
Students earn 6 credit hours (3 for ITMD 132, Interior Products, and 3 for MKT 134, Professional Selling). In this learning community, students will learn in-depth product knowledge inclusive of specific features and benefits for numerous interior products. Additionally, students will learn how to utilize professional selling skills to sell interior products. Students will practice through role playing the steps of professional selling to illustrate the application of skill techniques in each step. 6 hrs. lecture/wk.

LCOM 142
Digital Literacies (6 CR)
Prerequisite: ENGL 106 or appropriate test score. Prerequisite for CWEB 105 is CWEB 101; Prerequisite for CWEB 115 is CWEB 105; Prerequisite for CWEB 130 CPCA 161 or CWEB 105 or CWEB 106
Students earn 6 credit hours (3 credit hours for ENGL 121, Composition I, 1 credit hour for CWEB 105, Intro to Web Pages: Dreamweaver; 1 credit hour for CWEB 115, Intermediate Web Pages: Dreamweaver and 1 credit hour for CWEB 130, Intro to Flash) (The CWEB courses would be taken in sequence throughout the semester.) This course combines the basic thinking skills and core competencies needed to thrive in the modern interactive environment. Students will enroll in ENGL 121 and CWEB 105, 115 and 130. Students will learn to transform “technobabble” into a language they can speak and understand. The course unlocks the power and potential of the Internet through a four-step inquiry process of awareness, analysis, reflection and action. This course helps students acquire an empowering set of "navigational" skills which include the ability to: 1) access information from a variety of sources; 2) analyze and explore how messages are "constructed" whether print, verbal, visual or multi-media; 3) evaluate media's explicit and implicit messages against one's own ethical, moral and/or democratic principles and 4) express or create their own messages using a variety of media tools.

LCOM 145
The Origins of Human Nature (6 CR)
Students earn 6 credit hours (3 for SOC 122 Intro to Sociology and 3 for PSYC
130 Intro to Psychology). Is it nature? Is it nurture? Are we who we are because of our genes or our environment, or both? Experience this Learning Community to learn what sociology and psychology have to say about human nature.

**LCOM 147**  
**Foundations of Modern Thought** (6 CR)  
Students can earn 6 transferable credit hours in general education requirements (3 for HIST 126, Western Civilization: Readings and Discussions, and 3 for SOC 122, Intro to Sociology). Modern social issues and structures have their origins in classic thought and writings. This learning community connects the heritage of Western thought to our contemporary lives. Search for the connections to democratic thought, social inequalities, the creation and dissolution of community, and other foundational ideas of modern society.

**LCOM 149**  
**Interpersonal Communication Navigation** (4 CR)  
Students earn 4 transferable credit hours in general education requirements (3 for SPD 120, Interpersonal Communication, and 1 for HPER 102, Navigation 102). This 4-credit hour course combines principles of effective communication with helping students experience a successful transition to college life. Students will learn practical life management skills and how to enhance their academic skills, while navigating through the fundamental elements of the communication process. Students in this learning community class will learn principles of communication theory, terminology of human communication, and will apply communication skills in everyday life. Students will have an opportunity to learn about self, one's self-concept, and how we relate to our world through healthy interpersonal relationships. Students will participate in self-awareness and career exploration activities that involve campus and community resources. Through decision-making activities, conflict management role playing perception awareness drills, and mastering one's listening skills, students will view and appreciate communication in a new and improved way. Emphasis will be on interactive and participatory activities, that include journal writing, small and large group discussion, quizzes and self-assessment.

**LCOM 151**  
**American and Global Terrorism** (6 CR)  
Students earn 6-credit hours (3 credit hours for POLS 124 American National Government and 3 for ADMJ 224 Introduction to Terrorism). This course gives an overall view of terrorism and the impact on the American political system. This is a Coordinated Studies Learning Community that includes three full hours of on-campus instruction plus online work. The American government course is a JCCC online offering of many years.

**LCOM 153**  
**Russian Literature and Russian Culture** (6 CR)  
Prerequisite: ENGL 121  
Students earn 6-credit hours (3 credit hours for ENGL 130, Introduction to Literature and 3 credit hours for HUM 137, Introduction to Russian Culture). This course is an interdisciplinary survey of Russian culture and literature from the ninth century to the present day. Students examine representative examples of Russian fiction, poetry, drama, art, architecture, music, and dance within their cultural, historical and political context. Russian poetry, drama, and fiction do not stand in isolation from the culture that produced them and are most fruitfully studied and understood within that context.

**LCOM 155**
Intro to Algebra/Learn Strat Math - You MUST enroll in both 16087-MATH 115 013 and 19067-LS 174 002 (4 CR)

Prerequisite: MATH 111 with a minimum grade of "C" or appropriate score on the math assessment test

Students earn 4-credit hours (3 credit hours for MATH 115, Intro to Algebra and 1 credit hour for LS 174, Learning Strategies for MATH). This course facilitates mathematics learning by integrating thinking skills, study skills and mathematical content. The student will acquire life-long learning skills along with the basic skills of algebra. Students in this learning community class will learn problem solving, test taking and cognitive skills. They will apply these skills to their math textbook, homework assignments, class discussions and lectures. This course will also address emotions and attitudes which may block math learning and will offer strategies and techniques designed to overcome these feelings. MATH 115 may fulfill some certificate requirements, but will not fulfill degree requirements.

LCOM 157
Fund of Math/Learning Strat for Math-You MUST enroll in both 16074-MATH 111 004 and 19066-LS 174 001 (4 CR)

Prerequisite: Appropriate score on the math assessment test

Students earn 4-credit hours (3 credit hours for MATH 111 Fundamentals of Math and 1 credit hour for LS 174 Learning Strategies for Math). This course facilitates mathematics learning by integrating thinking skills, study skills and mathematical content. The student will acquire life-long learning skills along with fundamental math procedures and concepts. Students in this learning community class will learn problem solving, test taking and cognitive skills. They will apply these skills to their math textbook, homework assignments, class discussions and lectures. This course will also address emotions and attitudes which may block math learning and will offer strategies and techniques designed to overcome these feelings. Active learning will be encouraged through activities such as pair and share, journal writing, group discussions, self-assessments and collaborative learning.

LCOM 159
Intimate Relationships (6 CR)

Students earn 6-credit hours (3-credit hours for PSYC 130, Introduction to Psychology and 3-credit hours for SOC 131, Marriage and the Family). Does media imitate life or does life imitate media? Experience this learning community that combines Psychology and Marriage and the Family. Explore intimate relationships by applying sociological and psychological principles to episodes of classic shows such as "The Brady Bunch," and "Leave it to Beaver," as well as "Sex and the City," "Big Love," "Brokeback Mountain," and other popular shows. Find the keys to understanding the intimacies of contemporary relationships in this spicy course.

LCOM 161
Environmental Science/Comp II - You MUST enroll in both 19032-ENGL 122 042 and 19260-BIOL 130 009 (6 CR)

Prerequisite: ENGL 121

Students earn 6-credit hours (3 for ENGL 122, Composition II and 3 for BIOL 130, Environmental Science). Most Americans are only dimly aware of their immediate environment, and they know even less about how that place fits into, impacts, and is impacted by the global environment. Through reading, writing, and discussion, this course will raise students' awareness of where they are and help them become more conscious of their own place in and responsibility to the earth's ecology. This is a Coordinated Studies Learning Community that includes six full hours of on-campus instruction.

LCOM 163
Russia: Empire of East & West (5 CR)
Prerequisites: FL 141 or two years of high school Russian
Students earn 5-credit hours (2 for FL 246, Conversational Russian and 3 for HIST 160, Modern Russian History). This interdisciplinary Russian Conversation and Russian History course allows students to build their conversation skills with the vocabulary and grammar appropriate to describe and discuss the events, personalities and forces that shaped Russia as an Eurasian empire. The course requires 2-credit-hours weekly time and 3-credit-hours of online work.

LCOM 165
American Histories/Family Hist (6 CR)
Prerequisite: ENGL 106 or appropriate placement score or EAP 113 and EAP 117
Students can earn 6-credit hours (3-credit hours for ENGL 121, Composition I and 3-credit hours for HIST 141, U.S. Since 1877). U.S. History comes alive and makes more sense to people when they can see the big and little events in light of their own family’s stories and memories. Not only will students study the expected topics (World War II, Viet Nam, the Great Depression), they will also explore the history of private life: what people ate, wore, worked and played at in any given era. At the same time, students will work on writing their own family’s history. Instead of approaching Composition I as a series of unrelated essays, students will learn to write by focusing on how class readings and discussions related directly to their own and their family’s lives. Through narrative, analysis, and research, they will create a document that their family can rely on and refer to over the course of generations to come.

LCOM 167
Society: From Cells to People (6 CR)
Students earn 6 credit hours (3 for SOC 122 Intro to Sociology and 3 for BIOL 122 Principles of Biology) What is the difference between the society in the ant hill in your backyard and the society of a human megalopolis? Do bacteria have a society? Enroll in this Learning Community to study the parallels between biological and sociological structures. Learn how the processes of life evolve, function, change, and interact in the biological and social worlds. Examin the diversity within the unity of life.

LCOM 169
Intermediate Algebra/Learning Strategies for Math (4 CR)
Prerequisite: MATH 115 with a grade of “C” or higher or appropriate score on the math assessment test
This course is a combination of Intermediate Algebra (MATH 116 - 3 credit hours) and Learning Strategies for Mathematics (LS 174 - 1 credit hour). This course should be strongly considered for any student who has taken Intermediate Algebra repeated times without success. The student will acquire life-long learning skills along with fundamental math procedures and concepts. Students in this learning community class will learn problem solving, test taking and cognitive skills. They will apply these skills to their math textbook, homework assignments, class discussions and lectures. This course will also address emotions and attitudes which may block math learning and will offer strategies and techniques designed to overcome these feelings. Active learning will be encouraged through activities such as pair and share, journal writing, group discussions, self-assessments and collaborative learning. The course meets for approximately one hour more per week than a regular course.

Learning Strategies (LS)

LS 174
Learning Strategies for Math (1 CR)

*Corequisite: Concurrent enrollment in a math course*

This course teaches thinking and study skills specifically geared toward the learning of math. Students practice these skills on their math textbooks and homework assignments as well as in their math class discussions and lectures. This course also addresses feelings and attitudes that may block math learning and offers strategies and techniques designed to overcome these feelings. 1 hr./wk. Learning Strategies courses offer students opportunities to acquire the thinking and learning skills needed to be a successful learner, including reading textbooks, taking notes, organizing information and preparing for tests. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

LS 176
Strategic Learning System (1 CR)

*Corequisite: Concurrent enrollment in a college lecture course*

In this course, students will learn a series of strategies for processing information from textbooks and lectures and strategies for studying for and taking tests. As the strategies are introduced, students apply them to the content of courses in which they are concurrently enrolled. Upon successful completion of the course, students will have developed a system for learning that can be adapted for use in any learning situation. 1 hr./wk. Learning Strategies courses offer students opportunities to acquire the thinking and learning skills needed to be a successful learner, including reading textbooks, taking notes, organizing information and preparing for tests.

LS 178
Memory Strategies (1 CR)

*Corequisite: Concurrent enrollment in another college course*

In this course, students learn a series of techniques to help them improve their retention and recall of information needed for success in college courses. These techniques provide a systematic approach to learning and remembering. Students immediately use the techniques to learn information from their other college courses. 1 hr./wk. Learning Strategies courses offer students opportunities to acquire the thinking and learning skills needed to be a successful learner, including reading textbooks, taking notes, organizing information and preparing for tests.

LS 186
Exam Strategies (1 CR)

*Corequisite: Concurrent enrollment in at least one other college course in which exams are taken*

This course offers students an opportunity to explore their own learning styles and to develop appropriate strategies for improving test performance through improved learning procedures. Emphasis will be on practical application of the learned strategies to courses in which the students are concurrently enrolled. 1 hr./wk. Learning Strategies courses offer students opportunities to acquire the thinking and learning skills needed to be a successful learner, including reading textbooks, taking notes, organizing information and preparing for tests.

LS 200
College Learning Methods (3 CR)

*Corequisite: Concurrent enrollment in at least one academic college course*

This course provides students with opportunities to develop skills and habits that will help them establish and maintain effective learning systems. Students first learn and practice the learning methods in class and then apply these methods to appropriate situations in their other college coursework. The methods, which are
based on valid learning and thinking principles, will help students meet the higher-level demands of the subjects encountered in college courses. 3 hrs./wk. Learning Strategies courses offer students opportunities to acquire the thinking and learning skills needed to be a successful learner, including reading textbooks, taking notes, organizing information and preparing for tests.

Legal Studies (LAW)

LAW 121
Introduction to Law (3 CR)
Upon successful completion of this course, the student should be able to explain the major substantive and procedural aspects of law. This course provides an overview of the legal system and knowledge of specific legal topics, including torts, criminal law, contracts, family law, business law, real estate and probate. This course is a requirement for applying to the paralegal program and for completion of the legal nurse consultant program. 3 hrs. lecture/wk.

LAW 123
Paralegal Professional Studies (1 CR)
Upon successful completion of this course, the student should be able to explain the legal assistant profession. Topics will include paralegal licensing, certification, education, employment and professional ethics. The course is required for students seeking admission to the paralegal program. 1 hr. lecture/wk.

LAW 131
Legal Research and Writing I (3 CR)
Prerequisites: Admission to the paralegal program and BOT 106 or program administrator approval
This course will introduce the student to the types of specialized informational resources used to perform legal research, including both print and electronic media. The student will become familiar with the major characteristics of these resources and how to use them. The student will learn how to design a research strategy, and will learn a systematic method for researching legal issues and managing the legal research process. Numerous opportunities will be provided for skill development in the use of the these resources. 3 hrs. lecture/wk.

LAW 132
Civil Litigation (3 CR)
Prerequisites: Admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121
This course will acquaint the student with the major characteristics of the civil litigation process. Students will become familiar with the various types of procedural rules regulating the civil litigation process and their application. Emphasis will be on the role of the legal assistant in a civil litigation practice and will include the drafting of pleadings. 3 hrs. lecture/wk.

LAW 140
Alternative Dispute Resolution (3 CR)
Prerequisites: Legal nurse consultant students and paralegal program students - LAW 132 and selective admission approval
This course examines the various methods used by our legal system for dispute resolution and the role of the legal assistant in those methods. Upon successful completion of this course, the students should be able to explore the nature of conflict and the principles of negotiation and review the traditional litigation
The course will concentrate on the major alternatives to litigation, including mediation and arbitration. 3 hrs. lecture/wk.

**LAW 142**  
**Torts** (3 CR)  
*Prerequisites: Legal nurse consultant students and paralegal program students - LAW 132 and selective admission approval*  
Upon successful completion of this course, the student should be able to explain the major principles of tort law and personal injury litigation. The student should be able to discuss and compare the elements of negligence torts, intentional torts and strict liability torts, as well as the types of damages available and defenses to each of these torts. 3 hrs. lecture/wk.

**LAW 148**  
**Criminal Litigation** (3 CR)  
*Prerequisite: Legal nurse consultant students and paralegal program students - LAW 132*  
Upon successful completion of this course, the student should be able to explain the objectives, substantive principles and procedural rules of the criminal process. The student will be able to explain the role of the paralegal in criminal litigation practice and draft documents used in the criminal litigation process. 3 hrs. lecture/wk.

**LAW 152**  
**Real Estate Law** (3 CR)  
*Prerequisites: Paralegal program students - Admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121*  
Upon successful completion of this course, the student should be able to describe common types of real estate transactions and conveyances. The preparation of legal instruments, namely deeds, contracts, leases and mortgages will be studied. 3 hrs. lecture/wk.

**LAW 162**  
**Family Law** (3 CR)  
*Prerequisites: Paralegal program students - admission to paralegal program or assistant dean’s approval. Legal nurse consultant students - LAW 225 and LAW 121*  
Upon successful completion of this course, the student should be able to describe the substantive and procedural principles of family law, including issues related to adoption, divorce, custody, support and visitation. The student will also be able to draft pleadings including petition for divorce, petition for adoption, decrees, settlement agreements and motions for modification. 3 hrs. lecture/wk.

**LAW 171**  
**Law Office Management** (3 CR)  
*Prerequisites: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121*  
This course will acquaint the student with the general principles of law office management and will emphasize the unique characteristics of organizing and managing the law office or legal department. Projects will provide students with opportunities for practical application of law office management concepts. 3 hrs. lecture/wk.
LAW 205
Legal Research and Writing II (3 CR)
Prerequisite: LAW 131 or program administrator approval
This course is a continuation of LAW 131-Legal Research and Writing I. In this course, the student will learn how to use Westlaw to perform legal research. The student will learn how to analyze and apply relevant legal authority to a specific legal problem, and how to communicate their results and conclusions in a professional legal document. Numerous opportunities will be provided for skill development. 3 hrs. lecture/wk.

LAW 212
Business Organizations (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121
Upon successful completion of this course, the student should be able to describe the various forms of business ownership, including corporations, partnerships and sole proprietorships. The emphasis in the course is on the role of the legal assistant in a business law practice and on the preparation of related documents. 3 hrs. lecture/wk.

LAW 220
Computer-Assisted Legal Research (2 CR)
Prerequisite: Paralegal program students - LAW 131. Legal nurse consultant students - LAW 131
Upon successful completion of this course, the student should be able to access general and legal resources on the Internet and conduct electronic legal research using online and CD-ROM databases.

LAW 223
Law Office Computing (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program and completion of BOT 106
Upon successful completion of this course, the student should be able to evaluate and use legal software to perform customary law office procedures including computer litigation support, drafting and editing of specific legal documents, document and file management, time-keeping and billing, docket control, and forms generation. 3 hrs. lecture/wk. LAW 223 and CIS 223 are the same course.

LAW 225
Legal Nurse Consultant Profession (1 CR)
Prerequisite: Admission to the legal nurse consultant program or assistant dean's approval
In this course, students will examine the functions of legal nurse consultants and available career opportunities, including relevant issues regarding employment and independent contracting. 1 hr. lecture/wk.

LAW 226
Immigration Law (3 CR)
Prerequisites: Paralegal program students: admission to the paralegal program or program administrator approval. Legal nurse consultant students: LAW 225 and LAW 121
Upon successful completion of this course, the student will be able to explain the
various aspects of immigration law. The emphasis in the course is on the functions of the paralegal in an immigration law practice and on the preparation of related documents. 3 hrs. lecture/wk.

LAW 241
Wills, Trusts and Probate Administration (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121
Upon successful completion of this course, the student should be able to draft a will with testamentary powers. The use of trusts, probate procedures, techniques for fact gathering and mastery of estate tax principles are emphasized in this course. 3 hrs. lecture/wk.

LAW 245
Elder Law (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121
Upon successful completion of this course, the student should be able to explain the legal aspects of aging. Topics include financial and estate planning, health care, personal planning and protection, taxation, housing and other legal matters affecting the elderly and people with special legal needs. 3 hrs. lecture/wk.

LAW 247
Intellectual Property Law (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 225 and LAW 121
In this course, students will learn the various forms of intellectual property. The emphasis in the course is on the functions of the paralegal in an intellectual law practice and on the preparation of related documents. 3 hrs. lecture/wk.

LAW 250
Medicolegal Research and Writing (3 CR)
Prerequisites: Admission to the legal nurse consultant program and LIBR 125
This course emphasizes the role of the legal nurse consultant in the preparation of, and contribution to, various documents used in the context of a medicolegal-related law practice. Topics include the use of medical and science-related information resources and the preparation of such documents as legal memoranda; legal-related correspondence; summaries of medical/science literature; summaries of health-care records; and summaries of health-care expenses and settlement brochures, particularly in the context of intentional torts, negligence, product liability, strict liability, and medical-malpractice litigation. 3 hrs. lecture/wk.

LAW 266
Employment Law (3 CR)
Prerequisites: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 121 and LAW 225
This course examines the relationship between employer and employee. Major federal and state employment laws will be examined, including Title VII of the Civil Rights Act of 1964, the Age Discrimination Employment Act and the Americans
**LAW 268**

**Bankruptcy (2 CR)**

Prerequisite: Paralegal program students - admission to the paralegal program or division administrator approval. Legal nurse consultant students - LAW 121 or LAW 225

This course will familiarize the student with the purpose and application of the federal Bankruptcy Code. Topics will include Bankruptcy Court procedures and the preparation of bankruptcy forms and documents. Emphasis will be on the role of the legal assistant in a bankruptcy practice. 2 hrs. lecture/wk.

**LAW 270**

**Administrative Law (3 CR)**

Prerequisite: Admission to the legal nurse consultant program and LAW 225 and LAW 121 or admission to the paralegal program

Upon successful completion of the course, the student will be able to explain and apply substantive and procedural principles of administrative agencies. The course will concentrate on the basic principles of workers’ compensation law, Social Security law; the Americans with Disabilities Act and the Occupational Safety Health Administration. 3 hrs. lecture/wk.

**LAW 271**

**Legal Ethics, Interviewing and Investigation (3 CR)**

Prerequisite: Paralegal program students - LAW 132. legal nurse consultant students - LAW 132 or LAW 260 Corequisite: Paralegal program students - LAW 205. Legal nurse consultant students: LAW 205 or LAW 250

Upon successful completion of this course, the student should be able to explain ethical rules and standards governing the legal profession, interview clients and witnesses, and perform factual investigation pursuant to legal proceedings. The emphasis will be on recognition of ethical problems commonly encountered, as well as the development of interviewing and investigating skills. 3 hrs. lecture/wk.

**LAW 275**

**Paralegal Internship I (1 CR)**

Prerequisite or Corequisite: Paralegal program students - LAW 271

This course provides the student with an opportunity to gain practical work experience under the supervision of an attorney in day-to-day, on-site office work. The student must complete 120 hours of work at the internship site. In addition to on-site work, the student will meet with the internship instructor during the internship period four times and complete all requirements; keep an eight-week log; interview a practicing paralegal; draft a cover letter and resume; and submit final evaluations by the employer and student. Obtaining an internship is the responsibility of the individual student. 120 internship hours

**LAW 276**

**Paralegal Internship II (1 CR)**

Prerequisite: LAW 275

This course provides the student with an opportunity to gain practical work experience under the supervision of an attorney in day-to-day, on-site office work. The student must complete 120 hours of work at the internship site. In addition to on-site work, the student will meet with the internship instructor during the internship period four times and complete all requirements; keep an eight-week log; interview a practicing paralegal manager; participate in a mock job interview;
and submit final evaluations by the employer and the student. Obtaining an internship is the responsibility of the individual student.

Library (LIBR)

LIBR 125
Introduction to Library Research (1 CR)
This course provides an introduction to the methods and technologies of library research. Included will be a study of the various information resources available for research and techniques for retrieving information from both print and electronic sources. The resources of Billington Library will be featured, although the emphasis will be on building information retrieval skills that will be useful in many settings.

Marketing Management (MKT)

MKT 121
Retail Management (3 CR)
Upon successful completion of this course, the student should be able to describe and analyze retail store organization and operation including customer markets, store location and design, human resource management, merchandise planning and control, and retail promotion. 3 hrs. lecture/wk.

MKT 133
Salesmanship (3 CR)
Upon successful completion of this course, the student should be able to define and contrast the three main areas of selling -- direct, wholesale and retail -- and explain the selling process. In addition, the student should be able to define the steps of selling and identify their appropriate application. The student should also be able to demonstrate selling skills through role play and presentations. Students who have received credit for MKT 133 may not receive credit for MKT 133. 3 hrs. lecture/wk.

MKT 134
Professional Selling (3 CR)
Upon successful completion of this course, the student should be able to describe the process of successful selling in the retail environment. In addition, the student should be able to define the steps of selling and identify appropriate application. The student should also be able to apply selling principles through role-play. Students who have received credit for MKT 133 may not receive credit for MKT 134. 3 hrs. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

MKT 140
Teleservice Communication Skills (3 CR)
Upon successful completion of this course, the student should be able to describe the process of successful communication in the teleservice field. In addition, the student should be able to define the principles of teleclient service and identify their appropriate application. The student should also be able to demonstrate effective telecommunication and client services skills through role-playing. Students who have received credit for MKT 133 or MKT 134 may not receive credit for MKT 140. 3 hrs. lecture/wk.
MKT 202
Consumer Behavior (3 CR)
Upon successful completion of this course, the student should be able to analyze the elements and influences that affect consumer behavior. In addition, the student should be able to apply the basic principles of consumer behavior and insight to the application of consumer-research findings used in the professional practice of marketing. 3 hrs. lecture/wk.

MKT 221
Sales Management (3 CR)
Prerequisite: MKT 134 or MKT 133
Upon successful completion of this course, the student should be able to identify skills necessary to manage a sales force and develop a plan for recruitment selection, training, motivation and evaluation. In addition, the student should be able to describe and analyze techniques to forecast and plan sales and audit results. 3 hrs. lecture/wk.

MKT 234
Services Marketing (3 CR)
Corequisite: BUS 230
Upon successful completion of this course, the student should be able to describe the functioning of a services economy. In addition, students should be able to describe and define the nature and characteristics of services and the way services are required to be marketed because of their intangible core. Additionally, students should be able to describe service quality, the foundation of services marketing and the success factors in services marketing. 3 hrs. lecture/wk.

MKT 240
Advertising and Promotion (3 CR)
In this course, the student will understand and recognize the importance of an integrated marketing communications planning model in order to coordinate all of the promotional mix elements for today’s businesses. Topics of study include advertising, direct marketing, sales promotion, public relations and interactive media. The course integrates theory with planning, management and strategy. Upon completion, the student will be able to develop an effective marketing communications program. 3 hrs. lecture/wk.

MKT 284
Marketing and Management Internship I (1 CR)
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course offers work experience under instructional supervision in an approved training situation designed to provide practical experience in marketing and management. A minimum of 15 hrs./wk. on-the-job training is required.

MKT 286
Marketing and Management Internship II (1 CR)
Prerequisite: MKT 284
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course offers work experience under instructional supervision in an approved training situation designed to provide practical experience in marketing and management. A minimum of 15 hrs./wk. on-the-job training is required.
MKT 288
Marketing and Management Internship III (1 CR)
Prerequisite: MKT 286
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course offers work experience under instructional supervision in an approved training situation designed to provide practical experience in marketing and management. A minimum of 15 hrs./wk. on-the-job training is required.

MKT 289
Marketing and Management Internship IV (1 CR)
Prerequisite: MKT 288
Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. This course offers work experience under instructional supervision in an approved training situation designed to provide practical experience in marketing and management. A minimum of 15 hrs./wk. on-the-job training is required.

MKT 290
Capstone: Marketing and Management Case Studies (3 CR)
Prerequisites: BUS 141 and BUS 230 and MKT 284 and MKT 286 or assistant dean’s approval
Upon successful completion of this course, the student should be able to identify problems, develop and describe the situational analysis, formulate alternative solutions, and reach and explain a decision for each issue. In addition, the student should be able to apply the knowledge of marketing and management concepts and techniques in the analysis of cases and actual business situations. 3 hrs. lecture/wk.

Mathematics (MATH)

MATH 098
Fundamentals of Mathematics and Elementary Algebra (6 CR)
Prerequisite: An appropriate score on an assessment test
This 16-week course is an integration of the content of both Fundamentals of Mathematics and Elementary Algebra and graded as if taken as two separate courses. You will earn 3 credit hours in Fundamentals of Mathematics and 3 credit hours in Elementary Algebra that will transfer as if they were being taught in the traditional format. Students will receive credit on their transcript for MATH 111 and MATH 115. NOTE: MATH 115 may fulfill some certificate requirements, but will not fulfill degree requirements.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 099
Elementary Algebra and Intermediate Algebra (6 CR)
Prerequisite: MATH 111 with a grade of "C" or higher or an appropriate score on an assessment test.
This 16-week course is an integration of the content of both Elementary Algebra and Intermediate Algebra and graded as if taken as two separate courses. You will earn 3 credit hours in Elementary Algebra and 3 credit hours in Intermediate Algebra that will transfer as if they were being taught in the traditional format. Students will receive credit on their transcript for MATH 115 and MATH 116. MATH 115 may fulfill some certificate requirements, but will not fulfill degree requirements.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
MATH 111  
Fundamentals of Mathematics (3 CR) 
Prerequisite: Appropriate score on the math assessment test 
Fundamentals of Mathematics is designed for the student who needs to improve or review basic math skills and concepts. This course includes computation using integers, fractions, decimals, proportions and percents along with an overview of percents, measurement, geometry, statistics and linear equations. Fundamentals of Math provides the mathematical foundation upon which subsequent studies in mathematics and other areas depend. 3 or 5 hrs. lecture / wk. This course does not fulfill degree requirements. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details. 
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 115  
Elementary Algebra (3 CR)  
Prerequisite: MATH 111 with a grade of "C" or higher or appropriate score on the math assessment test 
This is a beginning course in algebra, designed to help students acquire a solid foundation in the basic skills of algebra. Students will learn to simplify arithmetic and algebraic expressions, including exponential expressions, polynomials, rational expressions and radical expressions; solve equations and inequalities, including linear equations and quadratic equations; graph linear equations; and analyze linear equations. 3 or 5 hrs. lecture/wk. MATH 115 may fulfill some certificate requirements, but will not fulfill degree requirements. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details. 
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 116  
Intermediate Algebra (3 CR)  
Prerequisite: MATH 115 with a grade of "C" or higher or appropriate score on the math assessment test 
This course focuses on arithmetic and algebraic manipulation, equations and inequalities, graphs, and analysis of equations and graphs. Students will simplify arithmetic and algebraic expressions, including those containing rational expressions, rational exponents, radicals and complex numbers; solve equations and inequalities including linear, quadratic, quadratic in form, as well as those containing rational expressions, radicals or absolute value; graph linear inequalities and basic conics; and analyze functions and nonfunctions. 3 or 5 hrs. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details. 
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 118  
Geometry (3 CR)  
Prerequisite: MATH 115 with a grade of "C" or higher or appropriate score on the math assessment test 
This course is an informal approach to geometry. Topics will include lines, polygons, area, volume, circles, similarity, congruence and coordinate geometry. 3 hrs. lecture/wk. 
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 120  
Business Mathematics (3 CR)
Prerequisite: MATH 111 with a grade of "C" or higher or appropriate score on the math assessment test

This is a course for the student who needs specific skills in mathematics to address business problems and business applications. Students will learn the mathematics involved in payroll, retailing, asset valuation, interest, finance, and the time value of money. Students will use a calculator and computer to solve a variety of applications. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $25.

MATH 122
Mathematics in Our Culture (3 CR)

Prerequisite: MATH 111 with a grade of "C" or higher or appropriate score on the math assessment test

This is a course about the extent, power and history of many interesting areas of mathematics. Topics will include mathematical reasoning and recreation, calculator activities, computer literacy, mathematics in art and music, probability, statistics and topology. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 133
Technical Mathematics I (4 CR)

Prerequisite: MATH 111 with a grade of "C" or higher or appropriate score on the math assessment test

This course is the first of a two-semester sequence that will introduce the mathematical skills and concepts necessary in technical work. It will focus on the basics of algebra, geometry and trigonometry and their applications. Topics will include operations with polynomials, linear equations, systems of equations, right triangle trigonometry and basic statistical concepts. 4 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 134
Technical Mathematics II (5 CR)

Prerequisite: MATH 133 or an equivalent course with a grade of "C" or higher

This course is the second of a two-semester sequence on technical applications of algebra and trigonometry. Topics will include factoring, algebraic fractions, quadratic equations, exponents, radicals, an introduction to coordinate geometry, logarithmic and exponential functions, trigonometric graphs and identities. 5 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 165
Finite Mathematics (3 CR)

Prerequisite: MATH 116 with a grade of "C" or higher or appropriate score on the math assessment test

This course will emphasize the beauty, scope, practical applications and relevance of mathematics. It is designed to involve the students with the concepts as well as quantitative skills. Topics include inductive and deductive reasoning, mathematical patterns, sets, introduction to trigonometry, Euclidean geometry, probability, statistics and matrices. The common themes throughout the course are innovation in computers, related mathematical and cultural history and reasoning ability. 3 hrs./wk. MATH 165 is only offered during the spring term.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 171
College Algebra (3 CR)
Prerequisite: MATH 116 with a grade of "C" or higher or MATH 134 with a grade of "C" or higher or appropriate score on the math assessment test Note: Not available to students with credit in MATH 173

This course focuses on the study of functions and their graphs, techniques of solving equations and the recognition and creation of patterns. Students will analyze and graph functions, including constant, linear, absolute value, square root, polynomial, rational, exponential and logarithmic functions and non-functions; solve equations and inequalities, including polynomial equations, exponential equations, logarithmic equations, systems of linear equations and systems of linear inequalities; and analyze and create algebraic and numerical patterns. 3 or 5 hrs./wk. Not available for credit for students with credit in MATH 173. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 172
Trigonometry (3 CR)
Prerequisite: MATH 171 with a grade of "C" or higher or appropriate score on the math assessment test Note: Not available to students with credit in MATH 173

This is a course in trigonometric functions and graphs. Emphasis will be on understanding function notation, definitions, algebraic relations, real-world applications, graphing in the real and complex plane, inverse functions, polar functions and vectors. Students who take Math 172 and Math 173 will receive at most five hours of credit toward graduation. 3 hrs./wk. Not available for credit for students with credit in MATH 173.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 173
Precalculus (5 CR)
Prerequisite: MATH 116 with a grade of "C" or higher or appropriate score on the math assessment test Note: Not available for credit for students with credit in MATH 171 and/or MATH 172

Note: MATH 173 is an accelerated course recommended for students with a strong high school math background (three to four years) who plan to take calculus. This course focuses on the study of functions and their graphs, trigonometry, techniques of solving equations and the recognition and creation of patterns. Students will analyze and graph functions, including constant, linear, absolute value, square root, polynomial, rational, exponential, logarithmic and trigonometric functions and non-functions; solve equations and inequalities, including polynomial equations, exponential equations, logarithmic equations, trigonometric equations, systems of linear and nonlinear equations and systems of linear and nonlinear inequalities; and analyze and create algebraic and numerical patterns. 5 hrs./wk. Not available for credit for students with credit in MATH 171 and/or MATH 172.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 175
Discrete Mathematics and its Applications (3 CR)
Prerequisite: MATH 171 or MATH 173 with a grade of "C" or higher or appropriate score on the math assessment test

This course is designed to present the beauty, scope, practical applications and relevance of mathematics. It will focus on applications of general interest drawn primarily from the social and biological sciences and business. Topics will be placed in a historical context, and mathematical reasoning will be stressed. Many of the applications will be computer-oriented. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 181
Statistics (3 CR)
Prerequisite: MATH 171 or MATH 173 or an equivalent course with a grade of "C" or higher or appropriate score on the math assessment test

This is a beginning course in statistical analysis, the skill of making sense of raw data - constructing graphical representations of data, developing models for making predictions, performing tests to determine significant change and finding intervals for population values. Students will learn the basics of descriptive statistics, probability, sampling, confidence intervals, distributions, hypothesis testing, regression and correlation. Computer applications will be incorporated into course topics. 3 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 191
Math & Physics for Games I (4 CR)
Prerequisites: MATH 171 or MATH 173 with a grade of "C" or higher or appropriate score on math assessment test and CS 200

This introductory course focuses on the mathematics and physics concepts needed to program a variety of video game scenarios. Students will learn to use vectors and matrix transformations to model the motion of physical objects in two and three dimensions. Students will also learn various computer programming methods in order to model these mathematical and physical concepts. 3 hrs. lecture and 2 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 210
Mathematics for Elementary Teachers I (3 CR)
Prerequisite: MATH 171 or MATH 173 with a grade of "C" or higher or appropriate score on math assessment test

This is the first of a two-course sequence for prospective teachers of elementary and middle school mathematics. The focus of this course is an in-depth investigation of the mathematical principles and concepts encountered in grades K-8. Topics include set theory, numeration systems, number sense, critical thinking, and problem-solving strategies. The use of appropriate techniques and tools, such as calculators, computers and manipulatives, will be integrated throughout the course in order to enhance the depth of understanding. 3 hrs. lecture/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 212
Math for Elementary Teachers II (3 CR)
Prerequisite: MATH 210 with a grade of "C" or higher or consent of the assistant dean

This is the second of a two-course sequence for prospective teachers of elementary/middle school mathematics. The focus of this course is an in-depth investigation of the mathematical principles and concepts encountered in grades K-8. Topics include probability, statistics, measurement, and shapes including congruency, similarity, and transformations. The use of appropriate techniques and tools, such as calculators, computers, and manipulatives, will be integrated throughout the course in order to enhance the depth of understanding. 3 hrs. lecture/wk. NOTE: the prerequisite of MATH 210 requires a grade of "C" or higher.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 225
Mathematics as a Decision Making Tool (3 CR)
Prerequisite: MATH 171 or MATH 173 with a grade of "C" or higher or appropriate score on the math assessment test

The focus of this course is to develop the quantitative skills and reasoning ability
necessary to help students read critically and make decisions in our technical information society. A project tying this course to the student’s own interest is a course requirement. Major topics include collecting and describing data, inferential statistics and probability, geometric similarity, geometric growth, symmetry and patterns. 3 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 231
Business and Applied Calculus I (3 CR)
Prerequisite: MATH 171 or MATH 173 with a grade of "C" or higher or appropriate score on the math assessment test
This is the first course in calculus as it applies to business, psychology and the physical sciences. Concepts include measuring the slope of a curve, writing equations of tangent lines, finding maximum and minimum points, determining the rate of change of a function, and measuring the area under a curve. Algebraic skills and application problems are stressed. Specific calculus topics include finding limits, differentiation of algebraic, exponential and logarithmic functions, and integration of algebraic and exponential functions. Trigonometry (MATH 172) can be taken concurrently with MATH 231 for those students planning to enroll in MATH 232 in subsequent semesters. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 232
Business and Applied Calculus II (3 CR)
Prerequisites: MATH 231 and either MATH 172 or MATH 173 with a grade of "C" or higher or appropriate score on the math assessment test
This is the second course in a two-semester series on calculus that covers five techniques of integration, differentiation and integration of trigonometric functions, differential equations, and functions of several variables as applied to business, statistics, biology and the social sciences. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 237
Calculus for Biology and Medicine (5 CR)
Prerequisite: MATH 172 or MATH 173 or an equivalent course with a grade of "C" or higher or an appropriate score on an assessment test
This course focuses on the study and mathematical modeling of biological systems. Through a host of biological and medical applications, the rudiments of calculus are developed. Concepts include measuring the slope of a curve, writing equations of tangent lines, maximizing and minimizing a function, determining the rate of change of a function, and measuring the area under a curve. Solution techniques, both analytic and numeric, for difference and differential equations are used. Modeling activities are heavily emphasized. Qualitative analysis of solutions of differential equations is incorporated in modeling activities. Application areas include mathematical physiology, pharmacology, cell biology and populations biology. 5 hrs. lecture/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 241
Calculus I (5 CR)
Prerequisite: MATH 172 or MATH 173 or an equivalent course with a grade of "C" or higher or an appropriate score on an assessment test
This is the first of a three-semester sequence on calculus designed for engineering, physics and math majors. Rates of change, areas and volumes will be studied. To accomplish this, the students will study and apply limits and continuity. Differentiation and integration of algebraic, trigonometric and transcendental functions will also be a major focus of this course. 5 hrs./wk.
MATH 242
Calculus II (5 CR)
Prerequisite: MATH 237 or MATH 241 or an equivalent course with a grade of "C" or higher
This is the second course of a three-semester sequence on calculus. The emphasis will be an analytic, numerical and graphical approach to techniques of integration, infinite series and vectors in the plane including scientific applications. 5 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 243
Calculus III (5 CR)
Prerequisite: MATH 242 with a grade of "C" or higher or an equivalent course with a grade of "C" or higher
This is the third course in a three-semester sequence on analytic geometry and calculus. Topics include vector-valued functions, functions of several variables, multiple integration, and vector analysis. 5 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 244
Differential Equations (3 CR)
Prerequisite: MATH 243 or an equivalent course with a grade of "C" or higher
This course will cover standard types of equations that involve rates of change. In particular, this is an introductory course in equations that involve ordinary derivatives. Both qualitative and quantitative approaches will be used. Standard types and methods will be covered, including Laplace transforms and numerical methods. 3 hrs./wk. Beginning summer 2009 this course will be replaced by the 4-credit-hour course MATH 254 Differential Equations.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 246
Elementary Linear Algebra (3 CR)
Prerequisite: MATH 242 or an equivalent course with a grade of "C" or higher
This sophomore-level introduction to linear algebra uses a matrix-oriented approach, with an emphasis on problem solving and applications. The course focus is on matrix arithmetic, systems of linear equations, properties of Euclidean n-space, eigenvalues and eigenvectors, orthogonality and vector spaces. The use of technology is a major feature of the course. 3 hrs. lecture/wk. MATH 246 is only offered during the spring term.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

MATH 254
Differential Equations (4 CR)
Prerequisite: MATH 243 with a grade of "C" or higher or an equivalent course with a grade of "C" or higher
This course will cover standard types of equations that involve rates of change. In particular, this is an introductory course in equations that involve ordinary derivatives. Both qualitative and quantitative approaches will be used. Standard types and methods will be covered, including Laplace transforms, infinite series, and numerical methods. Basic linear algebra will be developed to solve systems of differential equations. 4 hrs. lecture/wk. This course replaces the 3-credit-hour course, MATH 244, effective summer 2009.
MATH 285
Statistics for Business (4 CR)
Prerequisite: MATH 232 or MATH 242 or an equivalent course with a grade of "C" or higher Note: Students transferring MATH 285 to the University of Kansas must have CIS 201 as a corequisite.
This is a beginning course in calculus-based statistical analysis, the skill of making sense of raw data -- constructing graphical representations of data, developing models for making predictions, performing tests to determine significant change and finding intervals for population values. Students must have an understanding of calculus concepts in order to successfully complete this course. Students will learn the basics of descriptive statistics, probability, sampling, confidence intervals, hypothesis testing and linear regression. The course will stress the applications to business with emphasis on quality control. 4 hrs./wk. Students transferring MATH 285 to KU must have CIS 201 as a corequisite.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

Metal Fabrication and Welding (MFAB)

MFAB 120
MFAB Tools and Equipment (2 CR)
Upon completion of this course the student should be able to identify, operate, maintain, and explain the proper use of power equipment and the operation of several selected metal fabrication hand tools common to a welding fabrication shop. Instructors will demonstrate the safe use of primary and secondary tools and equipment. The student will be required to provide ANSI-Z-87 safety glasses and other basic personal protective equipment (PPE). This course is recommended for students who have never had an industrial arts or shop class. 1 hr lecture, 1.5 hr lab/wk.

MFAB 121
Intro to Shielded Metal Arc Welding I (SMAW I) (4 CR)
Prerequisite or corequisite: MFAB 120 or MFAB 127
Upon successful completion of this course, the student should be able to perform oxy-fuel cutting (OFC), oxy-fuel welding (OFW) and brazing, shielded metal arc welding (SMAW). The SMAW portion of the course will cover positions but will be limited to AWS U-bend tests with backing and fillet welds. All welds will be tested according to industry standards. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 1 hr. lecture, 6 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 125
Advanced Gas and Arc Welding (4 CR)
Prerequisite: MFAB 121
This course is a continuation of Introduction to Welding. The course will cover more advanced projects in oxyacetylene, cutting, shielded metal arc welding (SMAW) and carbon arc cutting with air (CAC-A). The SMAW process will be used to weld v-groove butt joints in the flat, horizontal, vertical up and overhead positions, with root and face AWS U-bend test being performed on AWS open root joints without backing weld made in the vertical and overhead positions. AWS welder qualification/certification will be awarded to students successfully performing U-bend tests to code. The student will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or
equipment. 1 hr. lecture, 6 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 127
Welding Processes (2 CR)
Upon successful completion of this course, the student should be able to identify various welding processes used by industries. Standard shop and maintenance welding processes will be taught and demonstrated. Welds will be tested and inspected according to industry standards. This course can be used by an individual company to train or upgrade train employees and can be customized to fit individual needs. Artists, hobbyist, automotive students or first-time welders will benefit from this class. 1 hr. lecture, 1.5 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 130
Introduction to Gas Metal Arc Welding I (GMAW I) (4 CR)
Prerequisite or corequisite: MFAB 120 or MFAB 127
Upon successful completion of this course, the student should be able to identify the theory of gas metal arc welding (GMAW) and flux-cored arc welding (FCAW). The welding of mild steel plate will occur in all positions on both fillet and groove welds with the GMAW process. Standard AWS terms and definitions will be used. The Plasma Arc Cutting (PAC) metal cutting process will be used to conserve material use and plant preparation. A root and face guide U-bend test will be performed on selected weld test coupons. Students successfully completing U-bends will be awarded a document of standards of acceptability. The student will be required to provide ANSI Z87 safety glasses, and may be expected to provide other basic hand tools and/or equipment. 1 hr. lecture, 6 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 140
Maintenance Repair Welding (3 CR)
Prerequisite: MFAB 121 or MFAB 130
Upon successful completion of this course, the student should be able to perform oxyfuel cutting (OFC), shielded metal arc welding (SMAW), gas metal arc welding (GMAW) and plasma arc cutting (PAC). Basic blueprint and standard AWS welding symbols will be introduced. Selected welds and assignments will be tested according to industry and AWS standards. The student will be required to provide ANSI Z-87.1 approved safety glasses and may be expected to provide other basic hand tools and/or equipment as required by employers. This course is designed for individuals who have welding experience or who are employed by a company that requires welding skills. This course can be customized for advanced training. 1 hr. lecture, 2 hrs. lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 152
Manufacturing Materials and Processes (3 CR)
This is a beginning course in metal fabrication technology that is appropriate for the metal fabrication major and other interested students. Upon successful completion of this course, the student should be able to identify various manufacturing materials and processes currently used in industry. The capabilities and applications of machine tool, general fabrication, welding processes, robotics, cut-off equipment and other manufacturing processes and equipment will be studied. Lectures will be supplemented by class tours and demonstrations of various processes and equipment. Students are required to wear safety glasses

MFAB 160  
Gas Tungsten Arc Welding (4 CR)  
Prerequisite: MFAB 121 or MFAB 130  
This course will cover the basic theory of gas tungsten arc welding (GTAW). The student will weld on mild steel, stainless steel and aluminum in a variety of positions on both fillet and groove welds using the GTAW process, with guided AWS U-bend test being performed on mild steel. AWS qualification/certification will be awarded to successful students who qualify weld to code standards. Students will also use the plasma arc cutting system (PAC) on selected assignments. The students will be required to provide ANSI Z87 safety glasses and may be expected to provide other basic hand tools and/or equipment. 1 hrs. lecture, 6 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 170  
Basic Machine Tool Processes (4 CR)  
Upon successful completion of this course, the student should be able to practice the basic principles of machining as well as the setup and operation of machines. This course is a hands-on course that will include the use of lathes, mills, drills, saws, grinders, cut-off and other types of equipment. Machine tool safety will be emphasized throughout the course. 2 hrs. lecture, 4 hrs. lab/wk.

MFAB 180  
Blueprint and Symbols Reading for Welders (2 CR)  
Upon successful completion of this course, the student should be able to identify basic welding positions and explain, list, sketch, draw, use or describe current American Welding Society (AWS) welding symbols and weld joint configurations. The student will be introduced to several methods of producing welding blueprints, object representatives, and specific meanings of selected lines, surface features, sectional views and basic math formulas used in the welding industry. The student will be able to identify the symbols used for fillet welds and groove welds made with and without backing. Topics such as pipe welding representations, pipe welding connections, pipe welding classifications, welder certification, metallurgical effects of heat on metals and the importance of weld quality and welding safety will be studied. 4 hrs. lecture/wk.

MFAB 230  
Gas Metal Arc Welding II (4 CR)  
Prerequisite: MFAB 130  
Upon successful completion of this course, the student should be able to identify the theory of gas metal arc welding (GMAW). The student will weld with the GMAW process in the flat, horizontal, vertical up and overhead positions on both fillet and groove welds. The GMAW welds will be made on aluminum and stainless steel AWS U-bend test will be made on overhead and horizontal weldments. 1 hr. lecture, 6 hrs. lab/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $150.

MFAB 240  
Metallurgy (2 CR)  
Metallurgy is the study of the science and technology of metals. This course covers the extractive, mechanical and physical phases of metallurgy. Topics include the identification of metals, types and classification of metals, heat
treatment procedures and common steel manufacturing processes. AWS terms and definitions will be emphasized throughout the course. 2 hrs. lecture-demonstration/wk.

MFAB 260
Fabrication Practices I (4 CR)

Prerequisite: Metal Fabrication Combination Welder Certificates I and II or have earned the Metal Fabrication Vocational Certificate or equivalent advanced welder training course work to be approved by program administrator/facilitator

Upon completion of this class, the student should be able to work from discipline specific drawings to manufacture and assemble a mock building section using already acquired skills. This class is a capstone course and is intended to serve all MFAB graduate students who have completed the fundamental skills coursework within the metal fabrication certificate or degree programs. The Fabrication Practices I class is part one of an advanced comprehensive class intended to put to practical use the skills obtained throughout the existing Metal Fabrication and Welding Technology Career program. This class will put emphasis on structural steel, its erection and assembly. The coursework will focus on modern welding fabrication techniques and practices used in the manufacturing and installation of structural steel, piping systems, and miscellaneous welded mechanical items. Students will work in teams from discipline specific drawings to manufacture and assemble a mock building section using already acquired skills. Completers of this class may elect to test to the AWS Entry Level I Welder program and the National Center for Construction Education and Research (NCCER) accreditation and national registry. 1 hr lecture, 6 hrs lab/wk.

MFAB 261
Fabrication Practices II (4 CR)

Prerequisite: Metal Fabrication Welder Certificates I and II, or have earned the Metal Fabrication Vocational Certificate or equivalent advanced welders training coursework to be approved by program administrator/facilitator

Upon completion of this class, the student should be able to work from discipline specific drawings to manufacture and assemble a mock building section using already acquired skills. This class is intended to serve all MFAB graduate students and current MFAB students who have completed the fundamental skills coursework within the metal fabrication certificate or degree programs. The Fabrication Practices II class is part two of an advanced comprehensive class intended to put to practical use the skills obtained throughout the existing Metal Fabrication and Welding Technology Career program. This class will put emphasis on pressure holding tanks and pressure vessels. Coursework will focus on modern welded fabrication techniques and practices used in the manufacturing and installation of steel pipe, tank and vessel systems, and miscellaneous welded mechanical structural items. Students will work in teams of three or four persons. Teams will work from discipline specific drawings to manufacture and assemble a mock tank/vessel section using skills already acquired. Completers of this class may elect to test to the AWS Entry Level II Welder program and the National Center for Construction Education and Research (NCCER) accreditation and national registry. 1 hr. lecture, 6 hrs lab/wk.

MFAB 271
Metal Fabrication Internship (3 CR)

Prerequisite: Program facilitator approval

Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students with on-the-job experience under the supervision of professionals in the industry. The work will be developed cooperatively with area employers, college staff and each student to provide a variety of actual job experiences directly related to the student's career goals. 1 hrs. lecture, 15 hrs. minimum on-the-job training/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $30 to $150.

Music (MUS)

MUS 121
Introduction to Music Listening (3 CR)
This course is designed to enhance student music listening. Students will learn to identify changes in the elements of music through the different stylistic periods of classical music. Factual and historical information will be presented to broaden the student’s cultural and music appreciation. Students will hear recorded examples of music from the Medieval, Renaissance, Baroque, Classical, Romantic and 20th-century eras, as well as popular American forms and music from non-Western cultures. 3 hrs./wk.

MUS 123
Introduction to Music Fundamentals (2 CR)
This course is designed to present the fundamentals of music theory to students who have no previous background or training in that subject. Students will receive detailed instruction in naming notes; scales and chords; building intervals; and correlating these skills to the keyboard. 2 hrs./wk.

MUS 125
Introduction to Jazz Listening (3 CR)
This is an entry-level course for the student with little or no prior knowledge of the American art form of jazz music. Through reading and listening, the student will learn the basic structure of the elements of music and how these are organized to create jazz. Topics to be covered will include rhythm, harmony, and form; Dixieland style; swing style; bop; and contemporary jazz. 3 hrs./wk.

MUS 126
Introduction to World Music (3 CR)
This course provides students with an introduction to the musical heritage of the world. Through an interdisciplinary approach targeting the arts, humanities and social sciences, the course fosters skills necessary to gain a deeper appreciation of both familiar and unfamiliar musical traditions. The course will survey a representative cross section of the major musical traditions of the world, which may include Native American, Black American, sub-Saharan African, Eastern European/Bosnian, Indian, Indonesian, Japanese and Latin American/Brazilian traditions. Note: The course does not require the ability to read music. 3 hrs. lecture/wk.

MUS 131
Sight-Singing and Ear Training I (2 CR)
This course is an introduction to sight singing and ear training. Basic methods of reading music are presented and practiced. Students are also trained to recognize aurally and notate the basic elements of music: intervals, diatonic melodies, simple rhythms, chord qualities, and basic harmonic progressions. The content is designed to complement the Harmony I course, though it is not necessary they be taken in the same semester. 2 hrs./wk.

MUS 132
Sight-Singing and Ear Training II (2 CR)
Prerequisite: MUS 131
This course is a continuation of the class Sight-singing and Ear Training I. The content is designed to complement the Harmony II course though it is not necessary they be taken in the same semester. 2 hrs./wk. This course is typically taught in the spring semester.

MUS 133
Sight-Singing and Ear Training III (2 CR)
Prerequisite: MUS 132
This course is a continuation of the classes Sight-singing and Ear Training I and II. The content is designed to complement the Harmony III course, though it is not necessary they be taken in the same semester. 2 hrs./wk.

MUS 134
Sight-Singing and Ear Training IV (2 CR)
Prerequisite: MUS 133
This course is a continuation of the first three courses in sight-singing and ear training. Students are trained to produce and hear the most complex aspects of music theory in the common practice era (1650-1920). The content is designed to complement the Harmony IV course, though it is not necessary they be taken in the same semester. 2 hrs./wk.

MUS 141
Music Theory: Harmony I (3 CR)
This course is a basic study of the harmonic system sited in Western music composed from 1650 to 1900 and still in use in areas of music composition. Students will learn the basic skills involved in writing and analyzing music of this nature as well as play simple chord progressions on the piano. 3 hrs./wk.

MUS 142
Music Theory: Harmony II (3 CR)
Prerequisite: MUS 141 or passing equivalency test
Harmony II is a continuation of the study of the harmonic system used in music composed from 1650 to 1900 and still in use in certain areas of music composition. The course covers use of non-harmonic tones, supertonic and dominant sevenths, functions of the submediant and mediant triads, advanced melodic writing and secondary dominant chords. Students will learn to harmonize melodies at the keyboard and play simple chord progressions on the piano. Music of the period will be analyzed. Selected software programs will enhance student skills and understanding. 3 hrs./wk. This course is typically taught in the spring semester.

MUS 143
Music Theory: Harmony III (3 CR)
Prerequisite: MUS 142 or passing equivalency test
This is a continuation of the study of the harmonic system used in all music composed from 1650 to 1900 and still in use in many areas of music composition today. Important topics include devices of modulation, binary and ternary, and 12 bar blues musical forms and application of part writing procedures to instrumental music. Particular attention will be paid to the nature and functions of diatonic seventh chords, secondary dominants, borrowed chords and Neapolitan chords. Students will work with keyboard harmony exercises of increasing difficulty. Selected software programs will enhance student skills and understanding. 3 hrs./wk.
MUS 144
Music Theory: Harmony IV (3 CR)
Prerequisite: MUS 143 or passing equivalency test
Harmony IV is a continuation of the study of the harmonic practices of tonal music and introduction to 20th-century harmony. Topics include augmented sixth chords, enharmonic modulation, and advanced chromatic harmonies. An introduction to 20th-Century harmonic organization includes extended tertian harmony, modal harmony, parallelism, pandiatonicism, atonality, serialism, and aleatory music. Students will work with keyboard harmony exercises of increasing difficulty. Selected software programs will enhance student skills and understanding. 3 hrs./wk.

MUS 151
Mixed Vocal Ensemble I (1 CR)
Prerequisite: Audition required
Choral ensembles are open to participation by the student body. Choral experience or skill is desired in some ensembles but not in others. The ensemble will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. The literature will be specific to the nature of the group and the skills of the students involved. 3 hrs./wk.

MUS 152
Mixed Vocal Ensemble II (1 CR)
Prerequisites: MUS 151 and audition required
Choral ensembles are open to participation by the student body. Choral experience or skill is desired in some ensembles but not in others. The ensemble will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. The literature will be specific to the nature of the group and the skills of the students involved. 3 hrs./wk.

MUS 153
Mixed Vocal Ensemble III (1 CR)
Prerequisites: MUS 152 and audition required
Choral ensembles are open to participation by the student body. Choral experience or skill is desired in some ensembles but not in others. The ensemble will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. The literature will be specific to the nature of the group and the skills of the students involved. 3 hrs./wk.

MUS 154
Mixed Vocal Ensemble IV (1 CR)
Prerequisites: MUS 153 and audition required
Choral ensembles are open to participation by the student body. Choral experience or skill is desired in some ensembles but not in others. The ensemble will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. The literature will be specific to the nature of the group and the skills of the students involved. 3 hrs./wk.

MUS 156
MIDI Music Composition (3 CR)
MIDI Music Composition I is designed to create a technical and conceptual foundation for further studies in electronic music. Students will learn and demonstrate basic compositional techniques, including form, melody, rhythm and harmony. Also, the student will demonstrate the ability to use computers and software to create and perform music. Emphasis will be on developing skills appropriate to the beginning student for the purpose of creative and technical expression. 2 hrs. lecture, 2 hrs. lab/wk.

MUS 157
Introduction to Digital Audio (3 CR)
Prerequisite: MUS 156
Introduction to Digital Audio is designed to further develop skills acquired in MIDI Music Composition I. Students will practice using ProTools digital audio software, combined with a digital audio interface to record, edit and play back music. Students will be introduced to basic concepts of sound, and common audio effects, including reverb, delay and compression. Students will also further develop their compositional skills through demonstration and practice, and create audio recordings of their music. 2 hrs. lecture, 2 hrs. lab/wk.

MUS 158
Digital Audio Techniques I (4 CR)
Prerequisite: MUS 157
This course is designed to develop both the creative abilities and technical skills needed to produce music using modern digital recording techniques and equipment. Students will acquire an increased proficiency with the operation of ProTools, the industry standard digital audio software, and the corresponding digital audio hardware. Students will demonstrate knowledge of microphone types and techniques by conducting simple recording sessions, from set-up to final mix. 3 hrs. lecture, 2 hrs. lab/wk.

MUS 159
Digital Audio Techniques II (4 CR)
Prerequisites: MUS 158
This course is designed for the student interested in the continued development of the creative abilities and technical skills needed to produce music using modern digital recording techniques and equipment. Students will understand simple copyright types and procedures, and create an itemized budget to establish a digital project studio. Students will demonstrate advanced knowledge of ProTools, and apply final mastering techniques in order to compile a portfolio of original music for personal, academic or professional purposes. 3 lecture, 2 hrs. lab/wk.

MUS 161
Chamber Choir I (1 CR)
Prerequisite: Audition required
This auditioned choral ensemble is open to participation by the student body. Prior choral experience or a reasonable level of music reading and vocal technique is necessary. The choir will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. 3 hrs./wk.

MUS 162
Chamber Choir II (1 CR)
Prerequisites: MUS 161 and audition
This auditioned choral ensemble is open to participation by the student body.
Prior choral experience or a reasonable level of music reading and vocal technique is necessary. The choir will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. 3 hrs./wk.

MUS 163
Chamber Choir III (1 CR)
Prerequisites: MUS 162 and audition
This auditioned choral ensemble is open to participation by the student body. Prior choral experience or a reasonable level of music reading and vocal technique is necessary. The choir will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. 3 hrs./wk.

MUS 164
Chamber Choir IV (1 CR)
Prerequisites: MUS 163 and audition
This auditioned choral ensemble is open to participation by the student body. Prior choral experience or a reasonable level of music reading and vocal technique is necessary. The choir will learn a varied body of choral materials from the choral traditions of both past and present, performing at student and community activities. 3 hrs./wk.

MUS 165
Music Composition I (1 CR)
Prerequisite: MUS 141 or consent of instructor
This entry-level course provides instruction in the craft of musical composition. Traditional compositional techniques and concepts will be studied through demonstration and practice. Students will learn correct notational procedures and compose melodies and short pieces for one or two live performers. 1 hr. lecture/wk.

MUS 166
Music Composition II (1 CR)
Prerequisite: MUS 165
This is an intermediate-level course for students seeking instruction in the craft of musical composition. Traditional compositional techniques and concepts will be studied through demonstration and practice. Students will learn to use a computer to notate their compositions, will begin to work with tonal harmony, will write music for a trio and/or quartet, and will have a piece performed during a music department recital. 1 hr. lecture/wk.

MUS 167
Music Composition III (1 CR)
Prerequisite: MUS 166
This class is an intermediate-level course for the student seeking instruction in the craft of musical composition. Traditional compositional techniques and concepts will be studied through demonstration and practice. Students will enhance their ability to use a computer to notate their compositions, will begin to work with nonfunctional tonal harmony, will write music for SATB choir or for vocal soloist, and will have a piece performed during a music department recital. 1 hr. lecture/wk.
MUS 168  
**Music Composition IV (1 CR)**
*Prerequisite: MUS 167*
This course is an advanced-level class for students seeking further instruction in the craft of musical composition. Traditional compositional techniques and concepts will be studied through demonstration and practice. Students will refine their ability to use a computer to notate their compositions, will continue to work with nonfunctional tonal harmony, will write music for larger ensembles, will have a piece performed in a music department recital, and will compile a portfolio of their work. 1 hr. lecture/wk.

MUS 171  
**Voice Class I (1 CR)**
This course is designed to introduce the student to beginning vocal technique, vocal vocabulary, performance experience and solo vocal repertoire. 1 hr./wk.

MUS 172  
**Voice Class II (1 CR)**
*Prerequisite: MUS 171*
This course is designed to continue instruction in proper vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.

MUS 173  
**Voice Class III (1 CR)**
*Prerequisite: MUS 172*
This course is designed to continue instruction in proper vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.

MUS 174  
**Voice Class IV (1 CR)**
*Prerequisite: MUS 173*
This course is designed to continue instruction in proper vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.

MUS 176  
**Jazz Band I (1 CR)**
*Prerequisite: Audition required*
This is an entry-level course in the jazz band performing format for the student with little or no experience in this course of study. The student will learn, through rehearsal and performance, the basic elements of music and how these are utilized in the jazz band. Topics will include simple rhythms, basic melodic construction and major scale construction. 3 hrs./wk.

MUS 177  
**Jazz Band II (1 CR)**
*Prerequisite: MUS 176 or audition required*
This is a beginning-level course for the student with at least one semester of prior jazz band experience. Through rehearsal and performance, the student will learn beginning elements of music as applied to the jazz band performing format. Topics covered will include syncopated rhythm, Dorian minor scales and blues
MUS 178
Jazz Band III (1 CR)
Prerequisites: MUS 177 and audition required
This is an intermediate-level course for the student with at least two semesters of prior jazz band experience. Through rehearsal and performance, the intermediate levels of jazz band performance will be learned. Topics covered will include Latin style, Mixolydian scales and the 32-bar song form. 3 hrs./wk.

MUS 179
Jazz Band IV (1 CR)
Prerequisites: MUS 178 and audition required
This is an advanced-level course for the student with at least three semesters of prior jazz band experience. Advanced elements of jazz music will be learned through rehearsal and performance. Topics covered will include Lydian scales and ensemble performance techniques. 3 hrs./wk.

MUS 187
Jazz Improvisation I (2 CR)
Prerequisite: Audition
This is an entry-level course for the student with little or no jazz improvisation experience. Through written work and performance on the instrument of choice, the student will learn the basic elements of jazz improvisation. Topics to be covered will include identification and performance of basic intervals, major scales, Dorian modes, Mixolydian modes, major seventh chords, minor seventh chords, dominant seventh chords and the basic blues form. 2 hrs./wk.

MUS 188
Jazz Improvisation II (2 CR)
Prerequisites: MUS 187 and audition required
This is an advanced-level course for the student with at least one semester of jazz improvisation. Through performance on the chosen instrument and written studies, the student will learn advanced concepts of jazz improvisation. Topics to be covered include jazz performance style, construction of the improvised solo and 32-bar song form. 2 hrs./wk.

MUS 191
Concert Band I (1 CR)
Prerequisite: Audition required
This is an entry-level course in the concert band format for the student with little or no concert band experience. Students will learn the basic elements of music as related to the concert band through rehearsal and performance. Topics include counting and subdividing motifs into melodies; and differentiating between major and minor tonalities. 3 hrs./wk.

MUS 192
Concert Band II (1 CR)
Prerequisites: MUS 191 and audition required
This is a beginning-level course in the concert band format for the student with at least one semester of prior concert band experience. Students will learn the
beginning-level elements of music as related to the concert band through rehearsal and performance. Topics to be covered include odd meters, minor scales and homophonic texture. 3 hrs./wk.

**MUS 193**  
**Concert Band III (1 CR)**  
*Prerequisite: MUS 192 or audition required*  
This is an intermediate course for the student with at least two semesters of prior concert band experience. Through rehearsal and performance, the student will learn intermediate levels of the elements of music in the concert band format. Topics will include parade march style, concert march style and concert overture style. 3 hrs./wk.

**MUS 194**  
**Concert Band IV (1 CR)**  
*Prerequisite: MUS 193 or audition required*  
This is an advanced course for the student with at least three semesters of prior concert band performing experience. Through rehearsal and performance, the student will learn the advanced concepts of concert band performance. Topics will include polyphonic texture, concert suite style and medley style. 3 hrs./wk.

**MUS 195**  
**Vocal Jazz Ensemble I (1 CR)**  
*Prerequisite: Audition required*  
This is an entry-level course in the vocal jazz performing format. Through rehearsal and public performance, the student will learn the basic elements of music as applied to vocal jazz. Topics will include 8th note swing, jazz syncopation and 32-bar song form. 3 hrs./wk.

**MUS 196**  
**Vocal Jazz Ensemble II (1 CR)**  
*Prerequisites: MUS 195 and audition required*  
This is a beginning-level course in the vocal jazz performing format. Through rehearsal and public performance, the student will learn the basic elements of music as applied to vocal jazz. Topics will include Dorian minor scales, Mixolydian scales and 12-bar blues form. 3 hrs./wk.

**MUS 197**  
**Vocal Jazz Ensemble III (1 CR)**  
*Prerequisites: MUS 196 and audition required*  
This is an intermediate-level course in the vocal jazz performing format. Through rehearsal and public performance, the student will learn the basic elements of music as applied to vocal jazz. Topics will include beginning improvisation, Latin rhythm and major scales. 3 hrs./wk.

**MUS 198**  
**Vocal Jazz Ensemble IV (1 CR)**  
*Prerequisites: MUS 197 and audition required*  
This is an advanced-level course in the vocal jazz performing format. Through rehearsal and public performance, the student will learn the basic elements of music as applied to vocal jazz. Topics will include scat, improvisation in 32-bar
song form, Lydian scales and ballad style. 3 hrs./wk.

MUS 201  
Chamber Ensemble I (1 CR)  
Prerequisite: Audition required  
This is an entry-level course for the student with little or no experience in the chamber ensemble performing format. Through written work and performance on the chosen instrument, the student will learn the basic fundamentals of this performing medium. Topics to be covered will include tone quality, intervals and rhythmic patterns. 2 hrs./wk.

MUS 202  
Chamber Ensemble II (1 CR)  
Prerequisite: MUS 201 or placement by instructor  
This is a beginning-level course for the student with at least one semester of experience in the chamber ensemble performing format. Through written work and performance on the chosen instrument the student will learn the basic fundamental of this performing medium. Topics to be covered will include minor scales, chord construction and compound rhythms. 2 hrs./wk.

MUS 203  
Chamber Ensemble III (1 CR)  
Prerequisite: MUS 202 or placement by instructor  
This is an intermediate-level course for the student with at least two semesters of chamber ensemble experience. Through written work and performance on the chosen instrument, the student will learn intermediate-advanced concepts of chamber ensemble performance. Topics to be covered include sight reading, intonation and style. 2 hrs./wk.

MUS 204  
Chamber Ensemble IV (1 CR)  
Prerequisite: MUS 203 or placement by instructor  
This is an advanced-level course for the student with at least three semesters of prior ensemble experience. Through performance on the chosen instrument, the student will learn the advanced concepts of chamber ensemble performance. Topics to be covered will include balance and cooperative expression. 2 hrs./wk.

MUS 211  
Orchestra I (1 CR)  
Prerequisite: Audition required  
This is an entry-level course in the orchestra format for the student with little or no orchestra experience. Students will learn the basic elements of music as related to the orchestra through rehearsal and performance. Topics include counting and subdividing duple, triple and quadruple rhythm; assembling melodic motifs into melodies; and differentiating between major and minor tonalities. Students will rehearse and perform with the Overland Park Civic Orchestra. 2 hrs. (1 evening)/wk.

MUS 212  
Orchestra II (1 CR)  
Prerequisites: MUS 211 and audition required
This is a beginning-level course in the orchestra format for the student with at least one semester of prior orchestra experience. Students will learn the beginning-level elements of music as related to the orchestra through rehearsal and performance. Topics to be covered include odd meters, minor scales and homophonic texture. 2 hrs. (1 evening)/wk.

**MUS 213**  
*Orchestra III (1 CR)*  
*Prerequisites: MUS 212 and audition required*  
This is an intermediate course for the student with at least two semesters of prior orchestra experience. Through rehearsal and performance, the student will learn intermediate levels of the elements of music in the orchestra format. Topics will include parade march style, concert march style and concert overture style. (1 evening)/wk.

**MUS 214**  
*Orchestra IV (1 CR)*  
*Prerequisites: MUS 213 and audition required*  
This is an advanced course for the student with at least three semesters of prior orchestra performing experience. Through rehearsal and performance, the student will learn advanced concepts in orchestral performance. Topics will include polyphonic texture, concert suite style and medley style. 2 hrs. (1 evening)/wk.

**MUS 221**  
*Piano Class I (2 CR)*  
This course provides a basic knowledge of music and the essential techniques required to play the piano. Students will learn essential musical terminology, including musical notation and symbols, major and minor key signatures, and the harmonization of melodies using tonic and dominant triads. Specific piano-related terminology will include finger exercises, basic keyboard repertoire using major and minor five-finger patterns, major and minor scales, major and minor triads in root position, ensemble playing of two to four parts, and the formation of good practice habits. Group Piano II should follow the successful completion of this course. Private piano lessons are encouraged for students who successfully complete both courses. 2 hrs./wk.

**MUS 222**  
*Piano Class II (2 CR)*  
*Prerequisites: MUS 221 and instructor approval required*  
This is a beginning-level course that provides a basic knowledge of keyboard instruments. Students will learn and review musical terminology, musical notation and symbols, and specific piano-related terminology. Topics covered will include major and minor key signatures; exercises and repertoire using major and minor scales; exercises and repertoire using major, minor, diminished and augmented triads in root position and inversions; chord progressions; ensemble playing of two to four parts; and use of the damper pedal. This course is the continuation of MUS 221. Completion of this course should precede Applied Piano I. This course is for beginners able to progress at a fast pace, students with minimal previous experience or students who have completed MUS 221. 2 hrs./wk.

**MUS 223**  
*Piano Class III (2 CR)*  
*Prerequisite: MUS 222 or permission of the instructor*  
This is an intermediate course that provides a basic knowledge of keyboard
instruments. Students will learn and review musical terminology, musical notation and symbols, and specific piano-related terminology. Topics covered will include major and minor key signatures; exercises and repertoire using major and minor scales and modes; exercises and repertoire using major, minor, diminished and augmented triads in root position and inversions; chord progressions; ensemble playing of two to four parts; and use of the damper pedal. This course is the continuation of MUS 222. Completion of this course should precede Applied Piano I. This course is designed for students who have completed one year of study or who have completed MUS 222. 2 hrs./wk.

MUS 224  
Piano Class IV (2 CR)  
Prerequisite: MUS 223 or permission of the instructor  
This is an advanced-level course for the student with at least three semesters of prior piano class instruction. Students will learn the advanced concepts of piano playing. Topics to be covered will include basic music notation, major and minor key signatures, tempo indications, major and minor arpeggios, finger patterns, practice method chord progressions, and the use of the damper pedal. 2 hrs./wk.

MUS 226  
Applied Guitar I (Class) (1 CR)  
Students will be provided with a foundation in guitar technique upon which to base further study of the instrument. The course consists of an introduction to the use of the guitar as a solo, accompaniment and ensemble instrument. 1 hr./wk.

MUS 227  
Applied Guitar II (Class) (1 CR)  
Prerequisite: MUS 226 or instructor permission  
This continuation of MUS 226 builds a foundation in guitar technique upon which to base further study of the instrument. The course continues to teach techniques that enable students to use the guitar as a solo, accompaniment and ensemble instrument. 1 hr./wk.

MUS 228  
Applied Guitar III (Class) (1 CR)  
Prerequisite: MUS 227 or instructor permission  
This continuation of MUS 227 is designed to move students from the basic skill level to the intermediate skill level. The course continues to teach techniques that enable students to use the guitar as a solo, accompaniment and ensemble instrument. 1 hr./wk.

MUS 229  
Applied Guitar IV (Class) (1 CR)  
Prerequisite: MUS 228 or instructor permission  
This is a continuation of MUS 228 at an intermediate level of guitar playing skills. The course continues to teach techniques that enable students to use the guitar as a solo, accompaniment and ensemble instrument. 1 hr./wk.

MUS 231  
Applied Voice I (Private) (1 CR)  
This course is designed to introduce the student to beginning vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.
MUS 232
Applied Voice II (Private) (1 CR)
Prerequisite: MUS 231
This course uses private lessons to continue instruction in beginning vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.

MUS 233
Applied Voice III (Private) (1 CR)
Prerequisite: MUS 232
This course uses private lessons to continue instruction in beginning intermediate vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.

MUS 234
Applied Voice IV (Private) (1 CR)
Prerequisite: MUS 233
This course uses private lessons to continue instruction in intermediate vocal technique, vocal vocabulary, performance experience and solo vocal repertoire.

MUS 236
Applied Piano I (Private) (1 CR)
This is an entry-level course for the student with little or no prior piano training. This course provides a basic knowledge of keyboard instruments. Students will learn essential musical terminology, musical notation and symbols, and specific piano-related terminology. Topics covered will include major and minor key signatures; exercises and repertoire using major and minor five-finger patterns; and exercises and repertoire using major and minor scales.

MUS 237
Applied Piano II (Private) (1 CR)
Prerequisite: MUS 236
This is a beginning-level course for the student with at least one semester of prior applied piano study. Students will learn the intermediate-level concepts of piano performance. Topics to be covered will include major scales and the natural and harmonic forms of the minor scales, rhythmic patterns and subdivisions of duple and triple meter and the basic keyboard literature of the intermediate level.

MUS 238
Applied Piano III (Private) (1 CR)
Prerequisite: MUS 237
This is an intermediate-level course for the student with at least two semesters of prior applied piano study. Students will learn the intermediate-level concepts of piano performance. Topics to be covered will include scale, the melodic form of the minor scale, rhythmic patterns and subdivisions of compound meter, and the basic keyboard literature of the intermediate level.

MUS 239
Applied Piano IV (Private) (1 CR)
Prerequisite: MUS 238
This is an advanced-level course for the student with at least two semesters of
prior applied piano study. Students will learn the intermediate level concepts of piano performance. Topics to be covered will include Dorian and Mixolydian modes, pentatonic scales and performance of a Chopin etude.

**MUS 241**
**Applied Guitar I (Private) (1 CR)**
In this private study in basic guitar technique, emphasis will be upon playing position, posture, tone production and basic music reading skills. Students will begin with studies and short pieces.

**MUS 242**
**Applied Guitar II (Private) (1 CR)**
**Prerequisite: MUS 241 or instructor approval**
This is a continuation of private study in basic guitar technique. Emphasis will be upon playing position, posture, tone production and basic music-reading skills. Students will begin with studies and short pieces.

**MUS 243**
**Applied Guitar III (Private) (1 CR)**
**Prerequisite: MUS 242 or instructor approval**
In this private study in intermediate guitar technique, emphasis will be on playing position, posture, tone production and intermediate music reading skills. Students will progress toward playing literature requiring intermediate skill levels.

**MUS 244**
**Applied Guitar IV (Private) (1 CR)**
**Prerequisite: MUS 243 or instructor approval**
In this continuation of private study in intermediate guitar technique, emphasis will be on playing position, posture, tone production and intermediate music reading skills. Students will progress toward playing literature requiring intermediate skill levels.

**MUS 246**
**Applied Classical Guitar I (Private) (1 CR)**
Private study in basic classical guitar technique and repertoire. Emphasis will be upon classical left- and right-hand technique, playing position, posture, tone production and standard classical guitar literature. Students will begin with studies and short pieces.

**MUS 247**
**Applied Classical Guitar II (Private) (1 CR)**
**Prerequisite: MUS 246 or instructor approval**
This continuation of private study in basic classical guitar technique and repertoire will emphasize classical left- and right-hand technique, playing position, posture, tone production and standard classical guitar literature. Students will continue with studies and short pieces, then progress toward longer pieces with the intent of performing these in a recital situation.

**MUS 248**
**Applied Classical Guitar III (Private) (1 CR)**

*Prerequisite: MUS 247 or instructor approval*

In this private study in intermediate classical guitar technique and repertoire, emphasis will be on classical left- and right-hand technique, playing position, posture, tone production and standard classical guitar literature. Students will progress toward playing and performing more advanced pieces and guitar studies.

**MUS 249**

**Applied Classical Guitar IV (Private) (1 CR)**

*Prerequisite: MUS 248 or instructor approval*

This continuation of private study in intermediate classical guitar technique and repertoire will emphasize classical left- and right-hand technique, playing position, posture, tone production and standard classical guitar literature. Students will progress toward playing and performing more advanced pieces and guitar studies.

**MUS 251**

**Applied Brass I (Private) (1 CR)**

This is an entry-level course for the student with little or no experience in performing on a brass instrument. Through written exercises and performance on the instrument of choice, the student will learn the basic concepts of brass performance. Topics to be covered include tone production, basic musical intervals and major scales.

**MUS 252**

**Applied Brass II (Private) (1 CR)**

*Prerequisite: MUS 251 or placement by instructor*

This is a beginning-level course for the student with at least one semester of prior brass instrument study. Through written exercises and performance on the instrument of choice, the student will learn the beginning concepts of brass performance. Topics to be covered include embouchure development, minor scales and duple and triple rhythmic patterns.

**MUS 253**

**Applied Brass III (Private) (1 CR)**

*Prerequisite: MUS 252 or placement by instructor*

This is an intermediate-level course for the student with at least two semesters of prior brass instrument study. Through written exercises and performance on the instrument of choice, the student will learn the intermediate concepts of brass performance. Topics to be covered include the chromatic scale, quadruple rhythmic patterns and chord construction.

**MUS 254**

**Applied Brass IV (Private) (1 CR)**

*Prerequisite: MUS 253 or placement by instructor*

This is an advanced-level course for the student with at least three semesters of prior brass instrument study. Through written exercises and performance on the instrument of choice, the student will learn the advanced concepts of brass performance. Topics to be covered include the pentatonic scale, whole tone scale and melodic contours.
MUS 256  
**Applied Percussion I (Private)** (1 CR)  
This is an entry-level course for the student with little or no training in percussion instruments. The student will learn the beginning concepts of percussion performance. Topics to be covered include basic duple and triple rhythm, snare drum rudiments and basic snare drum performance patterns.

MUS 257  
**Applied Percussion II (Private)** (1 CR)  
*Prerequisite: MUS 256 or placement by instructor*  
This is a beginning-level course for the student with at least one semester of prior instruction in percussion instruments. The student will learn beginning concepts of percussion performance. Topics to be covered include compound rhythm, snare drum rudiments and basic timpani skills.

MUS 258  
**Applied Percussion III (Private)** (1 CR)  
*Prerequisite: MUS 257 or placement by instructor*  
This is an intermediate-level course for the student with at least two semesters of prior instruction in percussion instruments. The student will learn beginning concepts of percussion performance. Topics to be covered include snare drum rudiments, basic mallet percussion skills and suspended cymbal skills.

MUS 259  
**Applied Percussion IV (Private)** (1 CR)  
*Prerequisite: MUS 258 or placement by instructor*  
This is an advanced-level course for the student with at least three semesters of prior instruction in percussion instruments. The student will learn advanced concepts of percussion performance. Topics to be covered include snare drum rudiments, crash cymbal techniques and drum set skills.

MUS 261  
**Applied Woodwind I (Private)** (1 CR)  
This is an entry-level course for the student with little or no experience performing on a woodwind instrument. Through written exercises and performance on the instrument of choice, the student will learn the basic elements of woodwind performance. Topics to be covered include tone production, basic intervals and major scales.

MUS 262  
**Applied Woodwind II (Private)** (1 CR)  
*Prerequisite: MUS 261 or placement by instructor*  
This is a beginning-level course for the student with at least one semester of prior woodwind study. The student will learn beginning concepts of woodwind performance on the chosen instrument through written exercises and performance. Topics to be covered include embouchure development, minor scales and duple and triple meters.

MUS 263  
**Applied Woodwind III (Private)** (1 CR)  
*Prerequisite: MUS 262 or placement by instructor*
This is an intermediate-level course for the student with at least two semesters of prior woodwind study. The student will learn the intermediate concepts of woodwind performance through written exercises and performance. Topics to be covered include chromatic scale, quadruple rhythmic patterns and chord construction.

**MUS 264**  
**Applied Woodwind IV (Private)** (1 CR)  
*Prerequisite: MUS 263 or placement by instructor*  
This is an advanced-level course for the student with at least three semesters of prior woodwind study. Through written exercises and performance, the student will learn the advanced concepts of woodwind performance. Topics to be covered include pentatonic scale, whole tone scale and melodic contour.

**MUS 266**  
**Applied Harp I (Private)** (1 CR)  
This course is the first college level course for harp students. The student will work in a studio setting with an instructor. Assignments will be based on the individual student's readiness, but work will emphasize growth in areas of technical development, understanding musical styles, developing music vocabulary and building a performance repertoire. 1/2 hr./wk.

**MUS 267**  
**Applied Harp II (Private)** (1 CR)  
*Prerequisite: MUS 266*  
This course continues the work in Applied Harp I. The student will work in a studio setting with an instructor. Assignments will be based on the individual student's readiness. Work will emphasize further growth in areas of technical development, understanding musical styles, developing music vocabulary and building a performance repertoire. 1/2 hr./wk.

**MUS 268**  
**Applied Harp III (Private)** (1 CR)  
*Prerequisite: MUS 267*  
This course continues the work in Applied Harp II. The student will work in a studio setting with an instructor. Assignments will be based on the individual student's readiness. Work will emphasize further growth in areas of technical development, understanding musical styles, developing music vocabulary and building a performance repertoire. 1/2 hr/wk.

**MUS 269**  
**Applied Harp IV (Private)** (1 CR)  
*Prerequisite: MUS 268*  
This course continues the work in Applied Harp III. The student will work in a studio setting with an instructor. Assignments will be based on the individual student's readiness. Work will emphasize further growth in areas of technical development, understanding musical styles, developing music vocabulary and building a performance repertoire. 1/2 hr./wk.

**Nursing (NURS)**
NURS 124  
Foundations of Nursing (9 CR)  
Prerequisites: Admission to the Nursing Program and current certification in Kansas as Certified Nursing Assistant (CNA) and Cardiopulmonary Resuscitation Certification (CPR) for Health Care Providers and CHEM 122 and MATH 116 or higher level MATH course and corequisite: BIOL 144 and PSYC 130  
This course is the first in a sequence of five nursing courses. Students will acquire nursing knowledge and skills necessary to care for patients across the health care continuum. Students will use a critical thinking approach to apply fundamental principles of nursing to patient care. In the clinical component, students will apply theoretical content and therapeutic interventions to patients with health alterations. Course instruction will occur in the classroom, online, in the health resource center and healthcare agencies. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. lecture, 1 hr. lab, 15 hr. clinical/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $540 to $565.

NURS 126  
Nursing Care of the Adult: Health Alterations (9 CR)  
Prerequisites: BIOL 144 and PSYC 130 and NURS 124 and prerequisite or corequisite: PSYC 218  
This course is the second in a sequence of five nursing courses. Students will build on fundamental nursing knowledge and skills acquired in the first nursing course to care for adult patients across the health care continuum. The content will emphasize nursing care of older adults experiencing complex multi-system conditions. The content will also include nursing care for young, middle-aged, and older adults experiencing alterations in mental health. The student will use a critical thinking approach to apply concepts of adaptation, nursing process, therapeutic interactions, communication, and teaching/learning in the care of the culturally diverse patient. In the clinical component, students will apply theoretical content and therapeutic nursing interventions to patients with acute and chronic health alterations. Course instruction will occur in the classroom, online, in the health resource center and health care agencies. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. lecture, 1 hr. lab, 15 hr. clinical/wk.

NURS 136  
LPN-RN Transition Course (6 CR)  
Prerequisites: Completion of LPN program, Current Cardiopulmonary Resuscitation Certificate (CPR) for Health Care Providers and CHEM 122 and MATH 116 or higher and either BIOL 144 or BIOL 140 and BIOL 225 and ENGL 121 and PSYC 130 and PSYC 218  
This course is an introduction to the second year of the associate degree nurse (ADN) program for graduates of licensed practical nurse (LPN) programs. The content will emphasize nursing care for patients experiencing alterations in mental health and complex multi-system conditions. The student will use a critical thinking approach to apply concepts of adaptation, nursing process, therapeutic interactions, and teaching learning in the care of the patient. An in-depth examination of physical assessment and psychomotor/communication skills will prepare the student for transition to the associate degree nursing program. Course instruction will occur in the classroom, online, in the Healthcare Simulation Center, in the Health Resource Center, and health care agencies. Theory: 28 clock hours/week for 4 weeks; 24 hours/week for 3 weeks.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $320.

NURS 228  
Nursing Care of the Childbearing Family (5 CR)
This course is the third or fourth in a sequence of five nursing courses. Students will acquire nursing knowledge and skills necessary to care for the childbearing family. Common alterations, stressors in the family, cultural sensitivity and the art of nursing will be emphasized during the antepartum, intrapartum, postpartum and newborn periods. Students will use principles of therapeutic communication, critical thinking, and teaching/learning to apply nursing process to both normal and high-risk mothers and newborns. In the clinical component, students will apply theoretical content and therapeutic nursing interventions with a caring approach to a culturally diverse population. Course instruction will occur in the classroom, online, in the health resource center and health care agencies. This course will be taken in the same semester with NURS 230, Nursing Care of Children. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. lecture, 1 hr. lab, 15 hrs. clinical/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $160.

NURS 230
Nursing Care of Children (5 CR)
Prerequisites: ENGL 121 and PSYC 218 and NURS 126 Corequisites: BIOL 230 and SOC 122 or SOC 125 and NURS 228
This course is the third or fourth in a sequence of five nursing courses. Students will acquire nursing knowledge skills necessary to care for infants through adolescents on a continuum of health and adaptation that may result in acute or chronic illness. Students will use principles of therapeutic communication, psychosocial concepts, growth and development, critical thinking, and organization to apply the nursing process to culturally diverse populations. In the clinical component, students will apply theoretical content and therapeutic nursing interventions to infants/children/adolescents with acute and/or chronic health alterations. Course instruction will occur in the classroom, online, in the health resource center and health care agencies. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. lecture, 1 hr. lab, 15 hrs. clinical/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $160.

NURS 232
Complex Patient Care Management (9 CR)
Prerequisites: NURS 228 and NURS 230
This course is the last in a sequence of five nursing courses that will enable students to care for patients experiencing complex multi-system health alterations across the health care continuum. Students will use a critical thinking approach to apply concepts of management to a group of patients in a health care setting. This course integrates knowledge and skills acquired in the previous four courses and facilitates student transition to professional nursing practice. In the clinical component, students will apply theoretical content and therapeutic nursing interventions to a group of patients/families with complex, acute and chronic health alterations. Course instruction will occur in the classroom, online, in the health resource center and health care agencies. 4 hrs. lecture, 1 hr. lab, 15 hrs. clinical/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $450 to $550.

NURS 234
Registered Nurse Refresher (9 CR)
Prerequisite: Previously licensed as a registered nurse, Corequisite: Current CPR certification for health care providers, professional liability insurance, current immunizations, health and dental records up-to-date
The course will prepare the Registered Nurse (RN) to reenter the acute health care setting for employment after an absence from the patient care arena. The course has a general med-surg focus, and will review adult anatomy and physiology, pathophysiology, pharmacology, lab values and key issues related to patient care. The course includes classroom, lab, simulation, clinical and preceptorship experiences.

NURS 236
Registered Nurse Perioperative Nursing (3 CR)
Prerequisites: Currently licensed as a Registered Nurse and current CPR certification for health care providers Corequisite: Could possibly complete CPR while taking this course

This course will prepare the novice perioperative registered nurse (RN) or the RN desiring to enhance employment opportunities in the perioperative setting with basic didactic perioperative content. The course will provide the rationale and theory needed to provide safe patient care in the perioperative setting as an operating room nurse. The course is designed to supplement clinical practice. 2 hrs lecture 1 hr. lab/wk.

NURS 238
Registered Nurse Perioperative Clinical (2 CR)
Prerequisites: Currently licensed as a Registered Nurse and current CPR certification for health care providers Corequisite: NURS 236

This course will prepare the novice registered nurse (RN) desiring to enhance employment opportunities in the perioperative setting with basic perioperative skill competencies. The clinical practice will be in the perioperative setting to provide a realistic experience for the student. 192 clinical hours

Occupational Therapy Assistant (KOT)

KOT 100
Introduction to Occupational Therapy (2 CR)
Introduction to the history, philosophy and practice of occupational therapy. Exploration of diversity and the role it plays in health care. 2 hrs. lecture/wk.
Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 102
Documentation Guidelines (2 CR)
Prerequisite: Formal admission into the occupational therapy assistant program
Guidelines for documentation of occupational therapy services. 2 hrs. lecture/wk.
Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 103
Clinical Conditions (2 CR)
Prerequisite: Formal admission into the occupational therapy assistant program
Etiology, clinical process and prognosis of common diseases and illnesses. Effect of disease or illness on an individual's performance and the impact this has on the person, family and society. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the
occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 106
Therapeutic Interventions I (4 CR)
Prerequisite: Formal admission into the occupational therapy assistant program
Basic therapeutic interventions, techniques, applications and legislation pertinent to OT practice. Learn OT's role in promoting health and wellness. 2.5 hrs. lecture, 3 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 112
Basic Emergency Patient Care (1 CR)
This course introduces current cardiopulmonary resuscitation skills, including adult, child and infant resuscitation, according to American Heart Association standards. Medical and environmental emergencies are reviewed. 1 hr. lecture/wk. Course taught at Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 116
Level I Fieldwork I (1 CR)
Prerequisite: Formal admission into the occupational therapy assistant program
Introduction to the role, policies and procedures of fieldwork. Directed experience in a specified community setting. 0.5 hr. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 118
Assistive Technology (2 CR)
Prerequisites: BIOL 144 and BIOL 145, KOT 112, KOT 100, 102, 103, 106 and 116
Hands-on introduction to high-tech assistive technology and augmentative communication. 1 hr. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 120
Pediatrics (3 CR)
Prerequisites: KOT 112, BIOL 144 and BIOL 145 and KOT 100, KOT 102, KOT 103, KOT 106 and KOT 116
Occupational therapy practice as it relates to individuals from birth to early adolescence. Study of normal growth and development. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of occupational therapy assistant about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 121
Level I Fieldwork II
Prerequisites: BIOL 144 and BIOL 145, KOT 112, and KOT 100, KOT 102, KOT 103, KOT 106 and KOT 116 and concurrent enrollment in KOT 120
Directed experience in a specified community setting. Course is .5 credit hour. 1 hr. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KOT 130**

**Analysis of Physical Performance (3 CR)**

*Prerequisites: KOT 112, BIOL 144 and BIOL 145, KOT 100, KOT 102 KOT 103 KOT 106 and KOT 116*

Analysis and evaluation of the components of physical performance and their relationship to functional activities. 2 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KOT 154**

**Applied Neurology (2 CR)**

*Prerequisites: BIOL 144 and BIOL 145, MCC BIOL 210, and admission to OTHA or PTHA program.*

Foundations of neuroscience necessary for practice as a rehabilitation professional. Anatomy and function of the nervous system. Correlation of Clinical problems with pathology of the nervous system. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KOT 173**

**Special Topics (2 CR)**

*Prerequisite: Concurrent enrollment in physical therapy assistant or occupational therapy assistant programs or completion of an associate or advanced degree in physical therapy or occupational therapy*

A study of advanced topics relevant to the current practice of rehabilitation. Cross listed as KPT 173. 2 hrs. lecture/wk. Course taught at Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KOT 201**

**Mental Health (2.5 CR)**

*Prerequisites: KOT 118 and KOT 120 and KOT 121 and KOT 130 and KOT 154*

Occupational therapy assessment and treatment techniques in the mental health setting. 2 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KOT 202**

**Physical Dysfunction (3 CR)**

*Prerequisites: KOT 118 and KOT 120 and KOT 121 and KOT 130 and KOT 154*

Occupational therapy assessment and treatment used with the physically and cognitively challenged population. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KOT 203**
Gerontology (3 CR)
Prerequisites: KOT 118 and KOT 120 and KOT 121 and KOT 130 and KOT 154
Concepts and processing of aging. The role of occupational therapy with the elderly. 3 hr. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 208
Therapeutic Interventions II (2 CR)
Prerequisites: KOT 118 and KOT 120 and KOT 121 and KOT 130 and KOT 154
Advanced therapeutic interventions and techniques used to enhance functional ability and independence in daily life tasks and occupations. 1 hr. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 212
Level I Fieldwork III (2 CR)
Prerequisites: KOT 118 and KOT 120 and KOT 121 and KOT 130 and KOT 154
Directed experience in specified community settings. 4 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 217
Fieldwork Seminar (3 CR)
Prerequisites: KOT 118 and KOT 120 and KOT 121 and KOT 130 and KOT 154
Preparation for full-time clinical practice, the national certification process, state licensure, and future employment. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KOT 222
Level II Fieldwork (12 CR)
Prerequisites: KOT 201, KOT 202, KOT 203, KOT 208 and KOT 212 and KOT 217
Directed clinical experience in different practice areas of occupational therapy. 40 hrs. field studies/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the occupational therapy assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

Philosophy (PHIL)

PHIL 121
Introduction to Philosophy (3 CR)
Students will examine the basic questions of philosophical inquiry, such as the nature of being, and the ways humans acquire knowledge and moral, social, religious and political values. Emphasis is on the application of the study of traditional problems of philosophy to the study of contemporary society. 3 hrs./wk.
PHIL 124
Logic and Critical Thinking (3 CR)
This course is an inquiry into techniques of persuasion and the standards for interpretation and assessment that are the basis for critical thinking. Argumentative and non-argumentative forms of persuasion are examined, including propaganda, exaggeration, stereotyping, slanted news and common fallacies. In addition, the course offers standards for evidential warrants based on samples, probabilities and causal claims. Relations between categorical propositions and Venn diagrams are examined and, finally, the course suggests strategies for fresh attacks on conceptual problems. 3 hrs./wk.

PHIL 138
Business Ethics (1 CR)
This course applies classical and contemporary theories of morality to problems, questions and dilemmas arising in business. Using the major concepts and principles of deontological, consequentialist and perfectionist theories, it examines and analyzes cases involving such areas as employer/employee relations, corporate responsibility, truth telling in business and workplace diversity. Emphasis is on the development of moral reasoning skills that allow for meaningful analysis and evaluation of moral situations. 1 hr./wk.

PHIL 143
Ethics (3 CR)
This course provides a systematic and critical study of values related to human conduct. It focuses on both traditional standards of ethical conduct and qualities of personal character. What we hold to be right or wrong, the basis for believing so, and what we consider to be virtues or vices are examined with an eye to understanding our current ethical situation. 3 hrs./wk.

PHIL 154
History of Ancient Philosophy (3 CR)
This course provides a thorough exploration of ancient Greek and Roman philosophical thought from the original efforts of the Pre-Socratics to understand the fundamental operations of the natural world to concerns about the way a person might live successfully in nature and society. Also explored are the notable Athenians of the classical period, Protagoras, Socrates, Plato and Aristotle, and the later schools of thought such as cynicism, skepticism, hedonism and stoicism. In the process, it provides a comprehensive understanding of the philosophical foundations of the Western world view. 3 hrs./wk.

PHIL 161
Elementary Symbolic Logic (3 CR)
This course is a beginning course in symbolic logic and should be of particular benefit to those students who will pursue more advanced studies in linguistics, philosophy of language, mathematics or computer science. Students will be introduced to modern analytical techniques of formal deductive logic. Students should gain the ability to use a formal language to translate English language arguments and the ability to demonstrate the validity or invalidity of symbolic arguments using the techniques of truth-table analysis and formal proof. Some attention will also be given to the historical development of symbolic logic. 3 hrs./wk.

PHIL 176
Philosophy of Religion (3 CR)
This course is an inquiry into the nature of religion, religious thought and religious language. It addresses philosophical topics such as the nature of religious belief,
the apparent need of some people for religion, the arguments offered as proof for and against the existence of God, apparent contradictions between scientific and religious teachings, special problems raised by religious language, and the changes religion and philosophy of religion have made to accommodate a modern world view. 3 hrs./wk.

PHIL 210
History of Modern Philosophy (3 CR)
Prerequisite: PHIL 121 or PHIL 143 or HIST 125 or HIST 126
This course takes a historical approach to the development of modern philosophy and covers the period from the Renaissance to the 20th-century. The course will cover the epistemological, metaphysical and relevant axiological issues of the major philosophers and philosophical movements of this period. The course will also examine the influence of modern philosophy on contemporary thought. 3 hrs. lecture/wk.

Photography (PHOT)

PHOT 121
Fundamentals of Photography (3 CR)
This course provides an introduction to the tools, procedures, concepts and application of photographic imaging. Students will use cameras, light meters and darkroom equipment for film developing and printing to make images to meet the requirements of a series of assignments designed to develop specific skills, competencies and points of view and to stimulate the students’ creative capacities for personal expression, communication and self-understanding. Students must provide their own camera with adjustable focus, shutter speeds and aperture. 6 hrs. lecture, lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $150 to $175.

PHOT 122
Advanced Photography (3 CR)
Prerequisite: PHOT 121
This course provides an introduction to advanced techniques, tools, procedures and concepts of photographic imaging, with an emphasis on black-and-white photography as a fine art. Students will use Zone System tests and procedures to produce prints of maximum quality. Students will use advanced techniques, such as split-developers for contrast control, multiple-imaging and archival processing, and print presentation. Several "alternative" printing processes will be discussed and demonstrated. This course also includes a basic introduction to medium format (2 1/4) and large format (4 x 5) camera equipment and technique. Students will apply the above to make images for a series of conceptually advanced, project/series-oriented assignments to stimulate the student's creative capacities for personal expression, communication and self-understanding. 6 hrs. lecture, lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $150.

PHOT 123
Studio Photography (3 CR)
Prerequisite: PHOT 121
This course provides an introduction to advanced techniques, tools, procedures and concepts of studio and commercial photography. Students will use professional camera and studio equipment, including studio electronic flash and hand-held light/flash meters. This course also includes an introduction to
professional medium format (2 1/4) and large format (4"x5") equipment and advanced camera techniques for total image control. Students will use studio lighting for various portraiture styles and for small-product, table-top photography. Applications of digital photography as they apply to studio photographic processes will be introduced. Students will apply the above to make images for a series of advanced studio assignments. 6 hrs. lecture, lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75 to $150.

PHOT 125
Photography for Publication (3 CR)
Prerequisite: PHOT 121
This course provides an introduction to the concepts and application of photographic imaging for media publication. Students will use cameras, computers, software, scanners and image-output devices to master the issues, concepts and constraints involved in creating images for a broad range of publication needs. They will prepare and format digitized image files for storage, transmission and print-based and Web-based reproduction. This course is designed to meet the photographic imaging needs of journalism students. 6 hrs. lecture, lab/wk.

PHOT 128
Digital Photography (3 CR)
This course is an introduction to the concepts, tools and technology of digital imaging for photographers. Students will develop competence in the use of digital photographic equipment, software, storage devices and printers to produce digital photographic images satisfying the requirements of a series of assignments designed to develop specific skills and competencies. Students will "capture," manipulate, correct, transmit, store and output images. They will use digital technology to produce images for commercial and/or artistic applications. Ethics and cultural implications of the technology will be discussed. 6 hrs. lecture, lab/wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $75 to $150.

Physical Ed, Health & Rec (HPER)

HPER 100
Basketball (Beginning) (1 CR)
Students will have an opportunity to learn fundamental basketball skills through demonstration and discussion of strategies for team play. Emphasis is on individual participation. 2 hrs./wk.

HPER 101
Basketball (Intermediate) (1 CR)
Prerequisite: HPER 100
Students will have an opportunity to learn intermediate basketball skills through demonstration and discussion of strategies for team play. This course will advance the skills of the student who successfully completed the beginning basketball course. Emphasis is on individual participation and competition team play. 2 hrs./wk

HPER 102
Navigation 102: Orientation at JCCC (1 CR)
This course is designed to help students transition from past experiences to
college life. The topics will focus on four key areas, including practical life skills, wellness-related presentations, working with diverse individuals and groups, and academic skills enhancement. Thus, the goal of this course is to provide students with a valuable living and learning experience that equips them with the tools necessary to be academically successful and remain in school. This course will help students "navigate" through their first semester at JCCC. 2 hrs. lecture/wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

**HPER 103**  
**Touch/Flag Football** (1 CR)  
The fundamentals of touch and flag recreational football will be introduced as well as strategies necessary for team play. 2 hrs./wk.

**HPER 104**  
**Yoga** (1 CR)  
This class will utilize techniques from yoga which aim to provide mind/body benefits including better posture and increased body awareness. Muscular strength and flexibility will be developed through poses and positions. This class will be geared towards all students, both beginners as well as those who have previous training. 3 hrs. activity/wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $12 to $15.

**HPER 105**  
**Bowling (Beginning)** (1 CR)  
The student will have the opportunity to learn and practice the fundamentals of bowling. The student will be introduced to the history of the game, rules, equipment and lane specifications, scoring, handicap calculations, and operation of automatic scoring equipment. 2 hrs./wk. HPER mini-courses meet an additional 16 hours on a modular schedule.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $34.

**HPER 107**  
**Bowling (Intermediate)** (1 CR)  
Prerequisite: HPER 105  
Students will demonstrate advanced fundamentals of bowling. The student will acquire advanced knowledge of the history of the game, rules, equipment and lane specifications. Intermediate to advanced bowling competition will be explored. 2 hrs./wk. HPER mini-courses meet an additional 16 hours on a modular schedule.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $34.

**HPER 110**  
**Racquetball (Beginning)** (1 CR)  
A brief history of rules and terminology of racquetball will be followed by instruction and actual practice and application of the fundamentals. 2 hrs./wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $45 to $200.

**HPER 112**  
**Racquetball (Intermediate)** (1 CR)  
Prerequisite: HPER 110  
Students will review the rules and terminology of racquetball, as well as
demonstrate the basic skills. The student will demonstrate skills and strategies in a competitive format and use the mental preparation and conditioning aspects of the game of racquetball. The intermediate racquetball student will apply skills in a competitive format. 2 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $45 to $200.

**HPER 115**  
**Soccer (1 CR)**  
The fundamentals of soccer will be introduced as well as strategies necessary for team play. 2 hrs./wk.

**HPER 117**  
**Power Volleyball (Beginning) (1 CR)**  
The basic skills of volleyball taught in this class include the forearm pass, overhead set, serve, block and spike (attacking). Elementary offense and defense along with volleyball rules, scoring and officiating will be covered. 2 hrs./wk.

**HPER 118**  
**Power Volleyball (Intermediate) (1 CR)**  
*Prerequisite: HPER 117*  
Students will have the opportunity to build upon the basic fundamentals of the Power Volleyball (Beginning) class. Intermediate skills, strategies, offensive and defensive systems and rules will be covered for six-player, four-player, three-player, and two-player volleyball. 2 hrs./wk.

**HPER 130**  
**Running Awareness and Exercise (1 CR)**  
The course will introduce the student to aerobic fitness through the activity of running. The training principles for running and competitive racing will be covered, and the individual will complete a personal running and/or racing training program. 2 hrs./wk.

**HPER 134**  
**Weight Training (Beginning) (1 CR)**  
In this class, muscular strength and endurance will be developed through weight training activity. A workout program will be implemented for each student. The muscular system, basic terminology of weight training and weight training theory will be discussed. 2 hrs./wk.

**HPER 135**  
**Weight Training (Intermediate) (1 CR)**  
*Prerequisite: HPER 134*  
In this class, muscular strength and endurance will be developed. A self-designed and directed resistance workout program will be implemented. The proper use of a training log and personal fitness evaluation techniques will be discussed. 2 hrs./wk.

**HPER 137**  
**Tennis (Beginning) (1 CR)**
Students will get individualized instruction in this course on the rules, terminology and history of tennis. The student will receive instruction on the basic strokes of tennis, as well as the strategies of singles and doubles play. 2 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $40.

**HPER 138**
**Tennis (Intermediate) (1 CR)**

*Prerequisite: HPER 137*

Students will review the rules, terminology and history of tennis. The student will receive instruction on the strokes of tennis, as well as the strategies of singles and doubles play in a competitive format. Emphasis will be on the mental and physical conditioning of the game. 2 hrs./wk. HPER mini-courses meet an additional 16 hours on a modular schedule.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $40.

**HPER 140**
**Modern Dance (Beginning) (1 CR)**

This course emphasizes the movement between positions rather than the picture-perfect poses of ballet and other dance styles. Moving through space off of and onto the floor, breathing and moving improvisationally will be explored. 2 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $12 to $40.

**HPER 142**
**Modern Dance (Intermediate) (1 CR)**

*Prerequisite: HPER 140*

A continuation of Modern Dance (Beginning), this course presents more difficult and longer movement combinations. Students further explore their creativity through elements of improvisations, choreography and performance while gaining greater muscular flexibility and strength. 2 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $12 to $40.

**HPER 150**
**Aerobics (Beginning) (1 CR)**

Motor skills, jogging and dance steps are combined in this exercise program to improve muscle tone and cardiovascular fitness. 2 hrs. wk.

**HPER 152**
**Aerobics (Intermediate) (1 CR)**

*Prerequisite: HPER 150*

The motor skills, jogging and dance steps are performed at faster pace for a longer period of time than in Aerobics (Beginning). The course will introduce the student to the fitness benefits from increased duration and intensity of aerobic activities. 2 hrs./wk.

**HPER 155**
**Ballet (Beginning) (1 CR)**

This progressive ballet system is designed to produce muscular strength and flexibility and a working knowledge of anatomy, plus the aesthetic satisfaction of expressing yourself through a classical art form. Offered to students of all ages and experience, both beginners as well as those who have had some training. 2 hrs./wk.
HPER 157
Ballet (Intermediate) (1 CR)
Prerequisite: HPER 155
A continuation of Beginning Ballet, this progressive ballet system explores multilayered ballet movement in simple dance combinations. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $17 to $30.

HPER 158
Jazz Dance (Beginning) (1 CR)
An introduction to the concepts and motor skills involved with jazz dance. Basic body position will be introduced as well as basic terminology, jazz history, various jazz styles and the basic techniques involved, isolations, combinations, choreography and rhythmic influences. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $7 to $30.

HPER 159
Jazz Dance (Intermediate) (1 CR)
Prerequisite: HPER 158 or equivalent
A continuation of Beginning Jazz Dance, this course will require students to assimilate and execute more difficult isolated dance moves as well as use the basic skills acquired in Beginning Jazz Dance to perform complex dance sequences to a variety of music. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $7 to $30.

HPER 163
Ballroom Dance (Beginning) (1 CR)
This is an introduction to ballroom dance with emphasis on basic patterns and fundamental steps of the waltz, fox trot, swing, polka and cha-cha. Common rules of dance courtesy and a brief overview of ballroom dance history will be included. Music or dance background is not necessary. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $40.

HPER 165
Karate I (1 CR)
The student will receive instruction in the basic fundamentals of karate, including stances, blocks, kicks, strikes and self-defense techniques. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $30.

HPER 166
Karate II (1 CR)
Prerequisite: HPER 165
The student will review the skills from the prerequisite course of Karate I. Students will demonstrate techniques that include the moving block, kicks and positions for karate. The course will also cover combination moves as well as the defensive technique.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $30.

HPER 167
Karate III (1 CR)
Prerequisite: HPER 166
Students will have the opportunity to achieve higher levels of proficiency, routines, kumite (sport/free fighting) and self-defense. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $30.

HPER 168
Karate IV (1 CR)
Prerequisite: HPER 167 Note: Beginning Japanese is a suggested prerequisite
Students in this course will have the opportunity to achieve the advanced level of karate in the following: taiso (exercise), kata (forms), kumite (sport/free fighting) and self-defense application. 2 hrs./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $30.

HPER 172
Track and Field (Beginning) (1 CR)
This course will introduce the student to the sport of track and field. Through activity and discussion the student will improve his or her motor ability to perform track and field events. 2 hrs./wk.

HPER 174
Coaching and Officiating of Track and Field (2 CR)
Students will have the opportunity to learn the fundamentals of coaching and officiating track and field events. Upon successful completion of the course, students will be prepared for USATF Level 1 certification. 2 hrs./wk.

HPER 175
Fencing (1 CR)
Beginning foil fencing will provide the student with the fundamental rules and techniques of foil fencing. The student will utilize these skills in a fencing bout. The student will also be instructed in the rules and procedures of officiating foil fencing. 2 hrs./wk.

HPER 176
Self Defense I (1 CR)
The class will present students with a variety of techniques for escaping a physical attack. Students will receive an introduction to the four ranges of self defense: ground, grappling, striking, and weapons. Students will learn the principles that apply in any self defense situation and the basic positions and structure of each range. The class is appropriate for beginners as well as those with previous self defense or martial arts training. 2 hrs. activity/wk.

HPER 180
Fencing (Intermediate) (1 CR)
Prerequisite: HPER 175
Intermediate fencing will provide the student with advanced techniques and rules of foil fencing and with fundamental techniques and rules of epee fencing. The student will utilize these skills in a fencing competition. The student will also be instructed in the rules and procedures of refereeing foil fencing and organization of fencing competitions. 2 activity hrs./wk.
HPER 182
Swimming (Beginning) (1 CR)
Students in beginning swimming will learn basic swimming skills and safety information that are fundamental to safe swimming performance. 1 hr./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $80.

HPER 183
Swimming (Intermediate) (1 CR)
Prerequisite: HPER 182 or the equivalent
Students in intermediate swimming will learn more advanced swimming strokes, skills and safety information along with increasing personal fitness levels through continuous endurance swimming. 1 hr./wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25 to $80.

HPER 185
Archery (1 CR)
Students will receive individualized instruction in the basic skills of archery as a recreational sport lending itself as a lifetime leisure interest. Safety, fundamental care and usage of archery tackle and beginning archery skills will be taught along with a survey of the history of archery. 2 hrs./wk. HPER 185 Archery classes will meet in the lobby in the gym building by room 116.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $10 to $20.

HPER 190
Golf (1 CR)
The beginning golfer will be given instruction in the rules of and basic swing fundamentals for the game of golf. Proper golf equipment, proper use of this equipment and golf etiquette will be reviewed. 2 hrs./wk. HPER mini-courses meet an additional 16 hours on a modular schedule.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $80 to $400.

HPER 192
Wellness for Life (1 CR)
This course introduces students to the theory and principles upon which the concepts of lifetime fitness and wellness are based. Students will examine the relationship that exists between wellness and lifestyle behaviors. Individual self-assessments will be used to establish current health and fitness levels. 1 hr./wk.

HPER 194
Sports Conditioning (Beginning) (1 CR)
Students will have the opportunity to learn the fundamentals of general and sports specific conditioning. All aspects of physical and psychological development are incorporated in this class. Strength, power, speed, acceleration, muscular hypertrophy and endurance, cardiovascular endurance, motor skills and agility drills are taught and practiced. The class will include general physical preparation sport fitness, plyometrics, agility drills and sport-related specific conditioning. The students will learn about the principle of year-round conditioning, including conditioning appropriate to the off-season, preparatory period, pre-competition period and competition period. 2 hrs./wk.

HPER 195
Introduction to Sports Medicine (3 CR)
The purpose of this class is to introduce the basic concepts of sports medicine, specifically Athletic Training. It will address the fundamentals of the human musculoskeletal system, sports related injuries, injury treatment, and other sports medicine related topics. This class is designed for beginning athletic training students and other students interested in the subject. 3 hrs. lecture/wk.

HPER 197
Sports Conditioning (Intermediate) (1 CR)
Prerequisite: HPER 194
Students will have the opportunity to build upon principles and practices of general and sports-specific conditioning learned in Beginning Sports Conditioning. All aspects of physical and psychological development are incorporated in this class. Strength, power, speed, acceleration, muscular hypertrophy and endurance, cardiovascular endurance, motor skills and agility drills are taught and practiced. The class will include general physical preparation, sport fitness and conditioning. Students will continue to learn about the principle of year-round conditioning, including conditioning appropriate to the off-season, preparatory period, pre-competition period and competition period. 2 hrs. lecture/wk.

HPER 198
Athletic Training Practicum I (1 CR)
Corequisite: HPER 195
At the conclusion of this practicum, the student will be able to explain and demonstrate a variety of basic principles and practices in athletic training, including the essentials of record keeping, athletic injury taping and strapping techniques, an introduction to the supervised use of and safety procedures for therapeutic modalities and therapeutic exercise equipment. Major anatomical landmarks and basic anatomy of the major joints of the human body will be identified and palpated. This practicum, intended for athletic training and other allied health students, will be hands-on and conducted under the direct supervision of a certified/licensed athletic trainer. This course may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 16 hrs. lecture, 112 hrs. practicum

HPER 200
First Aid and CPR (2 CR)
After completing this course, students should be able to perform the basic skills of first aid. The course will cover cause, prevention and first aid care of common emergencies. Certification may be earned in first aid and cardiopulmonary resuscitation. 2 hrs./wk.

HPER 202
Personal Community Health (3 CR)
This course is designed to provide the student with the knowledge and understanding to make positive, healthy lifestyle choices. In addition, students will learn about issues within the community that affect their daily health both directly and indirectly. 3 hrs./wk.

HPER 204
Care and Prevention of Athletic Injury (3 CR)
Care and Prevention of Athletic Injuries will focus on recognition, evaluation, treatment, and recording of common athletic injuries. Human anatomy will be emphasized through the understanding of athletic movements and physical
testing. Additional topics include legal and ethical practices for the athletic trainer and the psychology of today’s competitive athlete. Care and Prevention of athletic Injuries is the basic sports medicine class required by most exercise science and coaching degree programs. 3 hrs./wk.

**HPER 205**  
**Individual Lifetime Sports (2 CR)**  
This course provides a basic knowledge of several individual lifetime sports including badminton, bowling, golf, racquetball and tennis. Students will learn fundamental skills for each sport as well as history, benefits, equipment, rules, etiquette, safety, scoring and strategy. 3 hrs./wk. Fall.

**HPER 207**  
**Athletic Training Practicum 2 (2 CR)**  
**Prerequisites:** HPER 195 and HPER 198 and BIOL 140 and BIOL 225 and  
**Corequisite:** HPER 204  
At the conclusion of this practicum, the student will be able to explain and demonstrate the basic theories supporting the uses of therapeutic modalities and therapeutic exercise, and the evaluation/assessment of injuries to athletes. The student will demonstrate a functional understanding of the major muscle groups of the human body. The student will be able to discuss and explain the duties and responsibilities of a certified athletic trainer (ATC). Direct work with specific athletic teams will facilitate the practicum. This practicum will be hands-on, and conducted under the direct supervision of a certified/licensed athletic trainer. This class is intended for athletic training and other allied health students. This course may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 16 lecture 304 practicum hrs.

**HPER 208**  
**Introduction to Exercise Physiology (3 CR)**  
This introduction to exercise physiology will introduce the effects of exercise on the muscular system, the cardiovascular system and the metabolic system. The course will prepare the student in the design of and principles for an individual exercise program. 3 hrs./wk.

**HPER 217**  
**Coaching and Officiating Basketball (2 CR)**  
This course introduces students to the theory and principles of coaching basketball and the rules and mechanics of officiating. Students will have the opportunity to learn how to organize, coach and plan daily practice sessions. 2 hrs./wk.

**HPER 220**  
**Sports Officiating (3 CR)**  
The rules and practical application of officiating will be covered for the following sports: volleyball, football, basketball, baseball and softball. 3 hrs./wk.

**HPER 224**  
**Outdoor Recreation (3 CR)**  
This course introduces the student to activities that create interaction between the individual and/or individuals and elements of the outdoor recreational setting. Outdoor Recreation Students plan activity projects such as camping, hiking,
nature observation and biking. 3 hrs./wk. or, may be taught online for 16 weeks.

HPER 240
Lifetime Fitness I (1 CR)
This course is designed to provide an effective exercise circuit system to help the student develop overall muscle tone and cardiovascular conditioning. Handouts emphasizing the value of developing a total lifetime fitness attitude and optional lectures are available to enhance the student's knowledge of the benefits of a lifetime fitness program. This course requires an initial orientation/assessment. After the assessment, the class becomes an open-lab format by arrangement. 2 hrs./wk.

HPER 241
Lifetime Fitness II (1 CR)
Prerequisite: HPER 240
This course is a continuation and expansion of Lifetime Fitness I. 2 hrs./wk., open-lab format by arrangement.

HPER 242
Lifetime Fitness III (1 CR)
Prerequisite: HPER 241
This course is a continuation and expansion of Lifetime Fitness II. 2 hrs./wk., open-lab format by arrangement.

HPER 243
Lifetime Fitness IV (1 CR)
Prerequisite: HPER 242
This course is a continuation and expansion of Lifetime Fitness III. 2 hrs./wk., open-lab format by arrangement.

HPER 245
Elementary Physical Education (3 CR)
This course is designed to meet the needs of students who wish to teach in the area of elementary physical education and/or elementary education. This course will provide the students with knowledge and background in planning, classroom management techniques, teaching methodology, legal liability, evaluation, wellness, special students, sports, and games related to elementary physical education. The course will include observation and teaching. 3 hrs./wk. Spring

HPER 255
Introduction to Physical Education (3 CR)
This course will introduce the student to the field of physical education and sport. This course will discuss the historical, biomechanical, physiological and psychological foundations of physical education and sport. It will examine the role of physical activity as a means to help individuals acquire the skills, fitness levels and knowledge that contribute to the arena of physical development and organized competition. It will also discuss the role physical education and sports play in our society. Each individual will develop a personal philosophy for physical education and sports. 3 hrs./wk. Spring.
Physical Science (PSCI)

PSCI 120  
Physical Science (4 CR)  
This course is an introduction to the fundamental concepts and principles of physics, chemistry, geology and astronomy. Topics include energy, electricity, magnetism, modern physics and chemical bonding. It is counted toward laboratory science requirements and is intended for non-science majors. It includes presentation of material using audiovisual, computer and other multimedia aids. Three hours of class and three hours of work in a scheduled lab are required each week. 3 hrs. lecture, 3 hrs. lab/wk.

Physical Therapist Assistant (KPT)

KPT 102  
Basic Emergency Patient Care (1 CR)  
Current cardiopulmonary resuscitation skills, including adult, child and infant resuscitation according to American Heart Association standards. Medical and environmental emergencies review. (Successful completion of the course qualifies the student for the Basic Life Support Course Certification.) 1 hr. lecture/wk. Course taught at Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 151  
Introduction to Physical Therapy (2 CR)  
Introduction to the basic concepts of the function of a physical therapist and physical therapist assistant as members of the health team and interaction of health care disciplines in the care of the patient. Overview of physical therapy practice, terms, and current issues. Effective interaction with others related to implementation of the physical therapy plan of care. Medical terminology related to the specific discipline. 2 hrs. lecture/wk. Course taught at Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 152  
Physical Therapy Fundamentals I (4 CR)  
Prerequisite: Formal acceptance into the program. Basic patient care skills utilized by the physical therapist assistant in carrying out the plan of care established by the physical therapist. Theory and application of basic treatment modalities used in physical therapy, including indications and contraindications. Field trips to observe the clinic and its modalities. 2.5 hrs. lecture, 3 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 153  
Kinesiology (4 CR)  
Prerequisites: BIOL 144, BIOL 145, KPT 152 and KPT 160  
Anatomy and function of the musculoskeletal system. Analysis of various daily activities. Application of data collection techniques to monitor effectiveness of physical therapy interventions as outlined in the plan of care established by the supervising physical therapist. 2 hrs. lecture, 4 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley
KPT 154

**Applied Neurology (2 CR)**

*Prerequisites: BIOL 144 and BIOL 145, MCC BIOL 210 and admission to OTHA or PTHA program.*

Foundations of neuroscience necessary for practice as a rehabilitation professional. Anatomy and function of the nervous system. Correlation of clinical problems with pathology of the nervous system. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 155

**Rehabilitation (4 CR)**

*Prerequisite: KPT 162*

Introduction to the underlying theory, principles, and application of interventions involved in physical rehabilitation. Field trips are required. 3 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 158

**Therapeutic Exercise (4 CR)**

*Prerequisite: KPT 162*

Introduction to the theory and principles of application of therapeutic exercise, including patient instruction, manual techniques and equipment commonly used by the physical therapist assistant. Field trips to learn various specialized techniques. 2 hrs. lecture, 4 hrs. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 159

**Orthopedic Pathology (2 CR)**

*Prerequisites: BIOL 144, BIOL 145, KPT 152 and KPT 160*

Orthopedic pathologies commonly seen in physical therapy practice, diagnosis, signs and symptoms, physiological factors and common interventions associated with the physical therapy plan of care. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 160

**Medical Diseases (2 CR)**

*Prerequisites: Formal acceptance into the program.*

Medical diseases commonly seen in physical therapy practice; diagnosis, signs and symptoms, physiologic factors and common interventions associated with the physical therapy plan of care. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 161
Physical Therapy Fundamentals II (4 CR)
Prerequisites: BIOL 144, BIOL 145, KPT 152, and KPT 160
Introduction to the theory and practical application of electrotherapy, patient
documentation, patient care skills, and selected modalities, including indications
and contraindications for use. 2.5 hrs. lecture, 3 hrs. lab/wk. Course taught at
MCC-Penn Valley Community College. Students should contact the Penn Valley
coordinator of the physical therapist assistant program about the class meeting
times and beginning and ending dates of classes. Call 816-759-4000.

KPT 162
Clinical Experience I (2 CR)
Prerequisites: KPT 153, KPT 154, KPT 159, KPT 161, and KPT 102
Supervised clinical experience in the practical application of techniques and
procedures covered in all previous physical therapist assistant courses. Assisting
physical therapists and physical therapist assistants in treatment of patients in a
variety of clinical settings. 5 hrs. clinical/wk. Course taught at MCC-Penn Valley
Community College. Students should contact the Penn Valley coordinator of the
physical therapist assistant program about the class meeting times and beginning
and ending dates of classes. Call 816-759-4000.

KPT 164
Pediatrics and Gerontology (2 CR)
Prerequisite: KPT 162
Specialized information related to the treatment of pediatric and older adult
populations. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community
College. Students should contact the Penn Valley coordinator of the physical
therapist assistant program about the class meeting times and beginning and
ending dates of classes. Call 816-759-4000.

KPT 170
Clinical Experience II (2 CR)
Prerequisites: KPT 162 and concurrent enrollment in KPT 155, KPT 158, KPT 164
and KPT 171
Supervised clinical experience in the practical application of techniques and
procedures covered in all previous KPT courses. Assisting physical therapists and
physical therapist assistants in the treatment of patients in a variety of clinical
settings. 5 hrs. clinical/wk. Course taught at MCC-Penn Valley Community
College. Students should contact the Penn Valley coordinator of the physical
therapist assistant program about the class meeting times and beginning and
ending dates of classes. Call 816-759-4000.

KPT 171
Clinical Seminar (2 CR)
Prerequisite: KPT 162
This course contains current professional and patient care issues and
values, administrative policies and procedures, and related clinical topics
associated with the practice of physical therapy. Service learning projects
required. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community
College. Students should contact the Penn Valley coordinator of the physical
therapist assistant program about the class meeting times and beginning and
ending dates of classes. Call 816-759-4000.

KPT 172
Clinical Experience III (12 CR)
Prerequisites: Completion of all other required courses in the KPT program
Practical application of principles learned in prior coursework. Experience rotation
internships in selected clinical sites under the guidance of a physical therapist. 40
hrs. field studies/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of the physical therapist assistant program about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KPT 173
Special Topics (2 CR)
Prerequisites: Completion of all previous semesters of physical therapy and biology coursework with a minimum grade of "C"

This course presents specialized topics in physical therapy and the administration of health care. 1 hr. lecture/wk.

Physics (PHYS)

PHYS 130
General Physics I (5 CR)
Prerequisite: MATH 171 or assessment scores

In this introductory course for pre-professional and general education, students will learn the fundamentals of selected areas of classical physics. Using the tools of algebra and trigonometry, the course develops the topics of mechanics, heat and thermodynamics, and concludes with waves. The two-semester PHYS 130/131 sequence is designed to meet the requirements of area pre-professional programs. This is a transfer course that meets the college's requirements for associate's degree programs and also meets transfer requirements of area colleges and universities. The course includes an integrated laboratory component the completion of which is a necessary part of the total instructional package. 4 hrs. lecture, 3 hrs. lab/wk.

PHYS 131
General Physics II (5 CR)
Prerequisite: PHYS 130

In this introductory course for pre-professional and general education, students will learn the fundamentals of selected areas of classical physics. Using the tools of algebra and trigonometry, the course develops the topics of electricity and magnetism, light and optics and some elements of modern physics, such as relativity and quantum physics. The two-semester PHYS 130/131 sequence is designed to meet the requirements of area pre-professional programs. This is a transfer course that meets the college's requirements for associate's degree programs and also meets transfer requirements of area colleges and universities. The course includes an integrated laboratory component the completion of which is a necessary part of the total instructional package. 4 hrs. lecture, 3 hrs. lab/wk.

PHYS 133
Applied Physics (5 CR)
Prerequisite: MATH 133 or higher

This is a one-semester, comprehensive physics course intended for students enrolled in the biotechnology certificate program or an associate of applied science degree program. The course will cover all areas of applied physics, including mechanics, heat, thermodynamics, waves, electricity, magnetism, light, optics and some elements of modern physics. Emphasis will be placed on concepts and applications to real-life problems. This course includes an integrated laboratory component the completion of which is a necessary part of the total instructional package. 4 hrs. lecture, 3 hrs. lab/wk.
PHYS 191
Math & Physics for Games I (4 CR)
Prerequisite: MATH 171 or MATH 173 with grade of "C" or higher or appropriate score on math assessment test and CS 200
This introductory course focuses on the mathematics and physics concepts needed to program a variety of video game scenarios. Students will learn to use vectors and matrix transformations to model the motion of physical objects in two and three dimensions. Students will also learn various computer programming methods in order to model these mathematical and physical concepts. 3 hrs. lecture and 2 hrs. lab/wk.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $0 to $100.

PHYS 220
Engineering Physics I (5 CR)
Prerequisite or corequisite: MATH 242
This is an introduction to physics for engineering and science students. Included will be mathematical approaches to the study of mechanics, wave motion and thermodynamics. 4 hrs. lecture, 3 hrs. lab/wk.

PHYS 221
Engineering Physics II (5 CR)
Prerequisites: PHYS 220 and MATH 242
This is an introduction to physics for engineering and science students. Included are mathematical approaches to the study of electricity, magnetism, sound, optics and modern physics. 4 hrs. lecture, 3 hrs. lab/wk.

Political Science (POLS)

POLS 122
Political Science (3 CR)
This course provides students the opportunity to explore the discipline of political science and to discover how political scientists study politics in the contemporary world. 3 hrs. lecture/wk. and online

POLS 124
American National Government (3 CR)
This course examines the components of the public policy-making process. Topics of study include American political culture, constitutional principles, intergovernmental relations, public opinion, political parties, interest groups, media, the influence of the constant campaign of candidate-centered politics, budget construction, bureaucracy, and decision-making institutions. 3 hrs./wk. and online. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

POLS 126
State and Local Government (3 CR)
This course examines the executive, legislative, judicial and service functions of state and local government in the United States in general and in Kansas in particular. The course includes guest lectures by elected officials, government personnel and community activists. 3 hrs./wk. This course is typically offered only once each academic year.
POLS 132
Introduction to Comparative Government (3 CR)
This course compares the different political structures of many of the world's most important countries, including economic development, patterns of government and administration, party structures and policy formation. 3 hrs. wk. or online.

POLS 135
International Relations (3 CR)
This course analyzes the conflict and cooperation among nation-states. Students will study contemporary problems and how they relate to power, war, terrorism, diplomacy, international organizations and the future of the nation-state system. 3 hrs./wk. and online

POLS 200
Model United Nations (3 CR)
This course is designed for students who are interested in learning and understanding international organizations and participating in competitive intercollegiate Model United Nations. This course orients students with the history, structure and function of the United Nations and those facets of an assigned country. This orientation will assist students in their preparation for the Model United Nations (MUN) conference during the spring semester. 3 hrs lecture/wk.

POLS 210
Methodology in Social Sciences (3 CR)
Prerequisite: PSYC 130 or SOC 122 or ECON 230
This course deals with scientific research methods utilized in the social sciences, especially psychology, sociology, political science and anthropology. The course examines a wide range of data collection methodologies including observation, questionnaire construction, and controlled experimentation. The course will be beneficial for analyzing and evaluating the quality of research findings reported in both the popular and academic press. It will also be useful to those who plan to engage in occupations requiring the use of research methodology. This course may not be offered every semester. POLS 210, PSYC 210 and SOC 210 are the same course. Do not enroll in more than one of these three courses. This course is a required corequisite for PSYC 230 Personality Theory. 3 hrs./wk.

POLS 245
Introduction to Public Administration (3 CR)
This course provides students the opportunity to explore public administration and public policy including institutional arrangements for the provision of public services and the study of those arrangements. 3 hrs. lecture/wk.

POLS 270
Political Science Internship (3 CR)
Prerequisite and/or corequisite: By permission of the political science internship coordinator, completion of 6 credit hours in political science courses at JCCC or another college within the last two years, earning a minimum of a 3.0 on a 4.0 scale in those political science courses, and a written recommendation from your political science classroom instructor
Students augment their academic course work with an internship in an appropriate setting under instructional supervision. Internship projects are cooperative efforts between appropriate supervisors in state, local or national government settings or not-for-profit organizations and college staff and students. Internships give students the opportunity to participate in the real-world application of their academic studies. In addition, this synthesis of classroom
study with practical experience provides students with skills and insights useful in selecting a career or avocation in community service. The student spends the equivalent of 10 hours per week performing internship duties over the course of the semester or a total of 150 hours.

**Polysomnography/Sleep Tech (PSG)**

**PSG 125**  
**Introduction to Sleep Medicine (4 CR)**  
*Prerequisite: Admission to the polysomnography program Corequisite: Current AHA BLS Health Care Provider Certification*  
This course is an introduction to the history of sleep medicine. It also explores the role and the communication, time management, infection control, basic patient assessment, safety and professional expectations of the polysomnographic technologist. Students will have the opportunity to have direct observation in an associated sleep center or lab. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 4 hrs. integrated lecture/lab each week and 48 clinical hrs./semester  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $50 to $150.

**PSG 130**  
**Physiology of Sleep Medicine (3 CR)**  
*Prerequisite: Admission to the polysomnography*  
This course will provide a comprehensive study of neuroanatomy and physiology and normal sleep mechanisms. It will also provide an overview of the cardiovascular and respiratory anatomy and physiology as it relates to sleep medicine. This includes ECG interpretation, oxygenation and ventilation assessment, and mechanisms and basic management of breathing and upper airway collapse. 3 hrs. lecture/wk.

**PSG 140**  
**Sleep Disorders (4 CR)**  
*Prerequisites: PSG 125 with a grade of "C" or higher and PSG 130 with a grade of "C" or higher and Corequisite: Current AHA BLS for Health Care*  
This course is designed to provide the basic information related to the disease processes and conditions which adversely effect sleep. The etiologies, clinical presentation, diagnosis and therapeutic interventions will be covered for each condition. 3 hrs. lecture and 48 clinical hrs./semester

**PSG 145**  
**Sleep Study Instrumentation (4 CR)**  
*Prerequisites: PSG 125 with a grade of "C" or higher and PSG 130 with a grade of "C" or higher*  
This course will introduce the bio-potential electrophysiologic, polysomnographic, and ancillary equipment involved in patient assessment and the conducting of sleep studies. The basic principles, set up, operation, maintenance, cleaning and troubleshooting will be emphasized. 6 hrs. integrated lecture lab./wk.

**PSG 150**  
**Polysomnography I (4 CR)**  
*Prerequisites: PSG 125 with a grade of "C" or higher and PSG 130 with a grade of
"C" or higher and Prerequisites or Corequisites: PSG 140 with a grade of "C" or higher and PSG 145 with a grade of "C" or higher
This course provides the didactic preparation that will be needed to supplement the clinical experiences of Polysomnography Clinical I. Students will develop new knowledge and skills related to patient and equipment preparation, monitoring and documentation and therapeutic interventions associated with polysomnographic procedures. 6 hrs. integrated lecture lab./wk.

PSG 245
Polysomnography Clinical I (6 CR)
Prerequisites: PSG 140 with a grade of "C" or higher and PSG 145 with a grade of "C" or higher and PSG 150 with a grade of "C" or higher and Corequisites: Current AHA BLS Health Care Provider Certification
This course is the clinical application of entry-level sleep related diagnosis and treatment. Students will have the opportunity to work with patients under close supervision to further develop their skill and understanding of basic polysomnographic procedures. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 24 hrs. clinic/wk.

PSG 250
Polysomnography II (4 CR)
Prerequisite: PSG 150 with a grade of "C" or higher
This course provides the didactic preparation that will be needed to supplement the clinical experiences of Polysomnography Clinical II. Students will refine knowledge and skills related to patient and equipment preparation, monitoring and documentation and therapeutic interventions associated with polysomnographic procedures. 6 hrs. integrated lecture lab/wk.

PSG 255
Polysomnography Clinical II (6 CR)
Prerequisites: PSG 245 with a grade of "C" or higher and PSG 250 with a grade of "C" or higher and Corequisites: Current AHA BLS Health Care Provider Certification
This course is the clinical application of sleep related diagnosis and treatment. Students will have the opportunity to further refine their skills in obtaining and evaluating high quality sleep recordings and gaining clinical competence associated with advanced-level polysomnographic technology skills. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 24 hrs. clinical/wk.

PSG 265
Polysomnography Capstone (3 CR)
Prerequisite or Corequisite: PSG 255 with a grade of "C" or higher
This course is designed as a capstone experience to facilitate final preparation for employment and the BRPT examination for the RPSGT credential. Students will demonstrate knowledge and skill competency attainment expected of a polysomnographic technologist. Students will also be required to pass a comprehensive exam based on the current BRPT matrix. 5 hrs. integrated lecture lab./wk.

Power Plant Technology (PPT)
PPT 130
Basic Hydraulics, Mechanics and Pneumatics (3 CR)
This introductory course is designed to give a general overview of hydraulic, mechanic and pneumatic principles. Upon successful completion of this course, the student will be able to describe the concepts involved in industrial maintenance of hydraulic, mechanical and pneumatic equipment and identify the major components and their functions. Topics will include hydraulics, pneumatics, rigging, ladders, scaffolds, lubrication, drive belts, vibrations, mechanical drives, alignments, bearings and electricity. This course is appropriate for power plant technology majors or other interested students. 3 hrs. lecture/wk.

PPT 140
Generating Plant Fundamentals (3 CR)
This is an introductory course designed to give a general overview of power plant operations and functions. Upon successful completion of this course, the student will be able to describe the concepts involved in converting energy to electricity through a stream generation power plant and identify the major components and their functions. Topics will include fossil fuels, boilers, turbines, feedwater heaters, ash removal, condensate, power plant controls, and temperature and pressure relationships. This course is appropriate for power plant technology majors or other interested students. 3 hrs. lecture/wk.

PPT 150
Station Power Fundamentals (3 CR)
This course will give students the ability to describe the concepts involved in providing electricity to a power plant. Topics will include electrical concepts, the power grid, switchyards, transformers, critical services, essential services and black-out conditions. This course is appropriate for power plant technology majors or other interested students. 3 hrs. lecture/wk.

PPT 210
Reading Piping & Instrument Diagrams (3 CR)
This course will enable the student to be able to read a set of piping and instrument diagrams (P&IDs) and trace the flow paths of the major systems in a power plant. Topics will include symbols and terminology, the condensate system, the feedwater system, high pressure steam, extraction steam, fuel flow, auxiliary cooling, and lubrication systems. This course is appropriate for power plant technology (PPT) majors or other interested students. 3 hrs. lecture/wk.

PPT 230
Introduction to Water Chemistry & Water Treatment (3 CR)
Prerequisite or corequisite: MATH 171
This introductory course is designed to give a general overview of water chemistry and water treatment in power plants. Upon successful completion of this course, the student should be able to describe the concepts and solve the problems associated with water treatment in boiler operations. Topics will include hydrology, specific gravity of liquids, acids, bases, measurements, cooling towers, clarification, ion exchange and filtration. This course is appropriate for power plant technology majors and other interested students. 3 hrs. lecture/wk.

PPT 250
Intro to Power Plant Combustion and Exhaust (3 CR)
Prerequisite: PPT 140
Upon successful completion of this course, the student should be able to describe the concepts involved in the combustion of fuel for energy generation. Topics will
include fuel handling, combustion requirements, combustion control and by-products of combustion. This course is appropriate for power plant technology majors and other interested students, with the permission of the instructor. 3 hrs. lecture/wk.

PPT 251
Introduction to Power Plant Steam and Water Cycle (3 CR)

Prerequisite: PPT 140

Upon successful completion of this course, the student will be able to describe the steam water cycle in a steam generation plant. Topics will include boilers, turbines, feedwater heaters, condensers, cooling towers and auxiliary equipment. Enrollment in the course is limited to power plant technology majors or by permission of the instructor. 3 hrs. lecture/wk.

PPT 271
Power Plant Technology Internship (3 CR)

Prerequisite: Career program facilitator approval required

The internship will provide advanced students with on-the-job experience under the supervision of professionals in the industry. The work will be developed cooperatively with area employees, college staff and each student to provide a variety of actual job experience directly related to the student's career goals. This course is only available to students who have declared a power plant technology major. 20 hrs. on-the-job training/wk., or a minimum of 40 hrs./wk. on the job for summer semester

PPT 280
Power Plant Operations and Process Controls (3 CR)

Prerequisites or corequisites: PPT 250 and PPT 251

Upon successful completion of this course, the student should be able to describe the concepts involved in operating a steam generation power plant and identify the major components and their functions. Topics will include cold start-up, warm start-up, shutdown, normal operations, load changes, safety checks, and power plant controls. This course is designed to integrate and build on previous power plant technology course work. This course is appropriate for power plant technology majors and other interested students with the permission of the instructor. 3 hrs. lecture/wk.

Practical Nursing (AVPN)

AVPN 115
Nursing I (22 CR)

Prerequisites: CNA certification and BIOL 144 and PSYC 130 and MATH 111 and admission to the practical nursing program

Using the nursing process, the student will promote adaptive responses in the client during health and illness. The student will develop a basic understanding of the role of the practical nurse in the health care system and demonstrate the fundamental skills essential to the nursing care of the client. The nursing process will be applied to the care of clients in long-term care, the medical office and the acute-care settings. Basic concepts of gerontology, professional vocational relationships, pharmacology, medical terminology and nutrition will be used in the care of the clients. In-state tuition and fees $1,041 total. Out-of-state tuition and fees $4,451 total. 550 contact hrs. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $250 to $550.

**AVPN 117**  
**Nursing II (22 CR)**  
*Prerequisite: AVPN 115*

In Nursing II, the student will continue to explore the practical nurse’s role in assisting clients to meet basic and more complex physiological needs using the nursing process in a variety of health care settings, including acute care, long-term care and mental health facilities. The student will apply concepts of leadership and change and demonstrate the roles of charge nurse, medication nurse, treatment nurse and patient-care nurse in long-term care. The student will promote adaptive responses in the child and family during the child’s illness, pregnancy, labor and delivery, and postpartum and neonatal phases of reproductive processes. The student will explore the adaptive capacity of individuals with emotional stresses and diagnosed mental disorders across the life span. Basic concepts of gerontology, professional vocational relationships, pharmacology, medical terminology and nutrition will be applied in the care delivered. In-state tuition and fees $1075 total. Out-of-state tuition and fees $4,485 total. 550 contact hrs. The credit reflected in this course is for transcript reporting, recording and transfer only. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $250 to $550.

**Psychology (PSYC)**

**PSYC 121**  
**Applied Psychology (3 CR)**  
The course will focus on learning how to apply psychological principles in order to better understand one’s own experience (cognitive, behavioral and emotional) and that of other people. This course is not a substitute for Introduction to Psychology and will not meet the prerequisite requirement for advanced psychology courses. 3 hrs./wk.

**PSYC 130**  
**Introduction to Psychology (3 CR)**  
This basic introduction to psychology includes the study of biological aspects of behavior, the brain, consciousness, sensation and perception, motivation and emotion, stress, maturation and development, learning and memory, normal and abnormal personality, and social psychology. This course is the prerequisite for all advanced-level psychology courses. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

**PSYC 200**  
**Industrial and Organizational Psychology (3 CR)**  
*Prerequisite: PSYC 130*

The course will examine human behavior and psychological principles in an industrial/personnel context. It will also focus on how organizational factors contribute to individual behavior and how individuals affect groups and organizational functioning. Topics include recruiting, selecting and training personnel; evaluating job performance, work motivation, job satisfaction and other attitudes; leadership; and organization and job design. This course may not be offered every semester. 3 hrs./wk.
PSYC 205
Human Sexuality (3 CR)
Prerequisite: PSYC 130
PSYC 205, Human Sexuality, is a balanced and thoughtful account of what is known about sexuality from various perspectives. A broad and representative survey of research is presented in a number of topical areas. Psychobiology, sexual development during childhood and adolescence, sexual interactions, love relationships and behavior, gender issues, sexual orientation, health issues and diseases, and sexual problems and solutions will be studied. Primary emphasis will be placed on the individual and the couple as a unit of analysis. Class discussions of issues relating to human sexuality will be encouraged. 3 hrs. lecture/wk.

PSYC 210
Methodology in Social Sciences (3 CR)
Prerequisite: PSYC 130 or SOC 122 or ECON 230
This course deals with scientific research methods utilized in the social sciences, especially psychology, sociology, political science and anthropology. The course examines a wide range of data collection methodologies including observation, questionnaire construction, and controlled experimentation. The course will be beneficial for analyzing and evaluating the quality of research findings reported in both the popular and academic press. It will also be useful to those who plan to engage in occupations requiring the use of research methodology. This course may not be offered every semester. PSYC 210, SOC 210 and PSYC 210 are the same course. Do not enroll in more than one of these three courses. This course is a required prerequisite or corequisite for PSYC 230 Personality Theory. 3 hrs./wk.

PSYC 215
Child Development (3 CR)
Prerequisite: PSYC 130
This course is a comprehensive account of human development from conception through adolescence. The course integrates genetic, biological, physical and anthropological influences with psychological processes and explores determinants of behavior from a genetic and environmental perspective. 3 hrs./wk.

PSYC 218
Human Development (3 CR)
Prerequisite: PSYC 130
This course is a comprehensive account of human psychological and physical development from conception through infancy, childhood, adolescence, adulthood and death. The course integrates genetic, biological, physiological and anthropological influences with the psychological process and explores determinants of development from both hereditary and environmental perspectives. 3 hrs./wk.

PSYC 220
Social Psychology (3 CR)
Prerequisite: PSYC 130
Social psychology is the study of social influence on behavior and cognition. Social psychology explores our relationships with others, our interdependency, and the mutual influence we have on one another. The course will cover concepts such as attitude formation, attitude change, prejudice, aggression, affiliation, obedience to authority, and conformity; special emphasis will be placed on fostering prosocial behavior and how our attitudes toward self and others are influenced by race, ethnicity, gender, age, religious beliefs, socioeconomic status,
sexual orientation, and political beliefs. The course requires students to acquire a critical awareness of research methodology. 3 hrs./wk.

PSYC 225
Educational Psychology (3 CR)
Prerequisite: PSYC 130
This course addresses issues that apply theories of psychology to the educational environment. Topics included in the study of educational psychology include research methodology, theories of human development, principles of learning, the psychology of motivation, theories of intelligence, testing and assessment techniques, and career development. A 20-hour observation in an educational setting is required. This course may not be offered every semester. 3 hrs./wk.

PSYC 230
Personality Theory (3 CR)
Prerequisite: PSYC 130 and prerequisite or corequisite of either PSYC 210 or SOC 210
The general viewpoints of paradigms in psychology will be studied, with emphasis on each system's contribution to understanding human personality. The assumptions of each system will be critically analyzed using evidence from research and criticisms from philosophy. Usefulness of theories will be presented, and the systems will be compared and contrasted. General theories covered will include psychoanalysis, trait, biological, humanistic, behavioral/social and cognitive. This course is typically offered in the spring semester. 3 hrs./wk.

PSYC 250
Health Psychology (3 CR)
Prerequisite: PSYC 130
This course covers content, methods and theory regarding the interplay between psychological and biological determinants of health and illness and examines how these factors relate to health status. The course focus is on the application of psychological methods, principles of maintenance of health, prevention of disease, treatment of illness, and rehabilitation and recovery from impaired health. It follows an interdisciplinary approach to content and instruction. 3 hrs. lecture/wk.

Radiologic Technology (KRAD)
KRAD 150
Introduction to Radiologic Technology (2 CR)
Introduction to the profession of radiologic technology, including the duties of the radiologic technologist in the health care environment. 2 hr. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 160
Survey of Radiologic Technology (6 CR)
Prerequisite: Admission to the radiologic technology program
Orientation to the program and clinical responsibilities. Topics related to basic patient interactions, body mechanics, patient transportation, radiographic terminology, radiographic examinations of the chest and abdomen, methods of radiation protection and types of radiographic equipment will be explored. 4.2 hrs. lecture, 6 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology.
about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 162

Image Processing (2 CR)
Prerequisites: KRAD 160, KRAD 172 and KRAD 173
Materials and factors relating to acquisition, processing, viewing, and storage of radiographs. 1.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 165

Patient Care (2 CR)
Prerequisite: KRAD 160
This course will explore patient-health professional interactions, basic patient care and management, medico-legal issues, and medical ethics. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 170

Radiation Biology and Protection (3 CR)
Prerequisite: KRAD 160 with concurrent enrollment in corresponding semester of clinical training
The principles of radiation biology and techniques used to protect the patient and personnel from the effects of exposure to ionizing radiation. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 171

Radiographic Exposures I (3 CR)
Prerequisite: Admission to the program
Factors that affect radiographic image formation and determine image quality. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 172

Radiographic Positioning I (3 CR)
Prerequisite: KRAD 160 and concurrent enrollment in KRAD 165 and KRAD 173
Anatomy, positioning and image evaluation of the digestive and urinary system, upper and lower limbs. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 173

Clinical Practice I (3 CR)
Prerequisite: KRAD 160 and concurrent enrollment in KRAD 165 and KRAD 172
Performance of patient examination in a clinical setting under the supervision of a radiologic technologist. 16 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of
radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 174
Radiographic Exposures II (3 CR)
Prerequisites: KRAD 160, KRAD 171, KRAD 172 and KRAD 173
Quality control of radiographic images. Technic charts, calibration of equipment, standard exposure systems, and factors used for conversion of technics for variables in the exposure system. Special techniques used in producing radiographic images. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 175
Clinical Practice II (4 CR)
Prerequisites: KRAD 165, KRAD 172 and KRAD 173 and concurrent enrollment in KRAD 176
Performance of patient examinations in a clinical setting under the supervision of a radiologic technologist. 24 hrs. field study/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 176
Radiographic Positioning II (3 CR)
Prerequisites: BIOL 140 and KRAD 165, KRAD 172 and KRAD 173 and concurrent enrollment in KRAD 162 and KRAD 175
Anatomy, radiographic positioning, and film critique of pelvis, bony thorax, vertebral column, cranium, and facial bones. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 178
Clinical Practice III (4 CR)
Prerequisites: KRAD 175 and KRAD 176
Performance of patient examinations in a clinical setting under the supervision of a radiologic technologist. 20 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 278
Imaging Modalities and Pathology (3 CR)
Prerequisites: KRAD 279, KRAD 280, KRAD 281 and concurrent enrollment in KRAD 282
Human disease processes and their relationship to patient examination in the radiology department. Radiographic pathology and imaging modalities. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 279
Radiographic Positioning III (2 CR)
Prerequisites: KRAD 176 and KRAD 178 and concurrent enrollment in KRAD 280, KRAD 281 and KRAD 285

Anatomy and positioning of the biliary system, mammary glands and temporal bone; procedural adaptations for pediatric and trauma patients and mobile radiographic procedures. Advanced film critique of radiographs of all routine radiographic examinations. 2 hrs. lecture. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 280
Clinical Practice IV (4 CR)
Prerequisites: KRAD 162, KRAD 176 and KRAD 178, and concurrent enrollment in KRAD 279, KRAD 281 and KRAD 285

Performance of patient examinations in a clinical setting under the supervision of a radiological technologist. 24 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 281
Radiation Physics (3 CR)
Prerequisite: PHYS 162 and KRAD 171

Application of fundamental physics principles relating to energy, electricity, and magnetism and their relevance to the study of x-rays and x-ray equipment. 2.5 hrs. lecture, 1 hr. lab/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 282
Clinical Practice V (4 CR)
Prerequisites: KRAD 279, KRAD 280, KRAD 281 and KRAD 285 and concurrent enrollment in KRAD 278

Performance of patient examinations in a clinical setting under the supervision of a radiological technologist. 24 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 283
Final Seminar (2 CR)
Prerequisites: KRAD 174 and KRAD 279 and KRAD 280

Preparation for the National Registry examination. Simulation of American Registry of Radiologic Technologists examination. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KRAD 285
Special Procedures (2 CR)
Prerequisites: KRAD 170 and KRAD 171 and KRAD 178, and concurrent enrollment in KRAD 279 and KRAD 280 and KRAD 281

Anatomy, positioning, equipment and special tasks related to performance of special contrast media studies. Vascular, neurological, lymphatic, skeletal, and pulmonary systems. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of
radiologic technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

Railroad Conductor (RRTC)

**RRTC 123**
**Introduction to Conductor Service (4 CR)**

*Prerequisite: Admission to the JCCC railroad operations program, conductor option*

This is an introductory course for the conductor service option within the railroad operations program. Upon successful completion of this course, the student should be able to describe railroad organization and general operations, policies and practices to ensure railroad safety, and the basic responsibilities of conductors. 5 hrs. lecture, demonstration/wk. Selective admission program - see a counselor about special requirements.

**RRTC 175**
**Conductor Mechanical Operation (2 CR)**

*Prerequisites: Admission to the JCCC railroad operations program, conductor option, and successful completion of RRTC 123 with a grade of "C" or higher*

This course covers mechanical operations that relate to conductor service. This is the second course in the conductor option of the railroad operations degree program. Upon successful completion of this course, the student should be able to describe the importance and application of freight care mechanical policies and practices to ensure safe railroad operations. 2.5 hrs. lecture/wk. Selective admission program - see a counselor about special requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $36.

**RRTC 261**
**Conductor Service (2 CR)**

*Prerequisite: Admission to the JCCC railroad operations program, conductor option, and successful completion of RRTC 175 with a grade of "C" or higher*

Upon successful completion of this course, the student should be able to describe and apply railroad organization and general operations, policies and practices to ensure railroad safety and basic responsibilities of conductors. This course includes safety and the general rules with which conductors must comply and teaches the techniques and administrative procedures conductors use on the job to perform safely and effectively. 2.5 hrs. lecture/wk. Selective admission program - see a counselor about special requirements.

**RRTC 263**
**General Code of Operating Rules (4 CR)**

*Prerequisite: Admission to the JCCC railroad operations program, conductor option, and successful completion of RRTC 261 with a grade of "C" or higher*

This is the fourth course in the conductor option for the railroad operations degree program. Conductors must maintain a thorough understanding of the General Code of Operating Rules (GCOR). This course provides an in-depth study of the GCOR. Upon completion of this course, the student should be able to demonstrate abilities to apply the General Code of Operating Rules to safe and efficient train movement and operations. 5 hrs. lecture/wk. Selective admission program - see a counselor about special requirements.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $25.

**RRTC 267**
Conductor Field Application (4 CR)
Prerequisite: Admission to the JCCC railroad operations program, conductor option, and successful completion of RRTC 263 with a grade of "C" or higher

Upon successful completion of this course, the student will have observed actual operations and be able to apply skills learned in classroom-based instruction to those operations. The student will observe and perform operations under the supervision of experienced conductor mentors in an actual field location. The student prepares a daily reflective journal of the hands-on (OJT) railyard experience. 1 hr. lecture, 8 hrs on-the-job training/day for 7 days.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100.

Railroad Dispatcher (RRTD)

RRTD 122
Introduction to Railroad Dispatching (2 CR)
Prerequisite: Admission to the JCCC railroad operations program, dispatcher option

Upon successful completion of this course, the student should be able to describe railroad organization and general operations, policies and practices to ensure railroad safety and basic dispatching functions. 2.5 hrs. lecture/wk. Class currently held at Tarrant County Junior College, Ft. Worth, Texas.

RRTD 271
Apprentice Railroad Dispatching Training I (6 CR)
Prerequisites: Admission to the JCCC railroad operations program, dispatcher option, and successful completion of RRTD 275 with a grade of "C" or higher

Upon successful completion of this course, the student should demonstrate abilities to apply the General Code of Operating Rules, maintenance of way operating rules and the train dispatcher’s manual of policies and practices to safe and effective train movement and maintenance operations. This is an intensive course that prepares students to observe actual dispatching operations. 7.5 hrs. lecture/wk. Class currently held at Tarrant County Junior College, Ft. Worth, Texas.

RRTD 272
Apprentice Railroad Dispatching Training II (6 CR)
Prerequisites: Admission to the JCCC railroad operations program, dispatcher option, and successful completion of RRTD 271 with a grade of "C" or higher

Upon successful completion of this course, students should demonstrate their ability to use centralized traffic control equipment, computerized track warrant control equipment, and management information systems that record and report train movement. Students will also identify and resolve traffic conflicts safely and effectively. This is an intensive course in which students observe, practice and demonstrate rail traffic dispatching functions in a laboratory setting. In addition, the student will spend an additional week observing dispatching-related activities in the field in conjunction with this course. 4.5 hrs. lecture, 3 hrs. lab/wk. Class currently held at Tarrant County Junior College, Ft. Worth, Texas.

RRTD 275
Railroad Dispatching Field Observation (3 CR)
Prerequisites: Admission to the JCCC railroad operations program, dispatcher option, and RRTD 122 with a grade of "C" or higher

Upon successful completion of this course, the student will have observed actual dispatching operations and should be able to identify major responsibilities. Students will observe operations under the supervision of experienced dispatcher
mentors in actual dispatching offices. 1 hr. lecture, minimum 15 hrs. on-the-job training/wk. Class currently held at Tarrant County Junior College, Ft. Worth, Texas.

RRTD 276
Railroad Dispatching Field Applications (5 CR)
Prerequisites: Admission to the JCCC railroad operations program, dispatcher option, and RRTD 272 with a grade of "C" or higher
Railroad Dispatching Field Applications is a 10-week period in which students will observe and practice operations under the supervision of experienced dispatcher mentors in actual dispatching offices. Upon successful completion of this course, students will be able to apply skills learned in classroom-based dispatching instruction to those operations. Minimum 15 hrs. on-the-job training/wk. Class currently held at Tarrant County Junior College, Ft. Worth, Texas.

Railroad Electronics (RREL)

RREL 110
Introduction to Railroad Signal Systems (4 CR)
Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean
This course is the first of a series of four designed to provide entry (apprentice) level training to new signal employees, or those seeking to enter this trade. Upon successful completion of this course, the student should be able to describe basic company organization, operating and safety rules pertaining to signalmen, basic principles of electricity and measurement as well as protective devices. Also he or she should have a basic understanding of signal systems, track circuits, and Federal Railroad Administration (FRA) rules. 44 hrs. lecture 16 hrs. instructional lab/total

RREL 112
Track Circuits and Systems (4 CR)
Prerequisites: Successful completion of RREL 110 and approval of the railroad training administrator and the JCCC program assistant dean
This course is the second of a series of four designed to provide entry (apprentice) level training to new signal employees, or those seeking to enter this trade. Upon successful completion of this course, the student should be able to describe and explain the operation of various track circuits, relay and control circuits, traffic control systems, locks, and applicable rules and standards. 44 hrs. lecture 16 hrs. instructional lab studio/total

RREL 114
Traffic Control, Switch Machines & Locks (4 CR)
Prerequisite: RREL 112 and approval of the railroad training administrator and the JCCC program assistant dean
This course is the third of a series of four designed to provide entry (apprentice) level training to new signal employees, or those seeking to enter this trade. Upon successful completion of this course the student should be able to describe and maintain automatic block signaling systems, centralized traffic systems, power switches and locks. He should also be familiar with ground testing and isolation, as well as applicable rules and standards. 44 hrs. lecture 16 hrs. Instructional lab studio/total

RREL 116
Interlocking, Classification, Crossings & Gates (4 CR)
Prerequisite: RREL 114 and approval of the railroad training administrator and the JCCC program assistant dean
This course is the last of a series of four designed to provide entry (apprentice) level training to new signal employees, or those seeking to enter this trade. Upon successful completion of this course, the student should be able to perform interlocking plant and route plant analysis, explain classification yards, grade crossing warning systems, gates, and other devices, as well as applicable rules and standards. 44 hrs. lecture 16 hrs instructional lab/total

RREL 144
Introduction to Programmable Logic Controllers (2 CR)
Prerequisites: Approval of the railroad training director and the JCCC program assistant dean
This course is an introduction to programmable logic controllers using Allen Bradley PLC-5 processors and is designed for electricians and maintenance personnel. Upon successful completion of this course, the student should be able to identify the components of programmable controllers, configure and set up the controllers for specific operations, write and test basic programs, and apply troubleshooting procedures to locate problems. 1 hr. lecture, 1.5 hrs. lab/wk.

RREL 172
Programmable Logic Controllers Applications (2 CR)
Prerequisites: Approval of the railroad training director and the JCCC program assistant dean
This course is designed for electricians and maintenance personnel. It is intended as an advanced course for people with basic knowledge in programmable logic controllers operation. Allen Bradley PLC-5 family of processors is used for hands-on-training. Upon successful completion of this course, the student should be able to use advanced PLC instructions such as file, block transfer, stack concepts/operations and sequences, and configure and operate a network of processors. 1 hr. lecture, 1.5 hrs. lab/wk.

RREL 180
Introduction to Railroad Electronics (1 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to meet the needs of railroad electronic maintainers. Upon successful completion of this course, the student should be able to state basic safety procedures in electronics, explain basic principles of electronics, perform basic electronic calculations and use basic electronic tools. 2.5 hrs. lecture, 2.5 hrs. lab/wk.

RREL 181
Circuit Analysis DC/AC (6 CR)
Prerequisites: RREL 180 and the approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to meet the needs of the railroad electronic maintainers. Upon successful completion of this course, the student should be able to identify and use fundamental DC circuit concepts such as Kirchhoff's laws, power and energy formulas, Ohm's Law, Thévenin's Theorem and Norton's Theorem as they apply to resistive circuits. Also upon successful completion of this course, the student should be able to analyze circuits involving resistors, capacitors and inductors driven by time-variant sources. This analysis will involve both time and frequency responses. 3 hrs. lecture, 2 hrs. lab, 3 hrs. alternate deliver/wk.
RREL 182  
Semiconductor Devices and Circuits  (6 CR)  
Prerequisites: RREL 181 and the approval of the railroad training administrator and the JCCC program assistant dean  
This course is designed to meet the needs of railroad electronic maintainers. Upon successful completion of this course, the student should be able to describe the characteristics of basic semiconductor devices, explain practical circuits using semiconductor devices and analyze these circuits for DC and AC quantities. 3 hrs. lecture, 2 hrs. lab., 3 hrs. alternate delivery/wk.

RREL 183  
Digital Techniques  (6 CR)  
Prerequisites: RREL 182 and approval of the railroad training administrator and the JCCC program assistant dean  
This course is designed to meet the needs of railroad electronic maintainers. Upon successful completion of this course, the student should be able to analyze basic digital circuitry consisting of arrangements of gates and flip-flops using TTL and CMOS integrated circuits, as well as relay logic. This analysis will include the application of elementary Boolean algebra, truth tables and timing diagrams. 3 hrs. lecture, 2 hrs. lab., 3 hrs. alternate delivery/wk.

RREL 284  
Electronic Communications  (6 CR)  
Prerequisites: RREL 183 and approval of the railroad training director and the JCCC program assistant dean  
This course is designed to meet the needs of railroad electronic maintainers. Upon successful completion of this course, the student should be able to state the principles of amplitude, frequency, phase and pulse modulation and describe the technologies of transmitters, receivers, antennas, local area networks, wide-area networks and telephone systems. 3 hrs. lecture, 2 hrs. lab, 3 hrs. activity/wk.

RREL 285  
Microprocessor Techniques  (6 CR)  
Prerequisites: RREL 183 and approval of the railroad training director and the JCCC program assistant dean  
This course is designed to meet the needs of railroad electronic maintainers. Upon successful completion of this course, the student should be able to analyze and troubleshoot 6800 family microprocessor circuitry as well as microprocessor interface circuitry. 3 hrs. lecture, 2 hrs. lab, 3 hrs. activity/wk.

RREL 286  
Applied Microprocessors  (2 CR)  
Prerequisites: RREL 285 and approval of the railroad training director and the JCCC program assistant dean  
This course is designed to provide an introduction to advanced microcomputer concepts and applications. This course is a continuation of topics introduced in the microprocessor course, with specific applications in general-purpose microcomputers (PCs) and dedicated microprocessor-based control systems. Included are hardware and software training in operating systems, peripherals, monitors, processors, storage media, maintenance, diagnostics and troubleshooting. Analog and digital data acquisition and processing, as well as voice digitization and playback, will be demonstrated. Presentations and labs will include incorporation of these functions into a PC, Harmon HLC and the Servo 9000 hot box detector. 1 hr. lecture, 2 hrs. lab/wk.
**RRIT 122**

**Elements of Welding** (3 CR)

*Prerequisites: Approval of the BNSF manager of track and roadway maintenance training and the JCCC program assistant dean*

Upon successful completion of this course, the student should be able to cut and weld using oxyfuel (OFC) and shielded metal arc welding (SMAW). OFC will cover straight-line cutting, beveling, piercing and gouging. The SMAW portion will cover flat position and will be limited to fillet welds. The student should be able to discuss electrical safety in shielded metal arc welding (SMAW), handle welding cables properly, understand eye hazards, list safe clothing requirements and discuss environmental safety. This knowledge will be evidenced by achieving the specified score on the unit test. 2 hrs. lecture, 3 hrs. lab/wk.

**RRIT 123**

**Basic Welding** (3 CR)

*Prerequisites: RRIT 122 or approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean*

Upon successful completion of this course, the student should be able to properly use oxy-fuel cutting (OFC), shielded metal arc welding (SMAW) and air carbon arc cutting (CAC-A) equipment. The SMAW portion of the course will concentrate on 1G and 2F welds with bend tests being performed on selected weldments. 1 hr. lecture, 4 hrs. lab/wk.

**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $180 to $400.

**RRIT 127**

**Welding Processes** (2 CR)

*Prerequisites: Approval of the BNSF training director and the JCCC program assistant dean*

Upon successful completion of this course, the student should be able to identify various welding processes used by the railroad and other industries. Standard shop and maintenance welding processes will be taught and demonstrated. Welds will be tested and inspected according to industry standards. 1 hr. lecture, 1.5 hrs. lab/wk.

**RRIT 132**

**Thermite Welding** (3 CR)

*Prerequisites: Approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean*

Upon successful completion of this course, the student should be able to produce in a safe manner high-quality, sound thermite welds on standard rail and mismatched rail. This course is intended for people who are employed in the railroad industry. It will include specific in-depth industrial training. Students will be required to make various rail alignments and to grind various new and worn rails. 1 hr. lecture, 4 hrs. lab/wk.

**RRIT 136**

**Rail and Switch Point Repair Welding** (3 CR)

*Prerequisites: RRIT 123 and approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean*

Upon successful completion of this course, the student should be able to identify and/or produce in a safe manner high-quality welding repairs and correct welding techniques to railroad track components to include maintenance, grinding, welding
and repairs of switches, track rail ends, track wheel burns, battered welds, rail
transition ramp building methods, Pandrol weld on shoulders, proper placement of
work piece connections, and approved switch point welding procedures, as
specified by the Burlington Northern Santa Fe Railway. This course will involve
the study of different welding processes, welding safety, proper grounding
techniques, rail heater and metallurgy. The effects of heat in relationship to
specific rail steel components will be discussed. Students will be required to
experience all appropriate methods and processes including welding, cutting,
grinding, straight edging rail steel and preparing switch points for proper mating
surface according to current industry standards. Evaluation will be a classroom
and laboratory setting. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 137
Structural Welding SMAW (3 CR)
Prerequisites: RRIT 123 and approval of the BNSF manager of engineering and
maintenance training and the JCCC program assistant dean
Upon successful completion of this course, the student should be qualified to weld
with SMAW according to AWS D1.1.96 code. All welds will be made in the vertical
(3G) and overhead (4G) positions. Passing or failing will be determined by the
student's ability to successfully produce welds according to prescribed standards
in AWS D1.1.96. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 138
Structural Welding FCAW (3 CR)
Prerequisites: RRIT 137 and approval of the BNSF manager of engineering and
maintenance training and the JCCC program assistant dean
Upon successful completion of this course, the student should be qualified to weld
with FCAW according to AWS D1.1.96 code. All welding will be made in the vertical
(3G and 3F) and overhead (4G and 4F) positions. Passing or failing will be determined by the
student's ability to successfully produce welds according to prescribed standards
in AWS D1.1.96. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 139
Structural Welding Pipe (3 CR)
Prerequisites: RRIT 137 and approval of the BNSF manager of engineering and
maintenance training and the JCCC program assistant dean
Upon successful completion of this course, the student should be qualified to weld
on pipe using the SMAW process. All welding will be made in the vertical uphill
fixed position (5G). Passing or failing will be determined by the student's ability to
successfully produce test welds. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 140
Structural Quality SMAW (3 CR)
Prerequisites: RRIT 127 or approval of the BNSF training director and the JCCC
program assistant dean
Upon successful completion of this course, the student should be qualified to weld
with shielded metal arc welding (SMAW) according to industrial standards. Test
welds will be made in the vertical up (3G) positions; limited thickness. Passing or
failing will be determined by the student's ability to successfully produce welds
according to prescribed American Welding Society (AWS) standards. The oxyfuel
cutting (OFC) portion will include cutting metal to specific sizes and shapes. 1 hr.
lecture, 4 hrs. lab/wk.

RRIT 141
Structural Quality GMAW (3 CR)
Prerequisites: RRIT 127 or approval of the BNSF training director and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to explain the theory of gas metal arc (GMAW) identify materials and use equipment related to the processes. The student will weld on mild steel plate in all positions producing both fillet and groove welds with the GMAW process with a U-bend test being performed in selected positions according to industry standards. Selected welding codes and specifications will be used as a reference for this class. The oxy-fuel (OFC) will be used to prepare mild steel for welding. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 142
Structural Pile Welding (3 CR)
Prerequisites: RRIT 137 and RRIT 138 and approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to splice pipe and H-beam piling and install cap plate gussets according to Burlington Northern Santa Fe (BNSF) standard blueprints. This course shall make use of oxy-fuel cutting (OFC), grinding, shielded metal arc welding (SMAW), and flux cored arc welding (FCAW) to prepare, fit and weld piling. Selected welds will have test strips bent to check for soundness of welds. These strips should meet basic American Welding Society (AWS) test standards. Basic metallurgy will be discussed as it applies to the need for preheat and post heat in the building of railroad bridges. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 143
Thermite Welding for Supervisors (2 CR)
Prerequisites: Approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to produce in a safe manner high-quality, sound thermite welds on standard rail and mismatched rail. This course is intended for people who are employed in the railroad industry. This will be specific, in-depth, industrial training. Students will be required to make various rail alignments and grind various new and worn rails. The students should also be able to clean a used crucible, assemble a crucible and temper new and used crucibles. 1.5 hrs. lecture, 1 hr. lab/wk.

RRIT 145
Frog Welding (3 CR)
Prerequisites: RRIT 123 and approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to repair by welding a manganese frog casting according to Burlington Northern Santa Fe Railway standards. This course will involve the study of different welding and cutting processes, with emphasis on the FCAW process. Metallurgy and the effects of heat in relationship to austenitic manganese steel will be discussed. Students will be required to cut, grind, straight edge, dye penetrant test, weld and monitor heat input during the repair process on austenitic steel frog casting for evaluation in an actual laboratory setting. 1 hr. lecture, 4 hrs. lab/wk.

RRIT 147
Component Welding for Supervisors (2 CR)
Prerequisites: Approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to describe methods and processes used to weld railroad track components. This course will introduce the student to various types of welding and cutting processes.
Metallurgy and the effects of heat on rail steel and manganese frog castings will be discussed. Instructor demonstration and student hands-on experience will be provided regarding welding, cutting and grinding on rail steel, frog castings, carbon arc cutting with air (CAC-A), straight edging, temperature monitoring and dye penetrants on both rail steel and frog castings in an actual laboratory setting. 1.5 hrs. lecture, 1 hr. lab/wk.

RRIT 155
Railroad Welding Review (2 CR)
Prerequisites: Approval of the BNSF manager of engineering and maintenance training and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to identify currently used rail, frogs, switch points, crossings, Conley’s and insulated joint plugs. The student should be able to locate operating procedures in an approved manual and apply them to the appropriate component. In addition, the student should be able to describe the proper application of OFC, OFW, heating, SMAW, FCAW, CAC-A and thermite welding procedures. 1.5 hrs. lecture, 1 hr. lab/wk.

RRIT 156
Rail and Frog Welding Review (3 CR)
Prerequisites: Approval of BNSF manager of engineering maintenance training and the JCCC program assistant dean

Upon successful completion of this course, the student should be able to identify currently used types and sizes of rail, frogs, switch points and insulated joints. The student should be able to locate operation procedures in an approved manual and apply them to the appropriate component. In addition, the student should be able to describe the proper application of oxygen fuel cutting (OFC), oxy-fuel heating, shielded metal arc welding (SMAW), flux core arch welding (FCAW), carbon arc cutting with air (CAC-A), thermite welding (TW) and grinding procedures. 3 hrs. lecture/wk.

RRIT 271
Railroad Welding Internship (6 CR)
Prerequisites: Admission to the JCCC railroad program, welding option, and successful completion of RRIT 122 and RRIT 123 and RRIT 136 and RRIT 145 and RRIT 132 with a grade of “C” or higher

Upon successful completion of this course, the student should be able to apply classroom knowledge to an actual work situation. The internship will provide advanced students with on-the-job experience under the supervision of professionals in the railroad industry. The work will be developed cooperatively with railroads, college staff and each student to provide a variety of actual job experiences directly related to the student’s career goals. Minimum of 120 workdays required.

Railroad Maintenance of Way (RRMW)

RRMW 132
Railroad Structures Layout (3 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean

This is a beginning course for railroad maintenance-of-way personnel working with bridge and building personnel working with bridge and building construction. Students will learn to read construction blueprints used in railroad projects and perform layout work for railroad construction. Also, students will learn how to use basic surveying principles and equipment typically used at railroad construction sites. 2 hrs. lecture, 3 hrs. lab/wk.
RRMW 135
Concrete Technology (2 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean
This course contains information that will help experienced and inexperienced students understand the principles of quality concrete. The emphasis will be on allowing concrete to reach its highest level of durability through proper mix design, placing and finishing techniques, and curing methods. 1.5 hrs. lecture, 1 hr. lab/wk.

Railroad Operations (RRT)

RRT 120
History of Railroading (3 CR)
This course covers the history and traditions of railroading and the industry’s role in North American economic development. Upon successful completion of this course, students will be able to list and explain the significance of major events in North American railroading. 3 hrs. lecture/wk.

RRT 121
Railroad Technical Careers (3 CR)
This course includes information about technical careers in railroading, enabling students to choose suitable career paths. This course includes field trips that will demonstrate the relationships among technical work groups in day-to-day railroad operations. Upon successful completion of this course, students should be able to describe basic technical job functions, requirements and characteristics. 3 hrs. lecture/wk.

RRT 150
Railroad Operations (3 CR)
This course includes information about the industry, its major assets, structure, and typical operations. Upon successful completion of this course, students will be able to define the current North American railroading industry characteristics, basic operations components and processes, and industry structure and administrative processes. 3 hrs. lecture/wk.

RRT 165
Railroad Safety, Quality and Environment (3 CR)
This course covers the importance of safety, quality, personal health and environmental awareness to the railroad industry and emphasizes the basic tools and techniques for improving these conditions on the job. Upon successful completion of this course, students should be able to define and explain the need for improved safety, quality, health and environmental awareness; describe their basic principles; explain the elements of successful programs; and apply these elements to typical tasks on the job. 3 hrs. lecture/wk.

Railroad Operations-Mechanical (RRTM)

RRTM 124
Orientation to the Railroad Mechanical Craft (2 CR)
Prerequisite: Admission to the JCCC railroad operations program, mechanical option
This course is designed to familiarize the student with work in railroad mechanical crafts. Upon successful completion of the course, students should be able to describe apprenticeship program structures, benefits, organizational goals, basic safety and quality principles, and other aspects of mechanical craftwork. 2.5 hrs. lecture/wk.

**RRTM 130**  
**Freight Car Yard Inspection (3 CR)**  
*Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean*  
This course is the first of a series of three for freight car training. It is designed to introduce the student to the safe inspection, testing, and repairing of freight cars in a repair track environment in accordance with Federal Railroad Administration (FRA), Association of American Railroads (AAR), and BNSF Railway procedures and policies. 32 hrs. lecture, 8 hrs. instructional lab/total

**RRTM 131**  
**Railroad Car Repair Track Inspector (3 CR)**  
*Prerequisites: RRTM 130 and approval of the railroad training administrator and the JCCC program assistant dean*  
This course is the second of a series of three for freight car training. It is designed to introduce the student to the safe inspection, testing, and repairing of freight cars in a repair track environment in accordance with Federal Railroad Administration (FRA), Association of American Railroads (AAR), and BNSF Railway procedures and policies. 32 hrs. lecture, 8 hrs. instructional lab/total

**RRTM 135**  
**Basic EMD Mechanical (3 CR)**  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This is the first in a series of four courses in Locomotive Mechanics. This course is designed to introduce the student to the basic operation, maintenance, repair requirements and trouble shooting for EMD diesel engines and support systems. 40 hrs. integrated lecture lab/total

**RRTM 136**  
**Basic GE Mechanical (3 CR)**  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This is the second in a series of four courses in Locomotive Mechanics. This course is designed to introduce the student to the basic operation, maintenance, repair requirements and trouble shooting for GE diesel engines and support systems. 40 hrs. integrated lecture lab/total

**RRTM 137**  
**Locomotive Air Brake (3 CR)**  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This course is the third in a series of four courses in Locomotive Mechanics. It is designed to provide the student an introduction to the operation, testing, maintenance, and troubleshooting for 26L and 30 ACDW locomotive air brake systems. This course also emphasizes FRA air brake requirements applicable to locomotives. 40 hrs. integrated lecture lab/total
RRTM 138  
**Locomotive FRA** (3 CR)  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This course is the fourth in a series of four courses in Locomotive Mechanics. This course is designed to introduce the student to the Federal Railway Administration and Department of Transportation Code of Federal Regulations Title 49, Parts 209, 218, 229, 231, and 232. 40 hrs. integrated lecture lab/total

RRTM 142  
**Locomotive Electricity** (3 CR)  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This is the first in a series of four courses in Locomotive Electrical. This course is designed to introduce the student to the basic electrical theory and concepts related to locomotive electrical systems. 40 hrs. integrated lecture lab/total

RRTM 143  
**Low Horsepower Electrical** (3 CR)  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This is the second in a series of four courses in locomotive electrical. This course is designed to introduce the student to the operation, maintenance, and troubleshooting of EMD Low Horsepower locomotive electrical systems. 40 hrs. integrated lecture lab/total

RRTM 144  
**EMD Basic Electrical** (3 CR)  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This is the third in a series of four courses in Locomotive Electrical, this course is designed to introduce the student to the basic operation, maintenance, repair requirements and troubleshooting of EMD diesel engines and support systems. 40 hrs. integrated lecture lab/total

RRTM 145  
**GE Dash 8/9 Electrical Systems** (3 CR)  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean*  
This is the last in a series of four courses in Locomotive Electrical. This course is designed to introduce the student to the basic operation, maintenance, repair requirements and troubleshooting of GE Dash 8/9 locomotive systems. 40 hrs. integrated lecture lab/total

RRTM 150  
**Freight Car Open Top Loading Rules** (3 CR)  
*Prerequisite: Approval of the railroad training administrator and the JCCC program assistant*  
This course is designed to provide the student with a thorough knowledge of Freight Car Open Top Loading Rules as well as a firm understanding of other pertinent Association of American Railroads (AAR) and Federal Railroad Administration (FRA) requirements, with an emphasis on safe work practices. 40 hrs. integrated lecture lab/total
RRTM 152
Freight Car Air Brakes, Basic (2 CR)
Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to provide the student with a basic working knowledge of Freight Car Air Brake Equipment as well as a firm understanding of both Association of American Railroads (AAR) and Federal Railroad Administration (FRA) rules and requirements with emphasis on safe work practices. 40 hrs. integrated lecture lab/total

RRTM 154
Freight Car Air Brakes, Adv (2 CR)
Prerequisite: RRTM 152 and approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to provide the student with a thorough working knowledge and advanced diagnostic ability of Freight Car Air Brake Equipment as well as a firm understanding of both AAR and Federal rules and requirements with emphasis on safe work practices. 40 hrs. integrated lecture lab/total

RRTM 156
Freight Car AAR Billing (2 CR)
Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to provide the student a thorough working knowledge of the Freight Car AAR Billing system (CRB), the use of Handheld Computers for billing purposes, preparation of Original Records of Repairs and a firm understanding of both AAR and Federal rules and requirements. 40 hrs. integrated lecture lab/total

RRTM 158
Freight Car Intermodal (2 CR)
Prerequisite: Approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to provide the student a thorough working knowledge of Freight Car Intermodal Equipment as well as a firm understanding of both BNSF and Federal Railroad Administration (FRA) rules and requirements with emphasis on safe work practices. 40 hrs integrated lecture lab/total

RRTM 160
Freight Car Computer (Com C) (2 CR)
Prerequisite: Enrollment restricted to BNSF employees only. Approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to provide a thorough working knowledge of computer programs used by BNSF Railway. Upon completion, the student should be able to navigate easily through both the TSS and MEMS computer programs used by BNSF Railway. 40 hrs. integrated lecture lab/total

RRTM 170
Railroad Mechanical Safety and Health (2 CR)
Prerequisites: Admission to the JCCC’s railroad operations program, mechanical option, and completion of RRTM 124 with a grade of "C" or higher
This course is designed to teach the principles and policies governing railroad safety and health. Upon successful completion of this course, the student should
be able to describe safety and health rules and policies, including applying a team process to improving safety and health, use and care of personal protective equipment, back injury prevention, hazard communications, lockout/tagout procedures, and hearing conservation. Students will be qualified to perform first aid and CPR and will be able to conduct a job safety analysis. 2.5 hrs. lecture/wk.

RRTM 251
Locomotive Diesel Engine Fundamentals (2 CR)
Prerequisites: Admission to the JCCC railroad operations program, mechanical option, and completion of RRTM 124 and RRTM 170 with a grade of "C" or higher
This course teaches the principles of diesel engine operation. Upon successful completion of this course, students will be able to identify 2-cycle and 4-cycle diesel engine parts and describe how diesel engine lubricating, cooling and fuel systems operate. 1.5 hrs. lecture, 1 hr. lab/wk.

RRTM 253
Freight Car Fundamentals (2 CR)
Prerequisites: Admission to the JCCC's railroad operations program, mechanical option, and completion of RRTM 124 and RRTM 170 with a grade of "C" or higher
This course teaches the basic types and purposes of railroad freight cars. Upon successful completion of this course, students will be able to identify five types of railroad freight cars, explain their functions, describe their basic construction and explain purposes and references for AAR rules and regulations governing freight cars. 1.5 hrs. lecture, 1 hr. lab/wk.

RRTM 254
Basic Locomotive Electricity and Electronics (2 CR)
Prerequisites: Admission to the JCCC's railroad operations program, mechanical option and completion of RRTM 124 and RRTM 170 with a grade of "C" or higher
This course teaches the theory and operation of electrical and electronic circuitry on board modern locomotives and complements EMD and GE electrical systems classes. Upon successful completion of this course, students will be able to describe the theory and purpose of the processes and operation of locomotive electrical system components and maintenance techniques. 1.5 hrs. lecture, 1 hr. lab/wk.

Railroad Work Equipment (RRWE)

RRWE 136
Basic Electronics (2 CR)
Prerequisites: Approval of the railroad training director and the JCCC program assistant dean
This course is an introduction to electronics with a review of basic electrical concepts. Instruction is provided on the operation and use of an oscilloscope, function generator, DC power supply, digital multi-meter and watt-meter. The course also includes an introduction to electronic devices, schematics, basic electronic formulas and programmable logic controllers. 1 hr. lecture, 1.5 hrs. lab/wk.

RRWE 138
Work Equipment Symbols (2 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean
This course is designed to introduce the mechanic to the different types of symbols found on railroad track equipment. Major symbols families that will be discussed include mechanical, hydraulic, pneumatic, ladder and logic devices. At the end of each major topic, several small projects will be assigned to ensure that understanding has been achieved. As a final project, students will be assigned a project that will test their ability to use correctly several different families of symbols in one complete working drawing. 1 1/2 hrs. lecture, 1 hr. lab/wk.

RRWE 146

Hydraulic Principles (2 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean

This course is designed for operators and maintenance personnel who use hydraulic systems in their work. Upon successful completion of this course, the student should be able to apply hydraulic principles to improve operational availability of equipment. Students will learn to read hydraulic diagrams and perform preventive maintenance and troubleshooting. In order to explain component operation, there will be extensive use of cut-away components. 1 hr. lecture, 1.5 hrs. lab/wk.

RRWE 148

Electronic Principles (2 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean

This introductory course is designed to familiarize the student with the basic principles of electricity/electronics, the proper usage of a VOM or DMM, the reading of electrical prints in performing basic troubleshooting and the ability to identify basic hardware found in electrical circuits on maintenance-of-way equipment. 1 hr. lecture, 1.5 hrs. lab/wk.

RRWE 157

Fluid Power Systems (2 CR)
Prerequisites: Approval of the railroad training administrator and the JCCC program assistant dean

This course is designed to introduce the field of fluid power. Major topics that will be discussed include the two types of fluid power systems, major parts in a fluid power system and their purpose, the calculations needed to size motors and cylinders, the proper preventive maintenance procedures needed to keep the system operating at peak efficiency, and the troubleshooting methods used to isolate the problem in a system that is not working correctly. 2 hrs. lecture/wk.

RRWE 190

Advanced Hydraulic Principles (2 CR)
Prerequisites: RRWE 146 and the approval of the railroad training administrator and the JCCC program assistant dean

This advanced course contains information on hydraulic components found on the more complex maintenance-of-way equipment. Upon successful completion of this course, the student should be able to understand symbols, describe the theory of operation of and perform basic troubleshooting tasks on these components. 1 hr. lecture, 1.5 hrs. lab/wk.

RRWE 192

Advanced Electronic Principles (2 CR)
Prerequisites: RRWE 146 and the approval of the railroad training administrator and the JCCC program assistant dean
This advanced course contains information on electronic components and circuits found on the more complex maintenance-of-way equipment. Upon successful completion of this course, the student should be able to understand symbols, describe the theory of operation of and perform basic troubleshooting tasks on these components. 1 hr. lecture, 1.5 hrs. lab/wk.

**Reading (RDG)**

**RDG 125**  
**Fundamentals of Reading** (3 CR)  
**Prerequisite: Appropriate assessment score**  
This is a mandatory reading course based on JCCC assessment results, and successful completion of the course (defined as a "C" or higher) is required for students to progress in the assessment mandated sequence of reading courses. It is designed for students who need to improve their understanding of written expression. The focus is on the development of vocabulary, dictionary usage, comprehension and written communication. The next course, RDG 126 Reading Skills Improvement, is also required to complete the mandatory reading program. RDG 125 does not fulfill degree requirements. 3 hrs./wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

**RDG 126**  
**Reading Skills Improvement** (3 CR)  
**Prerequisites: Appropriate test score, or either RDG 125 or EAP 093 and EAP 115 with a grade of "C" or higher**  
This is the final mandatory reading course based on JCCC assessment scores, and successful completion of this course (defined as a grade of "C" or higher) is required to exit the assessment mandated sequence of reading courses. It is designed for students who need to improve their understanding of written expression. The focus of the course is on higher-level comprehension and vocabulary skills. Students use news articles and other materials to apply and practice skills learned in the class and to provide a background for written assignments. This course does not fulfill degree requirements. 3 hrs./wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

**RDG 127**  
**College Reading Skills** (3 CR)  
**Prerequisite: RDG 126 or appropriate assessment score**  
In this advanced course, designed for students who wish to further improve their reading, students will develop critical reading skills, expand background knowledge through reading, increase vocabulary, develop flexible reading techniques, and improve study and writing skills. Students use selected periodicals to apply and practice skills learned in the class and to provide a background for written assignments and class discussions. 3 hrs./wk.  
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $2 to $5.

**Religion (REL)**

**REL 120**  
**Exploring World Religions** (3 CR)  
This course is a comparative study of the world's major religious traditions. The basic beliefs of Hinduism, Buddhism, Confucianism, Daoism, Judaism, Christianity and Islam will be explored. A comparative framework for religious studies will be provided, and essential differences between Eastern and Western religions will be noted. Literary texts and iconographic images will be studied as
REL 125
Religions of the East (3 CR)
Religions of the East is a detailed examination of the rich and diverse religious traditions of India, Tibet, China and Japan. Students will explore the histories, mutual influences, beliefs, and practices of Hinduism, Buddhism, the Jain religion, the Sikh religion, Confucianism, Daoism, the Tibetan religions, and Shinto, stressing the characteristics they share, as well as those that differentiate them from each other and from Western religions. Primary and secondary texts, as well as the iconographic and artistic traditions of these religions, will be examined as appropriate. 3 hrs. lecture/wk.

REL 126
Religions of the West (3 CR)
Religions of the West is a detailed examination of the rich and diverse religious traditions that originated in the ancient Near East (Judaism, Christianity, Islam), examples of indigenous traditions of Africa and North America, and examples of “alternative religions” of modern/contemporary Western culture. The student will explore the histories, cultural influences, beliefs and practices of these religions, stressing the characteristics that they share and those that differentiate them, both from one another and from the religious traditions of South and East Asian cultures. The primary texts, as well as the iconographic and artistic traditions of these religions, will be examined as appropriate. 3 hrs. lecture/wk.

REL 150
Islam: Religion & Civilization (3 CR)
This course covers the context in which Islam arose; the career of the Prophet Muhammad; the main teachings and practices of the religion; the Qur’an and other early Islamic literature; subsequent political developments in the religion and its spread; its main religious branches; its history during the Middle Ages; the Christian crusades and their consequences; the major components of Islamic civilization including law, the arts, literature, philosophy, science, and mathematics; Sufi; the effects of Western imperialism upon Islamic states; major developments in Islamic thought and practice since the seventeenth century; the Islamic diaspora; and Islam today. REL 150 is the same course as HIST 150 and HUM 150; enroll in one only. 3 hrs. lecture/wk.

Respiratory Care (RC)

RC 125
Beginning Principles of Respiratory Care (4 CR)
Prerequisite: Admission to the respiratory care program
This is an introduction to the basic therapeutic modalities used in respiratory care, including patient safety and comfort considerations, infection control and standard precautions, medical gas delivery, humidity and aerosol therapy, basic respiratory pharmacology, secretion clearance techniques and lung expansion therapy. Emphasis is on patient assessment, clinical application of therapies, therapy evaluation and communication techniques. The roles of respiratory care in the health care system and basic respiratory care service scope, organization and operation are also introduced. Students will have the opportunity to work with patients after two to three weeks of introductory lecture and lab demonstration and practice. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 6 hrs. lecture, 16 hrs. lab/wk. Summer.
Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $150 to $250.

RC 130
Respiratory Care Equipment (4 CR)
Prerequisite: Admission to the respiratory care program
This course is an introduction to basic respiratory care equipment. The operation, function, calibration, troubleshooting and maintenance for oxygen administration devices, aerosol generators, humidifiers and hyperinflation devices will be addressed. Medical gas production and storage will also be addressed. 6 hrs. lecture, 8 hrs. lab/wk. Summer

RC 135
Cardiopulmonary Medicine I (1 CR)
Prerequisite: Admission to the respiratory care program
This is the first of three courses that provide a detailed review of the respiratory and cardiac system anatomy and physiology and the clinical implications of normal and abnormal function. 2 hrs./wk. Summer.

RC 220
Cardiopulmonary Physiology (2 CR)
Prerequisite: Successful completion of the summer sequence of respiratory care courses
This is a comprehensive study of the physiology and pathophysiology of the pulmonary, cardiovascular and renal systems as they relate to respiratory care. 2 hrs./wk. Fall.

RC 230
Clinical Topics and Procedures I (4 CR)
Prerequisite: Successful completion of the summer sequence of respiratory care courses
This course supplements the fall clinical experiences. Concepts, techniques and procedures learned in the summer semester are reinforced. The student will develop new understandings and skills in the acute care, basic emergency care and introductory-level critical care settings. Emphasis will be on arterial blood gas procurement and analysis, cardiac rhythm assessment and management, airway equipment and management procedures, patient management of obstructive lung disorders, perioperative care and chest trauma. In addition, basic mechanical ventilation concepts and techniques will be addressed as they relate to physiologic effects, ventilator commitment, management and basic troubleshooting. 3 hrs. lecture, 3 hrs. lab/wk. Fall.

RC 231
Clinical Topics and Procedures II (4 CR)
Prerequisite: Successful completion of the fall sequence of respiratory care courses
This course supplements the spring clinical experiences. Concepts, techniques and procedures learned in the fall semester are reinforced. The student will refine understandings of and skills in the acute care, basic emergency care and critical care settings. Emphasis will be on ventilator management of patients with specific lung insults, neurological compromise and cardiac problems. Advanced mechanical ventilation concepts and techniques will be addressed as they relate to physiologic effects, management and troubleshooting. Home care, pulmonary rehabilitation, physician-assisted procedures, cardiopulmonary stress testing,
patient case management and department management will be addressed. 3 hrs. lecture, 3 hrs. lab/wk. Spring.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $600.

**RC 233**  
**Respiratory Care of Children (2 CR)**  
*Prerequisite: RC 230*  
The focus will be on the respiratory care of neonatal and pediatric patients, with emphasis on the management of cardiopulmonary disease states unique to children. Information will be based on developmental anatomy and physiology, pathology, diagnostic/laboratory assessments, and associated patient management in the acute, critical, emergency care, transport and home care settings. 2 hrs./wk. Spring.

**RC 235**  
**Cardiopulmonary Medicine II (2 CR)**  
*Prerequisite: Successful completion of the summer sequence of respiratory care courses*  
This is the second in a series of three courses that provide a detailed review of the physical and diagnostic assessments of the cardiopulmonary patient and the related clinical implications of the assessment findings. 2 hrs. lecture/wk. Fall.

**RC 236**  
**Cardiopulmonary Medicine III (2 CR)**  
*Prerequisite: Successful completion of the fall sequence of respiratory care courses*  
This is the third in a series of three courses that provide a detailed review of pulmonary disorders, their pathology and their management. 2 hrs. lecture/wk. Spring.

**RC 240**  
**Cardiopulmonary Pharmacology (2 CR)**  
*Prerequisite: Successful completion of the summer sequence of respiratory care courses*  
This course acquaints the student with general principles of pharmacology and provides a comprehensive review of all drugs and drug groups that are either administered by respiratory-care practitioners or play an integral part in the management of patients they may encounter. Emphasis is on the clinical application of pharmacological agents, their therapeutic effects, mechanism of action and adverse effects, rather than the biochemistry involved. 2 hrs. lecture/wk. Fall.

**RC 271**  
**Clinical Practice I (6 CR)**  
*Prerequisite: Successful completion of the summer sequence of respiratory care courses*  
This course is the clinical application of respiratory care therapeutic and diagnostic procedures. Students will have the opportunity to work with patients under close supervision to further develop their skill and understanding of basic respiratory care procedures for adults and children. The course objectives progress throughout the semester to involve the student initially in basic care of the less critically ill patient. As their comfort level and exposures progress, students are allowed to work with the more critically ill patients. Enrollment in
certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 24 hrs./wk. Fall.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $100 to $200.

RC 272
Clinical Practice II (6 CR)
Prerequisite: Successful completion of the fall sequence of respiratory care courses
This course is the clinical application of respiratory care therapeutic and diagnostic procedures. Students will have the opportunity to work with patients under close supervision to further develop their skill and understanding of critical respiratory care procedures for adults and children. Students will also be involved in specialty activities to include physician rounds, pulmonary rehabilitation, home care, pulmonary function and cardiopulmonary stress testing. Enrollment in certain courses may require a professional liability fee of $16.00. Students will be notified via their JCCC student e-mail account if the fee is due and instructions on how to pay the fee. 24 hrs./wk. Spring.

Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $200 to $600.

Sociology (SOC)

SOC 122
Introduction to Sociology (3 CR)
Introduction to Sociology introduces students to sociology, the "science of society," and its approach to human social life. The course shows students how sociologists conduct research, and it describes the basic concepts and theories sociologists use to explain the social world. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

SOC 125
Social Problems (3 CR)
Selected social problems will be analyzed. Problems associated with race, gender, class, deviance, crime and ecology will be examined as perennial issues in contemporary society. In addition, other topics will be analyzed as they arise or as the instructor and students determine them to be significant. The history and development of each problem, as well as possible solutions, will be examined from a variety of perspectives. 3 hrs. lecture/wk.

SOC 127
Criminology (3 CR)
This class will explore various explanations for criminal behavior including choice, biosocial, psychological, social structure and social process theories. Society's responses to crime will also be examined. 3 hrs. lecture/wk. ADMJ 127 and SOC 127 are the same course. Do not enroll in both.

SOC 131
Marriage and the Family (3 CR)
This is a sociological examination of marriage and the family as a social institution. It will emphasize changing roles, family formation, socialization, domestic conflict, interaction among family members and marriage partners, and
the role of marriage and the family in society. 3 hrs./wk. This course may be offered as a Learning Communities (LCOM) section, see current credit schedule for LCOM details.

SOC 146
Introduction to Social Work and Social Welfare (3 CR)
This course will introduce the student to the profession of social work and to the history and development of social welfare and social service systems in the United States. This is a required introductory course in the sequence of study leading to a professional degree (BSW, MSW or DSW) in social work. 3 hrs./wk.

SOC 147
Social Work and Social Justice (3 CR)
The history of social movements in the United States will be integrated into exploration of current economic, political, religious and psychosocial issues, at micro and macro practice levels, relevant to the professional practice of social work at the BSW or MSW level of practice. This course is designed to support the National Association of Social Workers (NASW) Code of Ethics and Council of Social Work Education (CSWE) requirements for culturally competent practice. 3 hrs./wk.

SOC 152
Perspectives on Aging (3 CR)
Social aspects of aging will be identified. Areas of special interest will include research themes and demographic trends; aging and its relationship to family, the economy, politics, religion and education; the effect of cultural values on behavior; and the future of the elderly. 3 hrs./wk.

SOC 165
Chinese Society: Past and Present (3 CR)
An introduction to Chinese society since 1949, this course examines Chinese society and culture and focuses on contemporary social change while tracing the historical roots of Chinese culture and institutions. Social processes such as social movements, institutional development, political change, social organization and conflict are examined and analyzed. 3 hrs. lecture/wk. This course is typically offered in the spring semester.

SOC 200
Intercultural Applications (3 CR)
Prerequisite or corequisite: SPD 180
This course will provide students with direct experience with people from other cultures and in community organizations. Through their work with international representatives and service agencies, students will gain experiential and reflective knowledge of various cultures, social institutions and social issues and will develop skills needed to successfully negotiate intercultural settings. Enrollment in the course requires participation in a weekend retreat and some additional hours in activities outside the classroom. 3 hrs. lecture/wk. This course is typically offered in the spring semester.

SOC 205
Sociology of Food (3 CR)
Through this exploration of food in society, students will discover the fundamental significance of the relationships between people and food. In studying the ways
food is produced and consumed, we will also discover the ways food shapes and expresses relationships among people. This most basic of human needs is easily taken for granted by those who have plenty, while the causes of hunger are easily dismissed or misunderstood. This course will address such misunderstandings, as well as issues of culture, meaning, identity, power, and ecology, all through a focus on food. 3 hrs. lecture/wk.

SOC 210
Methodology in Social Sciences (3 CR)
Prerequisite: PSYC 130 or SOC 122 or ECON 230
This course deals with scientific research methods utilized in the social sciences, especially psychology, sociology, political science, and anthropology. The course examines a wide range of data collection methodologies including observation, questionnaire construction, and controlled experimentation. The course will be beneficial for analyzing and evaluating the quality of research findings reported in both the popular and academic press. It will also be useful to those who plan to engage in occupations requiring the use of research methodology. 3 hrs. lecture/wk. SOC 210, PSYC 210 and POLS 210 are the same course. Do not enroll in more than one of these courses.

Speech/Debate (SPD)

SPD 120
Interpersonal Communication (3 CR)
This course focuses on the principles of effective speech communication in small group and one-to-one relationships. Theory and practice of interpersonal communication are studied and applied to a variety of life situations. The course focuses on perception, self-concept, listening, conflict, language, nonverbal communication and culture as they relate to interpersonal relationships. 3 hrs./wk. Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $1 to $5.

SPD 121
Public Speaking (3 CR)
This course is designed to meet the needs of people who wish to improve their ability to prepare and deliver effective oral presentations before an audience. This fundamental speech course emphasizes creation of ideas, research techniques, outlining, audience analysis, organization and delivery techniques. Students will deliver a variety of speech types including informative and persuasive. 3 hrs./wk. Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $1 to $5.

SPD 125
Personal Communication (3 CR)
This course is concerned with the most frequently used human communication skills, interpersonal communication and public speaking. The course demonstrates the natural relationships between communicating one-to-one and in public, showing that skills in one can be employed in the other and giving practice in both. Focus is on communication theory, listening, concepts of self, language, research techniques, perception and various types of public speaking, such as impromptu, group panel, informative and persuasive. 3 hrs./wk. Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $1 to $5.

SPD 128
Business and Professional Speech (3 CR)
Students will improve their verbal communication skills both formally and
informally by studying interviewing, delivering effective presentations, working in
groups, negotiating, practicing listening, and recognizing verbal and nonverbal
messages. The course is designed for the student presently working in business
or planning to pursue a business degree. 3 hrs./wk.

Associated Costs: In addition to the course tuition, fees, and textbooks, this
course has additional expense considerations that are estimated to be $1 to $5.

SPD 130
Elementary Debate (3 CR)
This course is designed for those students interested in participating in
competitive intercollegiate debate. Through the course, students will learn debate
theory, debate skills and techniques, and methods of becoming successful
intercollegiate competitors. Students are expected to travel to tournaments in
order to develop skills in research, argument construction, debate format,
intercollegiate debate speaking style and refutation. Students enrolling in this
course will be required to participate as members of the intercollegiate debate
team and will attend an appropriate number of weekend intercollegiate debate
tournaments a semester. 3 hrs./wk.

SPD 132
Intermediate Debate I (3 CR)
Prerequisite: SPD 130 or the equivalent
This course is designed for those students interested in participating in
competitive intercollegiate debate. Through the course, students will learn debate
theory, debate skills and techniques, and methods of becoming successful
intercollegiate competitors. Students are expected to travel to tournaments in
order to develop skills in research, argument construction, debate format,
intercollegiate debate speaking style and refutation. Students enrolling in this
course will be required to participate as members of the intercollegiate debate
team and will attend an appropriate number of weekend intercollegiate debate
tournaments a semester. 3 hrs./wk.

SPD 140
Oral Interpretation of Literature (3 CR)
The student will develop techniques for effective spoken performance of literature.
Using poetry, fiction and nonfiction, students will create literary interpretations and
then master both the verbal and nonverbal methods necessary for effective
spoken expression of those interpretations. This course includes topics such as
selecting literary works for performance, interpretation of literary works, audience
analysis and performance. Skills acquired in this course will be essential to actors,
broadcast journalists, educators and other public speakers. 3 hrs./wk.

SPD 141
Voice and Speech (3 CR)
The student will develop techniques to expand breath support, vocal range and
dynamics; develop precise articulation; and strengthen the connection between
thought and sound. Through the use of exercises to free, develop and strengthen
the voice, the student will be better able to communicate the full range of human
emotion and all the nuances of thought. Skills acquired in this course are essential
for actors, broadcast journalists, educators and other public speakers. 3 hrs./wk.

SPD 180
Intercultural Communication (3 CR)
The intercultural communication course is concerned with communication theory
as it relates to cross-culture interactions. This course utilizes concepts drawn from
sociology, psychology, anthropology and communication. Focus is on identifying
the cultural bases of beliefs, attitudes, values and behaviors. Objectives include
recognizing commonalities across cultures, tolerating ambiguity in a variety of situations, developing a more global multicultural perspective, identifying and appreciating other cultural orientations, and recognizing and assigning cultural explanations to specific behaviors. 3 hrs/wk.

SPD 230
Intermediate Debate II (3 CR)
Prerequisite: SPD 132 or the equivalent
This course is designed for students interested in participating in competitive intercollegiate debate. Through the course, students will learn debate theory, debate skills and techniques, and methods of becoming successful intercollegiate competitors. Students are expected to travel to tournaments in order to develop skills in research, argument construction, debate format, intercollegiate debate speaking style and refutation. Students enrolling in this course will be required to participate as members of the intercollegiate debate team and will attend an appropriate number of weekend intercollegiate debate tournaments a semester. 3 hrs/wk.

SPD 235
Advanced Debate (3 CR)
Prerequisite: SPD 230 or the equivalent
This course is designed for students interested in participating in competitive intercollegiate debate. Through the course, students will learn debate theory, debate skills and techniques, and methods of becoming successful intercollegiate competitors. Students are expected to travel to tournaments in order to develop skills in research, argument construction, debate format, intercollegiate debate speaking style and refutation. Students enrolling in this course will be required to participate as members of the intercollegiate debate team and will attend an appropriate number of weekend intercollegiate debate tournaments a semester. 3 hrs/wk.

Surgical Technology (KST)

KST 100
Introduction to Surgical Technology (2 CR)
Explores historical aspects of surgery, health care facilities, and organizations. Includes the roles, duties, and responsibilities of the surgical team members. Ethical, legal and moral issues in health care and surgery are addressed. Focuses on effective communication skills, accurate medical terminology, and the impact of transcultural psychosocial outcomes for clients in the surgical setting. Also includes organization and physical layout of the operating room suite. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KST 102
Introduction to Fundamentals I (5 CR)
Prerequisites: The student must meet the entrance requirements and be accepted into the surgical technology program.
Applies principles of medical and surgical asepsis. Focuses on preparation and maintenance of the sterile field, identification, care and handling of instruments, sutures, supplies and equipment. Emphasis is on basic skills of the surgical technologist in preparation for and during the operative procedure. Practices maintaining a safe client environment and includes the responsibilities and duties of surgery personnel. Common surgical techniques and procedures. 3 hrs. lecture, 4 hrs. lab/week. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call
KST 103
Introduction to Fundamentals II (6 CR)
Prerequisites: KST 100 and KST 102 and KST 106
Duties of the surgical technologist that include maintaining a safe client environment and emphasizes the role of the surgical technologist in the first scrub role. Common surgical techniques and procedures are introduced. 3 hrs. lecture, 4 hrs. lab/wk, 1 hr. clinical/week. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KST 104
Body Structure and Function (2 CR)
Prerequisites: Students must meet entrance requirements and must be accepted into the surgical technology program.
Introduces students to the major structures and functions of the human body. Is taught according to body systems. Laboratory time is used to introduce and reinforce classroom instruction. 1 hr. lecture, 1 hr. lab/wk. Course taught at Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KST 105
Pharmacology for the Surgical Technologist (2 CR)
Metric, apothecary, household and linear systems of measurement. Anesthetic agents and stages of anesthesia are introduced. Emphasis on the use and preparation of drugs and solutions commonly used during operative procedures. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KST 106
Microbiology for the Surgical Technologist (3 CR)
Study of structure, function and pathogenicity of micro-organisms, with an emphasis placed on the infectious process, principles of sterilization, disinfecting, environmental sanitation, treatment, and the immune response. 3 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KST 109
Surgical Procedures I (8 CR)
Focus is on the diagnosis, pathology and surgical sequence of general surgery, gynecological surgery, genitourinary surgery and laparoscopic surgery. Included is discussion of postoperative care and complications. 4 hrs. lecture, 12 hrs clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

KST 110
Surgical Procedures II (8 CR)
Pathology and surgical sequence of surgical specialties, including preoperative care and client outcomes for: ophthalmology, otorhinolaryngology, head and neck surgery, plastic/reconstructive/burn, and orthopedics. 4 hrs. lecture, 12 hrs.
clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KST 111**

**Career Development for the Surgical Technologist (2 CR)**

This course emphasizes skills in developing employability. Included is an exploration of the advanced practice role as a first assistant in the hospital operating room setting as well as other areas of employment. The process of becoming certified and requirements for maintaining certification are explored. 2 hrs. lecture/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**KST 114**

**Surgical Procedures III (8 CR)**

Focus is on diagnosis, pathology and surgical sequence with complex surgical specialties: neurosurgery, cardiovascular and peripheral vascular, thoracic, pediatric, geriatric, trauma and surgery. 4 hrs. lecture, 12 hrs. clinical/wk. Course taught at MCC-Penn Valley Community College. Students should contact the Penn Valley coordinator of surgical technology about the class meeting times and beginning and ending dates of classes. Call 816-759-4000.

**Theater (THEA)**

**THEA 120**

**Introduction to Theater (3 CR)**

Students will be introduced to a variety of theatrical experiences, read great plays and see live theater presentations. They also will discuss theater practices, dramatic literature and the history of the theater. Includes 12 required shop hours. 3 hrs./wk.

**THEA 123**

**Improvisation for the Theater (2 CR)**

*Prerequisite: THEA 130*

The student will be introduced to theater improvisation, which will emphasize creative stage activities not requiring a written script. Participation in activities of this course will release and enhance the work of serious acting students and show the students how to approach characterization viscerally rather than intellectually, spontaneously rather than intentionally. 2 hrs. lecture/wk.

**THEA 130**

**Acting I (3 CR)**

The fundamentals of acting will be studied in this class. Emphasis will be on discovering and expanding creative potential through exercises in self-awareness, posture, movement, voice and personality projection. Students will complete a minimum of three in-class performances. 3 hrs./wk. plus rehearsals and performances.

**THEA 131**

**Voice and Speech (3 CR)**

The student will develop techniques to expand breath support, vocal range and
dynamics; learn precise articulation; and strengthen the connection between thought and sound. Through the use of exercises to free, develop and strengthen the voice, the student will be better able to communicate the full range of human emotion and all the nuances of thought. Skills acquired in this course are essential for actors, broadcast journalists, educators and other public speakers. 3 hrs. lecture/wk. This course is typically taught in the fall semester.

THEA 133
Technical Practicum I (1 CR)
Students gain practical experience in technical theater in this course. The student completes the course objectives by working in the theatre department’s productions and/or working in the scene/costume shop during the semester. 2 hrs. lab/wk.

THEA 134
Performance Practicum I (1 CR)
This course will enable students to gain practical experience in performance-related aspects of college theater productions. Admission may be granted upon being cast in a JCCC production. 2 hrs. lab/wk.

THEA 135
Stage Makeup (2 CR)
An introductory course designed to provide an understanding of, and practical skill in, the design and application of makeup for theatrical performance. 1 hr. lecture, 1 hr. lab/wk. This course is typically taught in the spring semester.
Associated Costs: In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $30 to $60.

THEA 136
Basic Costuming (3 CR)
This is a survey of the theory, techniques and skills used in costume creation for the theater and film. Areas of study and practice include basic construction, patterning and cutting; fabrics, design and realization; millinery; craftwork; and organization. 2 hrs. lecture, 2 hrs. lab/wk. This course is typically taught in the fall semester.

THEA 137
Movement for the Stage (3 CR)
The student will develop techniques to expand kinesthetic awareness, flexibility, physical freedom and the language of movement. Through the use of exercises to free, develop and strengthen physical vocabulary, the student will be better able to communicate the physical life of a character. Skills acquired in this course will include mime, stage combat, commedia, improvisation and circus techniques. 3 hrs. lecture/wk. This course is typically taught in the spring semester.

THEA 138
Oral Interpretation of Literature (3 CR)
The student will develop techniques for effective spoken performance of literature. Using poetry, fiction and nonfiction, students will create literary interpretations and then master both the verbal and nonverbal methods necessary for effective spoken expression of those interpretations. This course includes topics such as selecting literary works for performance, interpretation of literary works, audience analysis and performance. Skills acquired in this course will be essential to actors, broadcast journalists, educators and other public speakers. 3 hrs. lecture/wk. This course is typically taught in the fall semester.
THEA 140  
**Basic Stagecraft (3 CR)**  
This course introduces the general student and theater major to basic stagecraft. Through lectures, in-class demonstrations and hands-on experiences, the student will gain a working and appreciative knowledge of technical theater. The course includes 15 lab hours and attendance at two live theatrical productions. 2 hrs. lecture, 2 hrs. lab/wk. This course is typically offered in the fall semester.

THEA 145  
**Introduction to Theater Design (3 CR)**  
This lecture and studio class introduces the theory and practice of theater design and the graphics and standards of entertainment technology. Emphasis will be on the processes and practices used in designing for the performing arts. Using course-taught computer and hand-based drawing techniques, the student will create a portfolio of his or her work through in-class projects. 2 hrs. lecture, 2 hrs. lab/wk. This course is typically offered in the spring semester.  
**Associated Costs:** In addition to the course tuition, fees, and textbooks, this course has additional expense considerations that are estimated to be $20 to $80.

THEA 209  
**Script Analysis (3 CR)**  
Script Analysis introduces students to those methods used in the theater for the study and/or analysis of plays. Directors, actors and designers use script analysis during their preparatory work and then continue to use it through the rehearsal process until, and sometimes even after, the production has finished. This course is of value to the student because it focuses on the crucial elements of a play encountered during the production process including dramatic structure, content and meaning. 3 hrs. lecture/wk. This course is typically offered in the fall semester only.

THEA 225  
**Reader's Theater (3 CR)**  
Students will combine acting, interpretation and rhetoric as they analyze and perform poetry, prose and dramatic literature and present public performances. Through the process of reading, studying, investing, rehearsing and performing literary and nonliterary works, the student will learn to pay particular attention to the voice embodied in a given text and the cultural and social context within which that voice speaks. 3 hrs./wk. plus rehearsals. This course is typically taught in the spring semester.

THEA 230  
**Acting II (3 CR)**  
*Prerequisite: THEA 130*  
This continuation of Acting I will focus on more in-depth character analysis and development, emphasizing the actor’s responsibility in creating the character. 3 hrs./wk. plus rehearsals and performances.

THEA 233  
**Technical Practicum II (1 CR)**  
*Prerequisite: THEA 133*  
Students gain practical experience in technical theater in this course. The student completes the course objectives by working on the theatre department’s productions and/or working in the scene/costume shop during the semester. 4 hrs. lab/wk.
THEA 234  
Performance Practicum II (1 CR)  
*Prerequisite: THEA 134*  
This course will enable students to gain further practical experience in the performance-related aspects of college theater productions. Admission may be granted upon being cast in a JCCC production. 2 hrs. lab/wk.

THEA 235  
Technical Practicum III (2 CR)  
*Prerequisite: Permission of the instructor*  
Students will gain professional technical theater experience in this course by working as an apprentice for the theater department and an outside professional performing arts agency. While on campus and/or on location, students will build and install a stage and/or scenery as they work alongside theater professionals to execute theatrical productions. 4 hrs. lab/wk. This course is offered in summer only; permission from instructor is required to enroll.

THEA 240  
Costuming (1 CR)  
A 16-week course designed to introduce basic techniques in costume design and research and to provide an overview of the scope and impact of costume as a technical and artistic aspect of theater and film. 1 hr. lecture, 1 hr. lab/wk. This course is typically taught in the spring semester.

THEA 275  
Selected Topics in Theatre I (3 CR)  
*Prerequisite: Permission of instructor*  
This course periodically offers specialized or advanced discipline-specific content related to performance, not normally taught in the curriculum, to interested and qualified students within the program. 3 hrs. lecture/wk.

THEA 276  
Selected Topics in Theatre II (3 CR)  
*Prerequisite: Permission of instructor*  
This course periodically offers specialized or advanced discipline-specific content related to technical theatre and theatre design, not normally taught in the curriculum, to interested and qualified students within the program. 3 hrs. lecture/wk.

**Veterinary Technology (KSAH)**

KSAH 100  
**Introduction to Veterinary Technology (2 CR)**  
Orientation to career opportunities available in veterinary technology. Professional ethics, public relations and the psychological adjustment of the student in terms of understanding the need for physical treatment and care of animals. Client relations, vaccination programs, regulatory organizations, receptionist duties, breeds and breed characteristics, neutering, puppy care, diets and hospital management. 2 hrs. lecture/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.
KSAH 101

Principles of Animal Science I (3 CR)
Principles of handling, housing and management of animals. Basic dietary and sanitation requirements. Restraint and handling, administration of medications, bathing, skin scraping, and basic laboratory tests. Emphasis on animal physiology including the cell, muscle, nervous, respiratory and cardiovascular systems. Introduction to anesthesia and general animal nursing. 2 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 108

Clinical Mathematics for Veterinary Technicians (1 CR)
Prerequisites: Admission into the Veterinary Technician Program
Vocabulary. Metric and apothecary conversions. Drug and dosage calculations. Preparation of solutions based on percents, ratios and drugs. Infusion flow rates and constant rate infusion. 1 hr./wk. Course taught at Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 110

Principles of Animal Science II (3 CR)
Prerequisite: KSAH 101
Anesthesia and the physiology of the digestive, urinary, endocrine and reproductive systems. Blood and specimen collection, basic bandaging and introduction to surgical preparation and radiographic processing. 2 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 111

Sanitation and Animal Care (2 CR)
Introduction to microorganisms, sanitation, disinfectants, sterilization and Zoonotic diseases and public health problems. Introduction to parasitology, vermin control, specimen preservation, instrument identification, cleaning and sterilization, and sanitary procedures in patient care. 1 hr. lecture, 2 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 200

Veterinary Hospital Technology I (3 CR)
Prerequisites: KSAH 101 and KSAH 110
Administration of anesthetics and surgical assisting, bandaging, casting, blood transfusions, surgical preparations and postoperative procedures, parenteral fluid administration, and intravenous hookups. Introduction to orthopedics, electrocardiography, bone marrow cytology, and pharmacology. 1 hr. lecture, 4 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 201

Clinical Pathology Techniques I (4 CR)
Introduction to laboratory procedures including preparation of blood smears, cell identification, fecal analysis and parasitology. Urinalysis and urine sediment valuation. 1 hr. lecture, 6 hrs. lab. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 202

Veterinary Anatomy (5 CR)

Prerequisite: BIOL 101 (Maple Woods) or BIOL 127 and KSAH 101 and 110

Basic principles of anatomy using a systemic approach. Physiology as it relates to anatomy and applicable pathology involving the animal body systems. Comparison of the animal species using the cat for dissection. 3 hrs. lecture, 4 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 203

Laboratory Animal Technology (2 CR)

Prerequisites: KSAH 101, KSAH 110 and KSAH 201

Restraint and handling of laboratory animals and birds. Blood collection, restraint, identification, medicating, anesthesia and specimen collection. Technical skills for laboratory animal research. 1 hr. lecture, 2 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 209

Equine Medicine and Management (3 CR)

Prerequisite: KSAH 212

Breeds and types of horses and their use. A study of conformation as it relates to soundness, horse psychology, fitting, conditioning, first aid and restraint. Parasites and their control, farm management for safety, nutrition, mare care, breeding, foaling, hoof soundness, equine diseases and their prevention. Laboratory procedures. 2 hrs. lecture, 2 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 210

Veterinary Hospital Technology II (3 CR)

Prerequisite: KSAH 200

Introduction of anesthetics, surgical assisting, bandaging, casting, blood transfusions, surgical preparations and postoperative care. Administration of parenteral fluid and emergency treatments. Introduction to ophthalmology and dermatology. 1 hrs. lecture, 4 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 211

Clinical Pathology Techniques II (5 CR)

Prerequisite: KSAH 201

Theory and performance in hematologic, urinalysis, clinical chemistry and parasitology. Introduction to simple immunologic tests, blood coagulation tests, and bone marrow evaluation. Emphasis on hematology and hemoparasites. 2 hrs. lecture, 6 hrs. lab/wk. Course taught at MCC-Maple Woods Community College.
Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 212
Large Animal Technology (4 CR)
Prerequisites: KSAH 101 and KSAH 110
Techniques necessary to assist the veterinarian in a large animal or mixed practice and in research facilities. Bovine, porcine, ovine and caprine medicine and management, including restraint, blood collection, medicating and nursing techniques. 2 hrs. lecture, 4 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 213
Radiology and Electronic Procedures (2 CR)
Intensive study and practice in radiological techniques, radiographic exposure techniques, film processing, contrast radiography and machine electronics. 1 hr. lecture, 2 hrs. lab/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

KSAH 214
Veterinary Technician Internship (6 CR)
Prerequisite: Two semesters of first-year veterinary technology courses
Supervised intensive clinical study under the direction of a cooperating veterinarian to provide 420 hours of actual work experience. 40 hrs. field study/wk. Course taught at MCC-Maple Woods Community College. Students should contact the Maple Woods coordinator of veterinary technology about the class meeting times and beginning and ending dates of classes. Call 816-437-3000.

Women and Gender Studies (WGS)

WGS 201
Global Women's Studies (3 CR)
The course is intended to increase student understanding of the history and experiences of women. It principally focuses on the ways in which gender interacts with race/ethnicity, social class, sexual orientation, religion, age, nationality and other cultural identities to create differences and similarities in gendered lives. Students will critically examine and compare through a multidisciplinary approach the voices and experiences of women representing both domestic and global diversities. Selected topics may include: gender socialization; the female body and the sociopolitical context of reproduction, body image, appearance and of sexuality; similarities and differences between the genders; marriage and the family; work roles, inequalities and the global economy; health issues; violence against and by women; women in religion and politics; and, an historical and contemporary look at global feminism. 3 hrs. lecture/wk.

WGS 220
The Many Women of Islam (3 CR)
This course introduces students to Islam and the many ways in which Islam views women. It explores the relationship of the ideal teachings of the Qur'an to the
Continuing Education Certificate Programs

Medical Coding Certification
Microsoft Certified Systems Administrator
Microsoft Certified Technical Specialist: SQL 2005
Network+, Certificate in
A+, Certificate in

Start your IT training off in the right direction. Build a solid foundation with our A+ Essentials and A+ IT Technician classes as you start your IT career. Mapped toward both of CompTIA’s A+ exams, this series will help prepare you for the industry recognized A+ certification. The exam vouchers alone have a $290 value.

Prerequisite: Knowledge of Windows operating system and basic computer hardware.

See individual classes for detailed descriptions and outlines.

Required Courses:

XCM 8252  A+ IT Technician: 220-602
XCM 8255  A+ Essentials: 220-601
XCM 8251  A+ Certificate Series

Access Specialist Certificate

Receive instruction in our complete lineup of Access classes. Build a solid foundation with Access Fundamentals and Access Intermediate before moving on to more advanced topics in Access Advanced. Once completed, either take the MOS exam at participating Prometric testing centers or use your Center for Business Access Specialist Certificate to verify your competency. 21 classroom hours.

Prerequisite: Knowledge of Windows OS, ability to use keyboard and mouse with proficiency and a basic knowledge of database use.

See individual classes for detailed descriptions and outlines.

Required Courses:

XCM 4220  Access Fundamentals - 2003
XCM 4225  Access Intermediate - 2
XCM 4230  Access Advanced
XCM 4219  Access Certificate Series

Adobe Graphic Design

See individual classes for detailed descriptions and outlines.

Required Courses:

XCM 1584  Adobe Graphic Design Series
XCM 4000  Adobe PhotoShop Fundamentals
XCM 4002  Adobe PhotoShop Advanced
XCM 1588  Adobe InDesign Fundamentals
XCM 1589  Adobe InDesign Advanced
XCM 1585  Adobe Acrobat Fundamentals
XCM 4100  Adobe Illustrator Fundamentals
XCM 4102  Adobe Illustrator Advanced
XCM 1583  Adobe Acrobat Advanced
Adobe Web Design, Certificate in

Combine the following classes: HTML and Web Page Design, Cascading Style Sheets, Dreamweaver: Designing Websites, Dreamweaver: Database Connections, Fireworks: Web Graphics and Interactivity, Flash Fundamentals, Flash: Interactive Movies and Flash: Advanced Techniques in one easy-to-follow schedule at a special, reduced price. Everything you need to know to become Web-design proficient. This course series is eligible for a payment plan.

Prerequisite: Knowledge and experience with Windows OS and the internet.

See individual classes for detailed descriptions and outlines.

Required Courses:

- XCM 9540 HTML and Web Page Design
- XCM 9525 Cascading Style Sheets
- XCM 9463 Dreamweaver: Designing and Developing Websites
- XCM 4152 Fireworks: Web graphics and Interactivity
- XCM 9470 Flash Fundamentals
- XCM 9477 Flash, Interactive Movies
- XCM 9450 Building Web Sites: Integrative Workshop
- XCM 9478 Flash: Advanced Techniques
- XCM 1605 Macromedia Web Design Certificate Series

Audio Recording Engineering, Certificate in

If you are interested in a studio career, JCCC’s Audio Recording Engineering Certificate Program provides a focused two-year education. All recording classes are taught by experienced, working audio professionals. A superior audio teaching environment includes a professional recording studio, and state-of-the-art facilities on the JCCC campus.

The certificate program encompasses a two-year sequence with 1,376 contact hours of required work in recording and music. Curriculum is designed to prepare you for jobs in the field of commercial music, particularly in the areas of audio recording; computerized music systems; sound reinforcement; audio and audio/video production. After completing the program, you will be prepared for audio work in recording and/or video studios, radio/TV stations, corporate audio/video departments, and sound reinforcement/recording for theater, conventions, music concerts, and other live performance situations.

Semester 1

- XRE 1008 Introduction to the Recording Studio........128*
- XRE 1015 MIDI in the Recording Studio................64*
- XRE 1010 Music Fundamentals & the Keyboard I........64*
- XRE 1016 Music Styles & Recording Analysis I.........64*
  or
- XRE 1017 Music Styles & Recording Analysis II.........64*

Semester 2

- XRE 1003 Recording Studio Skills II....................128*
- XRE 1001 Chamber Recording Ensemble I...............32*
- XRE 1019 Music Fundamentals & the Keyboard II........64*
- XRE 1016 Music Styles & Recording Analysis I.........64*
  or
- XRE 1017 Music Styles & Recording Analysis II.........64*
- XRE 1004 Music Theory for Recording Engineers........64*
  or
- XRE 1010 The Studio Business..........................64*

Summer

- XRE 1014 Sound Reinforcement Engineering........64*
- XRE 1012 Remote Location Recording..................32*
- XRE 1005 Chamber Recording Ensemble II............32*
Semester 3

XRE 1002  Advanced Recording Engineering ....................160*
XRE 1006  Chamber Recording Ensemble III .....................32*
XRE 1004  Music Theory for Recording Engineers ............64*
Or
XRE 1010  The Studio Business ..............................64*

Complementary and Alternative Medicine, Certificate in

The certificate in complementary and alternative medicine is designed to provide
a multidisciplinary educational experience. Those wishing to become
knowledgeable, skilled and committed health care professionals in the field of
complementary and alternative medicine should achieve certification.

- The program requires 27 contact hours.
- Students must register with JCCC and then complete the online orientation
  at www.ed2go.com/jccc.
- ALLEGRA Learning Solutions, LLC, is accredited as a provider of continuing
  education in nursing by the American Nurses Credentialing Center's
  Commission on Accreditation.
- The program meets the qualifications for the stated hours of continuing
  education credit for MFTs and/or LCSWs as required by the California Board
  of Behavioral Sciences.
- The program is provider approved by the California Board of Registered
  Nursing, Provider #CEP12385, for the stated number of contact hours.
- The certificate program must be completed within six weeks of the
  start date.

Required Courses:

XNH 1650  Certificate in Complementary and
Alternative Medicine

End of Life Care, Certificate

The U.S. population is aging at a rapid rate, and the number of individuals, young
and old, who are living with debilitating, chronic or terminal illnesses, is also
increasing. The demand for knowledgeable providers to meet the needs of this
population is dramatically increasing, new jobs are being developed, and new
services created. If you are a health professional who works with this population,
this program will provide you with continuing professional education to help you gain a broad understanding of this special area of care and stay current with emerging trends. 26 contact hours

Note: Students must register with JCCC then complete the online orientation at www.ed2go.com/jccc. This program is accredited through ALLEGRO Learning Solutions, LLC, and accredited provider of continuing education in nursing by the American Nurses Credentialing Center’s Commission on Accreditation.

Required Courses:

XNH 1770 Certificate in End of Life Care

Excel Specialist Certificate

Receive instruction in our complete lineup of Excel classes. Build a solid foundation with Excel Fundamentals and Excel Intermediate before moving on to more advanced topics in Excel Advanced. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Excel Specialist Certificate to verify your competency. Prerequisite: Knowledge of Windows, keyboard and mouse.

See individual classes for detailed descriptions and outlines.

Required Courses:

XCM 3405 Excel Fundamentals
XCM 3406 Excel Intermediate
XCM 3407 Excel Advanced
XCM 3404 Excel Specialist Certificate - 2003

Gerontology, Certificate in

Offered completely online, the certificate in gerontology represents a specialization in the field of gerontology. Divided into individual courses, the program provides 26 hours of instruction designed to enhance the knowledge and skills of individuals who work with adults by providing an educational experience that is multidisciplinary in nature.

- Students must register with JCCC and then complete the online orientation at www.ed2go.com/jccc.
- The program is accredited through ALLEGRO Learning Solutions, LLC, an accredited provider of continuing education in nursing by the American Nurses Credentialing Center’s Commission on Accreditation.
- This program also meets the qualifications for the stated hours of continuing education credit for MFTs and/or LCSWs as required by the California Board of Behavioral Sciences.
- The program is provider approved by the California Board of Registered Nursing, Provider #CEP 12385, for the stated number of contact hours.
- The certificate program must be completed within six weeks of the start date.

The four core courses:
Introduction to Gerontology
Physiology of Aging
Mental Health and Aging
Healthy Aging

Elective Courses (complete any four):
Spirituality and Aging
Pain Assessment and Management in the Older Adult
Intensive English Program

Since 1997, the IEP has served English language (ESL) learners who want to improve and strengthen their English proficiency and cultural understanding for academic, career-enhancing, or personal reasons. Curriculum and activities include:

- Beginning, intermediate and advanced-level oral communication, pronunciation, reading, writing, structure, idioms and slang, study skills, short stories and vocabulary skills courses.
- A maximum of up to 18 hours of instruction a week for full-time students during the fall and spring.

Required Courses:

XGI 1020 Idioms and Slang 1020
XGI 1030 Study Skills 1030
XGI 1043 English Pronunciation Improvement 1043
XGI 1110 Oral Communication 1110
XGI 1120 Oral Communication 1120
XGI 1130 Oral Communication 1130
XGI 1140 Oral Communication 1140
XGI 1112 Pronunciation 1112
XGI 1122 Pronunciation 1122
XGI 1132 Pronunciation 1132
XGI 1310 Writing 1310
XGI 1320 Writing 1320
XGI 1330 Writing 1330
XGI 1340 Writing and Structure 1340
XGI 1210 Structure 1210
XGI 1220 Structure 1220
XGI 1230 Structure 1230
XGI 1410 Reading 1410
XGI 1420 Reading 1420
XGI 1430 Reading 1430
XGI 1440 Reading 1440
XGI 1411 Vocabulary 1411
XGI 1421 Vocabulary 1421
XGI 1431 Short Stories 1431

Medical Coding Certification

Medical coding certification is

- designed for medical office professionals.
- a 16-week program offered each fall and spring.
Individuals who complete the course may choose to apply to sit for the national certification examination offered by the American Academy of Professional Coders. The exam application is made individually. Course completion does not guarantee you will pass the examination.

This comprehensive course is based on the Professional Medical Coding Student Workbook with information on medical terminology, anatomy and coding issues related to CPT and ICD-9-CM coding. Copies of the current CPT, ICD-9-CM and HCPCS are the required textbooks.

**Required Courses:**

**Prerequisite Courses (must take one or have equivalent):**

- XNH 1550  Medical Terminology
- XNC 2413  Demystifying Medical Terminology

**Additional Required Course:**

- XNC 2430  Medical Coding Certification

**Microsoft Certified Systems Administrator**

Prerequisite: A+ Certification, Network+ Certification, or equivalent knowledge.

See individual classes for detailed descriptions and outlines.

**Required Courses**

- XCM 8291  Security + Certification Series
- XCM 8315  Install, Configure & Administer Win XP Professional
- XCM 8395  Manage & Maintain Win Server 2003 Environment
- XCM 8375  Implement, Manage & Maintain Win Network Server
- XCM 8275  MCSA Certification Series

**Microsoft Certified Technical Specialist: SQL 2005**

Combine our Implementing and Maintaining SQL Server 2005 classes as you work toward one of Microsoft's newest certifications: 70-431 MCTS: SQL Server 2005 Implementation and Maintenance. Prerequisite: Knowledge of relational databases and database design.

See individual classes for detailed descriptions and outlines.

**Required Courses**

- XCM 8832  SQL: Implementing SQL Server 2005
- XCM 8833  SQL: Maintaining SQL Server 2005
- XCM 8831  MCSA:Implementing and Maintaining SQL Server 2005

**Network+, Certificate in**

Combine our Networking Fundamentals class with our Network+ Test Prep CD in a package which will prepare you for CompTIA's Network+ certification. We will include an exam voucher, a $207 value. Prerequisites: A+ Certification or
comparable knowledge. See individual classes for detailed descriptions and outlines.

Required Courses:

XCM 8305 Networking Fundamentals
XCM 8262 Network+ Certification Series

Project Management Certificate

The Center's Project Management Certificate program can help you generate real results and provide the most reliable and respected path to maintaining an understanding about that ever-shifting professional landscape.

Required Courses:

XDM 8927 Project Management Essentials
XDM 8928 Estimating and Managing Project Costs
XDM 8931 Effective Project Scheduling and Control
XDM 8929 Project Risk Management
XDM 8934 Project Quality Management
XDM 8933 Project Leadership and Team Motivation
XDM 8935 Project Management Workshop

Electives:

XDM 8926 Conflict Resolution for Project Managers
XDM 8932 Effective Communication for Project Managers
XDM 8930 Effective Presentation and Public Speaking Skills
XDM 8924 Effective Team-Building Skills for Project Managers

Spirituality, Health, Healing

The certificate in spirituality, health and healing presents a broad understanding of spirituality, health and healing. Health care professionals will stay current with emerging trends.

- The program requires 21 contact hours.
- Students must register with JCCC and then complete the online orientation at www.ed2go.com/jccc.
- ALLEGRA Learning Solutions, LLC, is accredited as a provider of continuing education in nursing by the American Nurses Credentialing Center’s Commission on Accreditation.
- This course meets the qualifications for the stated hours of continuing education credit for MFTs and/or LCSWs as required by the California Board of Behavioral Sciences.
- The program is provider approved by the California Board of Registered Nursing, Provider #CEP 12385, for the stated number of contact hours.
- The certificate program must be completed within six weeks of the start date.

Required Courses:

XNH 1645 Certificate in Spirituality, Health and Healing

Orientation to Literacy Volunteering
If you're interested in working as a literacy volunteer or as a General Educational Development (GED) or English as a Second Language tutor in the Project Finish Program, this orientation session is for you. Handout material will be provided. No fee.

XGE 5001
GED Test Preparation
This online course will help refine your reading and thinking skills necessary to
be successful in five areas tested on the GED exam: Language Arts/Reading, Language Arts/Writing, Social Studies, Science, and Mathematics. After completion of this course, you should be well-equipped to pass the GED practice test followed by the GED examination.

XGE 5002
GED Language Arts and Writing Test Preparation
This in-depth online course will give you the skills and knowledge you need to successfully prepare for the GED Language Arts, Writing test. Learn the basics of usage and mechanics so you can edit the passages on the multiple-choice part of the exam. Then, you'll learn a step-by-step approach to writing that will give you the confidence you need to write a winning GED essay!

XGE 5003
GED Math Test Preparation
This online course will help you master the skills required to successfully past Test 5 in the GED test series. Give yourself the strong foundation you'll need to solve the types of math problems commonly found on the test. Gain comfort with your math skills, and be able to recognize how, when and why to apply each math concept you learn.

Art Museum-Youth (XKU)

XKU 1001

Contemporary Creations: Illusion in Art
Students (ages 8-11) will learn about illusion and space in art through JCCC’s diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a layered painting in the museum’s studio classroom. Ask us about becoming a museum member and saving $5 on children’s classes at the Nerman Museum.

$15.00

XKU 1002

Contemporary Creations: Nature in Art
Students (ages 8-11) learn about nature in art through JCCC’s diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create an imaginary plant or animal out of clay in the museum’s studio classroom. Ask us about becoming a museum member and saving $5 on children’s classes at the Nerman Museum.

$15.00

XKU 1003

Contemporary Creations: Art & Architecture
Students (ages 8-11) will learn about buildings in art through JCCC’s diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a miniature monument with foam in the museum’s studio classroom. Ask us about becoming a museum member and saving $5 on children’s classes at the Nerman Museum.

$15.00

XKU 1004

Contemporary Creations: Native American Art
Students (ages 8-11) will learn about contemporary Native American art through JCCC’s diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a clay vessel with symbols in the museum’s studio classroom. Ask us about becoming a museum member and saving $5 on children’s classes at the Nerman Museum.

$15.00

XKU 1005

Contemporary Creations: Abstract Art
Students (ages 8-11) will learn about abstract art through JCCC’s diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a 3-D paper design in the museum’s studio classroom. Ask us about becoming a museum member and saving $5 on children’s classes at the Nerman Museum.

$15.00

XKU 1006
Contemporary Creations: Exploring Ceramics
Students (ages 8-11) will learn about sculptural ceramics through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a clay sculpture with a twist in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00
XKU 1007

Contemporary Creations: Realistic Art
Students (ages 8-11) learn about art that imitates life through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a life-like pastel drawing using shading techniques in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00
XKU 1008

Contemporary Creations: Narrative Art
Students (ages 8-11) will learn about works of art that tell stories through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a watercolor painting in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00
XKU 1009

Contemporary Creations: Mixed Media Art
Students (ages 8-11) will learn about different materials contemporary artists use through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a mixed media collage in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00
XKU 1010

Contemporary Creations: Art Connects with Science
Students (ages 8-11) will learn about artists who explore science through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a mobile structure in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00
XKU 1011

Contemporary Creations: Functional Art
Students (ages 8-11) will learn about art that can be used through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a miniature piece of furniture in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00
XKU 1012

Contemporary Creations: Patterns in Art
Students (ages 8-11) will learn about patterns in art through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and then create a woven wire design in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00  
XKU 1013  
Contemporary Creations: Exploring Painting  
Students (ages 8-11) learn about painting techniques through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and combine the processes in their own painting in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00  
XKU 1014  
Contemporary Creations: Out of Proportion  
Students (ages 8-11) learn about proportion and scale in art through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a distorted self portrait drawing in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00  
XKU 1015  
Contemporary Creations: Native American Sculpture  
Learn about contemporary Native American art through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a wearable sculpture in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00  
XKU 1016  
Contemporary Creations: People in Art  
Explore how artists show people through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a miniature person using clay in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00  
XKU 1017  
Contemporary Creations: Exploring Drawing  
Learn about different styles of drawing through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a still life rendering of natural objects in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00  
XKU 1018  
Contemporary Creations: Textures in Art  
Learn about visual textures through JCCC's diverse and nationally acclaimed
permanent collection and exhibitions in the Nerman Museum of Contemporary Art and experiment with different ways to make a printed image using objects in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00

**XKU 1019**

**Contemporary Creations: Non-objective Art**

Learn about artistic design through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a clay plate with your own designs in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00

**XKU 1020**

**Contemporary Creations: Architecture in Art**

Learn about buildings in art through JCCC's diverse and nationally acclaimed permanent collection and exhibitions in the Nerman Museum of Contemporary Art and create a miniature monument of your own with foam board in the museum's studio classroom. Ask us about becoming a museum member and saving $5 on children's classes at the Nerman Museum.

$15.00

## Arts and Crafts (XPA)

**XPA 1024**

**Drawing, Beginning to Intermediate**

Bring a 14 x 17 sketch pad, HB pencil, kneaded eraser and dark crayon to first class. Explore using basic shapes, shading, perspective and measuring methods while using various techniques, tools and mediums. A supply list will be mailed before the first class. Supply costs, approximately $25-$30.

$85.00

**XPA 1032**

**Portrait Art**

Learn about form, perspective and structure of the head in the first two classes. Eight classes will have a live model. The goal is for you to portray a three-dimensional, live person. We will work in one color, 2-3 colors and in full color, with one color work emphasized in the first few classes. Bring to class compressed soft charcoal sticks (4), charcoal soft pencils (2), kneaded eraser, white soft pastel or white Nupastel (1), paper stump (1), pencils (HB-6B, 2 total), pastel pencils-sepia (1), set of pastel colors (optional), drawing paper (11" x 14" or 17"), drawing pad of Canson colored pastel paper.

$99.00

**XPA 1034**

**Sweater Workshop**

Move beyond scarves and purses in this advanced beginner’s garment workshop. Learn simple applications of knitted structures and have 2 handmade sweaters ready for cold weather! Must know how to knit and purl.

$36.00

**XPA 1036**
Holiday Gifts
Get ready for the Holidays! Handmade gifts are perfect for Christmas, Hannukah or any holiday gift exchange. We will focus on small projects like ornaments and accessories. Must know how to knit and/or crochet.

$45.00
XPA 1042

Bookmaking
Are you a writer, a scrap booker, a traditional artist or do you just love books? Class will learn four methods of book binding: Case bound, side sewn, loose leaf and hanging. Using traditional materials as well as found ones, we will create a variety of books for personal use or display. Supplies will be discussed in class. Supply costs will vary depending on the project.

$55.00
XPA 1060

Metal Casting
Learn about the lost wax bronze-casting process. On the first day, work in wax to create your sculpture; on the second, we prepare it for casting; and the third day, we prepare the bronze. Wear non-flammable clothing, close-toed shoes, and prepare to get dirty. No prior experience necessary. Students must purchase the bronze and wax for their project.

$139.00
XPA 1062

Sculptural Welding Workshop
Design an art piece by welding and cutting steel using electric and gas-welding equipment. We will also use a metal bender, sheer, grinders, saws, drills and the forge. Wear shoes that cover your feet and wear clothes that you don't mind getting dirty. No prior experience necessary.

$129.00
XPA 1077

Summer Sweater Workshop
Tired of scarves? Expand your knitting and crocheting skills by trying your hand at a great summer sweater. Start with a basic tank top, tee shirt, or anything that catches your eye. Choose two patterns based on your experience level, or try the easy pattern provided in the class. You'll have a cool hand-knit shirt ready for the warm summer! Supply list will be mailed to students before first class session. Prerequisite: Student must know how to knit and/or crochet.

$49.00
XPA 1078

Afghan Workshop
Create your very own knitted or crocheted heirloom in this 8-week workshop! Students will gain a comprehensive understanding of working from patterns, identifying and "reading" the stitches as they are produced, and even learning how to write their own patterns. Choose from a wide variety of afghan styles, shapes, and sizes and perk up the couch with your own handmade creativity. Supply list will be mailed to students before first class session. Prerequisite: Must know how to knit and/or crochet.

$49.00
XPA 1079

Learn to Crochet
Learn to chain, single and double crochet, and much more in this four session class. Start with really easy scarves, hats, and functional items for the home and see where your creativity takes you! Patterns will be provided by instructor. Supply list will be mailed before first class session.

$29.00
XPA 1080

Calligraphy, Beginning
Have fun learning the chancery cursive alphabet (italics) in this course. These skills may be used for personalized gifts, invitations, cards, envelopes, weddings, etc. Bring a medium point calligraphy pen to class.

$35.00
XPA 1084

Crochet II
We will move past the beginner's projects to reading and practicing pattern stitches, as well as 3-D forms. Must know how to crochet. Bring to class patterns and texts, plus crochet supplies.

$29.00
XPA 1089

Matting and Framing
Learn how to finish and display photographs, drawings and paintings with a hand cut mat and how to pick out the perfect frame. You will learn about archival preservation and proper placement of sometimes delicate artwork. Bring two pieces of flat 2D artwork (photo, drawings or paintings on paper) for the first session and mat board for second session, foam core board to cut on, metal straight edge and pencil.

$25.00
XPA 1100

Drawing, Beginning
This is a drawing class for beginners (or others) using the classical method to learn to draw realistically. Bring 6B or 8B lead pencils, soft charcoal pencils, kneaded eraser, a white pastel and "11 X 14" drawing pad.

$89.00
XPA 1102

Still Life Drawing
You will work with graphite and ink while participating in memory exercises. From these exercises, you will observe in detail and then draw from memory. Bring to class: 18" x 24" drawing pad, Canson or Strathmore; Pencils - H, 2B, 3B, 4B; Staedtler Mars Plastic Eraser (white drafting eraser); still life materials, these will vary for the projects. Cost will vary depending on projects. For beginning and intermediate students.

$55.00
XPA 1105

Landscape Drawing, Beginning
Study the various aspects of plein air work (French term for working outside in front of your subject as opposed to working in the studio from photographs or the imagination). Work on all the prime aspects of drawing: values, line, proportions/perspective, composition. Depending on weather, class subjects may be reversed in order. In case of rain we will work indoors and work from a set-up. Bring an outdoor chair and an easel if you have a portable one. Supplies include
hardboard or cardboard, pencils (HB to 8B), charcoal pencils (soft or compressed), kneaded eraser, pastels or colored pencils, kleenex or paper towels, masking tape, exacto knife. The first class session will meet at the location listed below. The remaining class sessions will be at off-campus sites to be discussed at the first class meeting.

$35.00
XPA 1108
Figure Sculpture
Learn how to sculpt the human figure in clay. You will complete a one-third figure from a model. Anatomy of the figure also will be discussed and your project will be fired for you. No prior experience needed. Supply list will be mailed before first class session.

$99.00
XPA 1110
Portrait Drawing
Develop your drawing skills and get a better understanding of form, values, perspective and proportion through a series of practices. For seven sessions you will be working from a model using charcoal, pencil or other materials. All levels of skill are welcome. Bring to class compressed charcoal (medium to soft), or charcoal pencils (medium to soft), lead pencils (HB-6B), conte, pastels (at least two), a sketch pad 11 x 7.

$89.00
XPA 1130
Watercolor, Beginning to Intermediate
Using photos as a reference, this class will explore the basic art process of creating a watercolor. Techniques such as wash application, push and pull to control moisture content, and the use of additional materials such as salt and alcohol will be shown. Please be sure to bring a notebook to the first class. Supply list will be provided at first class session. Supplies approximately $60 - $100.

$89.00
XPA 1145
Stone Carving Workshop
In this introduction to stone carving, you will learn to chip, tear and shear stone. Each student in the class will receive a piece of limestone from a local quarry. Traditional and contemporary carving methods, as well as, the history of stone carving, will be addressed and applied to the work at hand. This workshop is open to everyone; prior experience is not necessary. Wear shoes that cover your feet and clothes that you don't mind getting dirty.

$129.00
XPA 1147
Art Car 101
Enjoy an introduction to art cars as we take a donated vehicle and convert it into a rolling gallery/museum/spectacle. The car's design will be hammered out by the class and the construction completed by taking advantage of the individual talents of the student artists. The final product will be driven, dragged or pushed in the Art Tougeau Parade in Lawrence on May 16th. Be sure to wear your 'getting dirty' clothes. No prior experience necessary.

$135.00
XPA 1150
Oil Painting
Oil painting is one of the world's most widely recognized mediums. In this class, designed to be helpful for both beginning and intermediate students, we will work from photographs and review the sequential process of creating an oil painting. I'll begin with a demonstration on stretching a canvas and proceed directly to underpainting technique, color analysis, and review various styles of brush work. Please be sure to bring a notebook to the first class; a supply list will be provided and discussed. Bring your own table top easel. Supplies approximately $100 - $150.

$89.00
XPA 1192
Santa & Snowman Ornaments Workshop
The Holidays are just around the corner. Paint 2 Santa and 2 snowmen ornaments for gift giving or to display. The resin ornaments and paints will be furnished by the instructor. Bring a 10/0 liner brush and a #4 shader brush to class.

$25.00
XPA 1196
Old World Santa Workshop
Celebrate the season by painting and antiquing your own Santa with the instructor who has painted over 1000 Santas. The resin old-world Santa and acrylic paints will be furnished by the instructor. Bring #3/0 liner B brush, #2 and #4 flat brush, and disposable gloves. (2 sessions)

$35.00
XPA 1201
Patriotic Table Decorations
Transform ordinary terra cotta pots into dazzling and unique July 4th display for your outdoor celebration. Paints and terra pot furnished. Bring to class: No. 1 Script Liner, No. 6 and 12 Shader, No. 4 Round Stroke brush.

$29.00
XPA 1225
Basic Bead Stringing
Learn to use jewelry wire, beads, simple crimp beads and clasps to make and repair bracelets and necklaces. This class is for beginners. A supply kit is available from the instructor for $20.

$14.00
XPA 1241
Faux Finishes I
A beginning class for students interested in the art of faux finishing or decorative painting, you will be introduced to the materials used and different techniques applied. A $25 supply cost will be payable to the instructor.

$29.00
XPA 1242
Faux Finishes II
For those who have completed Faux Finish I. You will learn the techniques of rag-roll, stippling, combing, stripping, sponge, marble and stone effects. A $25 materials fee will be payable to the instructor.

XPV 1040
Partners of Pilots "Pinch Hitter"
Get comfortable with your Pilot spouse, child, parent or friend. Enjoy flying with them because you have knowledge and confidence - not fear and intimidation.
Non-pilots learn essential safety and emergency information. Pilots may attend with non-pilot partner.

$49.00

**Business Skills (XBD)**

**XBD 0101**

**Business Etiquette: Gaining That Extra Edge**
A faux pas at the wrong time can damage your career. If you are newly appointed to a management position, or if you interact with people you don't know on a regular basis, this workshop can help you succeed. If you want to enhance and polish your business image, or if you just want to avoid feeling uncomfortable in the corporate world, this workshop will allow you to take a quantum leap forward in skill, sophistication, and confidence.

$99.00

**XBD 0102**

**Communication Strategies**
Can you recall an occasion where you met someone for the first time and immediately liked that person? Something about the individual made you feel comfortable. A major goal of this workshop is to help you understand the impact your communication skills have on other people, and how improving these skills can make it easier for you to get along in the workplace.

$99.00

**XBD 0103**

**Accounting Basics**
In this seminar, you will learn the essential language, concepts and processes of accounting, presented in a practical, non-technical fashion. You will cover the nature of accounting and generally accepted accounting principles, as well as the process of accounting, accounting equations, debits and credits, and accounting cycles. You will also explore how to create financial statements, balance sheets, statements of income and retained earnings, statements of changes in financial position, and more.

$249.00

**XBD 0104**

**Managerial Accounting**
This course focuses on providing you with the necessary accounting information to make better business decisions. After a brief review of basic accounting concepts, you will cover financial statements, the analysis of financial statements, cost patterns/behavior, cost-volume-profit analysis and budgeting. This course is presented in a practical, hands-on, non-technical fashion.

$169.00

**XBD 0105**

**Time Management: Get Organized for Peak Performance**
Time is money, and lots of it gets lost in disorganization and disruption. This workshop will help you organize and prioritize for greater workplace efficiency. You will learn to get a grip on your office space, organize your work flow, learn how use your planner effectively, say no without guilt, and delegate some of your work to other people. This workshop is full of ideas for working on the "right" things.

$99.00
XBD 0106
Public Speaking: Presentation Survival School
A great presenter has two unique qualities, appropriate skills and personal confidence. This confidence comes from knowing what you want to say, and being comfortable with your communication skills. In this two-day workshop, you will master the skills that will make you a better speaker and presenter.

$299.00
XBD 0107
Business Writing for Results
Your two goals in business writing are to write so the reader can understand immediately and to get the response or results you want in a timely way. This course emphasizes concise, clear correspondence, including e-mail, letters, summaries, and meeting minutes. Relaying executive-level and customer-focused information are primary concerns.

$169.00
XBD 0108
Grammar, Punctuation and Word Usage
The tools, tips and techniques presented in this course will help you to develop the competence and confidence you need in written communication. You will concentrate on grammar concerns: effective sentence structure, proper punctuation and correct word usage. You will be able to compose appropriate written correspondence with clarity and conciseness by the end of the course.

$169.00
XBD 0109
Stress Management
You will explore the harmful long-term effects of stress on your mental and physical health and review suggestions for managing your individual stresses more effectively. Strategies may include changes in lifestyle, stress management techniques such as relaxation and exercise, and the use of music or humor.

$99.00
XBD 0116
The Critical Elements of Customer Service
Do you deal with the public or serve those who do? Customer service skills can increase your value to your company and advance your career at the same time. You will cover topics such as communication skills, tools for dealing with difficult people, and resolving conflicts.

$99.00
XBD 0122
Analyzing Financial Statements
You will learn the accounting terms and concepts that will help you interpret your company's true financial performance by taking an in-depth look at what statements can tell you. You will cover the information required for accurate financial statements, what such statements reveal, and the ratios used in their analysis.

$169.00
XBD 0130
HR for the Non-HR Manager
Are you confused by the overwhelming amount of policies and laws that dictate
your work environment? In this course you will review the latest trends in the human resource field; identify core competencies; learn how to find, select, and keep the best people using behavioral interviewing techniques; deal with compensation and benefits; and practice making performance appraisals a cooperative process.

$169.00
XBD 0139

Business Ethics
What exactly makes a decision ethical? What may seem right to you may seem appalling to someone else. This workshop will help you define your ethical framework to make solving ethical dilemmas easier. You will review tools that you can use when you are faced with an ethical decision. In addition, you will participate in several case studies so that you can practice making decisions in a safe environment.

$99.00
XBD 0147

Employee Dispute Resolution
Have you ever been in a workplace situation where a supervisor has made a decision that you do not agree with? Did you wish that you could ask someone else what they thought of the decision; whether they would have done the same thing? The Peer Review process offers employees just that chance, using a formalized procedure. You will participate in a case study that will challenge you on all steps of the process, including what happens when the it fails.

$99.00
XBD 0190

Powerful Presentations
Want to add zip and pizzazz to your presentation? Want to have your participants leave feeling pumped about applying what they learned? Want to get creative? Then this session is for you! You will learn ways to set the stage and create dynamic openers. Learn exciting ways to present key points, learn techniques for adding humor, and find ways to get participants involved.

$169.00
XBD 0192

Train-the-Trainer
Often subject matter experts are asked to become trainers. This 3-day program covers everything you ever needed to develop dynamic content, present powerful presentations and deliver results. Video-taping is done for enhanced learning. Leave with techniques for handling an unruly audience, keeping an audience’s interest and strategies for maximizing the learning experience.

$399.00
XBD 0220

Conducting Critical Conversations
You will gain confidence conducting conversations when potential for conflict or disagreement is likely...whether it is an employee performance review, customer conflict, bad news for the boss or a nosy-neighbor. You will learn how to control your reactions to hostile responses and prepare for a productive outcome.

Computer Training (XCM)

XCM 1000
Lunch and Learn with the Center for Business
Come to the Center for Business and Technology for lunch and an hour of helpful tips, tricks, and hints related to computers and computer applications. Seating is limited. Call CE Registration at 913.469.2323 to reserve your spot.

$0.00
XCM 1001
Train the Trainer - Computer
A description is not available for this course.
$0.00
XCM 1006
Senior Series
Combine all four of our Senior classes into one series at a discounted price. Learn about basic computer skills, word processing and the internet.

$140.00
XCM 1007
Introduction to Personal Computers for Seniors I
If you have never owned a computer, have never touched a mouse, and need to have instruction and the time to practice the basic skills necessary to operate a keyboard and mouse, then this is the class for you. Three hours of personal attention.

$40.00
XCM 1008
Introduction to Personal Computers for Seniors II
This class will introduce new owners to the necessary skills needed to use the computer, such as mouse skills and using the keyboard. We will spend time examining how to make files, store files, personalizing the desktop, keyboard and mouse. We'll find tutorials on the computer and on the Internet that will help you learn how to do various jobs on the computer.

$40.00
XCM 1009
Introduction to Windows Vista for Seniors
This class will introduce new computer owners to the basic skills needed to work with Windows Vista. We will spend time examining how to make files, store files, personalizing the desktop, keyboard, mouse, plus finding tutorials inside the computer and on the Internet that will help you learn how to do various jobs on the computer. Prerequisite: Intro to PC for Seniors I or competent skills with mouse and keyboard.

$299.00
XCM 1019
Teen Web Design with Dreamweaver and Flash
Why settle for surfing the web when you can build your own website? Discover how easy it is to build and animate a website and then publish to the internet for all your friends to view. Prerequisite: Ability to work with computer, keyboard and mouse.

$139.00
XCM 1024
Social Software: Tools for Collaboration
This course explores the rich environment of social networking software. We'll set up accounts in the popular programs for collaborating online, including LinkedIn and Facebook, as well as other emerging online social software tools. The course will explore how to use these environments to work with other people online. We'll create an avatar in Second Life, and explore some of the communities being built in that virtual world. Finally, we'll explore some of the ramifications of living online in these virtual communities. Prerequisites: Experience with Windows, mouse and keyboard.
XCM 1028
Teen A+
Learn how to support PC hardware, including installation of new hardware, hardware troubleshooting strategies, and updating components. Obtain the skills and knowledge necessary to install, build, upgrade, repair, configure, troubleshoot, and perform preventative maintenance on personal computer hardware and operating systems. You'll do hands-on work including installing hard drives, adapter cards, and other components. Along with the hands-on work, you'll receive the theory behind the operation of the computer and its operating system to diagnose and fix both hardware and software problems. In addition, you'll install a Windows operating system and configure it to work with its hardware and the network.

$899.00
XCM 1034
Introduction to the Internet for Seniors
Configuring the browser, understanding the Internet, Internet security, cookies, temp files, popups, spyware, favorites, history, etc. We will have search projects in class as groups. Prerequisite: Ability to use Windows, keyboard and mouse.

$40.00
XCM 1051
Introduction to Word Processing for Seniors
This class will use existing word processing programs within Windows XP, plus Microsoft Word to complete projects that include tables, inserting graphics, creating greeting cards, creating labels, and mail merge. Prerequisite: Ability to use Windows, keyboard, mouse, and some typing skills.

$40.00
XCM 1100
Mac: Photoshop Fundamentals
Familiarize yourself with digital image editing using Photoshop. Examine the tools and features as you edit graphic imagery in the Photoshop environment. You will work with Photoshop’s powerful selection and layer tools. In addition, work with tools for painting, altering and enhancing images. Save images for web, print and to Acrobat. The course material maps to the Adobe Certified Expert Exam, available through the Testing Center at the Center for Business. Prerequisite: Familiarity with Windows, keyboard and mouse.

$299.00
XCM 1101
Mac: Photoshop Advanced
Begin working with advanced image editing tools using masking techniques available in Photoshop. Learn about tools used for retouching photographic imagery. Work with the latest Photoshop filter and video advancements. Use tools to record and automate Photoshop tasks as well. The course maps to the Adobe Certified Expert exam, given at the Testing Center at the Center for Business. Prerequisite: Photoshop Fundamentals or comparable knowledge.

$299.00
XCM 1102
Mac: Illustrator Fundamentals
Adobe Illustrator is a sophisticated digital drawing program. Illustrator allows you to create attractive illustrations and type effects for use in logos, advertisements, and other illustrations. In this course, you will start by drawing and manipulating simple shapes to create logos, and then combine text and graphics to create
$199.00
XCM 1103

Mac: Illustrator Advanced
Expand on your skills to create more complex illustrations. Receive a better understanding of how to print documents without any errors or color mismatches. Discover how to prepare illustrations for the Web. Create complex, robust illustrations that go beyond those created using Illustrator's basic tools. Prerequisite: Mac: Illustrator Fundamentals or equivalent knowledge.

$199.00
XCM 1104

Mac: InDesign Fundamentals
Familiarize yourself with print layout and design using InDesign. Work with the tools and features to create eye-catching printed documents. Manage the InDesign environment, design documents, manage text, utilize colors, swatches, gradients, flow text into layouts, build tables for presenting data, prepare for handoff to a service provider, and create Acrobat PDF files. The course content maps to the Adobe Certified Expert Exam, available through the Testing Center at the Center for Business. Prerequisite: Knowledge of OS X, keyboard and mouse.

$299.00
XCM 1105

Mac: InDesign Advanced
Discover the advanced features in InDesign to create attractive documents. Build and use styles with InDesign's style tools, control text, handle page elements, graphics and paths, build Bezier paths to design graphic elements, manage long documents, import and export files, adjust print settings and work with the XML features built into the program. The course material maps to the Adobe Certified Expert exam, available through the Prometric Testing Center at the Center for Business. Prerequisite: Mac: InDesign Fundamentals or comparable knowledge.

$299.00
XCM 1106

Mac: Flash Fundamentals
We begin by exploring the Flash development environment, then move to importing and creating graphics. Symbols are a critical part of Flash design, and we'll learn how to create graphic symbols and button symbols. Flash can deliver text content, and the course covers how to display text in Flash in the most readable manner. We'll then create animations using four different methods. Our Flash documents will frequently require user interaction, and we'll use Flash to control Flash documents with buttons, and movie clip symbols. Finally, the course will cover the techniques to add audio and video to our Flash documents. Prerequisite: Knowledge of OS X, keyboard and mouse.

$299.00
XCM 1107

Mac: Flash Level 2-Building Interactivity with ActionScript
This Flash class focuses on writing ActionScript to control Flash documents. We'll create forms with interactive components, and build conditional logic to control the flow of content through the form. We'll then script a Flash document to allow a site visitor to drag and drop objects in the Flash document, and control how and where they are dropped. The course covers the use of built-in classes and function creation by building a web page layout with Flash and adding interactivity to the objects we build. Finally, we manage data captured in a form on a Flash-driven web page by controlling dynamic content. Prerequisites: Mac: Flash Fundamentals.
Mac: Flash Level 3-Delivering Video with Flash
This class focuses on using Flash to deliver video to our web sites. We begin with a discussion of techniques to produce good video content, and discuss video encoding techniques. The course covers three different methods to encode video for use in Flash, and then moves to setting cue points to add additional information for our site visitor. We then build a customized Flash video player, and then explore transparency, masking and blend modes for Flash video. The course then explores deploying Flash video content and enhancing it with closed captions, cue points and playlists. Prerequisites: Mac: Flash Level 2: Building Interactivity with ActionScript.

Mac: Dreamweaver Designing Web Sites
Discover how to design and build a website as you explore the features of Dreamweaver. From novice to advanced, there is something for everyone in this class. In two days, you will move from basic web design to professional-looking websites. We'll add text and images to web pages, layout pages using tables, and prepare the site for uploading. In the second day, we'll build rollover buttons, and discover how to use built-in Flash buttons and text for navigation. Then, we'll use Dreamweaver's Cascading Style Sheet tools to more format our web page content more efficiently. The course finishes by introducing forms using traditional HTML form objects, and the built-in Spry objects. Prerequisites: HTML & CSS, or comparable knowledge.

Mac: Cascading Style Sheets
Cascading Style Sheets (CSS) is the professional approach to web site design. CSS can more efficiently control color, typography, and layout techniques than relying on HTML alone. We begin with techniques to specify color and font information in a single web page. We then improve our management and workflow by moving our formatting rules to a .css file and link multiple pages to a single set of formatting rules. We then explore the use of borders, margins, and padding to control the layout of a web page, as well as consider four different CSS layout tools. We finish by styling HTML forms, and improve the experience of our site visitors by building a print style sheet. Prerequisite: Experience with OS X, mouse and keyboard, HTML, and comfortable working with a text editor and simple code.

Mac: HTML Fundamentals
Examine the basic concepts of Hypertext Markup Language (HTML), write source code, place text on the page, format text, and create headings and horizontal rule lines. Display lists, color Web pages, use graphics, add hypertext links and create graphic hyperlinks. Prerequisite: Knowledge of OS X, keyboard and mouse.

Mac: Fireworks
Work with Fireworks to gain better control over editing vector and bitmap graphics and also make web graphics appear the way you had intended. Explore the tools and features of Fireworks to create and edit vector and bitmap graphics, apply interesting effects, as well as add graphical text to web pages. Prerequisite: Knowledge of OS X, keyboard and mouse.
$299.00

XCM 1113

**Mac: Building Web Sites Interactive Workshop**

The Web Site Workshop offers you the opportunity to fine-tune your web site in a classroom setting with the assistance of the Center for Business's web design curriculum instructors. Bring in your code, content, and supporting files for a day of hands-on work on your site. Prerequisite: Mac versions of HTML, Cascading Style Sheets, Dreamweaver Designing Web Sites, Flash Fundamentals, and Fireworks.

$169.00

XCM 1114

**Mac: OS X Introduction**

Get started with Mac OS X, and take control of your computer. The best way to become comfortable working with your computer is to learn about the operating system. Explore the basics as you do just that in this introductory class. We'll explore the user interface, and use the Finder to manage our documents and files. We'll explore how to control the Mac using Preferences, and how to start and run software programs. The class concludes with an introduction to the included software on Mac. Prerequisite: knowledge of OS X, keyboard and mouse.

$149.00

XCM 1115

**Mac: Final Cut Pro Fundamentals**

A two-day course, the Introducing Final Cut Pro class will cover the primary features of the Final Cut Pro video editing application. Students will learn the basic interface of Final Cut Pro, and use this interface to perform basic video editing. Additionally, students will be introduced to the digital editing workflow process from capture to finished output. They will learn how to adjust and customize editing preferences and learn how to capture video and audio. Students will also learn several methods for fine-tuning the rough cut, including use of the ripple, roll, slip and slide tools, and a look at audio editing. Prerequisite: Knowledge of OS X, keyboard and mouse.

$199.00

XCM 1116

**Mac: Final Cut Pro Advanced**

This three-day class covers more advanced editing and finishing techniques, and will incorporate the use of other Final Cut Pro Studio applications such as LiveType and Soundtrack Pro. Also, the course covers working with film as a capture medium. Students of the Advanced Editing course will get hands-on experience as they learn how to edit multi-camera projects, create professional-looking graphics and transitions, and correct errors in performance and/or direction. Additionally, students will work with nested sequences, use picture and audio filters, color correct, and composite shots. Prerequisite: Mac: Final Cut Pro Fundamentals.

$199.00

XCM 1200

**Introduction to Personal Computers**

New to computers? In this course, learn about the physical components of computers and take a brief tour of Windows. Hard drives, floppy disks, CD-ROMs, RAM, monitors, modems and other hardware, and computer terminology will be discussed.

$119.00

XCM 1201
Computer Basics
If you are new to computers, getting ready for college, or preparing for a new job, our Computer Basics class will introduce you to the skills you need to succeed. You will learn about computer fundamentals and the Windows OS, key applications, and the online universe. Maps to IC 3 certification. Prerequisite: Ability to use keyboard and mouse with competence.

$599.00
XCM 1202
Podcasting
We’ll walk through the process of creating, broadcasting, and promoting your podcasts. We’ll begin by stepping into our audience’s shoes by subscribing, downloading, and listening to other podcasts. Then we’ll investigate the hardware and software necessary to record our own podcasts. Once we have the tools in place, we’ll plan, record, edit, and release our podcast. Then we’ll add music, sweeps, interviews, and other elements.

$199.00
XCM 1300
Windows Vista Configuration
This is an excellent class for the beginner who has taken the Introduction to the PC class or for the PC user who did not take the time to learn DOS. You will use our hard disks while following a logical process of installing a software program, creating directories/subdirectories, saving and copying data, performing backups and restoring data, protecting data from accidental erasure and managing the hard disk. While most DOS commands apply to all versions, we’ll use DOS 6.0 to show you some of the new features. Participants keep the training manual. Six classroom hours.

$98.00
XCM 1450
Windows XP Introduction
Get started with Windows XP, and take control of your computer. The best way to become comfortable working with your computer is to learn about the Operating System (OS). Explore the basics as you do just that in this introductory-level class.

$149.00
XCM 1451
Windows Vista Fundamentals
Learn how to use the Start menu, move and resize windows, manage files and folders, and perform content searches. Create shortcuts, change system settings, and browse the Web with Internet Explorer 7. Prerequisite: Familiar with keyboard and mouse.

$149.00
XCM 1452
Windows Vista Advanced
Scan for spyware, manage user accounts, change file attributes, and create a complete PC backup. Learn how to manage the print queue, enable file sharing, use Windows Meeting Space, and publish a calendar.

$149.00
XCM 1455
Windows XP Advanced
Explore advanced features that streamline the use of Windows XP and allow you to work more efficiently. Create passwords and user profiles, work with network features, and system tools to optimize system performance. Prerequisite: Experience with Windows, keyboard and mouse required.

$149.00
XCM 1457
Office 2007 New Features
Explore how to use the Microsoft Office Button, Ribbon tabs and Ribbon groups, galleries, contextual Ribbon tabs, Live Preview, the Dialog Box Launcher, the Document Information Panel, and the Mini toolbar. This course also covers the XML file format and the macro and non-macro file formats. There is a dedicated unit for each Office application (Word, Excel, PowerPoint, Outlook, and Access) that introduces new features unique to that application. Prerequisites: Familiar with Office 2003 versions of these applications.

$179.00
XCM 1583
Adobe Acrobat Advanced
Further develop your PDF documents. Use Acrobat to convert technical documents to PDF files, enhance and control PDF content accessibility, customize PDF documents for interactive use online, and prepare PDFs for commercial printing. Maps to ACE. Prerequisite: Acrobat Fundamentals or comparable knowledge.

$299.00
XCM 1584
Adobe Graphic Design Certificate
The Adobe Graphic Design Certificate covers the Adobe software applications devoted to print design; Illustrator, Photoshop, InDesign, and Acrobat. Explore the drawing capabilities found in Illustrator, the page layout possibilities with InDesign, how to work with graphics using Photoshop and reproduce created works with Acrobat. Prerequisite: Experience with Windows OS.

$1,899.00
XCM 1585
Adobe Acrobat Fundamentals
Use Adobe Acrobat to make information more portable, accessible, and useful to meet the needs of your target audience. Access information in a PDF document, create PDF documents, modify PDF documents, add PDF navigation aids, work with multiple PDF documents, and review PDF documents. Maps to ACE. Prerequisite: Familiarity with Windows, keyboard, and mouse.

$299.00
XCM 1586
Adobe GoLive Fundamentals
Discover the basics of the GoLive web development application by using it to build and upload a website. Learn to develop a website complete with web pages that contain text, images, links, tables, and forms. Maps to ACE. Prerequisite: Familiarity with Windows, keyboard and mouse. Should have familiarity with the internet.

$299.00
XCM 1587
Adobe GoLive Advanced
Building a website is no longer a difficult task. Discover GoLive’s advanced features to build more sophisticated websites. Explore advanced concepts that include dynamic elements, rollovers, navigation bars, layers, and animations. Maps to ACE. Prerequisite: GoLive Fundamentals or comparable knowledge.

$299.00

XCM 1588

Adobe InDesign Fundamentals
Familiarize yourself with print layout and design using InDesign. Work with some of the tools and features to create eye-catching printed documents. Manage the InDesign environment, design documents, manage text, utilize colors, swatches, and gradients, manage transparency, utilize tables, prepare for handoff to a service provider, and create Acrobat PDF files. Maps to ACE. Prerequisite: Familiarity with Windows, keyboard and mouse. Should have basic understanding of page layout and design.

$299.00

XCM 1589

Adobe InDesign Advanced
Discover the advanced features in InDesign to create catchy and attractive documents for print and web. Administer advanced styles, control text, handle page elements, graphics and paths, develop Bézier paths, manage long documents, import and export files, adjust print settings and work with XML. Maps to ACE. Prerequisite: Adobe InDesign Fundamentals or comparable knowledge.

$299.00

XCM 1605

Adobe Web Design Certificate
The Adobe Web Design Certificate includes: HTML and CSS, Dreamweaver: Designing Websites, Fireworks: Web Graphics and Interactivity, Flash Fundamentals, Search Engine Optimization Fundamentals: Building Findable Sites, and Building Web Sites: Integrative Workshop. This capstone class is built as a facilitated class to work with and build your web site content, with an instructor present for facilitation. The certificate program consists of one easy-to-follow schedule at a special, reduced price. This course series is eligible for a payment plan. Please call 913-469-3891 for information about this option. Prerequisite: Knowledge and experience with Windows OS and the internet. Some programming background is helpful, but not required.

$1,900.00

XCM 1700

Keyboarding Fundamentals
Learn keyboarding skills or improve your current skill level. The flexible format is designed to improve skill, speed and accuracy. Immediate feedback on typing speed and accuracy is provided with each lesson. IBM-compatible software and practice exercises are provided for the student to take home.

$159.00

XCM 2300

Word 2007 Fundamentals
Learn how to enter and edit text, and save and browse documents. Learn how to enhance the appearance of a document by using various formatting options, create tables, insert headers and footers, proof and print documents, and insert graphics. Prerequisites: Competent with Windows and mouse with good typing skills.
$169.00  
**XCM 2301**  
**Word 2007 Intermediate**  
Work with styles, sections, and columns. Learn how to format tables, print labels and envelopes, and work with graphics. Use document templates, manage document revisions, and work with Web features. Prerequisite: Word 2007 Fundamentals

$169.00  
**XCM 2302**  
**Word 2007 Advanced**  
Perform mail merges, create and use forms, and create master documents that include a table of contents, a table of figures, footnotes, endnotes, an index, bookmarks, cross-references, and Web frames. Create macros, customize the Quick Access toolbar and keyboard shortcuts, and work with XML documents. Prerequisite: Word 2007 Intermediate

$169.00  
**XCM 2303**  
**Word 2007 Specialist Certificate**  
Receive instruction in our lineup of Word 2007 classes. Build a solid foundation with Word Fundamentals 2007 and Word Intermediate 2007 before moving on to more advanced topics in Word Advanced 2007. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Word Specialist Certificate to verify your competency. Prerequisite: Familiarity with Windows, keyboard and mouse.

$429.00  
**XCM 2305**  
**Word Fundamentals - 2003**  
Designed to give proficiency in creating, opening, formatting, saving, and printing a document. Explore how to edit documents and automate tasks. Format text, characters, and paragraphs. Create tables, control page layout and use proofing tools. Prerequisite: Knowledge of Windows, keyboard and mouse.

$169.00  
**XCM 2306**  
**Word Intermediate - 2003**  
Explore more advance Word features and functions, such as creating columns and sections, formatting tables, importing table data, applying styles, adding headers and footers, using the drawing canvas, and creating templates. Prerequisite: Word Fundamentals - 2003 or comparable knowledge.

$169.00  
**XCM 2310**  
**Word Advanced - 2003**  
Perform mail merges, create and use forms and form letters, and create master documents as well as macros to automate tasks. Customize menus and toolbars. Prerequisite: Word Intermediate - 2003 or comparable knowledge.

$169.00  
**XCM 2321**  
**Word Specialist Certificate - 2003**
Receive instruction in our lineup of Word classes. Build a solid foundation with Word Fundamentals - 2003 and Word Intermediate - 2003 before moving on to more advanced topics in Word Advanced - 2003. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Word Specialist Certificate to verify your competency. Prerequisite: Familiarity with Windows, keyboard and mouse.

$429.00
XCM 2500
Web-Based Creating Web Pages (HTML)
Learn how to design, create and post your very own site on the Internet's World Wide Web. Discover low-cost marketing techniques and search engine strategies. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00
XCM 2502
Web-Based Introduction to JSP Programming
In this course you will learn how to create JSP code and use it to access data stored in a Web application or in a database. You will be able to create and manage cookies, handle forms, display custom data, and more! Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, please complete the required on-line orientation at www.ed2go.com/jccc.

$104.00
XCM 2503
Web-Based Intermediate Photoshop CS3
A description is not available for this course.

$110.00
XCM 2505
Web-based Advanced Web Pages
Learn how to turn great Web pages into great Web sites from a top Internet author. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$78.00
XCM 2508
Web-Based Designing Effective Websites
Learn powerful graphic design techniques and build Web sites that are both attractive and wickedly effective. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, please complete the required on-line orientation at www.ed2go.com/jccc.

$104.00
XCM 2517
Web-Based Introduction to Dreamweaver MX
Master the best and most widely used Web design tool available. You will create and format text, images, tables, and various other Web page elements. You will also explore page design. Note: Please confirm computer requirements before registering for this course, web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.
$104.00  
**XCM 2518**

**WB: Intro to FrontPage 2003**  
A description is not available for this course.

$104.00  
**XCM 2519**

**WB: Intro to Dreamweaver 8**  
Learn to harness the power of this industry-standard Web design program from a Silicon Alley veteran. Master the basics of document creation and how to insert and format text, images, hyperlinks, tables, multimedia files, and other types of Web page content.

$104.00  
**XCM 2522**

**Web-Based Introduction to PhotoShop 7**  
Learn how to use layers, blends, masks, and transformations. You will also learn how to create a variety of special effects and how best to create and save images for the Web. Note: Confirm computer requirements before registering for this course. Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00  
**XCM 2525**

**Web-Based Keyboarding**  
Use the computer program FasType for Windows to learn the basic skills of touch-typing. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00  
**XCM 2530**

**Web-Based Introduction to Visual Basic 6.0**  
Visual Basic is the most popular development tool in the world and the easiest to learn. You will learn the basic designs and how to add various controls to interfaces. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00  
**XCM 2531**

**Web-Based Introduction to CorelDraw X3**  
Enhance your company newsletter, logo, or letterhead, boost your personal Web page, or create an original greeting card with dazzling images you’ve created with CorelDRAW. Learn how to add brilliant colors, designs and exquisite text to your original artwork and then export them with ease to other computer applications, such as Microsoft Office, Adobe Acrobat, and the Web. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00  
**XCM 2532**

**Web-Based Introduction to Visual Basic 2005**
Visual Basic is the most widely used programming language and development tool for creating Windows applications. The Visual Basic programming language is very easy to learn, and the Visual Basic 2005 development environment enables you to rapidly build Windows applications. In six short weeks, you'll learn how to write Windows applications using the Visual Basic programming language and the Visual Basic 2005 development environment. You'll also learn principles of object-oriented and event-driven programming that you can use, not only with Visual Basic, but also with other programming languages you may want to learn.

Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$150.00  
XCM 2545  
Web-Based Computer Skills for the Workplace  
Learn the fundamental computer skills you need to succeed in today's workplace. You'll discover practical applications for e-mail, word processors, spreadsheets, and databases, gaining a working foundation for the critical computer skills you need to survive in the modern job market. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registering, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00  
XCM 2573  
Web-Based Introduction to Flash MX 2004  
In this six-week on-line course, you'll learn how to use Flash MX 2004 to create dynamic, entertaining, and interactive Web sites and other projects. You'll discover the basic tools and techniques for making a Flash movie. You'll use Flash to create and modify graphics and text, build simple animations, and design Web site navigation buttons. Before you know it, you'll have a solid understanding of Flash and how best to make it work for you. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00  
XCM 2577  
Web-Based Introduction to Gaming Industry  
Learn about game development, game design, and production and the current challenges facing the gaming industry. Learn how to prepare for a dynamic career and succeed on the technical, artistic, or business side of game development. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00  
XCM 2585  
Web-Based PowerPoint Intermediate  
Learn to create exciting presentations from an expert in PowerPoint and digital media. Work smarter in PowerPoint and use graphics, animation, digital photography and video to hold your audience's attention and create memorable presentations for public speaking, teaching, video, or the Web. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00  
XCM 2596
Web-Based Introduction to Windows XP
This course covers all the basic skills and concepts needed to use a computer. This course will teach you how to work with text, pictures, photos, sound, music, DVD, Interactive TV, and video. Note: Confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00

Web-Based Introduction to Microsoft Excel 2007

Work with numbers? Then you need to learn Excel 2007. In this unique six-week online workshop, you'll discover dozens of shortcuts and tricks for setting up fully formatted worksheets quickly and efficiently. You'll also learn the secrets behind writing powerful mathematical formulas, using the function wizard to quickly and automatically calculate statistics, loan payments, future value, and more. You'll also learn the best ways to sort and analyze data, create custom charts and graphs, create 3-dimensional workbooks, build links between files, endow your worksheets with decision-making capabilities, and automate oft-repeated tasks with macros and buttons. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00

XCM 2750

Web-Based Introduction to Microsoft Access 2007

Learn how Microsoft's powerful and award-winning database can help you manage, store, search, analyze, and display important information you've collected about your business, home, community, or any other entity. In this practical and project oriented hands-on workshop, you'll learn how to create tables filled with fields and records. You'll build relationships between the tables to eliminate redundancies and slash data entry time. You'll discover how to achieve huge reductions in data entry errors by setting default values, creating validation rules, and building input masks. You'll find out how to make your database more user-friendly with custom data entry forms, smart lists, and other sophisticated controls. You'll learn how to retrieve exactly what you need from your database with powerful queries and reports, and you'll even start automating routine tasks with labor-saving macros. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration,
complete the required on-line orientation at www.ed2go.com/jccc.

$110.00
XCM 2751
Web-Based Introduction to Microsoft Outlook 2007
Want to learn Microsoft Outlook 2007 fast? Want to become a confident and productive user of this powerful program without having to memorize a lot of technical mumbo-jumbo? In this course, you’ll see what’s new in Outlook 2007 and get up and running quickly with the most important aspects of the program, from basic e-mailing to automating your work with rules. You’ll learn security basics and how to perform maintenance tasks, like backing up your data. You’ll even create a Google Gmail account for class assignments and personal use. You’ll also interact with other students and an instructor whose Outlook books, articles, and online courses have helped thousands of people like you learn the essentials of earlier editions of Outlook. Whether you’re new to Outlook or you’ve been using it for years, you’re sure to learn something useful in every lesson. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00
XCM 2752
Web-Based Introduction to Microsoft PowerPoint 2007
Learn how to use Microsoft PowerPoint 2007-- the best presentation program on the market today. This version of PowerPoint is very different from previous versions because of its new interface in which a Ribbon replaces the menu bar and toolbars. You’ll find out how to create dazzling slide presentations consisting of slides that contain text, objects, animation, slide transitions, sounds, charts, outlines, media clips, clip art, and hyperlinks. You’ll learn how to work with the new PowerPoint Ribbon, task panes, the clip organizer, and how to access Microsoft’s Web site to download clip art and templates for your presentations. You’ll see how to make global changes to your slides with the Slide Master. Finally, you’ll discover how to save your presentations so you can share them online or copy them onto CDs. The instructor will share valuable tips and keyboard shortcuts that you’ll use all the time with PowerPoint 2007. She’ll also provide you with many links to Web sites to broaden your knowledge of PowerPoint even further. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00
XCM 2753
Web-Based Introduction to Microsoft Project 2007
Discover how to effectively plan, implement, and control projects using Microsoft Project 2007. Learn how to apply the world’s most popular project management software to convert your lists and schedules into an integrated plan you can be proud of. See how Microsoft Project helps you think through and organize your project’s details, sequence tasks, produce a baseline, assign resources and costs, track progress, identify and analyze variances, and revise your project plan. You’ll discover the basics of Microsoft Project 2007 so you can create a project schedule in no time flat. Once you construct a basic schedule, you’ll learn how to enlarge and share it with clients and coworkers. After completing the course, you’ll know how to develop, implement, and control a project plan that meets organizational and customer objectives. The course will help you avoid going down dead-end alleys and also prevent you from overloading your schedule. Should you encounter trouble on your project, you’ll be able to apply a number of tried-and-true problem-resolution techniques to help get back on track. You’ll learn how to fine-tune different aspects of your project, including splitting tasks for work interruptions and defining material consumption rates. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.
$110.00
XCM 3400
Excel 2007 Fundamentals
After an introduction to spreadsheet terminology and Excel's window components, learn how to use the Help system and navigate worksheets and workbooks. Enter and edit text, values, formulas, and pictures, and save workbooks in various formats. Move and copy data, learn about absolute and relative references, and work with ranges, rows, and columns. Prerequisites: Strong competence with Windows, keyboard and mouse. Some familiarity with spreadsheet concepts.

$179.00
XCM 3401
Excel 2007 Intermediate
Learn how to use multiple worksheets and workbooks efficiently, start working with more advanced formatting options including styles, themes, backgrounds, and watermarks. Explore how to create outlines and subtotals, how to create and apply cell names, and how to work with lists and tables. Save workbooks as Web pages, insert and edit hyperlinks, and save a workbook as a PDF file. This course also covers advanced charting techniques, worksheet auditing and protection, file sharing and merging, and workbook templates. Prerequisite: Excel 2007 Fundamentals

$179.00
XCM 3402
Excel 2007 Advanced
Work with advanced formulas, as well as lookup functions such as VLOOKUP, MATCH, and INDEX. Explore data validation and database functions such as DSUM. Work with PivotTables and PivotCharts, how to import and export data, and how to query external databases. Learn about the analytical features of Excel (such as Goal Seek and Solver), running and recording macros, and sharing Excel data via the Web. Prerequisite: Excel 2007 Intermediate.

$179.00
XCM 3404
Excel Specialist Certificate - 2003
Receive instruction in our complete lineup of Excel classes. Build a solid foundation with Excel Fundamentals 2003 and Excel Intermediate 2003 before moving on to more advanced topics in Excel Advanced 2003. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Excel Specialist Certificate to verify your competency. Prerequisite: Knowledge of Windows, keyboard and mouse.

$479.00
XCM 3405
Excel Fundamentals - 2003
Designed for students with limited Excel experience. Gain proficiency with entering and editing data, modifying a worksheet, using functions, printing, creating charts and basic web features. Prerequisite: Knowledge of Windows, keyboard and mouse.

$179.00
XCM 3406
Excel Intermediate - 2003
Create simple worksheets and charts that will be used for internal reports and
data tracking. Work with large worksheets, multiple worksheets and multiple workbooks as you use 3-D formulas for linking and consolidating data. Customize menus and toolbars and use advanced formatting to make Excel work for you. Explore list management, advanced charting, auditing features, and templates. Prerequisite: Excel Fundamentals 2003 or comparable knowledge.

$179.00
XCM 3407
Excel Advanced - 2003
Perform advanced tasks, such as creating nested functions and using advanced formulas. Work with data tables, PivotTables and PivotCharts. Export/import data, perform what-if analyses, record macros, and publish worksheets as Web pages. Prerequisite: Excel Intermediate 2003 or comparable knowledge.

$179.00
XCM 3408
Excel Power User - 2003
Designed for the experienced Excel user who wants to gain proficiency in how to use formulas, functions, arrays, and add-ins for manipulating and analyzing data. Prerequisite: Excel Advanced 2003.

$99.00
XCM 3409
Excel 2007 Specialist Certificate
Receive instruction in our complete lineup of Excel 2007 classes. Build a solid foundation with Excel Fundamentals 2007 and Excel Intermediate 2007 before moving on to more advanced topics in Excel Advanced 2007. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Excel Specialist Certificate to verify your competency. Prerequisite: Knowledge of Windows, keyboard and mouse.

$479.00
XCM 3411
Excel VBA Programming - 2003
Create procedures that run in response to specific events, create user forms to accept or display data, validate the data entry in user forms, and debug and handle errors in code. Explore the Visual Basic Editor (VBE) as you begin programming basics and application development. Prerequisite: Excel Advanced 2003 or comparable knowledge.

$179.00
XCM 4000
Adobe Photoshop Fundamentals
Familiarize yourself with digital image editing using Photoshop. Examine the tools and features as you edit graphic imagery in the Photoshop environment. You will work with Photoshop's powerful selection and layer tools. In addition, work with tools for painting, altering and enhancing images. Save images for web, print and to Acrobat. The course material maps to the Adobe Certified Expert Exam, available through the Testing Center at the Center for Business. Prerequisite: Familiarity with Windows, keyboard and mouse.

$299.00
XCM 4002
Adobe Photoshop Advanced
Begin working with advanced image editing tools using masking techniques.
available in Photoshop. Learn about tools used for retouching photographic imagery. Work with the latest Photoshop filter and video advancements. Use tools to record and automate Photoshop tasks as well. The course maps to the Adobe Certified Expert exam, given at the Testing Center at the Center for Business. Prerequisite: Adobe Photoshop Fundamentals or comparable knowledge.

$299.00  
XCM 4005  
Adobe Photoshop Elements: Working with Photos  
Photoshop Elements opens the door for amateur photographers, business users, students, and home users who want professional-looking images for their print and Web projects. Capture photos from traditional or digital cameras, reduce red eye, correct color, work with layers, erase backgrounds, create photo-illustrations and Web graphics, simulate painting and drawing techniques, apply artistic effects, and more. Prerequisite: Familiarity with Windows, keyboard and mouse.

$249.00  
XCM 4006  
Adobe Premiere Elements: Video & DVD Creation  
Learn how to make impressive home videos using Adobe Premiere Elements. Use either still photos or video to create high quality movies and DVD's.

$249.00  
XCM 4100  
Adobe Illustrator Fundamentals  
Adobe Illustrator is a sophisticated digital drawing program. Illustrator allows you to create attractive illustrations and type effects for use in logos, advertisements, and other illustrations. In this course, you will start by drawing and manipulating simple shapes to create logos, and then combine text and graphics to create advertisements. Prerequisites: Knowledge of Windows, keyboard and mouse.

$199.00  
XCM 4102  
Adobe Illustrator Advanced  
Expand on your skills to create more complex illustrations. Receive a better understanding of how to print documents without any errors or color mismatches. Discover how to prepare illustrations for the Web. Create complex, robust illustrations that go beyond those created using Illustrator's basic tools. Prerequisite: Adobe Illustrator Fundamentals or equivalent knowledge.

$199.00  
XCM 4152  
Fireworks: Web Graphics and Interactivity  
Work with Fireworks to gain better control over editing vector and bitmap graphics and also make web graphics appear the way you had intended. Explore the tools and features of Fireworks to create and edit vector and bitmap graphics, apply interesting effects, as well as add graphical text to web pages. Prerequisite: Proficiency with Windows, keyboard and mouse.

$299.00  
XCM 4154  
3D Modeling with Google Sketchup  
Course description Google's Sketchup application allows you to build in 3D. Sketchup marries perspective, shading, angles, and rotation as you build, making the 3D modeling process more intuitive and doesn't require drawing skills.
to execute. The course begins with an overview of the Sketchup's interface, followed by an orientation of the tools, including measurement tools, painting and texturing tools, and selection tools. We then build a simple building, followed by a house with walls, stairs, a hip roof, interior walls, doors and windows. Sketchup uses layers and components to keep our drawings organized, and we explore their uses. Once we’ve finished the simple house plan, we use Sketchup to build everyday objects for our models, such as handrails or gutters for our house model. We can then add styles, shadowing, and sections to modularize and enhance our drawings. We finish with printing, exporting, and sending your model to Google Earth.

$189.00
XCM 4200
Access 2007 Fundamentals
Cover the basic functions and features of Access 2007. Learn how to design and create databases; work with tables, fields, and records; sort and filter data; and create queries, forms, and reports. Prerequisite: Strong competence in Windows, keyboard and mouse. Familiar with database concepts.

$189.00
XCM 4201
Access 2007 Intermediate
Learn how to normalize data; work with Lookup fields and subdatasheets; create join queries; add objects to forms, print reports and labels; create charts; and use PivotTables and PivotCharts. Prerequisite: Access 2007 Fundamentals

$189.00
XCM 4202
Access 2007 Advanced
Learn how to query with SQL; create crosstab, parameter, and action queries; create macros; import, export, and link database objects; work with XML documents; work with Windows SharePoint Services; optimize databases; password-protect and encrypt databases; set Access options and properties; create hyperlink fields; and use Outlook 2007 to update data. Prerequisite: Access 2007 Intermediate

$189.00
XCM 4203
Access 2007 Specialist Certificate
Receive instruction in our complete lineup of Access 2007 classes. Build a solid foundation with Access Fundamentals 2007 and Access Intermediate 2007 before moving on to more advanced topics in Access Advanced 2007. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Access Specialist Certificate to verify your competency. Prerequisite: Knowledge of Windows OS, ability to use keyboard and mouse with proficiency and a basic knowledge of database use.

$499.00
XCM 4204
Access 2007 VBA Programming
Learn about ActiveX Data Objects, control structures, and the basics of VBA programming. Prerequisite: Access 2007 Application Development.

$189.00
XCM 4205
Access 2007 Application Development
Go beyond using the built-in features offered by Access and develop your own applications. The course starts with how to plan an application from the ground up, and how to make use of advanced form design, macros, and dialog boxes. The course also covers creating switchboards, splash screens, custom menu forms, and navigation groups. Prerequisite: Access 2007 Advanced

$189.00
XCM 4219
Access Specialist Certificate - 2003
Receive instruction in our complete lineup of Access 2003 classes. Build a solid foundation with Access Fundamentals 2003 and Access Intermediate 2003 before moving on to more advanced topics in Access Advanced 2003. Once completed, either take the MOS exam at our Prometric testing center or use your Center for Business Access Specialist Certificate to verify your competency. Prerequisite: Knowledge of Windows OS, ability to use keyboard and mouse with proficiency and a basic knowledge of database use.

$499.00
XCM 4220
Access Fundamentals - 2003
Designed for students with limited Access experience. Explore how to use the Table Wizard, AutoForm, the Report Wizard, and filtering. Discuss database concepts, database planning and design, data entry rules and simple queries. Create forms and reports. Prerequisite: Knowledge of Windows, keyboard and mouse.

$189.00
XCM 4225
Access Intermediate - 2003
Work with concepts such as relating tables, referential integrity, joins, complex queries, advanced form design, advanced reports, charts, PivotTables, PivotCharts, and Internet integration. Prerequisite: Access Fundamentals 2003 or comparable knowledge.

$189.00
XCM 4230
Access Advanced - 2003
Explore advanced techniques such as: querying with SQL; using crosstab, parameter, and action queries; creating and running macros; importing, exporting, and linking database objects; optimizing, replicating and synchronizing databases; and basic database security. Prerequisite: Access Intermediate 2003 or comparable knowledge.

$189.00
XCM 4232
Access Developer Certificate - 2003
Finish off your Access education as you explore the most advanced features of Access and work with SQL. Class includes Access Application Development, Access VBA Programming and SQL Fundamentals curriculums. Prerequisite: Access Advanced - 2003 or comparable knowledge.

$599.00
XCM 4233
Access VBA Programming - 2003
Learn about ActiveX data objects, control structures, and the basics of VBA

$189.00
XCM 4234

Access Workshop
The Access Workshop offers you the opportunity to fine-tune your database work in a classroom setting with the assistance of the Center for Business’s database instructors. Bring in your files, content, and supporting files for a day of hands-on work on your database. Prerequisites: Access Intermediate or above.

$189.00
XCM 4236

Access Application Development - 2003
The Access Application Development class teaches you advanced techniques to customize access to a database. The course demonstrates the techniques to build a user friendly front-end to a database, which helps users manipulate the database more easily, while avoiding errors or invalid data entry. The course demonstrates techniques to automate frequently used tasks with macros and VBA code. This simplifies complex and repetitive tasks for the developer and the database user. The class guides you through the process to create and implement splash screens to welcome users to the database. After building the splash screen, we build a switchboard to help the database user both manipulate the database components, and execute the common tasks the developer makes available to the user. The class demonstrates how to customize the menu bar, toolbars and shortcut menus to control access to the database design tools. Finally, the course covers the design tools available to build a properly designed application. Database applications that are properly designed, as shown in this class, can be designed to help prevent data entry errors and validate the data entry process.

$189.00
XCM 5103

Publisher 2007 Fundamentals
Create and edit publications, arrange text and pictures, work with master pages, and create and format tables. Learn how to flow text across text boxes, create a facing-pages layout, export publications to PDF, and prepare publications for commercial printing. Prerequisite: Proficient with Windows, keyboard and mouse.

$189.00
XCM 5104

Publisher 2007 Advanced
Learn how to control colors and gradients, create and apply styles, work with WordArt objects, and apply section page numbers and bookmarks. Create and manage mail merge lists, prepare mailing labels, apply Web templates and forms, and create and publish a Web site. Prerequisite: Publisher 2007 Fundamentals

$189.00
XCM 5500

PowerPoint 2007 Fundamentals
Create new presentations that include text, graphics, WordArt, tables, charts, and diagrams. Edit and format slide content, and apply transition effects. Prerequisite: Proficient with Windows, keyboard and mouse.

$169.00
XCM 5501

PowerPoint 2007 Advanced
Customize PowerPoint by modifying the Quick Access Toolbar and creating macros. Apply themes and templates, and work with SmartArt graphics and tables. Add multimedia content and interactive elements to slides, and learn about presentation distribution options including PDF and HTML. Integrate PowerPoint with Word and Excel. Prerequisite: PowerPoint 2007 Fundamentals.

$169.00

XCM 5505

PowerPoint Fundamentals - 2003
Designed for students with little or no PowerPoint experience. Build new presentations while formatting slides, using drawing tools, working with graphics, tables and charts. Work with the slide master, add transitions and timings, create speaker notes and footers, and set up slide shows. Prerequisite: Knowledge of Windows, keyboard and mouse.

$169.00

XCM 5510

PowerPoint Advanced - 2003
Use PowerPoint's advanced features to create enhanced presentations. Build custom presentations by modifying templates, using multimedia, using organization charts and tables, and adding special effects. Even add Office integration with Word and Excel. Prerequisite: PowerPoint Fundamentals - 2003 or comparable knowledge.

$169.00

XCM 6000

Programming Fundamentals
Ready to become a programmer, or just want an introduction to object oriented skills? Receive an introduction to Classes, Objects, Behaviors, Attributes and other object-oriented topics such as inheritance and exception handling. This is a language-independent class using an object-oriented approach to programming logic, the solid foundation needed to build 21st-century business applications and successful Web sites. Prerequisite: Proficiency with Windows, keyboard and mouse.

$449.00

XCM 6141

Visual Basic 2008
Create programs in Visual Basic 2008 using a clean, conceptual approach. Whether new to programming or just wanting to upgrade your programming skills, you'll receive comprehensive instruction in the Visual Basic 2008 programming language.

$999.00

XCM 6168

ASP.NET Fundamentals
This is the next generation of Active Server Pages! Revolutionizing the way Web applications are developed, ASP.NET is built on Microsoft’s .NET framework with new functionality to ASP to make Web application development easier and more tool friendly. In this introductory course, receive an introduction to ASP.NET and Visual Studio.NET, the use of Server Controls and ASP.NET Rich Controls. Prerequisite: Programming knowledge or background, and a familiarity with HTML.
$579.00
XCM 6171

ASP.NET Advanced
Develop and deploy your ASP.NET applications. In this advanced-level class, work on configuring an ASP.NET application, troubleshooting and deploying an ASP.NET application, creating XML Web Services, and extending ASP.NET applications. Prerequisite: ASP.NET Fundamentals.

$459.00
XCM 6201

C#: Introduction for Developers
The software development industry has gone through several revolutions over the last 50 years, the most recent of which is the introduction of Microsoft’s .NET platform. As a programmer, you will want your skills on the leading edge of this revolution. Of all the languages targeting the .NET platform, C# has been tailor-made for future .NET developers. Prerequisite: Knowledge of programming principals.

$999.00
XCM 7200

MS Project Fundamentals
The smart way to learn Microsoft Project! Develop a project plan with tasks, resources and assignments, master the tools for presenting your plan and creating reports. Track progress and costs, and make real-time adjustments. Learn techniques for managing multiple projects and dependencies. Prerequisite: Knowledge of project management terms and functions, experience working with Windows, keyboard and mouse.

$359.00
XCM 7201

MS Project Server 2007
Receive instruction on the implementation and use of MS Project Server 2007. Prerequisite: MS Project Fundamentals or comparable knowledge.

$359.00
XCM 7252

Visio 2007 Fundamentals
Learn how to use stencils, scale and resize objects, draw basic shapes, manipulate compound lines, and distribute and group objects. Create diagrams, work with text, format shapes and lines, and apply a background page. Prerequisite: Proficient with Windows, keyboard and mouse.

$189.00
XCM 7253

Visio 2007 Advanced
Learn how to create and assign layers, work with themes and styles, customize stencil shapes, compare organization charts, and create PERT and Gantt charts. Integrate Visio with other Office programs, generate a Web site map, and draw a system diagram. Prerequisite: Visio 2007 Fundamentals.

$189.00
XCM 8251

A+ Certification - Essentials/IT Technician
Start your IT training off in the right direction. Build a solid foundation with our A+ Essentials and A+ IT Technician classes as you start your IT career. Mapped toward both of CompTIA's A+ exams, this series will help prepare you for the industry recognized A+ certification. The exam vouchers alone have a $290 value. Prerequisite: Knowledge of Windows operating system and basic computer hardware.

$1,299.00
XCM 8262
Network+ Certification
Combine our Networking Fundamentals class with our Network+ Test Prep CD in a package which will prepare you for CompTIA's Network+ certification. We will include an exam voucher, a $207 value, to make this an even greater deal. Prerequisite: A+ Certification or comparable knowledge.

$809.00
XCM 8279
Internet Marketing
Learn to use the internet as a marketing tool for your business or website. Prerequisites: Familiar with Windows and Internet Explorer, keyboard and mouse.

$299.00
XCM 8281
Computer Forensics and Investigation
Explore the skills necessary to launch and complete a successful computer investigation. Discover how to conduct a high-tech investigation, from acquiring digital evidence to reporting its findings. Coverage includes how to set up a forensics lab, how to acquire the proper and necessary tools, and how to conduct the investigation and subsequent digital analysis. Prerequisite: Competent skills with Windows, keyboard and mouse. Knowledge of Windows XP, Linux, and DOS helpful.

$799.00
XCM 8282
Certified Ethical Hacker Training and Exam Prep (CEH)
This course provides a review of topics and exam preparation for the Certified Ethical Hacker Training & Exam Prep (CEH). The Certified Ethical Hacker (CEH) certification is a vendor neutral certification in the network security discipline of Ethical Hacking. It covers the standards and language involved in attempting to penetrate a network or computer system. The Ethical Hacker is a technical professional who uses the same knowledge and tools as a hacker to look for the weaknesses in target systems and to help prevent unauthorized penetration. This knowledge or certification applies to security officers, auditors, security professionals, site administrators, and really anyone who is concerned about the integrity of the network infrastructure. In this course students prepare for the CEH exam by studying security risks through lectures and hands-on lab exercises. Students understand and learn how to look for the weaknesses and vulnerabilities in target. In addition, the application and testing process for the CEH as well as key topics on the exam are covered.

$1,599.00
XCM 8501
Oracle 10g SQL
Students receive a solid foundation for creating databases and strengthen their knowledge in creating queries. To assist students in bridging SQL topics to further studies, students are introduced to SQL tuning, compare Oracle’s SQL syntax to other databases, and describe how SQL can be embedded in applications. This is an entry-level course to help students develop SQL, DDL, & DML knowledge.
and experience specific to Oracle. Prerequisite: Efficient with MS Windows OS and basic knowledge of database functions.

$729.00
XCM 8504

Oracle 10g PL/SQL
Create dynamic client/server applications using PL/SQL. Explore scripting semantics and syntax, and fully detail the PL/SQL functionality of Oracle Database 10g. Learn how to write powerful PL/SQL programs, interact with Oracle databases, perform complex calculations, and handle error conditions. Prerequisite: Knowledge of relational databases and database design.

$729.00
XCM 8508

Oracle 10g New Features
Receive an introduction to the new features in Oracle Database 10g Release 2 - the database for Grid computing. Learn how to use Oracle Database 10g new features to increase database availability, to simplify database performance monitoring and tuning through the use of Oracle Database 10g Advisors, and to offer simplified database manageability. The course also covers security changes that students need to understand. This course counts towards the hands-on course requirement for the Oracle 9i Database Administrator and Oracle Database 10g Administrator Certification. Prerequisite: Knowledge of relational databases and database design.

$899.00
XCM 8512

Oracle 10g Database Administrator I: Implementation & Administration
Receive instruction using a real-world approach, combined with topics ranging from initialization parameters and table space storage to data integrity, constraints, and user profiles. Prep for the updated Oracle certification exam, #1Z0-042. Prerequisite: Oracle SQL and Oracle Guide to 10g or comparable knowledge.

$729.00
XCM 8515

Oracle 10g Database Administrator II: Backup/Recovery & Network Administration
Receive real-world instruction on the use of key tools and techniques for Oracle database backup, recovery and network administration. Prep for the updated Oracle certification exam, #1Z0-043. Prerequisite: Oracle 10g Administrator Certified Associate certification or comparable knowledge.

$729.00
XCM 8517

Oracle 10g Performance Tuning
Get the most out of your 10g Database by learning performance tuning methods that maximize the utility of the database. Students learn how to benefit from Oracle Database 10g automatic tuning features, as well as practicing the manual tuning methods using the statspack tool. After clearly defining the various methodologies one can use to tune an Oracle Database, the course covers the various tunable components of an Oracle Database. Throughout the course, students experience hands-on the tuning of an Oracle Database by practicing through a series of workshops. This course counts towards the Hands-on course requirement for the Oracle Database 10g Administrator Professional Certification. Prerequisite: Oracle 10g Administrator Certified Associate certification or comparable knowledge.
$899.00  
XCM 8570  
Crystal Reports Fundamentals  
You will learn the basics of creating reports using Crystal Reports, including sorting, selecting records, grouping, linking, creating formulas, using Report Expert, and distributing data to other users. **Prerequisite:** Experience with Windows operating systems. **Preferred knowledge:** Experience with database applications such as Microsoft Access.

$359.00  
XCM 8575  
Crystal Reports Advanced  
This course is designed for users with a basic knowledge of Crystal Reports. You'll learn to use advanced formulas, formatting and cross-tabs, and how to create and modify dictionary files. Topics include conditional formatting, subreports, parameter fields and Crystal SQL Designer. **Prerequisite:** Crystal Reports Fundamentals course or equivalent knowledge.

$359.00  
XCM 8600  
Java Programming  
This course teaches you the syntax of the Java programming language, object-oriented programming with Java, including graphical-user interfaces, exceptions, file input/output, and developing Java applications and applets. This course uses the Sun curriculum and supports the Sun Java certification. **Prerequisite:** Knowledge of programming principals.

$999.00  
XCM 8620  
JavaScript  
Following a review of HTML, you'll cover JavaScript scripting basics, using variables and functions, validating user-entered data, working with windows and frames, and adding advanced elements to the Web page, including animation, cascading style sheets and cookies. **Prerequisite:** HTML & CSS, Programming Fundamentals.

$649.00  
XCM 8632  
SQL: SQL Fundamentals  
This course introduces the fundamental concepts of SQL. Work with tables, keys, viewing data and functions. **Prerequisite:** Any database background, including Access and Crystal Reports. Some exposure to programming is helpful, but not required.

$359.00  
XCM 8654  
PHP and MySQL for Dynamic Web Sites  
When static HTML pages no longer cut it, you need to step up to dynamic, database-driven sites that represent the future of the Web. Explore the way users work with PHP and MySQL to build dynamic sites using Open Source tools. Work with PHP and MySQL separately before going on to cover security, sessions and cookies, and using additional Web tools. Finish the class by creating sample applications. **Prerequisite:** HTML & CSS, Access Intermediate or working knowledge of database design.
$559.00
XCM 8765
**CCNA Certification Series**
Ramp up for your CCNA certification as you learn about Cisco routers, switches and other networking devices. Prerequisite: Network+ certification or comparable knowledge. Work in a Cisco environment also helpful.

$1,599.00
XCM 8831
**MCTS: Implementing and Maintaining SQL Server 2005 Certification Series**
Combine our Implementing and Maintaining SQL Server 2005 classes as you work toward one of Microsoft's newest certifications, 70-431 MCTS: SQL Server 2005 Implementation and Maintenance. Prerequisite: Knowledge of relational databases and database design.

$1,309.00
XCM 8832
**SQL: Implementing SQL Server 2005**
Receive the product knowledge and skills needed to implement a Microsoft SQL Server 2005 database. Focus on how to use SQL Server 2005 product features and tools related to implementing a database. Part one of the Microsoft Certified Technology Specialist (MCTS) coursework. Prerequisite: Knowledge of relational databases and database design.

$699.00
XCM 8833
**SQL: Maintaining SQL Server 2005**
Receive the product knowledge and skills needed to maintain a Microsoft SQL Server 2005 database. Focus on how to use SQL Server 2005 product features and tools related to maintaining a database. Part two of the Microsoft Certified Technology Specialist (MCTS) coursework. Prerequisite: Knowledge of relational databases and database design.

$699.00
XCM 8834
**SQL Server 2008 New Features**
Take immediate advantage of the new capabilities of SQL Server 2008. Discover the details on all the innovative features and benefits available in SQL Server 2008. You will get a comprehensive overview of the new and improved enterprise data management capabilities, developer functions, Business Intelligence tools, and security enhancements. Prerequisite: familiarity with SQL 2005 or earlier version of SQL.

$699.00
XCM 8836
**SQL Reporting Services**
To be successful in the marketplace, businesses need to extend information beyond the walls of their organization and seamlessly interact with customers, partners, and suppliers in real time. Microsoft SQL Server Reporting Services enables you to do just that. We explore Reporting Services by starting with the included wizards, then we hand-craft reports. We then explore how to deploy your reports to the server where they can be viewed and downloaded by anyone with access rights. Prerequisite: Knowledge of SQL 2005 or previous SQL experience.

$899.00
XCM 8838

SQL: Programming SQL Server 2008
Discover the programming fundamentals for SQL Server 2008 with crucial real-world context and extensive code samples. Get the hands-on programming instruction, practical examples, and best practices you need to master the core programmability features in SQL Server 2008. Explore how to program views, stored applications, triggers, and functions using T-SQL. Work with the new data types, LINQ, and the ADO.NET Entity Framework. Automate common administration and maintenance tasks, debug databases, reports, and objects using Microsoft Visual Studio 2008. Prerequisite: familiarity with SQL 2005 or earlier version of SQL and familiarity with programming or completion of Programming Fundamentals course.

$999.00

XCM 8925

PMP Test Prep
This course contains topics required for Project Management Institute's (PMI) Project Management Professional (PMP) certification exam. You will cover the application and testing process for PMP as well as key test topics, such as project integration, time, cost, quality, communication and risk. The course will be taught by certified instructors. Prerequisite: industry experience with project management.

$999.00

XCM 8937

Performance Management
Performance Management is an integral part of Project Quality and Project Human Resources Management. This 1-day course focuses on effective performance management. Topics include performance diagnosis, evaluation, communication, and reporting. Prerequisite: Project Management Essentials or equivalent experience.

$279.00

XCM 8938

Software Testing
This 2-day workshop defines a process to implement a structured testing environment for all phases of the Systems Development Life Cycle (SDLC). It covers the four techniques of structured testing and the application of those techniques during the phases of the SDLC. Topics include risk assessment, creating functional and structural test plans, test scripts, and test cases. Break-it testing, complexity testing, and basis path testing are also introduced. Prerequisite: Project Management Essentials or equivalent experience.

$559.00

XCM 8939

Project Quality Management
A description is not available for this course.

$299.00

XCM 9001

Web-Based Introduction to Networking
This class explains computer networking basics in terms that you can easily understand, using concepts common to everyday, non-computer experience. A brief introduction to networking history provides context, explaining how networks have become so important to businesses and individuals. The course emphasizes networking fundamentals, explaining the software and hardware that makes
networking possible. The course stresses understanding how and why networks work, rather than focusing on memorization of terms and numbers. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$110.00

XCM 9004

Web-Based Java for the Absolute Beginner

If you want to learn Java, but don't have any prior programming knowledge, you'll enjoy this course. A Java programmer with more than nine years of real-world corporate programming experience teaches you almost every important Java topic at a leisurely pace, using clear and easy-to-understand language. Practical exercises and examples will help you feel comfortable with the most important Java concepts, including databases and Java Server Pages. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register for this course complete the required on-line orientation at www.ed2go.com.

$104.00

XCM 9005

Web-Based Intermediate Networking

Learn real-world applications for the concepts you learned in "Introduction to Networking." You'll gain a full understanding of almost every aspect of networking technology, including hot topics such as virtual private networks, security, and Internet connectivity. Completion of this course and its prerequisite should serve as a springboard for a career in computer networking or training for CCNA certification. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the on-line orientation at www.ed2go.com/jccc.

$104.00

XCM 9006

Web-Based Introduction to PC Troubleshooting

This course takes you through the typical hardware and operating system problems encountered by technicians and teaches you troubleshooting techniques to decipher any problem and gives you the skills to solve them. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00

XCM 9008

Web-Based Introduction to Oracle

This course will introduce you to the Structured Query Language (SQL), Oracle's SQL *Plus, and other valuable tools used to develop, manage, and reference an Oracle database. Note: Please check computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00

XCM 9009

Web-Based Introduction to Database Development

This course will guide you step-by-step through all the phases of a system development project to guarantee that the resulting project will not only work as it was designed, but also that the design truly responds to user needs. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.
Web-Based Introduction to SQL
Learn the key concepts of Structured Query Language (SQL) and gain a solid working knowledge of this powerful and universal database programming language. You will learn the basic structure of relational databases, how to read and write simple and complex SQL statements, and advanced data manipulation techniques. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Introduction to Perl Programming
Learn Perl, a powerful and easy to use scripting language used on PCs, servers, and on the Internet for a wide range of programming problems. Perl is a capable as C, C++, and Java, but is easier to learn and does not require the software development tools and environments required by those languages. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Creating User Requirements Documents
Your success as a developer depends almost entirely on your ability to meet or exceed your customer’s every expectation. This course will show you, step by step, how to discover and document precisely what your customer wants. You will learn how to gather, manage and document user requirements for any type of project in any industry. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based JavaScript Programming for the Web
Learn how to spiff up your pages with cool effects like mouseOvers, popUps, and alerts and hot links, scrolling messages, navigation enhancements, basic forms, and more, with JavaScript! Note: Please confirm computer requirements before registering for this course and Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based C++ for the Absolute Beginner
Create programs for Microsoft Windows using Borland C++ Builder. Learn Object-Oriented techniques, how to create windows and forms, and how to program in a step-by-step nature. This course is ideal whether you are an enthusiast, business person hoping to advance your career, or someone who already knows how to program but wants to move ahead to C++ and Object-Oriented Programming. Note: Confirm computer requirements before registering for this course. Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc. C++ Borland software is available through amazon.com for $72.99.
Web-Based Creating a Small Office Network
Create your own home office or small office network using Windows XP. Slash expenses and improve efficiency by learning how to share printers, Internet connections, drives and documents. You will learn what hardware you will need, how to configure Windows XP to run your small network, how to configure your printers and other peripherals and how to manage and maintain your network and keep it secure. Note: Confirm computer requirements before registering for this course. Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Introduction to Visual Basic .Net
Visual Basic .Net is the most widely used programming language and development tool for creating Windows applications. The Visual Basic .Net programming language is easy to learn, and the Visual Basic .Net development environment enables you to rapidly build Windows applications with little more than a few clicks of your mouse. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After you register, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Introduction to VBA
Discover the time saving power of document automation. Cut through the mystery of object-oriented programming, the Word object model and the logical structure of the Visual Basic for Applications language by developing a customized document automation program one lesson at a time. Note: Please confirm computer requirements before registering for this course and web registration is not available. After registering, please complete the on-line orientation at www.ed2go.jccc.com.

Gain in-demand skills writing sophisticated Windows programs that access and modify business databases and implement SQL. This course will be ideal if you are a Visual Basic .NET programmer and you want to upgrade your programming skills or prepare yourself for a new and exciting line of work. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

WB: Intermediate Oracle
This course will give you the skills you need to write powerful and flexible programs using SQL. Learn the building blocks and core features of PL/SQL and begin building fully functional PL/SQL programs with procedures, packages, debugging routines, database structures, triggers and cursor processing. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.
XCM 9021
Web-Based C# Programming for the Absolute Beginner
Learn the fundamentals of computer programming with the hot new C# programming language. Note: Please confirm computer requirements before registering for this course and Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00

XCM 9022
WB: Wireless Networking
Industry experts show you how wireless networking works, as well as how to plan, deploy and connect to wireless networks.

$104.00

XCM 9023
WB: Intro to PC Security
Security expert teaches the fundamentals of PC and network security.

$104.00

XCM 9024
Web-Based Introduction to PHP & MySQL
Gain skills that are highly in demand by learning to build dynamic, data-driven Web sites using two of the most popular open source technologies available: PHP and MySQL. In this result-oriented, hands-on class, you'll master essential programming concepts by designing and building a full-featured Web site powered by PHP and MySQL. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00

XCM 9025
Web-Based Introduction to FreeHand MX
Harness the power of Freehand MX to create stunning logos, brochures, book covers, flyers, Web graphics, and more! Gain an understanding of the dramatic differences between creating designs for onscreen viewing and creating images for printing. Quickly convert your printable artwork into Web-compatible designs. Integrate Freehand with Fireworks, Flash, and Dreamweaver for a total Web development solution. Learn how to publish your illustrations in a variety of formats, including print, Web, Adobe PDF, and Macromedia Flash. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00

XCM 9026
Web-Based Introduction to Photoshop CS2
If you want to work with graphics, Photoshop is the program you will most need to learn. This hands-on, project-oriented course is filled with detailed step-by-step instructions you'll have no trouble following as you learn how to edit photos, create basic paintings, and prepare your images for printing. Discover how to improve photographs by removing flaws, correcting for poor exposure, or adding new elements. You'll even learn how much fun it can be to paint again without the mess to clean up. And, best of all, no prior artistic ability is required to take this course. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.
Web-Based Creating a Home Network
Create your own home network so that your computers can easily share printers, Internet connections, drives, documents, photos, and other resources. You'll learn what hardware you need, how to configure Windows XP to run your small network, and how to configure printers and other peripherals. By the end of the course, you'll know how to manage and maintain your network, and how to keep it secure. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Making Movies with Windows XP
If you have Windows XP, you already have Microsoft Movie Maker, the program that makes creating professional-quality movies fun and easy. You can edit your existing video to show only the best parts, and leave out the not-so-good parts. Add special effects, titles, credits, photos, background music, sound effects, and more to turn your home video into truly entertaining digital movies. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Introduction to Linux
Learn how to navigate through the world of Linux, and use the free office productivity, multimedia, and Internet software packages provided by Linux. Also learn how to use your Linux desktop to access the Internet to browse web sites, download files, chat with friends, and work with e-mail. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

Web-Based Intermediate C# Programming
Build upon your current knowledge of programming logic by writing Graphical User Interface applications in the C# programming language. Learn how to write applications with menus, toolbars, and files, and find out how to interact with databases and write SQL queries. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the on-line orientation at www.ed2go.com/jccc.

WB: Advanced PC Security
When is hacking legal? When you use it to secure your own network. This new method of hacking, called ethical hacking or white-hat hacking, uses common and readily available hacking tools and techniques to audit your network so you can locate and close security holes. Note: Please confirm computer requirements before registering for this course, web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.
Web-Based Introduction to Alice 2.0 Programming
Learn how to write three-dimensional animation and game programs while learning object-oriented programming principles at the same time. If you're a novice programmer who wants to master programming concepts like decisions, loops, methods, and arrays, this course is for you! While building fun interactive worlds (including a flight simulator), you'll also learn more advanced programming concepts like arrays and event-driven programming. When you're finished, you'll be able to apply these concepts to other programming languages, like Java, C++, C#, or Visual Basic. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$104.00
XCM 9033

Web-Based CompTIA Security+ Certification Prep
The U.S. Department of Labor forecasts that computer security and related computer-support specialties will be among the fastest-growing occupations through 2012. CompTIA's Security+ certificate is widely regarded as the entry-level certificate for gaining access to this well-paying, in-demand field. In this six-week course, you'll learn everything you need to know to achieve your Security+ credential. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$150.00
XCM 9034

Web-Based CompTIA Network+ Certification Prep
This course will teach you everything you need to know to take and pass the challenging CompTIA Network+ certification exam and become an excellent network technician. You'll learn about topologies, the OSI Seven-Layer model, protocol suites, modern network operating systems, network hardware, cabling standards, remote connectivity, Internet connections, network troubleshooting, and more. CompTIA Network+ certification also counts as one of the elective exams for the Microsoft Certified Systems Administrator (MCSA) certification. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$150.00
XCM 9035

Web-Based CompTIA A+ Basic Certification Prep
Time to roll up those sleeves and dive inside the personal computer! The Basic CompTIA A+ Certification Prep course teaches you about the hardware common to virtually every personal computer, including microprocessors, RAM, power supplies, motherboards, BIOS, CMOS, the expansion bus, and input/output devices. This course gives you the knowledge upon which you?ll base the rest of your CompTIA A+ certification studies for the exams that debuted in late 2006. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$150.00
XCM 9036

Web-Based CompTIA A+ Intermediate Certification Prep
The Intermediate CompTIA A+ Certification Prep course picks up where the Basic course left off, taking you right into the PC. You?ll learn to install, configure, and maintain hard drives, removable drives, and printers. Plus you?ll learn Windows inside and out. This course takes you through the second of the three steps you need to become both a highly competent PC tech and a CompTIA A+ certified technician, 2006 style. Note: Please confirm computer requirements before
registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$150.00

XCM 9037

Web-Based CompTIA A+ Advanced Certification Prep
The Advanced CompTIA A+ Certification Prep course focuses on fun technology. You?ll learn everything you need to know to select, install, and service video, sound, portable computers, wired and wireless networks. You?ll learn about security plus get an outstanding troubleshooting methodology. The Advanced course completes the three-course CompTIA A+ Certification Exam Prep cycle and prepares you for both the 2006 exams and for real life as a PC tech. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$150.00

XCM 9038

Web-Based Microsoft Windows Certification Prep: Exam 70-270
The road to Microsoft certification begins here! This intense course teaches you what you need to know to pass the 70-270 exam--Installing, Configuring, and Administering Microsoft Windows XP Professional--which carries with it the title of Microsoft Certified Professional (MCP). The 70-270 exam can also be the first step toward full-fledged Microsoft Certified Systems Engineer (MCSE) certification. Note: Please confirm computer requirements before registering for this course. Web registration is not available. After registration, complete the required on-line orientation at www.ed2go.com/jccc.

$169.00

XCM 9400

Outlook Fundamentals - 2003
Outlook is much more than just an e-mail application. Create and use messages, contacts, appointments, tasks, and other Outlook items as you explore many of Outlook's rich features. Prerequisite: Knowledge of Windows, keyboard and mouse.

$169.00

XCM 9401

Outlook Advanced - 2003
Explore activities such as customizing Outlook and managing the mailbox. Search and filter messages while setting rules. Work with folders, templates and forms, importing and exporting data, public, shared, and offline folders. Prerequisite: Outlook Fundamentals - 2003 or comparable knowledge.

$359.00

XCM 9402

SharePoint Server: Site Administration for Site Owners
Work with SharePoint to share information and collaborate on projects in an efficient and cost-effective manner. Use Windows SharePoint Services to create virtual team Web sites to enable information sharing and collaboration between project team or department members. Prerequisite: Proficiency with Windows, keyboard and mouse.
Expand your SharePoint solution to include a variety of teams with different needs and manage the sites and servers. Create virtual Web-based meeting and document workspaces, as well as administer, maintain, and extend the functionality of a team Web site. Prerequisite: SharePoint Server: Site Administration for Site Owners or comparable knowledge.

$359.00  
XCM 9404  
**InfoPath: Creating InfoPath Forms**  
You're a person who has information that needs to be gathered and shared. InfoPath is a product that does just that. Discover how to use InfoPath to gather and share information by creating and implementing XML-based forms. Prerequisite: Advanced Microsoft Office experience, HTML and Web Page Design.

$179.00  
XCM 9405  
**OneNote**  
Capture, organize, and reuse your notes on laptop computer, desktop computers, or Tablet PCs. OneNote gives you one place to store all your notes and the freedom to work with them however you want. It helps you capture information in multiple ways and then organize and use it according to your needs. OneNote combines the freedom and flexibility of paper notes with the efficiency and power of digital organizational tools. Prerequisite: Familiarity with Windows and Microsoft Office applications.

$149.00  
XCM 9406  
**Business Skills for the IT Professional**  
Developing as a Professional is key to your success in business and social situations. Explore what qualities define a professional and what you can do to gain recognition as a true professional in your workplace. Discuss everything from developing good work habits to minding your cubicle manners, as well as networking and scheduling your time effectively. Finally discover new ways to cope with workplace challenges such as defusing conflict and managing pressure and stress.

$169.00  
XCM 9408  
**Outlook 2007 Fundamentals**  
Create e-mail accounts and send e-mail messages using several techniques. Learn how to manage e-mail messages, contacts, tasks, and meeting requests. Prerequisite: Proficient with Windows, keyboard and mouse.

$169.00  
XCM 9409  
**Outlook 2007 Advanced**  
Learn advanced techniques for managing stored e-mail messages, create and work with notes and Journal entries, schedule and manage meetings, share Outlook content, and customize templates and forms. Prerequisite: Outlook 2007 Intermediate.

$169.00  
XCM 9450  
**SharePoint Designer: Building Websites**
Learn how to create and apply templates, control layout and spacing, create and apply style sheets, and apply IDs and classes. Explore how to insert, modify, and arrange images, create links and navigation bars, and insert and format tables. Prepare a Web site for publishing.

$299.00
XCM 9460

SharePoint Designer Advanced
Learn how to create dynamic components, work with multimedia files, create interactive content, design with layers, and create tables and forms. Explore the basics of data-driven Web sites, and how to fix typical Web site problems. SharePoint Designer: Building Websites.

$299.00
XCM 9463

Dreamweaver: Designing Websites
Discover how to design and build a website as you explore the features and functions in Dreamweaver. From novice to advanced, there is something for everyone in this class. In two days you will move from basic web design to professional-looking websites ready for upload. Prerequisite: HTML and CSS, or comparable knowledge.

$349.00
XCM 9469

Dreamweaver: Database Connections
Learn to create web applications that change dynamically. Use Dreamweaver to create and administer database-driven sites, establish server connectivity, and create and manage database records. Receive an in-depth understanding of techniques used to create dynamic web applications. Prerequisite: Dreamweaver: Designing Websites.

$199.00
XCM 9470

Flash Fundamentals
A website can be made to look more inviting with interactive graphics and animations. Discover the basic features and functions of Flash as you create different types of animations and publish them on the web. Prerequisite: Proficiency with Windows, keyboard and mouse.

$299.00
XCM 9477

Flash Level 2: Building Interactivity with ActionScript
This Flash class focuses on writing ActionScript to control Flash documents. We'll create forms with interactive components, and build conditional logic to control the flow of content through the form. We'll then script a Flash document to allow a site visitor to drag and drop objects in the Flash document, and control how and where they are dropped. The course covers the use of built-in classes and function creation by building a web page layout with Flash and adding interactivity to the objects we build. Finally, we manage data captured in a form on a Flash-driven web page by controlling dynamic content. Prerequisites: Flash Fundamentals.

$299.00
XCM 9478

Flash Level 3: Delivering Video with Flash
This class focuses on using Flash to deliver video to our web sites. We begin with
a discussion of techniques to produce good video content, and discuss video encoding techniques. The course covers three different methods to encode video for use in Flash, and then moves to setting cue points to add additional information for our site visitor. We then build a customized Flash video player, and then explore transparency, masking and blend modes for Flash video. The course then explores deploying Flash video content and enhancing it with closed captions, cue points and playlists. Prerequisites: Flash Fundamentals and Flash Level 2: Building Interactivity with ActionScript.

$299.00
XCM 9515
Building Web Sites: Integrative Workshop
The Web Site Workshop offers you the opportunity to fine-tune your web site in a classroom setting with the assistance of the Center for Business’s web design curriculum instructors. Bring in your code, content, and supporting files for a day of hands-on work on your site.

$299.00
XCM 9525
Cascading Style Sheets: Focus on CSS
Cascading Style Sheets (CSS) is the professional approach to web site design. CSS can more efficiently control color, typography, and layout techniques than relying on HTML alone. We begin with techniques to specify color and font information in a single web page. We then improve our management and workflow by moving our formatting rules to a .css file and link multiple pages to a single set of formatting rules. We then explore the use of borders, margins, and padding to control the layout of a web page, as well as consider four different CSS layout tools. We finish by styling HTML forms, and improve the experience of our site visitors by building a print style sheet. Prerequisite: Experience with Windows, mouse and keyboard, HTML, and comfortable working with a text editor and simple code.

$299.00
XCM 9526
Ajax Web Applications
Ajax offers highly interactive, desktop-like Web applications that can be deployed through any modern Web browser without the need for special plug-ins. Ajax is built on existing Web technologies such as JavaScript, HTML, and CSS, and it is used in conjunction with your favorite server-side language. Foundations of Ajax explains how to combine these technologies effectively to implement Ajax into your new or existing Web applications. Prerequisite: Cascading Style Sheets: Focus on CSS, and JavaScript or equivalent experience.

$399.00
XCM 9540
HTML and CSS
Examine the basics of foundational web technology and create your own functional web pages using markup languages such as Hypertext Markup Language (HTML), Extensible Hypertext Markup Language (XHTML), and Cascading Style Sheets (CSS). Learn skills that will be instrumental in creating advanced web pages. Discover the best practices of web design and create a website that enhances the usability and interactivity of the web page/site. Prerequisite: Ability to use windows, keyboard and mouse.

$349.00
XCM 9541
Search Engine Optimization Fundamentals: Building Findable Sites
This course is meant for site builders, and others wanting to attract and reach
their audiences. Rather than a marketing approach, we'll consider web standards, accessibility, microformats, and server-side strategies to make sites more findable. We'll work with custom 404 pages, content strategies, RSS deployment, and building search into the site. The use of Flash, JavaScript, and AJAX present unique challenges to findability. We'll consider coding that will help mitigate and improve the searchability of sites using these newer techniques. Finally, we'll consider troubleshooting and discovery techniques to find the spots in our site strategy that need fixing. Prerequisites: HTML, web site building experience, and not intimidated by code. Experience with Flash, JavaScript, AJAX is helpful but not required. Access to your web server will be helpful.

Dance and Exercise (XYD)

XYD 1000
Ballroom Dancing, Beginning
Have fun learning the steps to traditional ballroom dances, including the foxtrot, waltz, swing and rumba. Shoes worn for class must be non-scuffing, soft-soled shoes. Leather soled shoes preferred. This class is for couples only. Couples must register together/concurrently; however listed fee is for per person.

$55.00

XYD 1010
Ballroom Dancing, Intermediate
If you've taken "Beginning Ballroom Dancing" at JCCC you are ready to learn the more advanced steps, including the rumba and the cha-cha. Shoes worn for class must be non-scuffing, soft-soled shoes. Leather soled shoes preferred. This class is for couples only; must register together concurrently. The listed fee is per person.

$55.00

XYD 1040
Latin American Dancing
Learn Latin American dances including merengue, rumba, samba, cha cha, and mambo/salsa. Practice dance etiquette and lead/follow techniques, perfect dance positions and gain confidence on the dance floor. Please enroll with a partner. Wear non-scuffing, soft-soled shoes, leather-soled shoes are preferred. Fee is per person.

$55.00

XYD 1100
Lifetime Fitness Center
JCCC's Lifetime Fitness and Wellness Center is designed to improve fitness levels through physical activity. For this program, all participants must have a fitness assessment. Workout clothes must be worn for your assessment and for center activities. Individuals taking Lifetime Fitness will be required to purchase the Lifetime Fitness and Wellness Manual that is available at the JCCC Bookstore and will need to bring this with them to the initial assessment. (The full assessment will take 1 1/2 hours to complete). The center has a cardiovascular circuit, consisting of stationary bicycles, stair climber and hydraulic resistance equipment. Strength training equipment is also available. A professional physical educator is on duty at all times to answer questions. After you enroll, call 913-469-4432 to schedule an assessment with other enrollees. You may complete the first portion of the assessment online through Blackboard (http://webct.jccc.net) with access to the assessment one week prior to the start of the semester. After the assessment is completed, you may then attend the center at your own pace during any of our open hours. Note: Hours of operation change somewhat when credit classes are not in session.

$99.00

EMT Training (XNT)
XNT 1000

Streetsense
Every health care professional needs to know much more than clinical medicine. Go beyond what you learned in school! Topics of great concern to savvy medical providers, education and administration of field providers include: effective interpersonal communication, safety on the streets, weaponry and harmful intention, self-awareness, stress and wellness and much more. This class is taught by the author of "Streetsense", covers material pertinent to all medical and emergency providers.

Many ESL learners have excellent training and skills in their native languages but find their academic or career progress slowed by the challenges of writing in English. This course will take you through each step of the writing process.

$99.00

XGF 5003

Introduction to Teaching ESL/EFL
English language teachers enjoy a wide range of opportunities and face a daunting set of challenges. This course will show you innovative ways of teaching vocabulary and grammar, listening and speaking, and reading and writing.

$99.00

XGF 5004

Communicating Like a Leader
Your style of communication can make the difference between succeeding and failing in almost any endeavor. You'll build up your listening skills, learn to read body language, become more artful at providing feedback, and more.

$98.00

XGF 5005

Interpersonal Communication
You'll explore clear examples of verbal and nonverbal habits, effective listening, self-concept, differences in cultural and gender conversation styles, and conflict management. You'll also gain practical strategies you can use to improve communication at home, social situations, and workplace.

$99.00

Education (XNE)

XNE 0290

Leadership in Early Childhood Education (5 CR)
You will study how program directors lead programs and create quality environments for children, family and staff. Leadership topics include: leadership styles; developing mission statements, program philosophies, procedures, manual and handbooks; assessing and planning for program improvements; recruiting and retaining qualified early childhood teachers; creating professional growth opportunities; developing effective staff meetings; implementing a shared decision making process; utilizing conflict resolution strategies; and developing
partnerships with families and community agencies.

$189.00  
XNE 1104

**Early Childhood Mentoring I** (1.6 CR)
You will be provided with the basic foundation needed for developing mentoring relationships, which includes the opportunity to develop communication skills, leadership skills, and the application of adult education theory. This course will provide practical and supportive ways to learn and grow on the job and is designed to help managers and supervisors plan, implement and evaluate mentoring techniques. This course has been approved for one undergraduate credit through St. Mary college which requires a separate registration of $75.

$99.00  
XNE 1105

**Early Childhood Mentoring II** (1.6 CR)
You will learn the foundations needed for developing mentoring relationships. This course provides practical and supportive ways to learn and grow on the job and is designed to help managers and supervisors plan, implement and evaluate mentoring techniques. This class is appropriate for any experienced early education teacher or director who is designing methods to encourage less experienced teachers. This course has been approved for one undergraduate credit through St. Mary college which requires a separate registration of $75.

$99.00  
XNE 1156

**Begin With the Brain**  
Experiences and interactions with the outside world literally shape how the brain develops. You will learn how early experiences have a decisive and long lasting impact on the growing brain. Furthermore, you will gain in sight into how you can contribute to providing children with a healthy start.

$15.00  
XNE 1160

**Summer Fun With Art**  
Young children's artwork reflects their own unique response to the world. This informative workshop will focus on the child’s process of art rather than the final product. You will have the opportunity to explore processing-oriented art materials throughout the store!  KS/MO Core Content Area II - Level 2, CDA Subject Area 2.

$19.00  
XNE 1165

**Sand & Water Play for Infants/Toddlers**  
When warm weather arrives, children want to play outside. Come to this fun-filled class to explore ways to incorporate sand and water play into your early learning environments. You will have the opportunity to explore sand and water materials throughout the store.

$15.00  
XNE 1170

**Redirecting Children's Behavior**  
Do you need to review your discipline techniques? You will learn a developmental approach to discipline that promotes positive guidance techniques that emphasize the adult's responsibility for guiding children. You will learn how to use modeling, inductive reasoning and reinforcing desired behaviors.
$19.00  
XNE 1175  
**Designing Preschool Environments That Facilitate Learning**  
Come and learn how to set up environments that support active learning, including the keys to managing learning centers, organization methods for supporting independent learning, and the principles for developing classrooms that eliminate common negative behaviors. You will learn how daily schedules and routines support independent learning.

$15.00  
XNE 1180  
**Every Child Ready to Read**  
Current research has proven the critical role of parents and caregivers in developing language and early literacy skills. Come learn appropriate and enjoyable activities to promote the varying stages of development and strategies for getting the most out of the time spent sharing books and stories.

$19.00  
XNE 1185  
**The Creative Curriculum - Blocks**  
Do you have a Block Area? Come to this informative class based upon "The Creative Curriculum" to discover first-hand the value of block play and how to support children's development and learning while they are constructing and creating. KS/Mo Core Content Area II - Level 2, CDA Subject Area 2.

$19.00  
XNE 1190  
**Holiday Art**  
In this course you will focus on the child's process of art rather than the final product. Holiday "process oriented" hands-on art projects will be presented. Come ready to dig in and have some fun! You will also have the opportunity to explore process-oriented art materials throughout the store!

$19.00  
XNE 1195  
**An Introduction to Room Arrangements**  
Since your children learn best through their interactions with objects, materials, and people, the physical environment serves as the setting for learning. This course will show you how to create a developmentally appropriate room arrangement.

$19.00  
XNE 1200  
**Building Classroom Community**  
One of the hallmarks of a quality early childhood program is that it gives children and families a sense of belonging. In this course you will learn techniques that encourage children to care for one another. You will discover ways to create a peaceful community of learners and learn activities that help each child feel like an important member of the class. KS/MO Core Content Area VI - Level 3, CDA Subject Area 3.
XNE 1205
Learning to Read and Write: DAP for 3-5 year olds
You will learn how three to five-year-old children view literacy, hear about the stages of literacy development, and discover ways to go beyond the ABC’s to promote literacy development in the preschool classroom.

$19.00

XNE 1210
1, 2, 3 - It is More Than Counting
The class will focus on how young children learn basic mathematical knowledge and problem-solving skills. Come discover what kinds of materials to include in the classroom environment, as well as what kinds of games challenge children's thinking. You will learn how to respond to children’s mistakes and turn them into opportunities for children to construct their own knowledge. KS/MO Core Content Area II - Level 2, CDA Subject Area 2.

$19.00

XNE 1215
How Young Children Think and Learn
Come explore how children's ways of thinking and learning are different from adults. You will have the opportunity to analyze the kinds of activities you do with young children and evaluate sample activities according to ways young children learn and think.

$19.00

XNE 1220
Anger Management and the Effective Use of Power
Anger is a normal emotion. Anger management techniques, including "REACH" and "RETHINK", will be discussed to help you understand anger and ways to help children deal with their feelings.

$19.00

XNE 1225
Managing Stress
Come to this class to learn how to recognize factors that contribute to stress. You will practice relaxation activities and set personal goals for well-being. You will also discover ways to help children cope with stress.

$19.00

XNE 1230
Communicating Effectively with Parents
Communication is critical to the parent-child-caregiver/teacher relationship. During this course you will learn strategies for communicating with parents to exchange information, share messages, and deal with problems.

$19.00

XNE 1235
Caring for Children of Non-Traditional Families
Children may come from families consisting of biological parents, step parents, adopted parents, or a combination. You will discuss various family structures and their effects on child care. You will also learn strategies for keeping communication consistent with all parties.
A Teacher's Most Powerful Tool
The relationship you develop with the families of the children in your care is your most powerful tool. You will have the opportunity to look at your philosophy as it relates to parent-teacher relationships. You will learn practical ways to develop good relationships and create shared power and mutual respect with families. KS/MO Core Content IV - Level 2, CDA Subject Area 4.

The Creative Curriculum - Dramatic Play
Dramatic play is central to children's healthy development and learning. You will discover ways to set up and equip the Dramatic Play area so that it becomes a stage where children can enter and immediately take on a role and pretend. You will have a hands-on experience investigating props throughout the store.

Setting the Stage...Creative Learning Centers
Children learn through active exploration of their environment. By "setting the stage" with learning centers filled with developmentally appropriate materials, you create a role in which children explore opportunities within their environment. Come learn how to make your environment inviting and engaging. You will have a hands-on opportunity to investigate props throughout the store. KS/MO Core Content Area II - Level 2, CDA Subject Area 1.

Spring Art: Process vs. Product
In this course, you will focus on the child's process of art rather than the final product. Spring time "process-oriented" hands-on art projects will be presented. Come ready to dig in and have some fun! You will also have the opportunity to explore process-oriented art materials throughout the store.

Let's Play Outdoors
Outdoors allows children to become aware of important sensory aspects - to play without rigid direction. If set-up correctly, the outdoor environment leads children to be risk-takers and confident in their abilities. Come explore ways to add richness and imagination to your outdoor play experiences. You will have a hands-on experience investigating props throughout the store.

Social and Emotional Stages in Lesson Planning
This class will focus on the tangible relationship between Piaget's cognitive learning theory and Erickson's 8 stages of emotional intelligence. How do children learn? What materials do they need to learn? Why do they do what they do at certain ages? Do not be afraid of a class on theory, this will be very hands on. Learn what materials to have in the classroom and how to create lesson plans that truly reflect the needs of children. You will also focus on age appropriate behaviors and how to help children through "challenging behaviors."
Documentation and Assessment - How to Effectively Use Them
What does documentation really mean? Why do we create lesson plans? Why do we collect samples of children's work and how do we decide what to collect? Yes, there really is a method to our "madness." This class will guide you in the four domains of learning, the milestones that occur, what you should collect and what these samples might look like. KS/MO Core Content Area III - Level 2, CDA Subject Area 3.

Communication Techniques for Adults
Communication techniques for all people can be challenging, but it is especially so when you work with someone for 8-10 hours a day. You will focus on how to talk to be heard, how to listen, how to problem solve and how to create a work environment that works for everyone. Creating a team is not easy but through reflective listening and problem solving solid teaching teams can emerge. You will have the opportunity to role play and problem solve real situations. KS/MO Core Content Area VIII - Level 1, CDA Subject Area 6.

Observation, Documentation and Child Portfolios
Do you need help developing or organizing a system to complete child observations, documentations and portfolios? Come to this class to learn different ways to accomplish all of this as well as find a way that works best for you in your classroom. You will also learn ways to communicate observations through Family/Teacher Conferences. KS/MO Core Content Area III - Level 2, CDA Subject Area 7.

Early Childhood Programs and Family Relations
Where are the parents, grandparents, aunts or uncles? In this class you will learn techniques to better incorporate families into your early learning program. Research supports the fact that if a family is involved in a child’s education, the child will be more successful. You will also learn ways to keep lines of communication open. KS/MO Core Content Area IV - Level 2, CDA Subject Area 4.

What is Professionalism in the Early Childhood Environment?
As the field of Early Learning is striving to become recognized as a profession in the general community, we as educators must look at what we are doing and how we are presenting ourselves to children, parents and families, and community members. Come to this class to create or further develop your own personal philosophy of early learning based on Child Development and Developmentally Appropriate Practices. Additionally, we will discuss the implementation of the NAEYC Code of Ethics to decision making in the classroom as well as in everyday life. KS/MO Core Content Area VIII - Level 4, CDA Subject Area 6.

Types of Attachment and Implications for the Classroom Teacher
Knowing and understanding the different types of child/guardian attachments is essential for creating a safe and secure environment. You will learn the different types of attachment and how to adapt and adjust to meet the different needs of your children. KS/MO Core Content Area VI - Level 2, CDA Subject Area 3.

$19.00
XNE 1300
Making Brain Connections with Music
Come learn how singing, dancing, laughing and learning go "hand in hand" in the early learning environment. You will learn information on brain research and the importance of music in a young child's life. Come prepared to have fun!

$19.00
XNE 1305
The Learning Power of Laughter
You will experience joyous activities to develop important skills in young children through humor, laughter and fun. Come explore creative and fun activities that will enrich any classroom experience.

$19.00
XNE 1310
Portfolio: A Picture of a Child's Development
Learn how to give parents a graphic look at their child's development. Learn how to develop portfolios that give parents a picture of their child's development over an entire year. Develop procedures for developing children's portfolios that help you manage your time. See samples of preschool portfolio entries and design ways to begin this process. Learn the skills you will need to make this process important and interesting to preschool children. KS/MO Core Content Area III - Level 3, CDA Subject Area 7.

$19.00
XNE 1315
Listen to the Children: Strategies for Dealing with Superhero Play
Learn why super-hero play fascinates and motivates children. Discover appropriate strategies for respecting and supporting children's make-believe play. Explore ways to extend this play beyond mere imitation of current super heroes.

$19.00
XNE 1320
Literacy Begins at Birth
Literacy, like all language, begins in infancy when adults speak, sing and read to their newborn babies. These early experiences build a foundation for a child's ability to read and write. This class will offer you ideas on how to enhance the early childhood classroom to promote language and literacy development. KS/MO Core Content Area II - Level 3, CDA Subject Area 3.

$19.00
XNE 1325
Emotional Intelligence and Its Impact on Learning
Providing environments that strengthen relationships of mutual trust and respect between children, teachers and families has a powerful impact on learning and problem solving. You will outline what Emotional Intelligence is, how it affects learning, and what you can do to support children's development in this area. KS/MO Core Content Area VI - Level 3, CDA Subject Area 3.
Academics or Not? Teaching that Promotes School Readiness
"They are just playing" is the age-old rhetoric that leads many preschool teachers and parents to believe that an emphasis on academics (getting kids ready for school) is essential for older preschoolers. You will learn how to incorporate "academic" learning into everyday routines and discover how to help children become successful in school.

Play with Me: Interactions that Help Children Learn
You will discover that children really do learn best through play. Come learn how to design intentional situations for children to solve problems as they explore math, science, literacy and everyday relationships in meaningful ways. KS/MO Core Content Area II - Level 3, CDA Subject Area 2.

Positive Guidance as a Teaching Strategy
Do you spend more time trying to control children's behavior than you do supporting their learning? Come learn six techniques that are proven to help children learn to control their own behavior. You will learn how to implement these techniques and use behavior problems as opportunities for learning. KS/MO Core Content Area VI - Level 3, CDA Subject Area 3.

Teachers as Decision Makers
Do you know "why" you teach as you do? Where did you learn the teaching practices that you use? You will learn the definition of developmentally appropriate practice and decide how this can enhance your teaching. You will analyze various teaching practices according to the principles of child development. KS/MO Core Content Area I - Level 2, CDA Subject Area 8.

Math, Science and Nutrition for Young Children
Teachers support children's innate sense of wonder within science, math and nutrition by introducing experiments, exploring items from nature and through cooking activities. Come learn new ways to present materials that will extend the discoveries that children make. In addition, you will have the opportunity to explore materials and ideas that help support this process. KS/MO Core Content Area II - Level 2, CDA Subject Area 2.

Working with Children With Special Needs
You will participate in a variety of scenarios that cover several disabilities. In addition, you will learn simple ways to integrate even the most challenging children into your everyday activities. KS/MO Core Content Area VIII - Level 2, CDA Subject Area 8.
XNE 1360

Fostering Language in the Early Childhood Classroom
Language is a child's ability to communicate with the world around him. You will visit what is developmentally appropriate for the preschool aged child. You will also look at strategies to foster good language skills in a variety of activities throughout your typical routine. Alternative communication systems will be introduced. KS/MO Core Content Area II - Level 3, CDA Subject Area 2.

$19.00

XNE 1365

Managing Time
This course will help you identify ways to maximize your productivity while reducing stress projected on children and staff. You will identify your “prime” time and learn productivity tips to increase the time you can spend on educational goals and relaxation.

$19.00

XNE 1370

Supporting and Engaging Families in Early Learning
When programs are designed with parents rather than to parents, the results are more successful and have a greater impact. You will identify practical strategies that can be used to create an environment that supports and engages families both in the classroom and throughout the program. KS/MO Core Content Area IV - Level 3, CDA Subject Area 4.

$19.00

XNE 1375

Is it Safe?
Child care programs are faced with serious concerns regarding the safety of children. In this course you will learn and discuss protocols to update and enhance your classroom safety. KS/MO Core Content Area V - Level 1, CDA Subject Area 1.

$19.00

XNE 1380

Creative Thinking During Childhood
Teachers are often advised to “work to children's strengths.” In this class you will explore how an understanding of children’s creativity enables you to do this. You will also examine the characteristics of schools that nurture creativity and the role of the teacher in fostering creativity. Come learn how to provide an environment that helps all children develop their creative potential to the fullest extent. KS/MO Core Content Area II - Level 4, CDA Subject Area 2.

$19.00

XNE 1382

Leadership or Management: Which Should it Be?
If you direct a program or have management responsibilities, this workshop is for you. You will learn the difference between leadership and management, discover when to use one style over another, and become familiar with the skills and competencies required for effective leadership. Learn what kind of power effective directors use. Discover ways to get your staff to do their jobs effectively. Learn the values and beliefs that shape your leadership behavior and begin a plan of action that leads your program to realize their dreams for young children.

$19.00
**XNE 1384**
**You Can Make a Difference**
Come experience a combination of child development information and philosophy mixed with a liberal dose of singing, laughing and fun. You will return to your classroom with a new appreciation of yourself and the children that you teach.
KS/MO Core Content Area II - Level 2, CDA Subject Area 3.
$19.00

**XNE 1386**
**Laughing and Singing Make Way for Good Reading**
Come to this class to learn games, rhymes, and songs that develop alphabet recognition, alliteration, story-telling, phonemic awareness and the necessary skills for learning to read. You will explore the importance of listening skills, order, sequence, memory, vocabulary and all the necessary language skills for creating readers.
KS/MO Core Content Area II - Level 3, CDA Subject 2.
$19.00

**XNE 1388**
**Normal Sexual Development in Children**
Children exhibit a host of behaviors that leave many adults stumped at how to respond. When children act out sexually or have questions about bodies, babies and more, again, adults aren't typically equipped to respond. This interactive and entertaining workshop addresses normal sexual development in children, how to talk with children and assist them in safety and esteem around their growing bodies. Both sessions must be attended to receive credit.
KS/MO Core Content Area I - Level 2 & 3, CDA Subject Area 8.
$38.00

**XNE 1390**
**Shared Power? You Must Be Kidding!**
If you direct a program or have management responsibilities, this workshop is for you. Learn how to analyze different kinds of decisions that are made in child care programs and discover ways that you can move toward a more participative process for solving problems and achieving program goals. Learn how to create a climate where individuals can openly discuss highly charged topics, how issues are decided, and how work in your program is carried out. Discover your leadership style and learn how to use it to benefit your entire program.
$19.00

**XNE 1392**
**Winter Holidays/Family Traditions**
When you think of your favorite winter holiday, what comes to mind? Thoughtfully planned, holiday activities, if used sparingly, can contribute to anti-bias curriculum and broaden children's awareness of their own and other culture's experiences. Participating in celebrations and rituals enhances children's feelings of being part of a close-knit group. Through music, art, literature, and cooking activities, we will explore ways to bring a part of the children's lives at home into the child care setting and introduce children to their classmates' family holiday traditions.
$19.00

**XNE 1394**
**The Influence of Culture on Caregiving**
As the early care and education field becomes increasingly diverse, the ability to collaborate effectively with parents and children from different backgrounds is increasingly critical to providing quality service to families and care to infants and toddlers. Participants who attend this training will have the opportunity to explore
how one's own culture influences routines, caregiving style, and parenting choices.

$19.00
XNE 1396
Understanding Temperament and Attachment
Understanding Temperament and Attachment in a child is a key to understanding the whole child. A child’s temperament influences not only their style of interactions, but the very way they understand and experience the world and the people in it. Come to this class to learn the importance of temperament and attachment with children birth to three.

$19.00
XNE 1398
Making Families Feel at Home
Relationships with parents are primary indicators of a quality early childhood program. You will explore how to design environments that make parents feel welcome and comfortable, and learn strategies for creating and maintaining reciprocal relationships with parents. You will discuss the reasons and goals for parent involvement activities and plan strategies for how to include these in your program.

$19.00
XNE 1400
Writing Your World: Literacy in the Early Childhood Setting
In this course you will review what NAEYC has to say about developmentally appropriate practices in the area of literacy. You will use an observation tool to look at what characteristics indicate a strong literacy based environment. Emphasis will be on developing hands-on, practical applications that can be used in your setting.

$19.00
XNE 1402
Building Blocks to Children's Development
Children's development can be difficult to describe, yet accessing development must be a part of everything you do. You will learn how to assess your daily activities and examine several methods for documenting observed learning. The goal is to embed assessment into everything you do.

$19.00
XNE 1404
Creative Drama
This class will focus on dramatic play and story drama. You will learn strategies for enhancing role play by exploring various props, puppets and themes to use. In small groups you will brainstorm how to adapt a story to dramatize. Come prepared for a fun learning experience.

$19.00
XNE 1406
Helping Preschool Children Develop Friendships
Is it possible for preschoolers to treat others with respect and kindness? Come learn strategies for helping your class become a caring, respectful community. You will also learn methods for encouraging children to be friends.
XNE 1408

**Music: The Universal Language**
In this class you will look at why music is important. You will learn how to create an environment that fosters music and movement in children. You will have a hands-on experience with music, as you engage in listening, singing, playing, moving and creating.

$19.00

XNE 1410

**Is It a Playground or an Outdoor Classroom?**
Do you have a playground or an outdoor classroom? You will examine the qualities of a well-planned outdoor learning environment that allows children to explore and create. Nature provides a convenient supply of materials and subject matter for children. We will discuss the teacher’s role, how to plan outdoor learning centers, storage and organization, activity files, gardening, safety and discipline.  KS/MO Core Content Area II - Level 3, CDA Subject Area 3.

$19.00

XNE 1412

**Building Family Relationships**
You will learn how to effectively communicate with parents and develop strategies to establish and maintain partnerships with families. Come discover what family empowerment means. KS/MO Core Content Area IV - Level 1, CDA Subject Area 4.

$19.00

XNE 1414

**Language and Literacy in the Preschool Years**
Language and literacy is everywhere in a classroom environment. You will explore the diversity in language and literacy within the preschool years. You will explore ideas for implementing and supporting your language and literacy goals.  KS/MO Core Content Area II - Level 3, CDA Subject Area 2.

$19.00

XNE 1416

**Loving and Learning Language**
You will have the opportunity to discuss appropriate language milestones of children birth to 5 years of age. You will also develop practical activities for children to encourage and enhance language development in the classroom and home.  KS/MO Core Content Area I - Level 2, CDA Subject Area 8.

$19.00

XNE 1418

**Curriculum from Children's Interests: Is it Possible?**
You will learn how to analyze curriculum to find those that support how children learn as well as how to develop curriculum that supports children’s & teachers’ interests. In addition, you will learn how to begin a new way of teaching that will require less structured teacher preparation.  KS/MO Core Content Area II - Level 4, CDA Subject Area 1.

$19.00

XNE 1420

**Taming the Transition Monster**
Do you ever feel like your experiences with children would be more fun were it not
for the horrible thing we call transitions? You will learn how to respond to
children's behavior during difficult times, evaluate daily routines that add to
transition nightmares, analyze transition scenarios and plan effective strategies,
and learn strategies that will lessen transition struggles. KS/MO Core Content
Area VI - Level 2, CDA Subject Area 3.

$19.00
XNE 1422
What's Your Next Move?
Have you ever had a problem with a parent or co-worker that was difficult to
solve? In this workshop you will learn the principles for solving difficult problems;
practice applying these principles to everyday problems you encounter in your
child care setting, and learn how to use NAEYC'S code of ethics to solve
classroom problems and other situations where a center's policies may conflict
with parent expectations and concern. KS/MO Core Content Area VIII - Level 4,
CDA Subject Area 6.

$19.00
XNE 1424
Structure Your World for Success
Taking the time to greet each child individually everyday can have a dramatic
impact on the success of your environment! Arranging your space so there is a
place for "alone" time can also make a difference. Normal development and
developmentally appropriate practice will be considered as we explore the social
world of the early childhood setting. KS/MO Core Content Area II - Level 2, CDA
Subject Area 3.

$19.00
XNE 1426
Meet All Children's Intelligences
The theory of multiple intelligences suggests that intelligence extends beyond the
traditional notion of I.Q. to eight areas: linguistic, logical/mathematical, spatial,
body/kinesthetic, musical, interpersonal, intrapersonal, naturalist. You will explore
how to understand and identify all eight intelligences in yourself and the children
in your classroom. Furthermore, you will learn how to ensure that all children's
intelligences are met through the activities and materials you provide. KS/MO
Core Content Area II - Level 3, CDA Subject Area 2.

$19.00
XNE 1428
Planning Your Infant/Toddler Care Setting
How an environment is organized has a powerful influence over the way children
and adults behave and interact. The environment's ability to meet the growing
child's physical, emotional, social, and cognitive needs is critical. You will focus on
how the use of clearly-defined activity areas is important to children's cognitive
development and growing ability to make appropriate choices. You will also have
the opportunity to design an infant/toddler care environment. KS/MO Core
Content Area II - Level 2, CDA Subject Area 2.

$19.00
XNE 1430
It's Not Just Routine, Part 1
Caregiving routines provide opportunities to build a close personal relationship
with each child while attending to the child's individual physical, emotional, and
developmental needs. You will address the importance of routines in creating
intimate bonds between child and caregiver and in providing opportunities for
physical, language, and cognitive development. KS/MO Core Content Area VI -
Level 2, CDA Subject Area 3.
Give Kids Control Without Losing Control
You will discuss the idea that the more involved children are in program planning, implementation and evaluation, the more effective the program will be. We will focus primarily on school-agers and older preschoolers, but there are ways for all programs to work more effectively with all age groups in giving kids more control while still maintaining the appropriate degree of control for adults. KS/Mo Core Content Area IV - Level 3, CDA Subject Area 3.

Respectfully Yours: Goals, Observation and Self-Motivated Learning
Infants are naturally motivated to do what they need to do in order to learn and grow and need caregivers who allow them time to respond and who will respond to their messages appropriately. You will consider the characteristics of quality infant/toddler care, particularly in light of children's developmental changes, and then view "Respectfully Yours: Magda Gerber's Approach to Professional Infant/Toddler Care." The video will serve as a springboard for discussion. KS/MO Core Content Area II - Level 3, CDA Subject Area 1.

Planning Curriculum That Reflects Children's Lives
You will learn how to make play the curriculum in your classroom. You will analyze your classroom environment and design ways to make it more conducive to children's interests and learning, learn the differences between traditional curriculum planning and planning that keeps children at the center, evaluate your schedule and plan ways to make it more conducive to a child-centered classroom, and discover how to plan more effectively and efficiently with less time spent on teacher-prepared materials. KS/MO Core Content Area II, Level 4, CDA Area 1.

Talking With Kids
A child care environment which uses effective communication practices with children benefits by getting children to open up, share ideas, and work out problems. You will learn how to monitor your own body language and other personal factors that can enhance children's desire to communicate. You will focus on how to effectively use open-ended questions when communicating with children. KS/MO Core Content Area II - Level 2, CDA Subject Area 3.

Language and Literacy in the Toddler Years
The development of language is essential within the toddler classroom. You will explore the diversity of language and literacy within these years. You will review language development, looking specifically at speaking abilities of young children, emergent literacy, and expression through drawing and writing. In addition, you will discuss ideas for implementing and supporting these topics within the classroom. KS/MO Core Content Area II - Level 3, CDA Subject Area 2.

Creative Art: The Foundation for Learning
In this workshop, you will analyze the stages of developmental art. You will
discover ways to introduce art materials that help children learn problem solving skills that are the foundation for developing cognitive skills. You will learn how to spend less time planning art activities and more time helping children learn and develop. KS/MO Core Content Area II - Level 3, CDA Subject Area 2.

$19.00
XNE 1444
Responding to Families in Culturally Sensitive Ways
You will explore your beliefs about culture, brainstorm values from a family's and a teacher's perspective, and gain an understanding of how culture is ingrained in everyday interactions. In addition, you will talk about situations where problems occur because of cultural issues, investigate ways to address problems, explore communication strategies that build respect and trust, and solve conflicts so everyone's needs are addressed. KS/MO Core Content Area IV - Level 4, CDA Subject Area 4.

This course, available in JCCC’s open lab, describes dysfunctional behaviors frequently seen in clients with borderline personality disorder and presents interventions, behaviors, and discharge planning. RNs, LPNs, LMHTs and social workers will earn 1 contact hour for completing this course. ACHAs will earn 1 (RC) hour.

$12.00  
XNC 1055  
Clinical Delegation and Nursing Roles  
This course, available in JCCC’s open lab, focuses on safely and effectively giving and taking delegation, and determining the supervision needed for delegated tasks. RNs, LPNs and LMHTs will earn 3 contact hours for completing this course. ACHAs will earn 3 (A) hours.

$36.00  
XNC 1056  
Infection Control  
This course, available in JCCC’s open lab, discusses the chain of infection, mechanisms of transmission and signs and symptoms of various types of infection, as well as the differences between Universal and Standard precautions. RNs and LPNs will earn 3 contact hours for completing this course. ACHAs will earn 3 (A) hours.

$36.00  
XNC 1057  
Pain Management  
This course, available in JCCC labs, provides a comprehensive survey of the research, neurophysiology, assessment and management of pain as it relates to children, older adults and patients at the end of life. RNs, LPNs and LMHTs will earn 7 contact hours for completing this course. ACHAs will earn 7 (RC) hours.
Ethical Care: Exploring Common Issues
Presented as a computer based module available in JCCC’s open lab, this course discusses important issues related to providing ethical care, including advance directives, confidentiality, ethical decision making and a patient’s rights. RNs, LPNs and LMHTs will earn 3 contact hours for completing this course.

Breastfeeding: A Model for Patient Education
This course, available in JCCC’s open lab, describes the benefits of breastfeeding and information related to establishing and maintaining the breast milk supply. RNs and LPNs will earn 3.5 contact hours for completing this course.

Avoiding Medication Errors: Geriatric
This program, available in JCCC’s open lab, discusses common causes of polypharmacy in the elderly and identifies nursing precautions for the elderly. RNs, LPNs and LMHTs will earn 1.5 contact hours for completing this course. ACHAs will earn 1.5 (RC) hours.

Information Management: Internet Basics
This course, available in JCCC labs, explains how the Internet works and how it can benefit healthcare professionals, including information about e-mail, ListServes, netiquette and searching the World Wide Web. RNs, LPNs and LMHTs will earn 1.5 contact hours for completing this course. ACHAs will earn 1.5 (E) hours.

Building Consensus
This course centers on the dynamics of groups coming to agreement and the importance of having everyone’s commitment. Participants learn seven techniques for making clear, high quality decisions that ensure the buy-in and commitment of staff. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours for attending this course. ACHAs will earn 3 (A) hours.

Phlebotomy Technician Course
This 90 hour on site course prepares professionals to collect blood specimens from clients for the purpose of laboratory analysis. Students will become familiar with all aspects related to blood collection and develop comprehensive skills to perform venipunctures completely and safely. Classroom and lab work includes terminology, anatomy and physiology; blood collection procedures; specimen hands-on practice; and training in skills and techniques to perform puncture methods. Proof of Hepatitis vaccination is required prior to the start of class. Note: There is no outside externship rotation included with this program. Payment plan is available for this course.
XNC 1805

EKG Technician Certification Program
This comprehensive 50 hour on site course prepares the student to function as EKG Technician Electrocardiograph (EKG) Technician exam and other National Certification Exams. This course will include practice and background information on anatomy and physiology of the heart, medical disease processes, medical terminology, medical ethics, legal aspects of patient contact, laboratory assisting, electrocardiography and echocardiography. Additionally, students will practice with equipment and perform hands on labs including introduction to the function and proper use of the EKG machine, the normal anatomy of the chest wall for proper lead placement, 12-lead placement and other clinical practices. Payment plan is available for the course.

Marriage: Theory and Therapy (An In-depth Seminar for Clinicians)
What contributes to a well-functioning marriage? How professionals answer this question influences their clinical work with a marital problem. Most theories about marriage focus on the individuals or the couple. Bowen family systems theory broadens the lens by seeing marriage embedded in the interlocking triangles of the family emotional unit. This seminar presents how marital functioning is influenced by anxiety, differentiation of self, emotional cutoff, and nuclear and...
multigenerational processes. The seminar explores the clinician’s challenge to translate theory into therapy. Common marital issues addressed include distance, conflict, polarization, affairs, focusing on the other, and reciprocal functioning. Social workers, psychologists, counselors and mental health clinical nurse specialists will earn 7 contact hours for completing this course.

**Communicating with Sensitivity in Health Care**
In the midst of the hectic pace of a health professional's day, patients or clients frequently feel rushed and even misunderstood. How can we be more empathic, "share the moment" with patients who hurt, are alone and losing hope? What roadblocks hinder our efforts to truly listen and understand. Ten sensitive communication techniques and strategies calm and reassure clients in the midst of crisis and uncertainty. In this workshop, you will explore methods of reducing misunderstanding, improving concentration and demonstrating credibility while sharing the emotional moment of your patient or client. RNs, LPNs, LMHTs, social workers, counselors and clergy will earn 6 contact hours for attending this workshop. Approval is pending for other health disciplines.

Family Issues in the New Millennium
In recent years, health care professionals have become increasingly aware of the importance of families to individual and societal well being. This seminar is designed to assist mental health and other health care professionals in understanding significant issues affecting today’s families. Four separate, yet interrelated, topics will be explored—couple survival, dilemmas of the blended family, facing America’s anti-child sentiment as a family unit and maintaining relationships when applying discipline. Meaningful interventions for each of these problematic family components will be provided. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health care professionals.

Business Skills Every Nurse Should Know
In the ever-changing health care marketplace, nurses have more opportunities than ever to lead the pack in health care matters. You must arm yourself with knowledge about communications, negotiations, marketing, networking, managed care terminology, outcomes reporting, finance, computer systems, and resume and publication writing. Influencing health care requires understanding why and how systems are formed, what financially drives those systems and what you as an individual can do to assure your own career path success. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop.

Successful Aging: Making the Most of the Journey
"Baby boomers," the 76 million babies born between 1946 and 1964, have become the dominant social, market and political force in our society. Who are they? What are they like? This workshop will provide you with a demographic profile of the "boomers," their relationship to other populations, their impact as babies, children, teens, young and middle-age adults and their future impact on health care providers. You will learn how to work effectively with this population in preparation for the aging boom of tomorrow. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTS.

$36.00

XNC 2251
Asthma: Update 2001
An estimated 17 million Americans, five million under age 18, have asthma. One adult out of three suffers from gastroesophageal reflux disease (GERD), a common trigger for asthma. Asthma, GERD and related conditions are becoming more prevalent across all age, sex and racial groups and the magnitude of these conditions alone complies nurses and other health professionals to be knowledgeable about recent innovations in successful management. This program will help update your knowledge and familiarize you with strategies to effectively assist the asthma patient to maintain better control of his/her disease. The morning session of this workshop will utilize a didactic format to present an overview of these conditions focusing on presentation, triggers, management strategies and pharmacotherapy. The afternoon session will utilize problem based learning to develop an action plan for both an adult and pediatric patient, giving you an opportunity to put theory into action. RNs and LPNs will earn 6 contact hours for attending this workshop.

Introduction to Chinese Medicine and Acupuncture
Traditional Chinese medicine, much of which is based in Taoism, teaches that when your body, mind and spirit are in harmony with one another, you will achieve internal balance. When any of these factors is stressed, internal Qi imbalances arise and disease and dysfunction result. In this workshop, you will explore the basic tenets of Chinese medicine, including "Yin and Yang" and "Qi," as well as discuss how Meridian Therapy (acupuncture) and other therapies assist in maintaining health and treating illness. RNs, LPNs, LMHTs, dentists and dental hygienists will earn 6 contact hours for attending this workshop. Approval is pending for other health disciplines.

Stress Management for the Superachiever
Extraordinarily high standards combined with the need to balance multiple roles are the hallmarks of the superachieving personality. Driven to succeed, superachievers push themselves to perform with perfection and often ignore signs and symptoms of distress. This scenario places them at risk for mental and physical exhaustion. As the healthcare environment grows increasingly demanding, superachievers are vulnerable to developing serious complications from the stress in their lives. If you are experiencing stress-related symptoms, suspect you might be a superachiever or have been told you hold very high standards, join us to learn stress management skills for the superachiever. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (A) hours for attending. Approval is pending for other health care professionals.

$27.00
XNC 2292

Understanding the Effects of Sibling Relationships
Are you the oldest, youngest, middle, only child? Or maybe a twin? Understanding the effects of your sibling relationships and position is useful in knowing yourself better and navigating relationships at home and work. In this class, you will explore common characteristics of various sibling positions and examine how sibling relationships affect your personality, adaptability to stress and relationship style. You will also take a look at how sibling relationships are affected by family maturity and anxiety. RNs, LPNs and LMHTs will earn 3 contact hours for
attending this workshop. Approval is pending for other health professionals.

$27.00
XNC 2293

Antibiotics: What’s New?
Need an update on the newer antibiotics being used? This workshop will examine new antibiotics for bacterial infections as well as review newer drugs for viral and fungal infections. A systems approach will be used and discussion will focus on mechanisms of action, principles of therapy and nursing implications. Nurses practicing in both inpatient and outpatient settings will find the information beneficial. The course will not cover treatment of HIV/AIDS. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00
XNC 2294

Breastfeeding: Clinical Management for the Early Days
This course will offer basic and advanced level information about lactation physiology, interventions that work in promoting and facilitating successful breastfeeding, and problem diagnosis and management. Strategies for use with fullterm and preterm babies and their mothers will be presented. RNs and LPNs will earn 9 contact hours for attending this workshop. Approval is pending for other health professionals.

$89.00
XNC 2295

Awakening the Spirit Within: Daring to Be Yourself
Think about creating the kind of life that reflects who you really are—your talents, your values, your serenity, your joy? There are so many ways in which you can express your true self every day of your life. And, there are so many ways to keep that from happening! In this experiential workshop, you will explore who you really are—your dreams, fears, passions, blocks, spirituality, creativity, laughter, gratitude—your SPIRIT. You will discover ways in which you are already expressing your authentic self as well as tools for deepening your understanding of what makes you YOU. RNs, LPNs, LMHTs, social workers, counselors, dentist and dental hygienists will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (A) hours. Approval is pending for other health professionals.

$54.00
XNC 2296

Right Choice: Values and Ethics for Changing Times
Social critics say that Americans are losing "moral fiber". The nightly news is filled with stories of people’s inhumanity to others. Are values and ethics following the path of extinction? Are the values and ethics of health professionals immune to such a fate? Re-engineering, financial constraints and the continuous call to “do more with less” challenge each of us to examine the ethical foundation of our practice. This course will explore ethical issues related to professional conduct rather than biomedical ethics. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval pending for other health professionals.

$54.00
XNC 2297

Power of Light: From Harming Light to Healing Light
Traditionally, sunlight has been associated with health and well being. Now, however, we are being warned of damaging light rays from the sun and other environmental sources. We hear that sunlight increases risk of skin cancer and
that certain foods, medicines and topical applications can react with light to cause unpleasant or damaging results. Conversely, laser light, infrared light and ultraviolet light are sometimes employed to improve and heal our bodies. In this workshop, you will explore the spectrum of light and its qualities and learn more about its possibilities and dangers. RNs and LPNs will earn 3 contact hours for attending this workshop.

$27.00
XNC 2298
Exploring Issues of Diversity in Patient Care
As a health care provider, you are mandated to increase your understanding and sensitivity to the varied people you meet and care for as part of your job. In this workshop, you will explore the dimensions of diversity, learn how your own background influences your personal paradigms and how these paradigms influence your professional practice. You will explore the concept of "privilege" and its effects on those that receive it and those that do not. You will examine organizational culture and its impact on professional practice and gain practical information that will allow you to more effectively meet the diversity needs of your patients. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00
XNC 2300
Promoting Oral Health for the Elderly: A Course for Dental Professionals
Our elderly population is rapidly growing and dental professionals must respond to the evolving oral care needs of this group. This program will assist you with identifying access to care challenges for today's elderly population and learn how to become actively involved with identifying solutions. You will examine the current structure of the oral health delivery system and discuss ways to develop promotional and educational oral care programs through partnering with community organizations. Dentists and dental hygienists will earn 3 contact hours for attending this program. (Dentist Fee $59) (Dental Hygienist Fee $29)

$59.00
XNC 2301
Assessment and Care of the Patient With a Failing Heart
Heart failure is the most common reason for hospital admission in Medicare patients. Equip yourself to perform a thorough nursing assessment of your next heart failure patient. Gain a current understanding of heart failure and the modern array of therapy for management of this complex problem. RNs and LPNs will earn 4 contact hours for attending this workshop. ACHAs will earn 4 (RC) hours.

$48.00
XNC 2302
Obstetrical Emergencies
Fortunately, obstetrical emergencies are rare, but when they occur, the results may be devastating, possibly compromising or ending two lives. In this workshop, you will explore selected obstetrical emergencies which may occur in the antepartum, intrapartum and/or postpartum period, including hemorrhagic complications, hypertensive disorders, shoulder dystocia and others. You will discuss pathophysiology as well as focus on early detection and nursing intervention to maximize outcomes. RNs and LPNs will earn 6 contact hours for attending this workshop.

$54.00
XNC 2303
Understanding Substance Abuse
Alcoholism and drug abuse present major problems and crisis situations for
individuals and families. Understanding "drugs of choice" and learning how to most effectively deal with the effects of substance abuse can be complicated. This presentation will include an overview of alcohol, cocaine, and marijuana abuse and treatment models. The special populations of women, children and adolescents who abuse these substances will also be explored. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00  
XNC 2304

Developing Healthy Boundaries
Boundaries are essential for personal and professional growth and development. In this workshop, you will examine emotional, physical and spiritual beliefs to better understand the basic dynamics of boundaries. You will also explore how issues developed from infancy can impact all areas of adult life. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00  
XNC 2305

Introduction to Complementary and Alternative Therapies
in Health Care Health care professionals are increasingly being challenged to answer questions about alternative therapies, help patients with referrals to alternative practitioners and learn more about the science behind such therapies. This course will provide an overview of a variety of alternative therapies currently being used by patients. The concept of evidence-based medicine will be discussed, especially as it applies to creating a level playing field for conventional and alternative therapies. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00  
XNC 2306

Stroke: Assessment and Management Strategies for the New Millennium
Stroke is the third leading killer and the number one cause of adult disability in this country. In spite of recent innovations in understanding and managing stroke, clinicians continue to struggle to define, measure and assess the physical, psychosocial and societal impact of stroke and the effectiveness of therapeutic interventions. This seminar will provide an update on primary and secondary prevention, diagnosis and medical management of hemorrhagic and ischemic stroke. Neurologic, functional and psychosocial assessment tools will be defined and discussed. Special emphasis will be paid to the assessment and treatment of visual and perceptual deficits. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00  
XNC 2307

Introduction to ICD-9-CM Coding
A basic understanding of coding has become an important part of effective health care delivery. If you need an introduction to coding and want to focus on basic how to’s, plan to attend this practical course. The course will begin with an overview of the coding system and its conventions and will include in-class exercises from real-life situations to help you correctly apply the concepts learned. While the basic concepts are applicable to a variety of health care settings, the content is hospital focused. A working knowledge of medical terminology is recommended. You will need to bring an ICD-9-CM coding book to each class. You may use any recent edition you have available or purchase the latest edition in the JCCC bookstore. Certificates of attendance will be awarded upon completion of the course.

$79.00
**XNC 2308**

**Sharpening Your Skills in Dealing with Ethical Issues**

Ethical issues confronting health care providers in our society have become more complex and challenging. Consumers are generally well-informed and demand more and better health care services, yet contradictory value systems are prevalent throughout both health care and society. In this seminar, you will explore critical content to assist you to strengthen decision-making and problem-solving skills in dealing with ethical issues in both your professional career and your personal life. Dental professionals, RNs, LPNs, and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00

**XNC 2309**

**Women and Heart Disease: Decreasing Risk and Promoting Health**

This three-hour workshop will focus on heart disease and its occurrence in women. You will review the general risk factors for the development of atherosclerotic disease and give special attention to those risk factors unique to the female population. You will explore ideas to modify those risk factors as well as discover ways to promote a healthy lifestyle. Special emphasis will be given to cholesterol management in women. Exercise and activities for older women will be discussed also. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00

**XNC 2310**

**Assuring a Safe Workplace: Annual OSHA Update Course**

This course provides participants with an overview and update of the mandatory OSHA Bloodborne Pathogen Standard, Hazard Communication Standard and the General Industry Standard. Although the standards are reviewed, participants attending this course should have knowledge and previous training in the OSHA standards. The course is presented as a review and current update and will satisfy the required annual training for the Bloodborne Pathogen Standard. Future standards being considered by OSHA will be discussed as well. RNs, LPNs, dentists and dental hygienists will earn 3 contact hours for attending this program. Kansas ACHAs will earn 3 (A) hours. Approval is pending for other health care professionals.

$27.00

**XNC 2311**

**An Update on AIDS**

Through the rapid evolution of treatment options and our scientific understanding of the HIV disease, today’s clinician faces the challenge of staying abreast of the state-of-the-art treatment modalities and newest research discoveries. A patient’s clinical well-being depends heavily on the clinician’s knowledge base and awareness of the most modern tools available. This course will provide an in-depth look at the natural history, epidemiology and pathogenesis of HIV infection. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00

**XNC 2312**

**Behavioral Disorders in Children: Dynamics, Issues and Interventions**

Explore etiological, diagnostic and clinical approaches for behavioral disorders commonly observed during childhood and adolescence, including conduct disorder, oppositional defiant disorder and ADHD. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours for attending this workshop.
Making Sense of What We Do: An Introduction to Bowen Family Systems Theory

Understanding human behavior has always been challenging. Bowen family systems theory provides a natural systems perspective with which to make sense out of what we do. It offers a road map that enables us to understand more about ourselves and about the people we treat—particularly, how relationships influence behavior and the development of symptoms. It also provides a way of thinking about how family relationships and the influence they exert throughout our lives. In this seminar, you will learn the basic concepts of Bowen family systems theory. You will examine numerous relationship systems, including marital relationships, parent-child relationships and work relationships. Emphasis will be placed on applying theoretical understandings to everyday personal, clinical and work situations. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours for this workshop.

Demystifying Medical Terminology

This introductory course, which serves as the prerequisite for the Medical Coding Certification Course, is of special interest to billing and insurance personnel, as well as consumers. The course covers use of basic medical terms in oral and written communication plus use of word-analysis and word-building skills to expand a basic vocabulary. No CE credit is offered.

Innovations in Diabetes Management

Innovative advances are evident in every dimension of diabetic care—new oral medications, new insulin, nutrition guidelines and choices, new glucose monitors, computer related technology and new administration devices and aides. Preventing the onset of diabetes, especially among our nation’s youth, is a high priority of care and education. This exciting workshop will provide you with the latest information about recent advances, including the concept of self care/self management as the basis for diabetes treatment and education. RNs and LPNs will earn 7 contact hours for attending this workshop. Approval is pending for other professional groups.

Healthy Boundaries: Increasing Personal and Professional

Effectiveness While we realize that boundaries are essential for personal/professional growth, it is not always clear how we develop them or how they impact our lives on a daily basis. Learn the basic dynamics of boundaries and explore how boundary issues are developed from infancy and how they can affect adult life. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6(A) hours. Approval is pending for other healthcare professionals.

Tips, Tactics and Techniques for Communicating in the Dental World

Our dental patients do not want dentistry! That’s right! They want the benefits of dentistry—improved appearance, greater comfort, better function and a generally improved feeling and quality of life. So, how can we steer our patients to want what they "need"? Join us for this high energy, fun-filled and informative evening designed to take the monotony and boredom out of your patient education and treatment presentations. Learn ways to vitalize your
communication skills and trigger that motivational spark in each of your patients. Be ready to enjoy the process and relish the result in this relaxed evening of enlightenment. Dentists and dental hygienists will earn 3 contact hours for attending this workshop. Fee for dentist is $59. Fee for dental hygienists is $29.

$69.00

XNC 2318

Alzheimer’s and Other Dementias: Strategies for Assisting
Patients and Caregivers Alzheimer’s Disease is the fourth leading cause of death in the United States. Like many other chronic conditions, it has no known cause or cure. Caregivers, including health care providers, who assist individuals with Alzheimer’s or other dementias, often face unique and seemingly impossible obstacles as they struggle to provide care. How do you prevent a confused person from driving a car or bathe a resistant resident? How do you communicate with a person who can not process information in a rational way? This workshop will explore problems confronting caregivers and offer practical approaches to assist them in dealing with demented individuals. RNs, LPNs, social workers, counselors and clergy will earn 3 contact hours for attending this workshop. Approval is pending for other health disciplines.

$27.00

XNC 2319

Aging and Individual Differences: We are More
Alike at 10 than at 70 Why are we more alike at 10 than at 70? Why are some people in a nursing home at 78 and others able to orbit the earth—or lead a country? This course will present an overview of physical and psychological aspects of the aging process and how individual differences often become more pronounced as we age. Knowledge about aging not only helps us to serve our clients and patients better, but it is also importaft for our own personal benefit. RNs, LPNs, LMHTs, social workers, counselors, dentists, and dental hygienists will earn 3 contact hours for attending this workshop. Approval is pending for other health disciplines.

$27.00

XNC 2320

Healing Power of the Pen: Journaling as a Therapeutic Tool
Today’s world is hectic. As people face the challenges of personal and professional transitions, the technique of journaling can be a helpful tool for change. Journaling can help ease the stress that often accompanies transformation and growth and it can help break through the emotional blocks that stand in the way of success. In this innovative workshop, you will learn techniques for personal use as well as explore specific case examples of exercises that can be used when working with patients/clients--those coping with serious illness, disability and mental health issues, including alcoholics, adult children of alcoholics and others in the addictions recovery process. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00

XNC 2321

Marriage or Divorce? (An In-depth Seminar for Clinicians)
Sitting on the fence between marriage and divorce is one of life’s weighty dilemmas for people in psychotherapy. Clients who are motivated to take a thoughtful approach with this difficulty can benefit from learning more about their emotional patterns in relationships and from taking another step in defining what principles matter most. How the clinician conceptualizes this issue significantly affects how this question is addressed in therapy. This seminar presents Bowen family systems theory as a framework for understanding how a marriage gets to this point and how to move forward. The seminar also focuses on the clinical work with the individual or couple. Case examples are presented to illustrate the
therapy process. RNs, LPNs, LMHTs, psychologists, social workers, counselors and clergy will earn 6 contact hours for attending this workshop.

$79.00
XNC 2322

Depression and Suicide in Children and Adolescents
Learn to recognize depressive symptomatology in children and adolescents and understand its relationship to the development of a depressive disorder. Learn about suicide risk and other self destructive behaviors associated with depression as well as treatment and therapeutic interventions. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours for attending this workshop.

$27.00
XNC 2323

Awakening the Spirit Within: Daring to Be Yourself
Think about creating the kind of life that reflects who you really are—your talents, your values, your serenity, your joy? There are so many ways in which you can express your true self every day of your life. And, there are so many things to keep that from happening! In this experiential workshop, you will explore who you really are—your dreams, fears, passions, blocks, spirituality, creativity, laughter, gratitude—your SPIRIT. You will discover ways in which you are already expressing your authentic self as well as tools for deepening your understanding of what makes you YOU. If you’re ready to take the next step in awakening your spirit within, join us for this day of self-discovery. RNs, LPNs, LMHTs, social workers, counselors, dentists and dental hygienists will earn 6 contact hours for attending this workshop.

$54.00
XNC 2324

Exploring the Child Within: Taking a Look at Codependency
Do you regularly put the needs and wants of others before your own? Do you deal with your feelings in ways that make you feel worse instead of better? In this workshop, you will explore the ways in which unhealed childhood wounds can interfere with your ability to create a loving and joyful life. You will learn practical tools for developing a caring relationship with your inner child—the part of you that feels—so that you can begin to include yourself in your “circle of care.” RNs, LPNs, LMHTs, social workers, counselors, dentists and dental hygienists will earn 3 contact hours for attending this workshop. Includes a box dinner.

$27.00
XNC 2325

Negativity: Increasing Skills for Diagnosis Intervention and Prognosis
We all know people whose general demeanor communicates—perhaps screams—negativity. Besides being unpleasant to deal with, negativity can significantly impact other individuals, groups and organizations. In this workshop, you will identify root causes of negativity and discuss ways to prevent, reduce or turn around negative attitudes or behaviors. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (A) hours. Approval is pending for other health professionals.

$54.00
XNC 2326

Three Score Years and Ten: Families and Eldercare
This seminar for helping professionals will focus on understanding the aging process within the context of family life. You will explore issues related to the life cycle, healthy aging, advance directives within the family context, family dilemmas associated with aging and the role of the professional care giver in working with the elderly and their families. This program will be helpful and interesting if you
work with the elderly, have elderly family members or are thinking ahead about your own or a loved one’s aging issues. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

$54.00  
XNC 2327  
**Art of Positive Conflict: Creative Approaches to**  
Conflict Management Do you hesitate to voice disagreement because you fear an unpleasant scene or a damaged relationship? Too often, disagreements are ignored because conflict is viewed as a destructive process. Learning to use conflict as a constructive tool for problem solving gives you the confidence to approach disagreements expecting positive outcomes. Achieving outcomes that enhance relationships and produce positive solutions is the essence of creative conflict. Join us as we explore this essential interpersonal skill. RNs, LPNs, LMHTs, social workers, counselors, dentists and dental hygienists will earn 6 contact hours for attending this workshop. Approval is pending for other health disciplines.

$54.00  
XNC 2328  
**Competency: Individual and Organizational Accountability**  
Increasing attention is being directed toward assuring competency of practicing health care professionals. This workshop will provide you with an overview of the legal, regulatory, accreditation and professional standards that draw attention to issues of competency. You will explore strategies for assessing competency as well as implications for practice, including accepting or declining assignments, delegation and floating. You will look at this important issue from both the individual and organizational perspective and discuss the responsibility and accountability of each for assuring appropriate practice competencies. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop.

$27.00  
XNC 2329  
**Connecting for Kids: Discovering Diversity’s Colorful**  
Palette Health care professionals have an opportunity to view their patients’ diversity as a colorful palette, with each patient adding a special hue or intensity to the experience, interaction or relationship. But while a colorful palette adds interest, it can also add confusion as we try to appreciate and understand individual and cultural differences. This program will help identify our prejudices and how they impact the way we perceive others as well as explore techniques for communicating with people from cultures other than our own. Presenters will demonstrate ways to hold a discussion without alienating others and discuss case studies from several different cultural backgrounds. Alice Kitchen, Children’s Mercy Hospital, will supplement the program with a hands-on approach to available resources, i.e. medical record translation and using the Internet as a research tool. RNs, LPNs, LMHTs, social workers, counselors, dentists and dental hygienists will earn 3.5 contact hours for attending this workshop.

$35.00  
XNC 2330  
**Parkinson’s Disease: New Miracles**  
Learn about the new "miracle" surgery for Parkinson's Disease as well as some of the problems patients have encountered after the procedure. Newer medications and the latest findings regarding swallowing, balance, exercise and ADL’s will be included also. RNs and LPNs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.
Managed Care: Mastering the Basics
The dynamics of the health care delivery system have changed dramatically over the past several years. The single most important factor impacting the change in health care delivery is consumer demand for quality care at an affordable price. As a result, we have witnessed the emergence of managed care. This workshop will provide you with a basic understanding of managed care, the concept of medical management, and the expanding roles for nurses in this growing area of health care. This timely workshop will give you insights and new information for decision-making in our changing health care environment. RNs and LPNs will earn 4 contact hours for attending this workshop.

High Tech Dentistry with a Compassionate Spirit:
A Recipe for Success Technology is pushing dentistry rapidly ahead in preparation for the new millennium. Which components are right for you and for your dental office? What benefits will they provide? What headaches? How will the staff adjust to the changes that result? And most important, what will your patients think? This workshop will provide a candid look at the high-tech dental office through the eyes of an experienced dentist and her practice manager. You will meet a dentist who went from being afraid to turn a computer on to one who uses most of the high-tech components available. You will interact with a practice manager who knew computers and how to care of people, but did not know an amalgam from an occlusal. Yet, together they have learned how to combine technology and a compassionate spirit to build a very successful dental practice. They look forward to sharing their journey with your dental team. Dentists and dental hygienists will earn 6 contact hours for attending this workshop. The fee for Dentists is $159. The fee for dental hygienists and dental office staff is $89.

Introduction to CPT-4 Coding
A basic understanding of coding has become an important part of effective health care delivery. If you need an introduction to coding and want to focus on basic how-to's, plan to attend this practical course. The course will begin with an overview of the coding system and its conventions. You will code in-class exercises from real-life situations to help you correctly apply the concepts presented. The CPT-4 coding book can be purchased in the JCCC bookstore. Because this course is applicable to a wide range of medical office professionals, no C.E. credit will be given. Certifications documenting attendance will be awarded and may be submitted by the individual participant to the appropriate licensing board.

Taking Care of You: Creative Self-Care
Is it possible to maintain a career and a life? Organizational demands and busy lifestyles have left many health care providers wondering about this question. Fortunately, the answer is yes! Learn how to prioritize needs and establish a plan for getting those needs met. Explore ways to develop daily discipline, a requirement for maintaining spiritual, emotional and physical health. Maintain a sense of peace even when the world around you seems hectic and chaotic. Join us to discover how to creatively take care of you! RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health care professionals.
The Challenges of Longevity
We often hear "when the baby boomers reach 65..." Economic implications and social security are already a concern and the large numbers in this age group will influence other factors also. When a large proportion of older people dominates a culture, the social and political climates change as well. Explore these factors and learn how older adults can use their later years in purposeful and rewarding ways. Learn how the healthy and more energetic older adult can contribute in the community, in the family and develop a deeper inner life. Resources for this pursuit will be presented. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health care professionals.

Practice What You Preach: Modeling Healthy Weight
Management Why is it so hard to maintain a healthy weight? Even many health professionals find it very difficult to remain physically fit. This program will help health care professionals analyze the effectiveness of their personal and professional approaches to healthy weight management. You will learn research-based strategies for eating without overeating, for getting regular exercise without procrastinating and for gaining insight into how relationships may set you up for overeating and not getting regular exercise. You will receive detailed descriptions of the recommended weight management clinical guidelines by the National Institutes of Health (NIH) as well as the presenter's three-pronged approach--- Holistic Self-Care Model for Long-Term Weight Management. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health care professionals.

Putting Your Patient’s Best Foot Forward
Painful or disabling conditions of the feet prevent many individuals, especially older or homebound patients, from living comfortable and active lives. In this program, you will learn to assess skin condition, circulation, sensation and movement in the foot as well as discuss the management of common foot fungi. You will also have an opportunity to observe a demonstration of nail and skin care. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health care professionals.

Nursing Documentation: Professional and Legal Issues
Nursing documentation has undergone multiple changes over the years and documentation methods are continuously evolving-narratives, soaps, AIEMS, focuses, exceptions, raps and paths! Individual, integrated and multidisciplinary formats! No matter what system is used, nursing documentation must reflect the nursing process and stand up to close scrutiny in legal, governmental and regulatory arenas. Learn to evaluate how documentation truly reflects the care received and examine examples of charting involved in medical malpractice cases. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop.

Breathe Easy: An Update on the Pharmacologic Treatment of Asthma and COPD
This practical presentation will emphasize the appropriate use of pharmacological agents in the treatment of patients suffering from asthma and/or chronic obstructive pulmonary disease (COPD). The pharmacology, pharmacokinetics, use, side effects and evidenced-based alternatives will be discussed thoroughly. Case studies of various patient scenarios will be provided to facilitate understanding and application of the information presented. RNs and
LPNs will earn 6 contact hours for attending this workshop. Approval is pending for other health care professionals.

$54.00

XNC 2340

Anger: The Road to Misery or Self-Discovery?
What happens when you get really angry? How does your body feel, how does your mood change and how do you act? Does your mood and behavior depend on whether you are a male or a female? In this experiential workshop, you will take a look at the different sides of anger---things that influence your particular style of feeling and expressing it, how the anger of others affects you and how repressed anger shows up. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health care professionals.

$54.00

XNC 2341

Diabetes: Psychosocial Aspects of Diagnosis and
Self-Management What does it mean to be diabetic? How does an individual's attitudes and coping styles impact the four areas of diabetes care---diet, medication and glucose monitoring, stress management and exercise? In this workshop, you will explore how various factors, including age, gender, ethnicity and learning or parenting style, influence an individual's response to a diagnosis of diabetes. You will learn to utilize these factors to enhance your patient education and assist your client to achieve good medical outcomes. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health care professionals.

$27.00

XNC 2342

Therapeutic Touch: A Nursing Intervention
Therapeutic Touch is a healing intervention that involves the direction of life energy by the practitioner to benefit the recipient. You will explore the interaction of the human energy fields with the environment and discuss the different phases of therapeutic touch. You will learn the importance of intentionality and centering in the therapeutic touch process. Specific research that supports the practice of therapeutic touch will also be discussed. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop.

$54.00

XNC 2343

So You Want to Be a Nurse Entrepreneur?
Nurses, because of their education and experience, are in a unique position to work independently rather than in a traditional employment setting. If you are intrigued with this idea, this program will answer your questions and tell you how to get started. RNs and LPNs will earn 3 contact hours for attending this program.

$27.00

XNC 2344

Lab Values: The ABCs of CBCs (and ABGs and TSHs and Lytes and...)
This practical program will provide you with a clear understanding of various lab tests, when and why they are indicated and what their values mean. An overview of cardiac and liver enzymes will be presented and routine labs and their implications will be described. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop.

$36.00
**XNC 2345**

**Women and Heart Disease: The Silent Epidemic**

Traditional research into the causes, diagnosis, treatment and prevention strategies of cardiovascular disease has been conducted predominantly on men. As a result, women have not been viewed as being at risk. Yet, national statistics support that more than 500,000 women die from heart disease annually, making it the leading cause of women's death in the United States. This state of vulnerability warrants an emergent need to stimulate awareness, prompt early detection, education and prevention in addressing the magnitude of this "Silent Epidemic" in women. Learn the approaches you need to improve the cardiovascular health of yourself, your family and your patients. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop.

$27.00

**XNC 2346**

**Sentinel Lymph Node: Concept and Technique**

The histologic status of lymph nodes is an important prognostic indicator in patients with cancer. The first stop along the route of lymphatic drainage from a primary tumor is a limited set of regional lymph nodes. Dyes and radioactive traces are used to identify the first lymph node(s) to receive drainage from a tumor, termed sentinel lymph node(s). In melanoma, this sentinel lymph node reflects the status of a lymph node basin and is the basis for further treatment. In breast cancer, the use of sentinel lymph node biopsy is undergoing debate. In this workshop, you will review the lymphatic system and explore both the concept and technique for using this important prognostic indicator. RNs and LPNs will earn 3 contact hours for attending this workshop.

$27.00

**XNC 2347**

**Hepatitis: Prevention and Management**

Hepatitis, presenting in both acute and chronic forms, is more prevalent and often more serious than many people realize. While some forms of the illness may be mild, others can lead to life threatening illness and/or development of serious sequelae. In this program, you will examine the different types of hepatitis, explore new treatments and prevention strategies and receive the latest information regarding blood borne pathogen protocols. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health care professionals.

$27.00

**XNC 2348**

**Psychotropics Made Simple**

The number and variety of psychotropic agents now available to treat clients/patients with mental disorders has grown significantly in the past few years. Many of these agents have diverse uses and are given to individuals in many different care settings. And you, the health care professional, are asked to respond knowledgeably to these situations! In this interactive program, you will explore the major disease states encountered in mental health care as well as the drug treatment and pharmacology associated with those illnesses. You will learn characteristics of major drug classifications, mechanisms of action, common side effects and implications for use. While pharmacologic treatment of five/six major disease states will be highlighted, the program is flexible and will include an opportunity for questions and more in-depth discussion as needed to provide practical information to assist you in your practice setting. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 4 contact hours for attending this workshop. Kansas ACHAs will earn 4 (RC) contact hours. Approval is pending for other health care professionals.

$36.00

**XNC 2349**
ADD/ADHD: Diagnostic Issues and Management Strategies
Hear thought provoking discussion addressing diagnostic and assessment issues regarding individuals with attention dysfunction (ADD/ADHD). Learn about research, the challenges associated with the condition and successful treatment interventions. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00
XNC 2350

Drug Therapy in the Elderly
The elderly constitute about 12.5% of the US population. A myriad of health-related problems complicate the lives of these older individuals. Management of these medical problems frequently involves the use of multiple medications resulting in a variety of adverse events. This program will help you gain a better understanding of these events and provide strategies to prevent adverse outcomes of drug therapy. In addition, the most commonly prescribed medications for the elderly will be discussed. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

$27.00
XNC 2351

Mastering Those Dysrhythmia Challenges
This program is designed for nurses and emergency personnel who already have a basic understanding of dysrhythmia analysis and who wish to advance their skills. You will gain confidence in recognizing and appropriately responding to the dysrhythmias covered. Lecture as well as practice on EKG strips will be included. RNs and LPNs will earn 6 contact hours for attending this workshop.

$54.00
XNC 2352

Holistic Approaches to Chronic Fatigue Syndrome
Chronic fatigue syndrome and fibromyalgia have many common features, and some patients may actually have both conditions. Living with these conditions is often very difficult for patients. Health care providers, helping patients manage these chronic ailments, find them challenging as well. This program will discuss criteria for the diagnosis of chronic fatigue syndrome and fibromyalgia and review the latest literature on treatment strategies. The program will also highlight current thinking about the roots of these two increasingly common diagnoses, and assist participants in understanding current research in the field. RNs, LPNs and LMHTs will earn 3 contact hours. Approval is pending for OTs and PTs.

$36.00
XNC 2353

Workplace Relationships: Best Friends or Worst
Nightmare Wherever men and women come together to accomplish a common goal, conflict seems to be an inevitable companion. This is just as true of the health care workplace as any other. In this workshop, you will examine basic life principles---the power of love, the practical application of forgiveness, keeping work issues in perspective and the importance of affirmation ---and how these impact workplace relationships, often turning worst nightmares into best friends. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals. Kansas ACHAs will earn 6 (RC) hours.

$54.00
XNC 2354

Anatomy of a Lawsuit: A Case Study Approach
Changes in our health care system have broadened the scope of nursing practice and professional accountability. Increased accountability can mean increased liability! It is essential for today’s nurse to be aware of areas of risk exposure and potential liability. This seminar will feature three legal nurse consultants who frequently review medical malpractice cases. You will learn how a medical practice case is researched and hear expert witnesses present actual court cases with trial exhibits. RNs, LPNs and LMHTs will earn 4 contact hours for attending this course. Approval is pending for other health professionals.

$36.00
XNC 2355

**Generation to Generation: How the Family Influences**

Children It is generally accepted that the family influences how children function. However, how this occurs is often not understood. Popular ideas range from blaming the mother to blaming the genetic pool of the family. These explanations do not offer people a way of thinking that takes into account how the family emotional environment can influence the behavior of children. This way of thinking dispels the myth of the “dysfunctional family” and focuses instead on the numerous variables that influence how parents function in relationship to their children. The perspective presented in this seminar is based on Bowen family systems theory, which outlines the complexity of how previous generations exert influence on current generations. The “generation” affect will be explored through the concepts of the theory and through clinical examples. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$69.00
XNC 2356

**Dermatologic Emergencies and Urgencies**

Often rashes or other skin problems may appear benign, but actually reflect an ominous diagnosis. Other conditions can appear alarming, but warrant only reassurance. In this workshop, nurses who encounter patients with skin problems as part of their daily care will discover cutaneous clinical clues that will assist them in providing knowledgeable care for patients who present with various inflammatory, infectious and neoplastic processes. Emphasis will be placed on clinical presentation and will include diagnostic intervention when appropriate. RNs and LPNs will earn 3 contact hours for attending this workshop.

$27.00
XNC 2357

**Diabetes and Pregnancy**

The outcome of pregnancy complicated by diabetes can be significantly influenced by the effective management of blood glucose levels. In this presentation, you will discuss gestational diabetes as well as pregnancy complicated by pre-existing diabetes. You will explore the pathophysiology of both conditions and learn screening criteria. You will discuss important aspects of effective management, including nutrition, exercise, stress reduction, medications, and intensive monitoring of mother and baby before and during pregnancy, labor, delivery and postpartum. Emphasis will be placed on achieving "healthy moms and healthy babies." RNs and LPNs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00
XNC 2358

**Innovations in Treating Arthritis**

Arthritis and other rheumatic conditions affect more than 42 million Americans, approximately one in every six people. Arthritis is the leading cause of disability in the United States and accounts for medical costs of $15 billion annually. The magnitude of arthritis and related conditions alone compels nurses and other health professionals to be knowledgeable about recent innovations in managing
these conditions. This presentation will provide an overview of rheumatic disorders, including rheumatoid arthritis, osteoarthritis, lupus and polymyositis, and will include the clinical presentation, treatment and drug therapy for these debilitating illnesses. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00

XNC 2359

Assessment and Stabilization of the Extremities
This practical presentation will introduce you to the examination of the extremities. Using a systematic approach, you will review the appropriate anatomy and learn to perform a detailed assessment of the upper and lower extremities. You will learn to evaluate injuries and medical problems using a risk management format (a systematic evaluation to eliminate potential, serious, underlying problems). RNs and LPNs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00

XNC 2360

Psychotherapy Made SimpleR
This workshop identifies and elaborates basic concepts of the psychotherapeutic process. Beginning with how to greet the client and concluding with planning and carrying out termination, this workshop will explore the essential ingredients of the successful therapy practice. Of interest to both new and experienced therapists. Advanced practice mental health nurses, psychologists, social workers and licensed counselors will earn 6 contact hours for attending this workshop.

$69.00

XNC 2361

Attachment and Hunger: Understanding the Client with An Eating Disorder This presentation will focus on the diagnosis and treatment of eating disorders within the context of connection and attachment. Nurturing care with balanced limit setting will be explored. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 6 contact hours for attending this workshop.

$54.00

XNC 2362

Potassium: Maintaining the Balance
This program, available in JCCC labs, provides an overview of the role and function of potassium in the body, as well as measures to correct potassium imbalance. RNs and LPNs will earn 1 contact hour for completing this course. ACHAs will earn 1(RC) contact hour.

$12.00

XNC 2363

Nursing and the Law
This course, available in JCCC labs, defines legal terms pertinent to nursing practice, explains the role of the state legislature in regulating nursing practice and discusses the relationship between negligence and malpractice. RNs and LPNs will earn 1 contact hour for completing this course. ACHAs will earn 1 (A) contact hour.

$12.00

XNC 2364

Care of the Client Experiencing Anxiety
Presented as a computer-based module in JCCC’s open lab, this course discusses various anxiety-related disorders, including social phobia, post trauma stress disorder, obsessive compulsive disorder and hypochondriasis. RNs, LPNs, LMHTs and social workers will earn 1 contact hour for completing this course. ACHAs will earn 1 (RC) hour.

$12.00
XNC 2365
Care of the Client with Peptic Ulcer Disease
This course provides a comprehensive overview of peptic ulcer disease, including causes, nursing interventions, medications and client teaching needs. RNs, LPNs and LMHTs will earn 1.5 contact hours for completing this course. Kansas ACHAs will earn 1.5 (RC) hours.

$18.00
XNC 2366
Clinical Management of Individuals with Alzheimer’s Disease
As our population ages, the emotional and behavioral problems associated with Alzheimer’s Disease and other forms of dementia are becoming increasingly significant for both families and health care providers. This comprehensive workshop will examine the Alzheimer’s Disease process from a neurological viewpoint, emphasizing the changes that result in behavioral and psychiatric problems for these individuals, their families and caregivers. Environmental, pharmacologic and interpersonal interventions will be discussed with an emphasis on understanding the demented person’s world and changing needs. Medications commonly used to treat both Alzheimer’s Disease and the behavioral changes that occur will be discussed also. RNs, LPNs and LMHTs will earn 8 contact hours for attending this program. Kansas ACHAs will earn 8 (RC) hours.

$54.00
XNC 2367
Religious Diversity in Health Care: A Foundation for Holistic Care
Historically, health care has focused on caring for and curing the body and mind, excluding the spiritual dimension of our triune nature. The wall between medical science and spirituality is now coming down! We recognize that effective treatment requires consideration of the whole person—body, mind and spirit. In this course, participants will explore the complementary relationship between spirituality in a religiously pluralistic society and the care provided to patients. Participants will identify approaches for meeting the spiritual needs of individuals from various religious traditions. RNs, LPNs, LMHTs, social workers, psychologists, counselors, clergy, dentists and dental hygienists will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

$54.00
XNC 2368
Understanding Lab Values
This practical program will provide you with a clear understanding of various lab tests, when and why they are indicated and what their values mean. You will discuss routine lab tests and their implications as well as overview cardiac and liver enzymes. RNs and LPNs will earn 4 contact hours for attending this workshop.

$48.00
XNC 2369
Naturopathic Medicine: Philosophy, Modalities
Naturopathic medicine, also known as natural or holistic medicine, has
experienced a tremendous resurgence in the last two decades as a health conscious public seeks alternatives in health care. In this informative course, you will explore the philosophy and therapeutic modalities of naturopathic medicine, including nutritional medicine, botanical medicine and homeopathy. You will learn the clinical indications, mechanism of action, side effects and contraindications of a wide variety of natural medicines commonly used today---CoQ10, DHEA, Hypericum (St. John’s Wort), Ginko, Ginseng and others. You will also gain an understanding of the education, training and role of the naturopathic physician, allowing you to answer your patients’ questions with greater knowledge and confidence. RNs, LPNs, LMHTs and dietitians will earn 3 contact hours. Approval is pending for OTs and PTs.

$36.00
XNC 2370
Pharmacology of Depression: Familiar Pathways
and New Frontiers
This course will allow you to take an in-depth look at depression with special emphasis on the receptors and the neurotransmitters involved. You will study serotonin, dopamine, norepinephrine and other neurotransmitters believed to be involved with depression, as well as the different anatomical pathways in the brain responsible for depression, obsessive compulsive disorder, panic disorder and eating disorders. You will review traditional drugs such as the selective serotonin re-uptake inhibitors (SSRIs) and tricyclics (TCAs) and learn about newer agents now available. You will also examine the pharmacology, side effects and interaction potentials with other drugs. This course will provide an excellent review of depression and introduce cutting-edge concepts and research about new serotonin receptors, new treatments and combination drug therapy. RNs, LPNs and LMHTs will earn 3 contact hours for attending this course. Approval is pending for other health professionals.

$27.00
XNC 2371
Obsessive Compulsive and Anxiety-related Disorders in Children
Although obsessive compulsive (OCD) and anxiety-related disorders are believed to affect only 3-5% of children under age 16, the symptoms and experiences of these children are often misunderstood and misdiagnosed. Families are confused and often feel helpless as their child battles internal anxiety and the overpowering urge to perform or avoid behaviors/rituals that give only temporary relief to overwhelming anxiety and fear. Since many symptoms associated with OCD or anxiety disorders can also be found in children with attention deficits, learning challenges, Tourette’s Disorder and depression, thoughtful consideration will be given to making the correct diagnosis as well as identifying therapeutic treatment/management approaches, including the importance of developing a team approach to assist the child experiencing these challenges. RNs, LPNs and LMHTs will earn 3 contact hours for attending this course. Approval is pending for other health professionals.

$27.00
XNC 2372
Immunization: You Call the Shots (Parts 1 & 2)
Presented on computer disk, this program is a two-part series. It provides a comprehensive overview of currently accepted immunization practices. RNs, LPNs and LMHTs will earn 6 contact hours for completing this course.

$66.00
XNC 2373
Musical Solutions for Everyday Problems
Music is good for us! We intuitively know this and accept it without question. But do we know why it is not only good for us, but needed for optimal development and well being? In this workshop, you will learn what The Mozart Effect is and
why it is important. You will discuss high and low frequency sounds and learn
how they relate to health. You will discuss the art of listening, hear the latest
research on the relationship between the ear and the brain and explore how this
can be used in children with ADD and other problems. You will see a slide
presentation on The Sound Environment and how this impacts our lives and
discover how cutting edge hospitals are using sound and music in innovative
ways, including music for grieving, music in hospice and how the harp is used to
assist dying patients. RNs, LPNs and LMHTs will earn 6 contact hours for
attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is
pending for other health professionals.

$54.00
XNC 2374
Pain Management: Integrating Complementary Therapies
into Traditional Regimens According to The American Pain Society, pain is often
undertreated, causing suffering and financial loss to individuals and to society. As
a practicing health care professional, you can cite numerous cases to verify this
assumption. In addition, Joint Commission on Accreditation of Organizations
(JCAHO) acknowledges pain as a coexisting condition with many diseases and
injuries and has included new pain management standards for compliance in
2001. In this experiential workshop, you will examine the mind/body connection
as well as learn principles of psychoneuroimmunology. You will explore a variety
of complimentary therapies, allowing you to individualize your treatment plans and
increase you effectiveness as a practitioner. RNs and LPNs will earn 7 contact
hours for attending this workshop. Approval is pending for other health
professionals.

$63.00
XNC 2375
Taking Off the Mask: Feeding the Hunger Within
Depression, anxiety, marital problems or stress! Traditionally, our clients have
presented with symptoms of one of these problems. In recent years, we have
been challenged by an increasing number of individuals presenting with feelings
of emptiness, being numb or being unable to develop or sustain relationships.
Rather than focus on symptoms, this workshop will examine ways clients can lead
a fuller life. It will explore issues of attachment, identity, boundary and spirituality
as well as barriers to meaningful relationships. RNs, LPNs, LMHTs will earn 6
contact hours for attending this workshop. Kansas ACHAs will earn 6 (A) hours.
Approval is pending for other health professionals.

$54.00
XNC 2376
Intrapartum Bleeding Disorders
Few emergencies are as frightening as intrapartum hemorrhage. The causes of
hemorrhage during the birth process are numerous and determining the etiology
of the problem requires a sound understanding of maternal-fetal physiology. In
this program, you will review maternal-fetal and uteroplacental physiology,
examine problems that may result in intrapartum hemorrhage---placental
abnormalities, coagulation defects and uterine problems, and explore
interventions to improve outcomes when intrapartum hemorrhage occurs. RNs
and LPNs will earn 3 contact hours for attending this workshop.

$27.00
XNC 2377
Making Pathophysiology Work in Your Practice:
Endocrine and CNS If you don’t work with patients experiencing endocrine and
central nervous system disorders often, you may feel challenged to recall the
pathological basis of conditions affecting these body systems. In this workshop,
you will review the anatomy and physiology related to endocrine and related CNS
disorders and discuss clinical features and laboratory changes expected in
patients. You will learn the pathogenesis, clinical characteristics, supporting lab
data and assessment procedures for a wide variety of endocrine and neurological
disorders as well as how to utilize this information to strengthen your everyday
practice. RNs and LPNs will earn 6 contact hours for attending this workshop.

XNC 2378

The Compassionate Heart: Dealing with Life-limiting

Illness, Death and Grief From the moment an individual learns they have a life-
limiting illness, their life and the lives of everyone close to them will never be the
same again. Life has changed---with change comes loss, with loss comes grief
and with grief comes the opportunity to feel, learn and grow into someone more
than we were before. In this workshop, you will examine some of the physical,
mental, emotional and spiritual aspects of life-limiting illness, death and loss. You
will also examine the pain of the grieving process and discover the healing,
helpful power it can bring. Whether you're dealing with the challenges of a
life-limiting illness professionally or on a personal level, developing a
compassionate, understanding and loving heart can help make this time a little
less difficult. RNs, LPNs and LMHTs will earn 3 contact hours for attending this
workshop. Kansas ACHAs will earn 3 (RC) hours. Approval is pending for other
health professionals.

$27.00

XNC 2379

Seizures and Epilepsy: An Overview of Current Management

A diagnosis of seizures/epilepsy can be frightening and health care professionals
are in a unique position to provide factual information about the management of
this condition. This workshop will provide an overview of this important topic
beginning with the classification of seizures. You will explore the epidemiology
and evaluation of seizures/epilepsy, review videos of various seizure types and
discover how to differentiate non-epileptic spells (e.g. syncope and
pseudoseizures) from epilepsy. You will also discuss therapeutic strategies to
eliminate seizures, including vagal nerve stimulators and brain surgery. The
impact of epilepsy on the life of the individual and family will also be discussed.
RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) contact hours.

$27.00

XNC 2380

Prevention and Management of Back Injury

Oh, my aching back! This disabling complaint will affect an estimated one out of
four people this year and many of these people will be health care professionals!
In this workshop, an advance practice nurse and a physical therapist will join
forces to explore this common problem. You will discuss spinal anatomy, the
etiology of common injuries and various treatment options, including medication,
physical therapy and specialist treatments. You will also focus on preventive and
rehabilitative aspects of back pain, including ergonomics and fitness. RNs and
LPNs will earn 6 contact hours for attending this workshop. Approval is pending
for physical therapists and other health professionals.

$54.00

XNC 2381

Hit Parade of Prescribed Drugs: The Top 100

Which drugs make up the top 100 list? Why are these drugs important and why
are they prescribed more than others? Are they safer than similar drugs? Is cost
the driving force? Do the multi-million dollar drug companies we hear so much
about play a significant part in drug selection? Take a critical look at the top 100
most frequently prescribed drugs, review the characteristics that make them
"favorites" and learn why they are prescribed so frequently. Learn why a drug is
taken off the market or "banned" by the FDA and discuss the use of herbals and
natural products. RNs and LPNs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00
XNC 2382
Reclaiming Your Life Story
We each carry with us a story of how we arrived at our current place in life. These stories are made up of generational influences, family of origin experiences, life events and perspectives. This presentation will give you the opportunity to see who the antagonists and protagonists are in your life, what has been the theme of your story to date, and how you can begin to shape and alter the script. A story of pain can be retold as one of empowerment. Come learn how to retell your story from strength and resilience. Information from family systems theory will be intermixed throughout the presentation. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00
XNC 2383
Meditation and Mind/Body Health: You and Your Patient
Meditation is becoming an important part of self-care regimens. However, the effects of meditation, its benefits and its risks are not always well understood. You will explore two major forms of meditation--- mindfulness and concentration, learn how meditation is being used in health care settings and which conditions it can help. You will experience four different meditation sessions and get tips on how meditation can be applied to daily life. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Approval is pending for other health care professionals.

$27.00
XNC 2384
Management of Primary Headache
It is estimated that from 60 to 70 million Americans have experienced some form of headache, making it one of our most common health problems. In this informative workshop, you will explore various causes and types of headache, discuss the prevention and medical management of primary headache and discover various behavioral therapies shown to decrease the frequency and severity of headache pain. RNs, LPNs and LMHTs will earn 3 contact hours for attending this course. Kansas ACHAs will earn 3 (RC) hours. Approval is pending for other health professionals.

$27.00
XNC 2385
Innovative Approaches to Diabetes Management
Type 2 diabetes is reaching epidemic proportions in the United States. Approximately 16 million people have diabetes, but only half are currently diagnosed. Although no cure yet exists for diabetes, our understanding of disease progression and complication escalation in growing each year. In this seminar, you will explore new and innovative approaches to the treatment of pre-diabetic conditions leading to type 2 diabetes, including alternative therapies, dietary variations, and folk remedies. You will also discuss the impact of psychological issues and culture on diabetes care. This seminar will be most beneficial for health care providers who wish to advance their knowledge beyond a basic understanding of diabetes. RNs and LPNs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

XNC 2386
The Business of Healthcare: Where Does the Money Go?

Reimbursement, budgets and quality patient care may appear to be in direct conflict with each other. Do you know how reimbursement drives your employer's budget? Do you know how to provide quality patient care and yet support your employer's budget? This workshop will explore healthcare reimbursement history, address budget preparation and provide an opportunity for group discussion of case studies that illustrate important concepts related to the business of healthcare. RNs, LPNs and LMHTs will earn 4 contact hours for attending this workshop. Kansas ACHAs will earn 4 (A) hours. Approval is pending for other health professionals.

$36.00

XNC 2387

Engineering Wellness: Nutrition, Exercise and Stress

Management Developing a wellness lifestyle isn't always easy, but it isn't the impossible task we sometimes imagine it to be. Must you impose rigid dietary restrictions, exercise to exhaustion or change your personality type? Absolutely not! In this seminar, you will explore good nutrition and long-term weight management, including the futility/potential harm of popular diets and the use of herbal drugs, supplements, appetite suppressants and caffeine. You will review the benefits of exercise, learn practical ways to incorporate more physical activity into your daily routine and gain tips to reduce stress, fatigue and professional burnout. RNs, LPNs and LMHTs will earn 6 contact hour for attending this workshop. Approval is pending for other health professionals.

$54.00

XNC 2388

Two and Three-headed Dragons: Meeting the Challenge of Dual Diagnosis

Individuals with dual diagnosis, addiction illness coupled with psychiatric illness, are among the most difficult patients to treat successfully. Left untreated, they are likely to demonstrate horrific behavior in forms of violence, self-harm and suicide. In this workshop, you will explore the relationship between addiction and psychiatric illness and learn how a dual diagnosis treatment approach can make an effective difference. You will also discover how treating only one problem while remaining blind to the other, only undermines good treatment. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

$54.00

XNC 2389

Differential Diagnosis, the DSM-IV and Biopsychosocial Assessment

Providing accurate differential diagnoses, using the DSM-IV, is a challenging task for mental health practitioners of all disciplines. While the multi-axial design encourages us to view the individual from multiple perspectives, in reality we tend to concentrate only on Axis I and Axis II criteria. In this program, you will learn to assess the individual's developmental stage, life circumstances, culture, gender and physical status, prior to applying DSM-IV diagnoses. Special emphasis will be given to commonly over-diagnosed and under diagnosed conditions. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 6 contact hours for attending this workshop.

$54.00

XNC 2390

Tell Me How It Hurts: Health Care Communication

Based on Personality Preferences Why do some patients comply with your requests, while the same words inflame others? It's probably not WHAT you said, but how they HEARD it. Even under normal circumstances, people don't all react the same. When they're sick, their responses are more complex and even more critical to their well being. Based on the Myers- Briggs Type Inventory (MBTI),
this program will help you recognize clues to patients’ type preferences and interpret them for more effective communication. RNs, LPNs and LMHTs will earn 7 contact hours for attending this workshop. Kansas ACHAs will earn 7 (RC) hours. Approval is pending for other health professionals.

$63.00  
XNC 2391  
Depression in the Elderly: Relationship to Dementia and Disability  
Major depression remains the single most under diagnosed and under treated mental illness in the population over 65 years old. Depression can be confused with dementia, but can be the first troubling symptom heralding the onset of Alzheimer’s Disease. Depression is the second most common reason for admission into nursing homes, and is implicated in high mortality rates following loss of a spouse or acute medical conditions. In this program, you will explore the reasons for this phenomenon and discuss how to recognize and differentiate it from delirium and dementia. Current medications, the role of psychotherapy and psychosocial and environmental interventions will be thoroughly reviewed that can successfully treat this illness. RNs, LPNs and LMHTs, social workers, dental hygienists, registered dieticians will earn 3 contact hours for attending this course. ACHAs will earn 3 (RC) hours.

$36.00  
XNC 2392  
Complementary Approaches to Women’s Health Problems  
Women are becoming more knowledgeable regarding choices that may be available for managing menopausal symptoms. And they are asking questions of their health care providers! In this seminar, you will review the physiology of menopause and perimenopause and discuss the pros and cons of conventional and alternative approaches to managing symptoms and preventing long-term sequelae of estrogen deficiency. You will also explore nutritional and herbal supplements, Oriental medicine options, lifestyle modifications, and bioidentical, or so-called “natural” hormones. RNs, LPNs and LMHTs will earn 3 contact hours.

$36.00  
XNC 2393  
Meeting the Challenge of Ethical Practice in Mental Health  
Mental Health Mental health professionals often face ethical challenges as they address the problems and concerns of their clients. In this important workshop, you will discuss these challenges and examine several ethical orientations that can be used as decision-making tools. Vignettes will be used to provide you an opportunity to think through how to manage ethical dilemmas. You will also review ethical principles and Codes of Ethics from various disciplines. This workshop meets the three-hour ethics requirement for mental health professionals established by the Kansas Behavioral Sciences Regulatory Board. Kansas ACHAs will earn 3 (A) hours.

$27.00  
XNC 2394  
Exploring the Risk Factors for Cardiovascular Disease  
Whether for personal or professional reasons, nurses and other health care professionals need a sound understanding of the risk factors for cardiovascular disease. In this workshop, you will review the well-recognized risk factors--family history and genetic predisposition, smoking, diabetes, hypertension and hyperlipidemia as well as lesser risk factors. You will examine each risk factor individually and explore up-to-date treatments and potential nursing interventions. You will review the current NCEP 2 treatment guidelines, learn about the upcoming NCEP 3 anticipated guidelines and discover how these changes will impact practice. This class will be helpful not only for patient care but also for yourself and your family. RNs and LPNs will earn 3 contact hours for...
attending this workshop. Approval is pending for other health professionals.

$27.00  
XNC 2395  
**Becoming a Quitter: A Guide to Smoking Cessation**
Smoking contributes, directly or indirectly, to 20% of all deaths in the United States annually. More than 400,000 smokers die each year from the effects of smoking. Are you concerned about your patient’s tobacco use, but feel unable to help? Is a family member or friend experiencing health problems related to smoking? Are you a smoker and wonder what methods are available to help you quit? This workshop will answer your questions and offer effective strategies for smoking cessation. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours. Approval is pending for other health professionals.

$27.00  
XNC 2396  
**Treatment of Inflammatory Disease-Old and New Chemotherapeutic Regimens**
Chemotherapeutic Regimens This course will briefly review rheumatologic disease and focus on old and new drug therapy regimens. The treatment goals for inflammatory disorders have remained constant for the past several years and include relief of pain, prevention of joint destruction and deformity and maintenance or restoration of preferred lifestyle. New therapies such as inhibitors of cytokine interleukin-1 and tumor necrosis factor along with monoclonal antibodies are changing current research efforts and treatment modalities. RNs, LPNs and LMHTs will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

$36.00  
XNC 2397  
**Information Management: Internet Basics**
This course is presented on CD for home use and as a computer-based module in JCCC’s open lab. It explains how it can benefit healthcare professionals, including information about e-mail, listSers, netiquette and searching the World Wide Web. RNs, LPNs and LMHTs will earn 1.5 contact hours for completing this course. Kansas ACHAs will earn 1.5 (E)hours.

$21.00  
XNC 2398  
**Care of Clients With Sexually Transmitted Diseases**
Presented as a computer-based module in JCCC’s open lab, this course provides a comprehensive overview of common sexually transmitted diseases, including signs and symptoms, patient teaching and pathophysiology required for nursing assessments and interventions. RNs, LPNs and LMHTs will earn 1.5 contact hours for completing this course.

$18.00  
XNC 2399  
**Antithrombotic Therapy in the Emergency Setting**
Learn the basic pharmacology, therapeutic indications, contraindications, adverse effects and monitoring parameters for the use of antiplatelet drugs, anticoagulants and thrombotic drugs in urgent and emergent settings. RNs and LPNs will earn 3 contact hours for attending this workshop.

$27.00
XNC 2400

Medicine Ways of Our Ancestors: Native American

Spirituality Energy Medicine, considered the cutting edge of scientific thought, is actually very old. Shamans, wise women, medicine men and sages have practiced it for over five thousand years. Our ancestors understood the true meaning of healing---restoration, reintegration, reunion and reconnection of one's Spirit. To the healing sound of drum, voice and rattle, explore the dreamtime, that realm of no time and no space where all spiritual healing is effected. RNs, LPNs, LMHTs, social workers, counselors, LMTs, dentists and dental hygienists will earn 6 contact hours. ACHAs will earn 6 (E) hours. Approval is pending for OTs and PTs.

$72.00

XNC 2401

Homeopathy: An Introduction to Principles,

The word homeopathy, derived from the Greek words for similar and illness/suffering, is based on the theory that a substance can cure the same problems it causes. You will explore how homeopathy differs from conventional medicine, what kinds of conditions it treats and some of the commonly prescribed remedies---Arnica, Sulphur, Sepia and more. RNs and LPNs will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.

$27.00

XNC 2402

Dealing with Aging Relatives: Care Along the Continuum

As our population ages, issues related to the care of our elderly are becoming increasingly important. Who are the caregivers and why are they caring? What happens in families as the demands of caring for aging relatives increase? How do you guide families in making tough decisions and talking about difficult issues? How do you balance care giving with a career, healthy self-care and other family relationships? This seminar will address the issues that are of primary concern for both elders and caregivers. Particular focus will be on family dynamics, how issues present themselves in mental health and medical settings and what community resources are available. Enrollment is limited to 54. RNs, LPNs, LMHTs, social workers, counselors, dentists and dental hygienists will earn 6 contact hours for attending this seminar. ACHAs will earn 6 (RC) hours.

$54.00

XNC 2403

OSHA Standards as They Apply to the Healthcare

There have been updates to the Bloodborne Pathogen Standard, Recordkeeping Standard and General Industry Standard that will affect your OSHA compliance program. You need to know the latest information for your healthcare workplace to be in compliance with OSHA regulations. This course will satisfy the required annual training for OSHA's Bloodborne Pathogen Standard and cover health care requirements of the Hazard Communication Standard and the General Industry Standard. RNs, LPNs, dentists and dental hygienists will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00

XNC 2404

Take Charge: Leave Chronic Fatigue Syndrome and

Fibromyalgia Behind Chronic fatigue syndrome and fibromyalgia currently afflict approximately 8-10 million people in the U.S. Many more go undiagnosed and ineffectively treated. This program will discuss physical and cognitive barriers to overcoming these illnesses and present strategies for healing these conditions. Strategies will focus on the whole person. RNs, LPNs and LMHTs will earn 5
contact hours for attending this workshop.

$45.00
XNC 2405
Those Mysterious Movement Disorders
"Movement disorders" encompass a broad array of disease processes, including "restless leg syndrome," ataxia, dystonia, essential tremor, Parkinsonism, spasticity and others. This workshop will explore the evaluation, management and care of these conditions. RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

$27.00
XNC 2406
Solving Workplace Challenges: 2008 and Beyond
The growing complexities of our changing society are adding challenges to the workplace and traditional thinking patterns seem insufficient for solving them. Meanwhile, staffing challenges and questions posed by a diverse workforce remain unanswered. Are realistic solutions to these issues possible? You bet! Don't miss this exciting seminar. RNs, LPNs, LMHTs and social workers will earn 6 contact hours for attending this workshop. ACHAs will earn 6 (A) hours. Approval is pending for OTs and PTs.

$72.00
XNC 2407
If I'm Their Leader, Which Way Did They Go? The Art of Caring Leadership
Health care is a business and business research reveals that as high as 75% of all staff are committed to their employer and truly desire to provide quality performance. Their ability to retain that commitment to excellence is governed most by the quality of the leadership they receive. Yet in this present atmosphere of flattened organizational charts, increased direct service of "working managers" and general distrust of people in authority, quality leadership is sorely lacking. This seminar provides the nuts-and-bolts "how to's" of leadership and of influencing staff to eagerly follow. It will be of special interest for health care managers. RNs, LPNs, LMHTs, social workers, LMTs, dentists and dental hygienists will earn 6 contact hours. ACHAs will earn 6 (A) hours. Approval is pending for OTs and PTs.

$72.00
XNC 2408
Uppers, Downers and All-Arounders
Take a whirlwind tour of the drugs that are abused in our society, from amphetamines, to opiates, to hallucinogens. Explore the brain to uncover the biochemistry of addiction and look at how to utilize this information in the recovery process. Take a look at the latest drugs used in the treatment of addictions as well as important aspects surrounding prescription and street drugs of abuse. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours for attending.

$54.00
XNC 2409
Evolutions and Revolutions in Women's Health
This workshop will present a clinical examination of the impact of the women's movement of the past 40 years. Young girls are increasingly susceptible to a dysfunctional peer and media culture. Adult women remain reluctant to make healthy physical and emotional choices. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 6 contact hours for attending this seminar. Approval is pending for other health care professionals.
Mindful Practice: Using Meditation for Personal and Professional Growth

Mindfulness is about developing your awareness skills. As you do this, you will experience increased insight, decreased stress and a more fulfilling life. In this workshop, you will learn about and practice mindfulness meditation. Through active experiences, you will increase your understanding of meditation and how to apply meditative techniques in daily life. The workshop will involve meditation, experiential exercises and group discussion. RNs, LPNs and LMHTs will earn 4 contact hours for attending this workshop. Approval is pending for other health professionals.

Managing Behavior Problems in the Elderly

Commonly our elders are stereotyped as cranky, irritable, forgetful, and difficult to deal with. The truth is they often do behave in ways that we don't understand. The bigger truth is that something is wrong and our seniors suffer needlessly. As clinicians caring for the elderly, we must know the signs and symptoms of depression and the ways that Alzheimer's Disease, strokes, pain or unmet psychosocial needs cause them to behave unexpectedly. This course explores the neurobiology of depression and dementia, the changing psychosocial needs of the elderly and why these changes cause unwanted behavior. Assessment of the physical and psychological status of the client and strategies to minimize disruptive behaviors will be explored. The use of psychotropic medications will also be reviewed. RNs, LPNs and LMHTs, counselors, social workers, registered dieticians will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for PTs and OTs.

Bringing Home to Those Who Can't Go Home

Home is the primary environment in which you develop and reinforce your sense of identity. It is there that you gain a sense of history and roots. Your home is a unique expression of who you are; it serves as a vessel for your memories and your relationships with family and friends. In this moving workshop, you will explore ways to help nurture that sense of home and personal identity so often lost in sick and institutionalized patients. Deanna Edwards will share her musical talents to show you how to accomplish this goal. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

When Drugs Don't Kill Bugs: Antibiotic Resistant

Bacteria Explore past, present and future trends of antibiotic resistant bacteria, including the impact of this phenomenon on patient care, patient outcomes and the health care economy. RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

Understanding Asperger and Other

Pervasive Developmental Disorders Pervasive Developmental Disorders (PPD) represent a spectrum of disorders that generally involve impairment in social relatedness, communication skills and eccentric interests, rituals or stereotypes. Asperger Disorder, one disorder within the PDD spectrum, is frequently compared to autism due to a number of shared behavioral similarities. Unlike autism,
however, individuals with Asperger Disorder do not tend to display language
delay, but rather exhibit severe impairment in social interactions as well as a
restricted repertoire of behaviors, interests and activities. In this seminar, the
characteristics of Asperger Disorder will be explored plus you will learn why
differential diagnosis of this condition is a complex process. There will be a focus
on issues regarding social relatedness and appropriate social interventions. RNs,
LPNs, LMHTs, social workers, psychologists, counselors, dentists, and dental
hygienists will earn 3 contact hours for attending this workshop. Approval is
pending for other health care professionals.

XNC 2415

GI Drugs: How Do You Spell Relief for GI Problems?
How do you spell relief for digestive problems that can range from minor
inconveniences to major illnesses? This practical seminar will review
gastrointestinal disorders, discuss the most common GI medications and explore
important drug interactions with these agents. RNs and LPNs will earn 3 contact
hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

XNC 2416

Finding the Courage to Care: Looking In and Reaching Out
These are tough, yet hopeful times for health care professionals. Critical voices,
impossible constraints and unreasonable demands can cause us to lose heart.
This seminar will help health care professionals take heart and dare to care. RNs,
LPNs and LMHTS will earn 6 contact hours for attending this workshop. Kansas
ACHAs will earn 6 (A) hours.

XNC 2417

The Silent Epidemic: Alcoholism in the Elderly
Among today's 25 million Americans age 65 and older, there are an estimated 2.5
to 3.7 million that are addicted to alcohol. What is perceived as frailty, senility, or
simply the unsteadiness of old age may be alcoholism. This program will explore
the depth of the problem in our elderly citizens, and how to recognize and
succesfully treat it in the geriatric client. RNs, LPNs and LMHTs will earn 3
contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

XNC 2418

Spanish 101 for Health Care Professionals
Having a grasp of elementary Spanish phrases can serve to meet patients’ basic
needs and provide a welcoming atmosphere. Learn Spanish pronunciation, basic
grammar and helpful phrases. Resources will be shared and discussion of
relevant cultural aspects will be included. RNs, LPNs and LMHTs will earn 6
contact hours for attending this workshop. Kansas ACHAs will earn 6 (E) hours.

XNC 2419

Innovations in Cardiac Surgery
Dramatic changes have occurred in the management of cardiac surgical patients
in the last decade. Surgical techniques have undergone exciting changes
too--off-pump conorary artery bypass, transmyocardial revascularization and
artificial heart implantation to name just a few. This seminar will explore current
issues and emerging techniques as well as discuss the impact of evolving
technology. RNs and LPNs will earn 3 contact hours for attending this workshop.
$27.00
XNC 2420
Bulletproof Confidence
Celebrities Michael Jordan and Oprah Winfrey generate bulletproof confidence from "feeling" brain centers that are not influenced by "thinking" centers or the thought- based techniques used in self-confidence programs. This new feeling-based program helps you uncover these instinctive, primordial "I-can-do-anything" feelings that, unfortunately, most of us have suppressed. RNs, LPNs, and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (A) hours.

$54.00
XNC 2421
Managing Anxiety in Today's World
In the uncertainty of today's world, stress cannot be avoided--but it can be managed. This workshop will examine how we can distinguish normal fears and anxieties from serious anxiety disorders. It will focus on ways to make anxiety work for you and your clients in today's uncertain times. RNs, LPNs and LMHTs will earn 4 contact hours for attending this workshop. Kansas ACHAs will earn 4 (A) contact hours.

$36.00
XNC 2422
Your Nursing Practice: A Potpourri of Legal Issues
Today's nurses have many concerns about the legal aspects of their practice. This seminar will address three important aspects--defensible charting, malpractice and liability issues, and your rights as an employee. RNs and LPNs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (A) hours.

$54.00
XNC 2423
Integrative Therapies for Labor Comfort
Explore the use of nurse-friendly, non-invasive interventions, including the therapeutic uses of music, massage, aromatherapy and birth balls to enhance support of the laboring and birthing woman. RNs and LPNs will earn 3 contact hours for attending this workshop.

$27.00
XNC 2424
Old Isn't Old Any More: Normal Aging in the 21st Century
At the turn of the 20th century life expectancy for females was 47 years; males slightly less. Today it is almost 80 years. The process of aging is not the same as it was 100 years ago. We must redefine what is normal and what is not. This seminar will explore normal changes that occur with aging as well as ways to slow this process. RNs, LPNs and LMHTs will earn 3 contact hours for attending this seminar. Kansas ACHAs will earn 3(RC) hours.

$27.00
XNC 2425
Stress Management from the Inside Out
Do you think you can't manage your stress because all the things that stress you out--your job, your boss, your spouse, the "system"--are things you can't change? Do you feel "stuck"? Learn how to use your mind and your activities to help create health and peace in your life. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (A) hours.
Understanding Conditions of the Liver
Review the role and functions of the liver. Explore the pathophysiology and evaluation of various liver conditions and understand liver function studies often seen in patient records. RNs and LPNs will earn 5 contact hours for attending this workshop.

The Heart of Healing: Providing Compassionate Care
Technological advances, budget challenges and calls for improved productivity contribute to the growing complexity of the healthcare environment. In spite of this complexity, the person seeking healthcare services is a human being in need of healing. For this reason, offering compassionate care within our high tech, fast-paced work environments has never been more important. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for OTs and PTs.

Management of Peripheral Lymphedema
One out of eight women will develop breast cancer over the course of their lifetime. Twenty percent of these women will develop lymphedema. This workshop will explore strategies to prevent, identify and manage this debilitating condition. RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours. Approval is pending for other health professionals.

Premenstrual Syndrome and Menopause: A Natural Medicine
Approach Millions of American women experience unpleasant symptoms because of premenstrual syndrome or menopause. Explore the role of hormones in these conditions and discover how natural and synthetic hormone replacement therapy can impact them. Learn to use dietary and lifestyle changes as well as nutritional supplements and botanical therapies to improve general health and sense of well being. RNs, LPNs and LMHTs will earn 3 contact hours for attending this workshop.

Medical Coding Certification Course
This class will study medical coding using the latest curriculum approved by the American Academy of Professional Coders (AAPC). Individuals who complete the course are then ready to sit for the national AAPC exam. Student workbooks are included in the fee. In addition, CPT, ICD-9-CM and HCPCS are required books and are available for purchase in the JCCC bookstore. A three installment payment plan is available for this course.

Chemotherapy Today: Principles, Practices and Complications
Learn the basic principles behind chemotherapy, including multiple dosing regimens and targeting specifics areas of the cell cycle with multiple drug regimens. Examine side effects and dose limiting toxicities of specific, commonly
used chemotherapeutics. Review oncologic emergencies. RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

$27.00

XNC 2432

The Decision to Forgive

The decision to forgive after a wrong is sometimes easy, at other times very difficult. In this workshop, you will explore the complex concept and process of forgiveness: the pros, the cons, the risks and the benefits. Gaining more clarity regarding this issue will enhance your personal life as well as your professional life. RNs, LPNs, LMHTs and social workers will earn 3 contact hours for attending this workshop.

$27.00

XNC 2433

Understanding Latino Diversity in Health Care

America's Latino citizens come from dozens of nations and all races. Learn about the similarities and dramatic differences among Hispanic groups and the historical events that shape Latino culture today. Discover how Latino citizens from various backgrounds experience health and illness and explore factors that define quality care for your Latino patients. RNs, LPNs, LMHTs, social workers and counselors will earn 4 contact hours for attending this workshop. Kansas ACHAs will earn 4 (RC) hours.

$36.00

XNC 2434

A Window Into You: Why You Do What You Do

Ever wonder, "How did I get to be the way I am?" This workshop will allow you to look at some of the contributing factors that create your unique self--your family system, your birth order, your personality and temperament as well as your group or leadership style. RNs, LPNs, LMHTs, social workers, LMTs, and counselors will earn 6 contact hours. ACHAs will earn 6 (E) hours.

$72.00

Healthcare Management in a Changing Environment

The healthcare manager has never been more challenged than in today's ever changing environment. New and aspiring managers are invited to explore current concepts of successful management, including finance and budgeting, communication and delegation, scheduling, ethics, TQM and leadership skills. RNs and LPNs will earn 12 contact hours for attending this workshop. Kansas ACHAs will earn 12 (A) hours. Approval is pending for other health care professionals.

$99.00

XNC 2437

Depression: Marital and Family Process

Depression is a multifaceted symptom that is part of the human's evolutionary inheritance. Although depression is usually thought of as a problem in the
individual, Bowen family systems theory sees depression as a symptom of the family system. Using Bowen theory, this seminar presents a map for understanding how marriage and family relationships affect the development and maintenance of depression and how working on oneself in the context of important relationships can influence the course of this symptom. RNs, LPNs, LMHTs, social workers, counselors, psychologists and mental health nurse clinicians will earn 7 contact hours for attending this seminar.

$84.00  
XNC 2438  
Movement Strategies to Manage Chronic Health Conditions  
This experiential workshop explores how different types of holistic movement can be beneficial for specific chronic health conditions, including arthritis, stroke, multiple sclerosis, fibromyalgia, chronic fatigue, osteoporosis and stress. RNs and LPNs will earn 6 contact hours for attending this workshop. Approval is pending for other health professionals.

$54.00  
XNC 2439  
Understanding and Motivating A Real Zoo Around the Workplace  
Identify your primary personality style and learn how ingrained behavioral patterns tend to cluster into four basic personality styles. Expand your awareness of individual differences and learn to bring out the best in others, while taking advantage of strengths in the workplace and home. RNs, LPNs, LMHTs, social workers, counselors, dentists and dental hygienists will earn 6 contact hours for attending this workshop. ACHAs will earn 6 (A) hours. Approval is pending for other health care professionals.

$54.00  
XNC 2440  
Something Old, Something New: Total Joint Replacement  
As our population ages, total joint replacement is increasing as an option for joint pain. Disciplines in many areas of health care will likely encounter patients who plan to or have already had a joint replacement. This comprehensive presentation will prepare you to care for the total joint replacement patient across the continuum. RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTS.

$27.00  
XNC 2441  
New Drugs on the Block  
Take a comprehensive look at recently approved drug products in the U.S. Discover how they work, their place in therapy and adverse and drug interactions. RNs and LPNs will earn 3 contact hours for attending this workshop. Kansas ACHAs will earn 3 (RC) hours.

$27.00  
XNC 2442  
Growing Old Ain’t for Sissies  
Getting older is not for the faint of heart. The aging process brings slow, but sure, declines in physical and mental abilities. In this workshop, you will explore normal aging, its liabilities and rewards, as well as the psychological characteristics and physical habits we can adopt to face our senior years with optimism and hope. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours.

$72.00
XNC 2443
Attachment and Hunger: Understanding the Client with
An Eating Disorder This presentation will focus on the diagnosis and treatment of eating disorders within the context of connection and attachment. Nurturing care with balanced limit setting will be explored. RNs, LPNs, social workers, psychologists and counselors will earn 6 contact hours for attending this workshop.

$54.00

XNC 2444
Family Caregivers: Meet Their Needs and Improve Patient Outcomes
One out of three families in America is providing care for one of their members—a child using high-tech equipment or an elder with dementia. Family caregivers must depend on health care professionals for direction. Learn how to assess and meet the needs of family caregivers from an interdisciplinary group of experts. Hear the latest research and identify resources in the Kansas City area to obtain further assistance. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

$54.00

XNC 2445
Beginning Spanish for Health Professionals
Learn the rudiments of conversational Spanish in the health care setting, especially in the context of the therapeutic patient relationship. Vocabulary words, phrases, pronunciation and idioms will be covered as well as basic medical terminology. Cultural considerations of the Hispanic patient will also be considered. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours for attending this course. ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

$54.00

XNC 2446
Intermediate Spanish for Health Care Providers
This course will build on the Beginning Spanish for Health Professionals course and will expand upon the Spanish speaking experience in the healthcare setting. More vocabulary and grammar along with more practical activities will be provided to allow the students to develop their Spanish-speaking skills and speak the language with greater confidence. Cultural aspects will also be discussed. Completion of a beginning Spanish course is a prerequisite for this class. Bring required textbook to class. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 8 contact hours for completing this course. ACHAs will earn 8 (RC) hours. Approval is pending for other health professionals.

$72.00

XNC 2447
Decemered Grief: Grief and Loss During the Holidays
The extended "holiday" season can be difficult, draining, and dysfunctional for persons in grief - regardless of the particular loss. Many of the world religions have holidays in December. How can grievers adequately find support while everyone else is celebrating? For some, the holidays "reboot" memories and become a difficult emotional season. Learn what a family member, friend, or health care provider can do to support a griever - especially when this is not the first holiday season. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 3 contact hours. ACHAs will receive 3 (A) hours. Approval is pending for other health care professionals.
It’s Not Like They Were Family or Something! When
Friends Grieve in the Workplace "Not on company time!" is an attitude many
corporations take toward grieving employees. For many, workplace colleagues
become a family of investment. Thus, when a colleague dies, friendgrief is
experienced in the workplace. Learn how colleagues and management can work
together to create a griever-supportive work environment. RNs, LPNs, LMHTs,
social workers, psychologists, dentists and dental hygienists counselors will earn
4 contact hours ACHAs will receive 4 (A) hours. Approval is pending for other
health care professionals.

Sensitive Communication in Healthcare: In Case We Have
To Eat Our Words, Make Sure They Are Tender and Sweet!! This seminar
reminds health care professionals of sensitive principles of communication with
colleagues, supervisors and customers, particularly when tension or time pressure
is running high. It also serves as a wonderful review when communicating with
those we are privileged to live with and love. This presentation has been recently
updated to include a current review of the latest research and information on
health care communication. RNs, LPNs, LMHTs, social workers, counselors,
psychologists, dentists and dental hygienists will earn 6 contact hours. ACHAs will
earn 6 (A) hours. Approval is pending for other health professionals.

OSHA Update for the Healthcare Work Place - 2008
The OSHA Standards were passed to assure a safe working environment for all
healthcare employees. Staying compliant and current with OSHA standards is
definitely a challenge in today’s working environment. Bloodborne Pathogen
Standard annual training is the cornerstone of safety in the healthcare workplace.
This course will satisfy the required annual training for OSHA's Bloodborne
Pathogen Standard and provide an update on OSHA Standards critical to the
healthcare work place. Participants attending this course would benefit by already
having a working knowledge of the OSHA Standards. OSHA compliance is
essential and required for every healthcare work place. This course is presented
as a review and update. RNs, LPNs, LMHTs, dentists and dental hygienists will earn 4 contact hours. ACHAs will earn 4 (A) hours. Approval is pending for OTs
and PTs.

Medical Coding for the Experienced Coder: Certification
Preparation This course is designed for the experienced coder and will move at a
fast pace. The latest curriculum approved by the American Academy of
Professional Coders (AAPC) will be utilized and will prepare participants to sit for
the national AAPC exam. Course completion does not guarantee passing the
exam. There is an additional fee for the exam. Prerequisite: Medical
Terminology Course and two years verifiable coding experience.

Pain Management in the Substance Dependent Patient
Learn how to properly assess and manage pain in a patient who is currently
abusing or has a history of substance dependence. Implementing boundaries in
pain treatment plans does this. Boundaries include opioid agreements, random
urine drug screens, psychotherapy and frequent appointments. Appropriate pain
treatment plans should have both pharmacologic and nonpharmacologic components. RNs, LPNs, LMHTs, social workers, psychologists, counselors, dentists and dental hygienists will earn 4 contact hours. ACHAs will earn 4 (RC) hours. Approval is pending for other health professionals.

$36.00
XNC 2453
Mood Disorders and Anxiety: Diagnosis and Treatment
The program will include didactic and experiential activities that will assist the participant in understanding and being able to make the differential diagnoses in each of these DSM-IV categories. Participants will learn the epidemiology, etiology, diagnostic criteria, and recommended treatments for each diagnosis. Additional topics will include interactions with other diagnoses and ethics with regard to clients with these diagnoses. Experiential activities will include the application of therapeutic interventions to themselves in order to facilitate awareness and understanding, and the review of real case scenarios for practice in diagnosis and treatment management. This program meets social worker requirement for DSM-IV education. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 6 contact hours. ACHAs will earn 6 (RC) hours.

$54.00
XNC 2454
Give Me Your Tired, Your Poor: Ethics and Cultural Competency
"Give me your tired, your poor, your huddled masses yearning to breathe free," is inscribed at the base of the Statue of Liberty. Nowhere is that invitation more realized than for those who deliver health care! Today's patient population presents cultural challenges that at times seem overwhelming. This course begins with the use of a dramatic monologue, "Bonita and Her Children," performed by nurse dramatist, Julie Russell. Helen Emmott, community ethicist, will follow with ethical theory and facilitation of participant self-reflection. With the presenters' unique methodology, you will journey from reaction to practical response, better preparing participants to meet the challenges of cultural issues. Active listening, narrative ethics and the ethic of care will be utilized. RNs, LPNs, LMHTs, social workers, psychologists, counselors, dentists and dental hygienists will earn 3 contact hours. ACHAs will earn 3 (A) hours. Approval is pending for other health professionals.

$27.00
XNC 2455
Mary Ann Thompson 11th Memorial Cancer Symposium
Cancer is the culmination of years of mutation, promotion and progression within a cell. It is never too soon to intervene, but it can often be too late if left unchecked. The idea reigns that a person was healthy until diagnosed with cancer. Who tries to change this concept? A few clinicians who believes in prevention - that's who! Let's hope that the number of believers grows and infects the world with more than hope, with the knowledge of each person's power to prevent cancer. This workshop will review current clinical concepts in complementary medicine, nutrition, and meditation. Dr. Jane Murray will discuss that as more people are diagnosed with cancer every year the interest in all options to assist them, including complementary therapies, is growing exponentially. Dr. Murray will discuss a variety of complementary therapies that can be useful for people with cancer - both during and after conventional treatment. The evidence to support their use, when it exists, will be presented. A model of integrating the best of all healing options will be offered. Tom Jacobs will share stories and songs from the heart that give support to the spiritual journey and help you view life's challenges with an inner strength and a positive demeanor that strengthen the immune system. This workshop will feel more like a retreat as you laugh, cry and soak-in the time to reflect and refresh and learn to heal yourself. Nan Borchardt will focus upon nutrition variables shown to contribute to increased risk and identify specific protective dietary intake factors which reduce overall risk and promote wellness. RNs, LPNs, LMHTs, and massage therapists will earn 6 contact hours. ACHA 6 (RC).
Approval is pending for OTs and PTs.

$72.00
XNC 2456
Holistic Strategies for Managing Chronic Pain
According to the American Pain Society, pain is often undertreated, causing suffering and financial loss to individuals and to society. Considering the multidimensionality of pain, traditional treatment modalities are not always successful. Pain often requires more than medical management. The addition of complementary therapies to traditional treatment is based on the principles of psychoneuroimmunology, or the mind/body connection. In this experiential workshop, participants will discuss current research on complementary techniques, experience techniques first hand, and begin to develop a plan to integrate techniques into daily life and patient care. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. ACHAs will receive 6 (RC) hours. Approval is pending for other health professionals.

$54.00
XNC 2457
Baby Boomers are Busting Out All Over
This seminar will provide an overview of the so called "baby boom" generation. The session will provide a demographic profile and then identify the effects of this generation on numerous American social institutions such as the family, the economy, and the health care industry. Methods of working with "baby boomers" who have aging parents will also be included. RNs, LPNs, and LMHTs will earn 3 contact hours. ACHAs will earn 3 (A) hours.

$27.00
XNC 2458
The Silent Epidemic: Alcohol and Prescription Drug
This workshop explores the seriousness of this problem and ways in which to become involved and help break the cycle of these addictions. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for other health professionals.

$36.00
XNC 2459
Creative Patient Education: How To Teach So That
Patients Will Learn Positive educational outcomes are the goal of patient teaching encounters. Declining lengths of stay have made attaining those goals more challenging. Have you wondered if it is possible to provide patients essential information in today's rapid delivery healthcare environment? Despite the challenges such an environment poses to professionals, shortened lengths of stay have intensified the need for effective patient education. Leaving the hospital sooner and often with complicated care requirements, patients and families are expected to manage increasingly complex care. Creative approaches to patient education are essential so that we may prepare individuals for life beyond the hospital. This program will provide realistic, practical, and creative approaches to give patients the education they need to be successful. RNs, LPNs, LMHTs and social workers will earn 6 contact hours. Approval is pending for other health care providers.

$54.00
XNC 2460
What's Bugging You? Update on Tick Borne Illness and Infectious Diseases
This program will provide information about the symptoms, evaluation and management of various insect borne and infectious diseases
affecting Americans currently. These diseases include: west nile virus, SARS, anthrax, lyme disease, erlichiosis, rocky mountain spotted fever, malaria, hanta virus, plague, tularemia, typhus, babesiosis, tick paralysis, relapsing fever, eastern equine encephalomyelitis and St. Louis encephalitis. RNs, LPNs and LMHTs will earn 3 contact hours. ACHAs will earn 3 (RC) hours.

$36.00
XNC 2461
Nursing Assessment of Patients with Cardiac Disorders
Nursing assessment is the foundation for providing care. Proficiency in conducting a concise and systematic history and physical assessment is a key element. This program will provide the nurse with the skills to perform an adult cardiac assessment and to differentiate between normal and abnormal findings. RNs and LPNs will earn 4 contact hours. ACHAs will receive 4 (RC) hours.

$36.00
XNC 2462
Sixty, Seventy and Suddenly Single
Aging in America is changing the psychosocial make-up of our society in many ways and none so important as widowhood and later life divorce. Historically, these life events were handled in traditional ways by remarrying or often going to live with family. Today, seniors are exploring a number of options not open to them before, and women in particular are leading the way to broader horizons after becoming single again. This workshop explores the ways in which seniors survive and often thrive following the loss of a spouse. RNs, LPNs, LMHTs, social workers and psychologists will earn 3 contact hours. ACHAs will earn 3 (RC) hours.

$27.00
XNC 2463
Conscious Anger: Learning to Respond Instead of React
Anger is one of those feelings that is often misunderstood and, in many situations, is just downright scary! We can learn to run from it, deny it, block it, use it as a weapon, or we can learn to see it for what it is - just another emotion that is trying to teach us something about ourselves or someone else. In this workshop, we will explore some of the different facets of anger - the things that influence your particular style of feeling and expressing it, the ways in which the anger of others affects you and the ways in which unexpressed anger shows up. We will also discuss the importance of learning to "pick your battles" wisely in your personal as well as your professional life. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 3 contact hours for attending this workshop. ACHAs will earn 3 (RC) hours. Approval is pending for other health care professionals.

$27.00
XNC 2464
The Compassionate Heart: Responding to the Needs of Your Seriously and Chronically Ill Patients From the very moment that someone is told that they have a serious or chronic illness, not only their life but the lives of everyone near and dear to them will never be the same again. Life has changed and with the change comes loss, with loss comes grief, and with grief comes the opportunity to feel, to learn, and to grow into someone more than we were before. We will look at some of the physical, mental, emotional and spiritual aspects of someone who is going through this process. Whether you are dealing with the challenges of illness professionally or on a more personal level, developing a compassionate, understanding and loving heart can help to make a very difficult time a little less difficult. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists, dental hygienists will earn 3 contact hours for attending this workshop. Approval is pending for other health professionals.
Pharmacologic Interventions for Mental Illness
This course will discuss drug therapies across different mental health disease states with an emphasis on pharmacological mechanisms of actions and side effects. The course will also highlight some of the newer drugs approved by the FDA within the last 3-5 years and the biology of some of the receptors and neurotransmitters involved. This course is designed to be interactive and involve participants in their learning. Your course experience will be enhanced if participants come prepared to talk and ask questions about some of the patients in your own clinical settings. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 6 contact hours for attending this workshop. ACHAs will earn 6 (RC) hours.

Long Term Care: Issues, Changes and Approaches for Our Future
Plagued with years of poor reimbursement, bad public image and a staffing crisis, the Long Term Care provider community is now rising above the struggles with new innovations and strategies. Demands will increase due to our aging population, especially within the next 20 years. This seminar will identify some of the issues and discuss their causes. Focus will then be shifted to successful strategies for dealing with those issues and current realities. RNs, LPNs, LMHTs and social workers will earn 3 contact hours. ACHAs will earn 3 (A) hours. Approval is pending for other health professionals.

Nursing Care of the Patient in Renal Failure
This interactive presentation focuses on the common causes, physiological alterations, clinical manifestations and nursing care of the patient suffering from renal failure. A differentiation is made between acute and chronic renal failure. Current treatments, such as dialysis and organ transplantation will be discussed. An interactive case approach is used to assist participants with learning about renal failure. This is basic introductory presentation. Enrollment is limited to 40. RNs and LPNs will earn 4 contact hours for attending this seminar. ACHAs will receive 4 (RC) hours.

Levels of Healing
This program explores the levels of healing, physical, psychological and spiritual, and the practitioner’s interventions at each of these levels. Beyond meeting the physical, medical needs, learn ways to promote a positive attitude during the healing experience and help your patients find meaning in their pain and suffering. Come and explore how to integrate this holistic approach in your practice. RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 3 contact hours for attending this seminar. ACHAs will receive 3 (RC) hours. Approval is pending for other health care professionals.

Diagnosing and Treating the Continuum of Grief
When loss occurs for individuals the resulting ripple effects of change permeates a family system as individuals move to adjust and adapt to the loss. The grief and mourning journey is unique to each person however there are some commonalities often shared by fellow travelers on the road. This workshop will explore what is referred to as the grief journey. Attention will be given to the
following areas: clinical aspects of diagnosing and treating grief; practical interventions to use with those experiencing loss; issues related to trauma; grief over the life span; discussion on the concept of complicated mourning; and cultural considerations in working with people around loss and grief issues. This course meets the requirements for social worker's DSM-IV annual training. RNs, LPNs, LMHTs, social workers, counselors and psychologists will earn 7 contact hours for attending the seminar. ACHAs will receive 7 (RC) hours.

$84.00
XNC 2470
Psychosocial Aspects of Patient Care: Now What Do
Many patients bring multiple emotional issues to the medical setting. In addition to the demands of addressing medical needs, the health professional is often used as a sounding board or confidant on emotional matters. It can be difficult to know what to say or suggest. Intense emotional reactions are common during crisis or anxious times, which can be especially challenging. This workshop is designed for the non-mental health professional. Discussion will center on interactions and interventions one might use to address the non-medical areas of life. RNs, LPNs, and LMHTs will earn 3 contact hours for attending this workshop. Approval is pending for OTs and PTs.

$36.00
XNC 2471
Insulin Resistance: The Path to Metabolic Syndrome and Diabetes Type 2? Obesity has risen to epidemic proportions in the US today. An estimated 64% of the current population is either overweight or obese. Metabolic Syndrome, the term used to describe a cluster of related medical conditions (including obesity, hypertension, high blood sugar), is also on the rise. An estimated 47 million Americans exhibit symptoms of Metabolic Syndrome. Many of these individuals eventually develop Diabetes Type 2. Can these conditions be identified and treated early to slow or stop the onset of Diabetes? This lecture will discuss Insulin Resistance (IR) as the root cause of these disorders and propose strategies for early detection and possible prevention of Metabolic Syndrome and Diabetes Type 2. RNs and LPNs will earn 3 contact hours for attending this seminar. Approval is pending for other health care professionals.

$27.00
XNC 2472
Assuring a Safe Working Environment: Applying the OSHA Standards to the Healthcare Workplace 2004 It is important for Healthcare employers and employees to not only know what is required by the OSHA standards, but also understand the spirit and intent of the standards to provide a safe working environment. OSHA has updated the Bloodborne Pathogen Standard, Recordkeeping Standard and General Industry Standard in the last three years that will affect your OSHA compliance program. You need to know what the latest information is for your healthcare workplace to be in compliance with OSHA regulations. This course will satisfy the required annual training for OSHA’s training. RNs, LPNs, LMHTs, social workers, dentists and dental hygienists will earn 6 contact hours for attending this seminar. ACHAs will receive 6(A) hours. Approval is pending for other health care professionals.

$54.00
XNC 2473
Living in a Culture of Loss
No one is immune from loss. Not in today’s business and social climate. Loss of status, employment, marriage, parent(s), spouse, child, sibling, mind, health, financial security and/or integrity are part of the task of navigating life in a loss-centric culture. The motivationalists tell us it’s about “turning lemons into lemonade!” You still end up with sticky lemon pulp and peels. How can one
recognize, integrate, and come, over time, to value the loss-the accumulated losses? How can the palette of loss become a resource for personal growth and maturation? It's not what you will do "about" the loss. It's, "What will you do through the loss?" RNs, LPNs, LMHTs, social workers, counselors, psychologists, dentists and dental hygienists will earn 4 contact hours for attending this seminar. ACHAs will earn 4 (RC) hours. Approval is pending for other health care professionals.

Advice Outside of the ER/Office

Nurses are always being asked for advice by friends, neighbors and family. Do you ever wonder if there are limitations on what kind of information or assistance a nurse can give outside of the office? Do you worry about your liability when helping a friend with a medical problem? This lecture will answer those questions and more. RNs and LPNs will earn 3 contact hours for attending this seminar.

End-of-Life Nursing Education Consortium Training (ELNEC)

Nurses spend more time with patients and families facing the end of life than any other health professional. Nurses are intimately involved in all aspects of end-of-life care and they address the myriad of needs facing individuals at this time of life. Expert nursing care has the potential to greatly reduce the burden and distress of those facing life’s end and the ability to offer support for the many physical, psychological, social, and spiritual needs of patients and their families. This educational activity utilizes the End-of-Life Nursing Education Consortium’s curriculum and includes all nine ELNEC modules addressing critical aspects of end-of-life care. Attendance for all nine modules is required to utilize the “ELNEC Trained” designation. RNs and LPNs will earn 9 contact hours for attending this seminar.

Seizure Salad: Recognizing Uncomplicated Childhood Seizures

Uncomplicated seizures and epilepsy are common findings in infants and children. Nurses need to have an understanding of epilepsy syndromes that occur in children, such as febrile seizures, benign focal epilepsy of childhood, complex partial epilepsy, juvenile myoclonic epilepsy and video game related epilepsy. Nurses also need to be aware that not all uncomplicated childhood seizures require neuro-imaging or treatment. RNs, LPNs, LMHTs and social workers will earn 3.5 contact hours.

Presentation Skills for Health Care Professionals

Speaking effectively is a top skill for success in the health care industry. If you want to look, feel, and sound more confident in speaking situations, you’ll want to enroll in this class. Learn how to easily organize your thoughts, confidently present your information and maintain audience interest. RNs, LPNs, LMHTs, social workers, and counselors will earn 6 contact hours. ACHAs will earn 6 (A) hours. Approval is pending for OTs and PTS.

Just a Behavior? Managing the Behaviors of Autism

As therapeutic interventions and scientific research continue to improve the quality of life for individuals with autism and their families. The stereotyped
description of a child banging a head against the wall while rocking and screaming has become vastly outdated. Individuals with autism spectrum disorders are winning basketball games and spelling bees, starting companies, and writing books. While awareness of autism disorders has grown, practical knowledge about this group of disorders has not followed suit. This course is designed to familiarize students with the characteristics of autism and Asperger Syndrome, with a dual focus on behavioral and social challenges. Particular emphasis will be placed on the proactive and reactive management of challenging behaviors as well as the promotion of social competence. RNs, LPNs, LMHTs, social workers and counselors will earn 4 contact hours. Approval is pending for OTs and PTs. $48.00

XNC 2484

Effective Teamwork

Health care is a growing industry where people work non-standard hours and often feel they lack sufficient resources. It is essential to their success that they involve, support, and share information with those in their teams or work groups. This course helps managers focus their staff on personal, interpersonal, and organizational advantages of working together effectively and efficiently. RNs, LPNs, LMHTs, social workers, and counselors will earn 3 contact hours. ACHAs will earn 3 (A) hours. $36.00

XNC 2486

Obesity and Bariatric Care

This course is designed to provide an overview of the obesity epidemic affecting so many Americans today. The treatment options available through bariatric surgery offer many of these people new hope for a better quality of life. The process of identifying appropriate surgical candidates, resolving co-morbidity issues and psychological and sensitivity issues will be addressed in this program along with the significance of multidisciplinary care to foster positive outcomes. Specific components of a comprehensive surgical program will be identified and reviewed. RN, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs. $36.00

XNC 2487

Leadership in Long Term Care

Leadership takes action, communication and insight, not to mention bravery when you work in the long-term care profession. This course will talk about effective leadership styles and techniques to help build teams and consistency. With the changing survey process, we will focus on the latest trends, deficiencies and how to keep up to date on survey issues, while being proactive in meeting these challenges. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (A) hours. Approval is pending for OTs and PTs. $36.00

XNC 2488

When You and Me and Baby Don’t Make Three: Infertility

The frequency of infertility has remained unchanged over the past century, however, medical advances have overcome many of the obstacles faced by couples wanting to have children. This fact brings hope to thousands of people every year and yet, further education is needed to help these people come to understand and be comfortable with the assisted reproductive technologies now available. Clients need this education to become comfortable with specific psychological and sexual issues that often accompany infertility and affect relationships. Participants will learn how to identify and assess the complex psychological and sexual issues that couples dealing with infertility face and what signs to look for when determining to make a referral for counseling. RNs, LPNs,
LMHTs, social workers and counselors will earn 3 contact hours.

XNC 2489

Why We Click With Some, and Clank With Others
This course will utilize the DiSC personal profile to help each individual better understand what their strengths and weaknesses are as well as those of others. This information is then utilized to help participants understand how to adapt their style to that of others and explore interpersonal relationships at work. This program also develops key skills based on communication, teamwork and leadership to improve personal and professional relationships. Course fee includes DiSC Personal Profile workbook ($25). RNs, LPNs, LMHT, social workers and counselors will earn 6 contact hours. ACHAs will earn 6 (A) hours.

$97.00
XNC 2491

Caring for the Caregiver: The Hidden Patient
Approximately 50 million people in the United State provide care for an elder or disabled family member during any given year. As the population of persons age 65 and older climbs to 20 percent by 2030, more and more families will be faced with care giving responsibilities. Caregivers must provide care under complex circumstances, balancing care giving with other responsibilities related to their own families and work outside the home. This seminar provides information about our aging population, issues related to care giving, how to support the caregiver, and available resources. RNs, LPNs, LMHTs, social workers, counselors and psychologists will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

$72.00
XNC 2492

Building Habits that Empower Positive and Durable Change in Clients
Boost your professional effectiveness by learning to make the most of both your knowledge and personal style. First, we'll examine the five strategies to success and how terminology and communication are key to facilitating change in clients. Then the next level begins with professional philosophy and demeanor: How do you see your role? Is success more art or science? How do you use your personality as an instrument? What elements of routine and self-discipline (as well as self-care) can heighten your effectiveness (think boundaries, record-keeping, professional support and consultation, policies, and systems)? This course will encourage participants to maximize the resources they bring to future professional interventions. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours.

$72.00
XNC 2493

Blending Families: Practical Skills and Insights for Combining Families
Blending families are the fastest growing lifestyle in America. The complexities far exceed the 'Brady Bunch' perception. Half of American children will live in divorced families before they are age 18. The divorce rate for first marriages is 50%, second marriages is 60%, and 75% for third marriages. Children are left with revolving parents and parents with revolving responsibilities. The challenge of clarifying ambiguous boundaries and roles takes 5-7 years. This course will cover how these Blending families can, with guidance and psycho-education, be very successful and positive for everyone. RNs, LPNs, LMHTs, social workers, counselors and psychologists will earn 6 contact hours. Approval is pending for OTs and PTs.

$72.00
XNC 2494
Neglected Articles: Advocacy, Aging and the Social Work Code of Ethics

Although working with the aging population exposes the significant presence of age discrimination that persists in our society, much of social work efforts in the aging field are directed at maintaining inadequate systems. This class will focus on the demands of the social work code of ethics as it relates to advocacy as interpreted through individual, group and community work and how those demands take form in day to day work with this population. Social workers and counselors will earn 3.5 contact hours.

$42.00

XNC 2496

Women With Attentional Issues: How to Intervene When Traditional Treatment Fails

Females with attentional deficits often fall through the cracks in terms of both diagnosis and treatment. Unlike their male counterparts, most women report no childhood history of disruptive classroom behavior, no impulsive hyperactivity. Instead, we see a pattern of adulthood contradictions: creativity and underachievement, plus insightful, witty personalities with troubled relationships. Participants will learn to identify and appropriately address attentional issues in women. Both professionals and clients benefit from a multi-discipline approach to client care and education, and this course will invite participants to increase their personal resource lists, gain a better understanding of which interventions are not appropriate for this population, and explore the unique benefits of a women's attention-deficit support group. RNs, LPNs, LMHTs social workers and counselors will earn 6 contact hours.

$72.00

XNC 2497

A Culture of Change in Long-term Care

As many industries use the term culture change, in long-term care it is vital and long overdue. In this course you will learn the changing trends of healthcare delivery affecting our seniors. Understand how culture change/resident centered care is transforming the long-term care profession. Identify the barriers and road-blocks found during the transformation process. Discover how employee empowerment and self-directed teams can effect retention, job satisfaction and resident outcomes. Find out what type of leadership skills best work in culture change. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn (3 RC) hours. Approval is pending for OTs and PTs.

$36.00

XNC 2498

Epilepsy in Infants and Children

Epilepsy, also called the "sacred disease" and the "falling sickness", affects one percent of the U.S. population. Epilepsy is particularly difficult to recognize early in infants and children. Epilepsy may be considered a "symptom" and not a disease, so that every effort should be made initially to find its cause or etiology. Diagnostic investigations may include laboratory tests, neurophysiological (EEG) and neuroimaging studies (CT, MRI, PET, ultrasound). Antiepileptic drugs (AED) and education of family, teachers and health care givers are important components of management. This workshop explores how successful diagnosis and treatment may allow epileptic patients to have normal lives. RNs, LPNs, LMHTs, social workers, and counselors will earn 3 contact hours. Approval is pending for OTs and PTs.

$36.00

XNC 2499

Overcome Behavior Patterns That Pollute

Interpersonal communication can contribute to harmony or disharmony in our relationships. Many of us learned patterns of thinking and behaving that create stress and emotional pain. Frequently we are unaware of how to identify and deal
with these destructive "no win" patterns that wreak havoc in our lives and relationships. In this course participants will to learn how to examine their patterns of thinking and interacting and determine how to make productive changes that can transform their lives. This course will be useful to clinicians to develop tools that can be used to help their own clients as well. RNs, LPN, LMHTs, counselors and social workers will earn 3 contact hours. ACHAs will earn 3 (A) hours.

$36.00
XNC 2501
Building Relationships That Can Prevent Youth Violence
American culture is the most violent in the world and our youth are now participants in crimes once thought unthinkable in ones so young. The causes for this are many, but no longer can we ignore the problem. The research shows that one caring adult can make a difference when they realize the pain our youth are experiencing trying to grow up in complex society. This symposium explores the individual psychiatric conditions, family, cultural and the societal dynamics that culminate in this serious problem. Strategies for individuals and organizations to apply that will make a difference will be presented. Lunch will be provided. RNs, LPNs, LMHTs, social workers, counselors, and psychologists will earn 16 contact hours.

$240.00
XNC 2502
Diagnosing and Treating Migraines and Other Headaches
Headaches, including migraine, are common in both children and adults. A simple classification of headaches includes tension headaches, migraine, and organic (caused by lesions or increased pressure in the brain) headaches. Each category has distinct symptoms that help to recognize each type of headache. Migraine, particularly in young children, may present as recurrent vomiting, vertigo or weakness (also known as ?migraine equivalents?). A correct diagnosis, appropriate medications and removal of stress and other contributing factor are helpful in controlling the majority of headaches. RNs, LPNs, LMHTs and social workers will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

$36.00
XNC 2503
Life's Anxieties: The Diagnosis and Treatment of Anxiety Disorders
This six hour course will be given in two, three hour segments. Both segments meet the BSRB requirements for diagnosis and treatment of mental illness. The morning section will cover the physiology of anxiety, including the chemical and physical changes that occur when we become anxious or suffer a panic attack. The diagnostic symptoms of panic attacks and treatment options will be addressed. The afternoon session will cover the remainder of the anxiety disorders in the DSM IV. Both diagnostic criteria and treatment options will be presented. The class will learn relaxation and breathing exercises that can benefit anyone suffering from an anxiety disorder. RNs, LPNs, LMHTs, counselors, psychologists, dental hygienists and social workers will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval pending for OTs and PTs.

$72.00
XNC 2504
Polish Up Your Skills: Physical Assessment
This is a review and refresher course of key physical assessment techniques to guide the clinician in the long term health care setting. The clinician will have a better understanding of performing a detailed adult physical examination and provide care based on these assessment findings in the long term care setting. RNs, and LPNs will earn 6 contact hours.

$72.00
XNC 2505

Generational Clashes: Building unity From Generational Diversity

One size fits all teamwork, leadership, recruitment and retention strategies are as outdated as go-go boots, disco music and Microsoft Word 3.0. Traditionalists wonder what happened to good old fashioned work ethic. Baby boomers worry their experience and interpersonal skills are no longer valued. Gen Xer's fear the organization promotes burnout and has no plans to facilitate their skill development. Millennials are troubled by lack of coaching and encouragement from supervisors. When these four groups meet in a health care organization conflict erupts as each group struggles to get their needs met. The strengths these generational groups bring to the workplace are phenomenal, but often generational limitations are the topic of the day. In this workshop you’ll learn how to avoid generational clashes and build unity from generational diversity. RNs, LPNs, LMHTs, social workers, and counselors will earn 6 contact hours. ACHAs will earn 6 (A) hours. Approval is pending for OTs and PTs.

$72.00

XNC 2506

Dysmorphic Syndromes: Down Syndrome and Other Abnormalities in Childhood

Recognition and understanding of syndromes (a collection of abnormalities) is an important part of the knowledge required by anyone involved in health and human services. For example, knowledge about Down syndrome facilitates the work of nurses, teachers, physical therapists, speech and language therapists who participate in the care of such persons. In addition to Down syndrome, more than a thousand other syndromes have been described. Databases are available to help identify individuals with syndromes. RNs, LPNs, LMHTs, social workers, dietitians and counselors will earn 3 contact hours. Approval is pending for OTs and PTs.

$36.00

XNC 2507

Obesity and Bariatric Care

This course is designed to provide an overview of the obesity epidemic affecting so many Americans today. The treatment options available through bariatric surgery offer many of these people new hope for a better quality of life. The process of identifying appropriate surgical candidates, resolving co-morbidity issues and psychological and sensitivity issues will be addressed in this program along with the significance of multidisciplinary care to foster positive outcomes. Specific components of a comprehensive surgical program will be identified and reviewed. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

$36.00

XNC 2508

Understanding Current Strategies in Diabetes Management

Understanding diabetes as a multi-organ disease broadens the scope of interventions for early treatment and ongoing management of this disease. This changing management includes the use of a multitude of new oral medications and insulins that have been introduced during the past five years. This seminar will present a series of case studies demonstrating the implementation of a wide variety of diabetes management therapies. The importance of in-hospital hyperglycemic control, early addition of insulin therapy in Type 2 diabetes, and a broad overview of the many oral anti-diabetic agents will be discussed. RNs and LPNs will earn 6 contact hours.

$72.00

XNC 2509

Insulin: Understanding Onset, Peak and Duration
Insulin analogs, insulin pumps and inhaled insulin have dramatically changed the fine tuning options in the management of diabetes management. Insulin is always a potent medication and understanding the differences in the variety of insulins is critical to the safe use of this medication. This seminar will present a clear understanding of insulins and present case studies to demonstrate practical application of this understanding. RNs and LPNs will earn 4 contact hours.

$48.00

**XNC 2511**

**Diagnosis and Treatment of Schizophrenia**

This continuing education course will look at the impact of a diagnosis of schizophrenia on the family system. This course will stress the diagnostic criteria of schizophrenia from the DSM-IV TR and how these criteria would manifest in a person diagnosed with schizophrenia. From there, emphasis will be placed on understanding schizophrenia and its impact on the family system. This course will conclude with discussion of family intervention, resources and education as an adjunct to the treatment of schizophrenia. RNs, LPNs, LMHTs, social workers, and counselors, will earn 3 contact hours. ACHAs will earn 3 (RC ) hours. Approval is pending for OTs and PTs.

$36.00

**XNC 2512**

**EKG-Making Sense of a Squiggly Line**

In this course participants will learn or for those who already are familiar, re-learn the fundamentals of EKG interpretation. The seminar will start with the basic principles of EKG's and help participants become comfortable with interpreting the important EKG patterns that they will encounter. RNs and LPSs will earn 4 contact hours.

$36.00

**XNC 2513**

**Traumatic Brain Injury and PTSD**

People sustain head injuries everyday from bumping into a cabinet door to being in horrific accidents and war. Minor head injuries usually go away without treatment. Serious injuries obviously require emergency treatment. This class will focus on the nurse?s role in the early detection and treatment of Mild Traumatic Brain Injuries that often go unnoticed, yet cause significant impairment. RNs, LPNs, and LMHTs will earn 6 contact hours.

$72.00

**XNC 2514**

**Low Back Pain: Non-invasive Assessment and Treatment**

In this workshop the student will explore the common causes of Low Back Pain (LBP) and the conditions associated with it. Symptoms and types of LBP and ways to determine the causes will be reviewed as well as how various professions diagnose LBP. The prevention and treatment of LBP by medical, chiropractic and massage therapy professionals will be included. Dr. Uriarte's Myokinesthetic System of treatment for low back pain will be reviewed and hands on practice will be included. RNs, LPNs, LMHTs and Massage Therapists will earn 6 contact hours. Approval is pending for OTs and PTs. Massage therapists please bring your own table.

$72.00

**XNC 2516**

**Troubled Youth: Where to Turn and How to Help**

Drugs, alcohol, crime, gangs, truancy, and mental illness plague some youth today. Though a small percentage of the total population, these young people wreak untold havoc on their families, schools, neighborhoods, law enforcement...
and community services. Healthcare professionals are frequently left bewildered about how to plan interventions, what resources to contact and where, and what approach is best to connect these youth with the resources they need to make a successful transition to productive society. This workshop will explore the psychosocial and medical dynamics involved in accessing, diagnosing, treating, and aftercare of troubled youth and their families. RNs, LPNs, LMHTs, social workers, counselors, psychologists will earn 6 contact hours.

$72.00
XNC 2517

Understanding Chemical Dependence: From Shame to Acceptance
One in 10 Americans are substance dependent. Everyone knows someone who is an alcoholic or addict. With inaccurate concepts of addiction, fueled by frustration and bewilderment, we form opinions that create detrimental stigmas. These stigmas, in turn, prevent people for seeking help and/or benefiting from it. This course will look at addiction from a medical disease perspective, comparing addiction to other diseases and helping the participant understand addiction for what it truly is and to be better prepared to intervene in its deadly path. This course meets the DSM - IV criteria for diagnosis and treatment. RNs, LPNs, LMHTs, counselors, social workers, psychologists, and dental hygienists will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval is pending for OTs and PTs.

$72.00
XNC 2518

Survey Readiness for Assisted Living
The survey process in assisted living is a key component in the delivery of quality care. This is an interactive course for professionals designed to provide tools to help prepare their staff for the survey process. The course will identify and discuss key survey issues so the attendees can self-evaluate their programs for their weakness and strengths. RNs, LPNs, and LMHTs will earn 6 contact hours. ACHAs will earn 6 (A) hours. (fee includes regulation manual)

$72.00
$20.00
XNC 2519

Core Concepts of Mental Health Diagnosis and Treatment
This workshop looks at the core concepts in the diagnostic and treatment process. Concepts such as forming an alliance, framing, and reframing the conflict, dealing with resistance are the bread and butter elements of our work with clients. This workshop brings these elements of treatment alive through a mixture of role-playing, discussion, and lecture. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours

$36.00
XNC 2521

Planning for the Baby Boomers: The Future of Long-Term Care
The U.S. Census Bureau shows the population over the age of 65 growing from 36 million in 2003 to 72 million in 2030. The fastest growing segment percentage wise in our population today are the "elite old" - those 85 to 100 years old. The need for long-term care homes will be staggering. But Baby Boomers will not accept institutionalized care. They will want a quality of life prior generations have not often been able to access once they leave independent living. This workshop will explore the changing culture in long-term care, the ethical issues related to aging services that this country will face, the pressure administrators and staff will face to create "home" in the face of increasing federal and state regulations, and what is currently being done to make long-term care an enjoyable, satisfying environment to work and live. RNs, LPNs, social workers, and dieticians will earn 3 contact hours. ACHAs will earn 3 (A) hours. Approval is pending for OTs and PTs.
Hope for Happy Health Care

Happy Health Care is distressed. Relentless change, difficult coworkers and chaotic teams have left her overwhelmed and burned out. She wonders how to get through demanding days with a shred of joy. Happy complains about her circumstances to anyone who will listen, but so far she hasn’t discovered methods to improve her situation. She dreams of retreating to a tropical island, but figures the bugs and tourists would get on her nerves. Happy is a bundle of possibilities, but she’s dwelling on limitations and becoming limited herself. She told coworkers she was thinking of abandoning her health care careersaying she ws tired of being tired, tired of being grouchy and tired of pretending to be Happy. Is there hope for Happy? Join us and find out. RNs, LPNs, LMHTs, social workers, counselors, dieticians, dental hygienists will earn 4 contact hours. ACHA will earn 4 (A) hours. Approval is pending for OTs and PTs.

The Healing Power of Nature

Nature has many miraculous ways to heal itself and us. Research has shown that a natural setting rather than an urban one reduces cardiac stress and promotes healing following surgery. Participants will explore ways that nature uses metaphors to relieve stress, cope with crisis, ease burnout and ways to walk in nature specifically for creative problem solving. The seminar includes a slide presentation on creative problem solving through nature and explains how to utilize this technique. For part of the seminar, you actually go out into nature to practice what you have learned. Walking long distances is not required, but is an option. This interactive and partially outdoor seminar will provide new insights on how to use the natural world for growth and healing. RNs, LPNs, LMHTs, social workers and counselors will earn 4 contact hours. Approval is pending for OTs and PTs.

Marital Autopsies: What Failed Marriages Teach Us About Good Marriages

Failed marriages teach us how to make a good marriage. Drawing on the work of John Gottman, Frank Pittman, and others and including his own clinical experience in working with couples, Dr. Stamm takes the audience on a journey through marriage that offers hope that we may all improve our own marriages and as therapists help our clients to improve their marriages. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours.

Methicillin Resistant Staph Aureus: Bad Bug Gone Worse

Disease-causing organisms that have become resistant to drug therapy are an increasing public health problem in hospitals, non-hospital health care settings (long-term care and skilled nursing homes, home care, hemodialysis centers, and physicians’ offices) and in the community. Common examples of these organisms include methicillin/oxacillin-resistant Staphylococcus aureus (MRSA), vancomycin-resistant Enterococcus (VRE), extended-spectrum beta-lactamases (ESBLs, resistant to cephalosporins and monobactams), and penicillin-resistant Streptococcus pneumoniae (PRSP). This program will help update your knowledge and familiarize you with antibiotic resistance and MRSA and provide you with strategies to effectively manage MRSA in the health care environment. Discussions will focus on disease transmission, epidemiology, treatment and prevention. In addition, antibiotic resistance in other bacteria and nosocomial infections will be discussed. RNs, LPNs, LMHTs, social workers, massage therapists, dieticians and dental hygienists will earn 6 contact hours. ACHAs will earn (RC) hours. Approval is pending for OTs and PTs.
Depression, Suicide and Self-Mutilation
One in ten Americans suffers from the medical illness we have come to know as depression. The worst outcome of depression is suicide. One in five of those afflicted with this condition will die by their own hand. Depression also takes a heavy toll on work performance, physical health and quality of life. If recognized, the illness can be effectively treated in most (70-80%) cases. This course will review the signs and symptoms of depression, suicidal risk and self-mutilation and effective treatment interventions. RNs, LPNs, LMHTs, social workers, and counselors will earn 3 contact hours. ACHAs will earn 3 (RC). Approval is pending for OTs and PTs.

Influenza: Could the 1918 Pandemic Come Again?
It is estimated that more than 200,000 people are hospitalized every year following complications arising from influenza infection, with around 36,000 mortalities being recorded in the US alone. This program will help update your knowledge and familiarize you with the influenza virus. Discussions will focus on disease transmission, epidemiology, treatment and prevention. In addition, mutation of the virus and how this contributes to the emergence of new viral strains including avian strains will be discussed. The threat of an influenza pandemic and the current preparedness strategies for pandemics will also be explored. RNs, LPNs, LMHTs, social workers, dietitians, and dental hygienists will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval is pending for OTs and PTs.

HIV/AIDS Update
It is estimated that 39.5 million people were living with Human Immunodeficiency Virus/Acquired Immunodeficiency Syndrome (HIV/AIDS) worldwide as of the end of 2006. This program will help update your knowledge and familiarize you with HIV/AIDS and provide you with strategies to effectively manage HIV/AIDS in the health care environment. Discussions will focus on disease transmission, epidemiology, treatment and prevention. In addition, the emergence of human immunodeficiency virus as an international pathogen will be discussed. Participants will discuss strategies to prevent stigma and educate about HIV/AIDS in the health care environment and in the community. RNs, LPNs, LMHTs, social workers, dietitians and dental hygienists will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval is pending for PTs and OTs.
Culture Change in LTC: Meeting the Psychosocial Needs of Residents

Meeting the psychosocial needs of those living in long-term care is challenging, but critical for their health and well-being. It has been estimated that up to 60% of institutionalized residents suffer from depression. Depression increases mortality and morbidity regardless of adequate treatment for all co-morbid conditions. Many of these seniors simply “give up.” The good news is there is a revolution sweeping our country to put the “home” in nursing home. This workshop reviews the psychosocial needs of the elderly, and reviews the signs, symptoms and treatment of depression. By addressing the environmental and interpersonal issues that negatively impact residents, much can be done to relieve depression. This workshop explores ways in which the Pioneer Network and other organizations are spearheading the culture change movement in America and transforming the culture of long-term care away from the medical model toward the person-centered model and securing a better future for all who live and work in long-term care. RNs, LPNs, LMHTs, social workers and dieticians will earn 4 contact hours. ACHAs will earn 4 (RC) hours. Approval is pending for OTs and PTs.

Stay Tuned! Successful Approaches to Listening
The strongest influence on the quality and outcome of interpersonal communication is not talking, but listening. Yet, most people screen out or misunderstand the intended meaning or purpose of the sender’s message in over 70 percent of communications. In today's busy health care environment strong listening abilities are key to “getting it right” and delivering quality care. This course uses the Personal Listening Profile to identify the five different listening approaches and to teach you how to listen and respond appropriately with those you communicate with. RNs, LPNs, LMHTs, social workers, counselors and dieticians will earn 6 contact hours. ACHAs will earn 6 (A) hours. Approval is pending for OTs and PTs. Note: Course fee includes additional supply cost.

$100.00

Self-Care Strategies for Health Care Practitioners
Providing healthcare can be both physically and emotionally taxing on the practitioner. By taking the time to incorporate proper self-care techniques into their lives, healthcare practitioners can increase their strength, vitality and fluidity allowing them the opportunity to increase the longevity of their career and be more effective providers. This class will introduce a number of quick, easy self-care strategies to address various stressors that affect healthcare practitioners. RNs, LPNs, LMHTs, social workers, counselors and massage therapists will earn 4 contact hours. ACHAs will earn 4 (E) hours

$48.00
XNC 2543

Play Therapy: Working With Children
Working with children in a therapeutic setting is often challenging when verbal and language skills are not yet fully developed. The field of play therapy is a vital and effective tool when working with this population though it is often not well understood. This workshop will discuss the practicality of play therapy in both a theoretical and clinical presentation. Participants will be able to identify theories of play therapy vis a vis Adlerian, psychoanalytic, family and cognitive behavioral. Play therapy in the context of education and family interventions will be discussed, and identifying techniques that are utilized in this approach. RNs, LPNs, LMHTs, counselors and social workers will earn 6 contact hours.

$72.00
XNC 2546

Exploring Energetic Healing
Can the human mind heal the body? Learn how mind-body healing methods such as meditation, visual imagery, and prayer affect the body’s ability to fight infection and ward off the damaging effects of stress and illness. Discover why more and more healthcare professionals complement traditional western medicine with mind-body healing methods an integral part of patient care. RNs, LPNs, LMHTs, social worker, counselors, and massage therapists will earn 3 contact hours. Approval is pending for OTs and PTs.
Neurological Evaluation of Infants and Children

A complete neurological evaluation of infants and children requires a detailed history, including pre-natal, perinatal and neonatal details and developmental events, and a complete examination of both the central and peripheral nervous systems. This includes evaluation of mental status, cranial nerves, motor and sensory functions, reflexes, and cerebellar function. The history and neurological examination must be modified according to the child’s age and developmental stage. In the case of suspected brain or neuromuscular abnormalities, additional studies such as EEG (brain-wave test), evoked potentials, EMG (electromyography), neuro-imaging (CT, MRI, MRS and MRA), may be necessary. RNs, and LPNs will earn 3 contact hours.

Customer Service: Getting It Right

Healthcare is a profession that is people-oriented and which requires exceptional communication skills, organization, and the ability to solve problems under pressure. The expectations of patients and their families in this zero-time world are high and advances in technology are placing more demands on you. As a health professional you must constantly hone your skills and find ways to improve your efficiency for improved patient satisfaction. The high stress associated with these jobs requires a positive mental attitude and healthy ways of dealing with the pressure while providing the service your patients expect. This workshop will give you insight into today’s patient demands and how to handle them, and how to stay energized and motivated as you strive to improve patient service. RNs, LPNs, LMHTs, social workers, and counselors will earn 3 contact hours. ACHAs will earn 3 (A) hours. Approval is pending for OTs and PTs.

Inpatient Hyperglycemia and Its Impact on Our Patient Population

Hyperglycemia and insulin resistance has been identified in critically ill patient with or without a history of diabetes. In addition, hyperglycemia has been identified as a risk factor for poor clinical outcomes. Improving glycemic control in the hospitalized patient continues to be a challenge but interventions to maintain normal glucose levels is relevant and important to nursing practice. RNs, and LPNs will earn 3 contact hours.

Metabolic Syndrome: A Closer Look

Until recently it was thought that increases in blood pressure, triglycerides and cholesterol, and blood sugar were a "normal" part of growing older. We now know this is far from the truth and has serious consequences. Metabolic Syndrome is a cluster of metabolic abnormalities that increase the risk of cardiovascular disease and type 2 diabetes. These abnormalities are related to the body’s metabolism and include excess body fat, high blood pressure, and abnormal cholesterol levels. Treatment strategies include education regarding appropriate lifestyle changes to reduce the cardiovascular risks. RNs, LPNs, LMHTs, and registered dieticians will earn 3 contact hours. ACHAs will earn 3 (RC).

Hepatitis: An Update on an Old Infection

Hepatitis, an acute or chronic inflammation of the liver, can be caused by viral infections, toxic agents, medications, alcohol abuse or an autoimmune response.
Five types of hepatitis, from A to E, have been identified. This program will help update your knowledge and familiarize you with Hepatitis A, B, C and provide you with strategies to effectively treat these diseases in the healthcare environment. Discussions will focus on transmission, treatment and prevention. Hepatitis D and E will also be discussed. RNs, LPNs, LMHTs, social workers, counselors, and massage therapists will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

XNC 2556

Death and Dying: Changing the Mind-Set of a Forbidden Topic
Death in American society is often a forbidden topic. Typically the focus is on fixing and maintaining. This causes a disconnect when it comes to discussing the end of life. When death is acknowledged, the developmental process can be addressed and, the inevitable can be met with a holistic approach and better acceptance. In this seminar you will review the many different ways long-term care facilities are addressing the end of life, through promoting relationships and offering rituals that provide meaning and celebration. Facts about organ donation will be presented, and a discussion about how organ donation can save lives despite the age of the donor. A review of hospice and palliative care will be discussed. RNs, LPNs, social work, counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours.

$36.00
XNC 2557

First Annual Stroke Forum: From victim to Victor
Every year approximately 730,000 Americans have a new or recurrent stroke - 1 every 45 seconds. That means that at about the time you finish reading this paragraph, another American will have suffered a stroke. Stroke is the third leading cause of death and the leading cause of serious long-term disability in the United States. Fifteen percent of stroke victims will die shortly after their stroke, and only 10% will have near full recovery. In light of these statistics, much has been done to prevent strokes, intervene and diminish stroke severity. Long after traditional rehabilitation drops off, we know people can improve following stroke when resources are available. This program is co-sponsored by the American
Stroke Foundation, a one of a kind stroke recovery center with locations in Kansas and Missouri. Regina Walsh is a nurse and artist and a cancer and stroke survivor. She will present her personal experiences as a stroke survivor and share the artwork she created during her recovery to begin this day of hope and learning. Susan Stark, Brenda Hanna-Pladdy and Karen Parker will focus on the recent research in stroke treatment and rehabilitation and discuss the acute and long-term treatments now available for stroke survivors. RNs, LPNs, LMHTs, social work, counselors and dieticians will earn 7.5 contact hours. ACHA's will earn 7.5 (RC) hours. Approval is pending for OTs and PTs.

Nurses Eating their Young: Bullying and Conflict to Mentoring and Collaboration

It isn’t just the young that are eaten; conflict in nursing work environments can take many casualties. Conflict is inevitable in any work environment, simply because there are differences in goals, needs, desires, and responsibilities. Some forms of conflict are actually beneficial. However, given the complexity of patient care, today’s nursing practice environments and issues related to new nurses in practice, the presence of negative conflict creates concern for the viability of professional nurses currently in practice. While the newest nurses may be the most likely victims of horizontal violence or nurse bullying, this is not always the case. This course will explore various concepts of conflict within nursing work environments from a historical and present-day perspective. Literature and research will be utilized to study sources and outcomes of conflict within nursing work environments. Strategies for preventing conflict, managing conflict and promoting healthy conflict will be studied and applied to practice examples. RNs, LPNs, LMHTs will earn 3 contact hours. ACHAs will earn 3 (A) hours.

$36.00
XNC 2559

Arthritis: A Disease of Heartache and Hope

Osteoarthritis and rheumatoid arthritis are two potentially devastating diseases. Over 10% of the US population is afflicted. This course will study these two diseases—prevention, causes, managing the disease and treatment options. Differences between these two forms of Arthritis will be addressed. Patient education in medical and surgical management will be reviewed, including current technology options related to joint replacement—preservation procedures, joint preservation strategies and prosthetic bearing surfaces (including the gender specific options). Participants will have the opportunity to practice exercises that are helpful for patients who have arthritis. RNs, LPNs, LMHTs, and massage therapists will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

Mirth, Music and Mental Health (Health Professionals Appreciation Day)

As a health care professional, you serve a vital role in the community and you deserve a day of relaxation and fun. Attend this program in your honor and explore the importance of laughter and music to good health. RNs, LPNs and LMHTs will earn 6 contact hours for attending this workshop. Kansas ACHAs will earn 6 (RC) hours. Approval is pending for other health professionals.

$40.00
XNC 2561

Children and Grief

Children grieve differently than adults. This workshop will discuss how children grieve; secondary losses children experience; developmental issues and grief;
suggestions for caregivers to help promote understanding of children’s needs; and community resources available. Many adults bring unresolved grief issues from childhood into their adult life. Information shared may be helpful with an adult population as well. RNs, LPNs, LMHTs, social workers, counselors will earn 6 contact hours.

$72.00
XNC 2562

Sex, Pregnancy and Parenthood in the Teenage Years
While teenage pregnancy has decreased in the last decade, the United States still has the highest teen pregnancy rate in the developed world. Approximately one million teenage girls become pregnant before the age of 20, and 40% are under the age of 17. This course will discuss the problems facing teenagers today related to unprotected intercourse that may result in a sexually transmitted disease, an undesired pregnancy and the final outcome of facing parenthood in adolescence. This course will begin by outlining the current literature on sexually transmitted diseases and discussing the health risks that teens now face from unprotected intercourse. Secondly, literature will be presented to discuss the complex issue of teenage pregnancies, health including risks to mother and infant and social implications on the family. The course will also outline the most at risk population for teenage pregnancy and interventions needed to successfully educate our youth to prevent adolescent pregnancy and disease. RNs, LPNs, LMHTs, social work, counselors, psychologists will earn 6 contact hours.

XNC 2563

Older Adults and Chemical Dependence
Alcohol abuse and addiction in the elderly is a serious problem that more often than not goes unnoticed. Seniors do not exhibit the same warning signs as younger people that alert friends and families to the problem. They do not miss work, rarely have trouble with the law, and often drink alone. The consequences are devastating for their mental and physical well being. Late onset drinkers have a very positive prognosis as do some early onset if the problem is addressed effectively. Penny Shaffer will address the psychosocial and physiological effects of alcohol and prescription drug abuse on the elderly and signs and symptoms to alert us to the problem. Ron Griffin will explore effective strategies for intervention, treatment and sustained sobriety among this population. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours. ACHAs will earn 6 (RC) hours.

$72.00
XNC 2566

Making a Difference in Chemical Dependence: Motivation, Treatment and Recovery
The best intentions from an untrained person may be counterproductive to assisting in the recovery of an addict or alcoholic. Seeking promises, threats, yelling, cajoling, helping them through the tough times? may not be what really works for the creating long lasting change. This course will look at motivating the addict or alcoholic by creating healthy boundaries and reasonable expectations and understanding what does and doesn’t work when addressing problem substance use. Other issues will include motivational enhancement, treatment paradigms, dealing with the untreated alcoholic or addict, recovery and how to be healthy yourself, regardless of what the addict or alcoholic does. RNs, LPNs, LMHTs, counselors, psychologists, social workers, registered dieticians will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval is pending for OTs and PTs.

$72.00
XNC 2568

Diagnosis and Treatment of Personality Disorders
This course will take an overview of personality disorders as defined in the DSM IV-TR. This course will utilize lecture, video clips, worksheets and discussion to look at personality disorders, how these disorders manifest, and effective treatment strategies. This course meets the BSRB criteria for diagnosis and treatment. RNs, LPNs, LMHTs, social workers, and counselors, will earn 3 contact hours.

$36.00
XNC 2569

The Kidneys: An Overview of Normal vs Chronic Kidney Disease
Renal disease affects thousands of Americans and has numerous etiologies ranging from hypertension to drug overdose. Understanding the complexity of the renal system is often challenging for clinicians and critical for the survival of their patients. This workshop explores normal renal function and the conditions that cause pathology and disease. Treatment options, including diet, medications and dialysis will be reviewed. RNs, LPNs, LMHTs, will earn 6 contact hours. ACHAs will earn 6 (RC) hours.

$72.00
XNC 2571

STDs: New Strategies for Old and New Diseases
The most common Sexually Transmitted Diseases (STDs) include Syphilis, Chlamydia, Gonorrhea, Trichomoniasis, Hepatitis B, Hepatitis C, Human Papilloma Virus, HIV and Herpes. This program will help update your knowledge and familiarize you with some of these STDs and provide you with strategies to effectively manage these diseases in the healthcare environment. Discussions will focus on epidemiology, transmission, treatment and prevention. RN’s, LPNs and LMHTs will earn 4 contact hours.

XNC 2579

Tick-Borne Disease: What You Need to Know About These Lurking Diseases

The recognition and diagnosis of tick borne diseases is difficult. As the incidence of tick-borne illnesses and the geographic areas in which they are found expand, it becomes increasingly important that health professionals be able to recognize the signs and symptoms of these diseases. The most common tick borne diseases are Lyme Disease, Rocky Mountain Spotted Fever and Erlichiosis. RNs, LPNs and LMHTs will earn 4 contact hours.

$72.00
Leadership: What Really Works
This workshop reviews the major components of leadership strategies developed over the past fifty years and those currently being touted. The common threads of these theories will be identified and discussed with suggestions for proper implementation. RNs, LPNs, LMHTs counselors and social workers will earn 3 contact hours. ACHAs will earn 3 (A) hours.

Assertiveness Can Change Your Life!
Assertiveness enables people to act in their own best interest. What do you want in your life that is negotiable? What do you need that is non-negotiable? Learn how to become more assertive in your work and personal relationships. Find out how you can deal with uncomfortable feelings and overcoming guilt when saying no in a positive and constructive manner that leaves you and others feeling positive about the interaction. RNs, LPNs, LMHTs, social workers, and counselors will earn 3 contact hours. ACHAs will earn 3 (E) hours.

Ethics and Issues for Helping Professionals
This three hour ethics course is approved for the Kansas Behavioral Sciences Regulatory Board continuing education requirement. This workshop will show the helping professional how to analyze an ethical situation. The course will dissect the ethical framework for solving ethical dilemmas in the helping profession and will use case studies to help understand ethical issues in the helping field. Social workers and counselors will earn 3 contact hours.

Dementia Care Certificate
Caring for persons with dementia is difficult, yet the need for personal and professional caregivers is growing fast as the population ages and individuals with Alzheimer’s, Parkinson’s, stroke and other neurological disorders increase accordingly. This program is designed to equip caregivers with practical and useful information and skills to meet the needs of the person they care for and themselves. This five day course covers most common types of dementia and focuses on understanding the cognitive and physical changes these disorders cause, practical care for assisting with activities of daily living and improving independence, activities for stimulating cognitive and physical abilities and creating quality of life, managing difficult behaviors in the least restrictive manner and managing caregiver stress and burnout. This course is funded through a grant from the International Longevity Center and Met Life. Health care providers will earn 30 contact hours. For information on how to attend as a non-professional/family member caring for someone with dementia, please contact Health and Human Services at 913 469 3140.

Blue Babies
Newborns with cardiac abnormalities present to caregivers and families difficult challenges. Understanding the specific conditions and their treatment provides health care providers information that sharpens assessment, focuses treatment and support parents and families with sound education and information regarding their infant’s diagnosis and treatment options. RNs, PLNs and LMHTs will earn 6 contact hours.
When the Injury is Intentional: Child Abuse
Caring for the child who is a victim of non-accidental trauma (NAT) can be the most emotionally challenging patient for a healthcare provider. This program will discuss recognition of NAT, documentation & evidence collection, mandatory reporting, family interaction and CISD. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. Approval is pending for OTs and PTs.

411 prevents 911: Legal Issues in Nursing
This presentation will address nurses’ questions about how the law affects their practice. Topics covered will include charting, malpractice, insurance issues, the function of the state board of nursing, patient rights and employee rights. RNs and LPNs will earn 3 contact hours. ACHAs will earn 3 (A) hours.

Shoulder Injury Therapy
This class will focus on shoulder injuries like rotator cuff problems, frozen shoulder, shoulder pain, anterior scalene syndrome, pain at the deltoid tuberosity, midback burning, numbness in the shoulder & more. We will look at some causes of these injuries, how various professions treat these problems & how we can get rid of these problems with Dr. Uriarte’s MyoKinesthetic System work in 4 treatments or less. Massage Therapists, RNs & LPNs will earn 6 contact hours. This course is approved through NCBTMB. Approval is pending for OT’s and PT’s.

Poverty, Addiction and Crime
A description is not available for this course.

Communication: How to Say Almost Anything to Almost Anyone
Anyone Effective communication is the building block for all relationships. Improved patient care, enhanced teamwork and creative problem solving are impossible without it. Discover methods to reduce defensiveness in others, learn to use the stages of conflict constructively and identify how important it is to use the whole message during difficult communication encounters. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours for attending this workshop. Kansa ACHAs will earn 6 (A) hours. Approval is pending for other health professionals.

Command Spanish for Health Professionals
This course is designed to teach Spanish that can be used immediately in day-to-day communication with patients. Pronunciation, work-specific language, phonetic encoding and listening activities are part of each lesson. This is a customized real-life Spanish program designed to prepare the non-Spanish speaking health care professional to better interact with and care for Spanish-speaking patients. Coursework will apply to a wide range of health professionals with an emphasis on enhancing the quality of patient care.
Educational materials are published by Command Spanish(r) and include a workbook manual and two CDs ($30) which are included in the fee. RNs, LPNs, LMHTs, social workers and counselors will earn 12 contact hours for attending this seminar.

Healing With Humor: Therapeutic Humor for Healthcare Professionals
A hearty laugh goes a long way in helping others feel good. This course is for healthcare professionals in all fields and is designed to provide participants with Smart Strategies to become more skilled at using therapeutic laughter, play and humor in a healthcare setting. Therapeutic humor is defined as "any intervention that promotes health and wellness by stimulating a playful discovery or expression of the absurdity of life's situations." Laughter may be the best medicine; laughter mobilizes the patient's own forces of mind and body to combat pain and illness. RNs, LPNs, LMHTs, social workers and dietitians will earn 3 contact hours for attending this course. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

$36.00

XNC 3101
Massage for Healthcare Professionals: More Than a Backrub
This interactive seminar provides healthcare professional information and techniques used in therapeutic massage that are helpful in reducing or eliminating commonly experienced patient discomforts, including headaches, sinus pain and achy shoulders, low back and leg pain. These techniques can reduce the need for medications and improves patient satisfaction with the overall healthcare experience. This course teaches the basics of therapeutic massage that all healthcare professionals can incorporate into their practice. RNs, LPNs, LMHTs, and counselors will earn 6 contact hours. Approval is pending for OTs and PTs.

$72.00

XNC 3102
Unlocking the Mysteries of the DSM-IV-TR
This seminar will start with a systematic look at various DSM diagnoses, some of the most prevalent and some of the trickiest, as portrayed by Hollywood. Comparing and contrasting these images and themes of presentation with DSM criteria, everyday professional issues related to diagnosis, treatment (psychopharmacological, behavioral, and psychological), and client compliance will be discussed. The critical question for all practitioners, 'is there such a thing as trusting this mental health Bible too much' will be explored. This seminar will also review threats to the DSM validity and reliability, questions, even scandals, related to the ethics behind particular diagnostic entries, and challenges that
include, `Might there be too many diagnoses' and `Who decides what's a disorder' and who benefits'. RNs, LPNs, counselors, psychologists, and social workers will earn 6 contact hours.

$72.00
XNC 3103
Clinical Update in Dementia Research and Treatment
This seminar will introduce the student to the diagnosis and treatment of the main dementing disorders including Alzheimer's disease, vascular dementia, dementia with Lewy bodies and frontotemporal dementia. Research advances that may lead to future diagnostic and treatment strategies will also be discussed. RNs, LPNs, LMHTs, social workers, counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

$36.00
XNC 3104
Cultural Competency: Strategies for a Diverse Healthcare Workplace
Cultural competency in healthcare describes care provided that is sensitive of health traditions of diverse cultural groups. This program will help update your knowledge and familiarize you with cultural competency and provide you with strategies to effectively manage a diverse healthcare workforce and patient population. Participants will utilize a series of questions to conduct a detailed self-interview of their own cultural heritage and evaluate how their cultural attitudes may influence healthcare provided in their workplace. Discussions will focus on the cultural diversity of Kansas and the United States (US). In addition, health and illness experiences of US ethnic and refugee populations will be discussed. RNs, LPNs, LMHTs, social workers, counselors and psychologists will earn 6 contact hours. ACHAs will earn 6 (A) hours. Approval is pending for OTs and PTs.

XNC 3106
Solving Sleep Problems: From A to Zzzzz
Today clients and professionals are often surrounded by multi-media demands, immediate deadlines, and multi-tasking nightmares. These day-to-day rhythms drive people to ratchet up their levels of activity, adrenaline, and stress, as well as their self-expectations. Why would we be surprised, then, to see that it becomes harder and harder for individuals in all walks of life to turn it off, calm down, take it easy, and settle in and get a good night’s sleep? The problems, and solutions, come from a variety of sources. Luckily, one of the most effective treatment options is based in classic cognitive behavioral theory and can be tailored to just about any client presentation. This workshop will explore cognitive behavioral therapies effective for resolving sleep problems. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours. Approval is pending for OTs and PTs.

$72.00
XNC 3107
Self-Centered, Petulant and Moody: Narcissistic and Borderline Personality Disorders
This course will seek to clarify the DSM IV-TR distinctions between Narcissistic and Borderline Personality Disorders and their corresponding, but less pervasive and severe, alternatives. While diagnosis is as much art as science, this course focuses on the science of identifying the differentiating symptoms and designing treatment plans that are both productive and realistic. A review of which diagnostic tools are useful in making the diagnosis as well as strategies to improve compliance with treatment recommendations will be reviewed. RNs, LPNs, LMHTs, counselors, psychologists, and social workers will earn 6 contact hours. ACHAs will earn 6 (RC) hours.
Alzheimer’s Disease Research Forum 2008
Dr. Maria Carrillo, director of Medical and Scientific Affairs for the Alzheimer’s Association National Office in Chicago, Illinois, along with a panel of area researchers, will return this year to discuss the latest directions in research. This year’s forum will focus not only on medical research, but also focus on caregiver and long-term care issues. Dr. Carrillo will be the keynote speaker for this day of hopeful information identifying steps forward in Alzheimer’s disease research, both on the medical battle front and on the care battle front. A program recorded by individuals with early stage Alzheimer’s disease will be viewed to inform and educate participants on their experience with having this disease and why research is so critical for their hopes of a cure. RNs, LPNs, LMHTs, social workers, counselors and registered dieticians will earn 6 contact hours. ACHA’s will earn 6 (RC) hours. Approval is pending for OTs and PTs.

"Just a Behavior?": Managing the Behaviors of Autism
Screaming, blurting out, swearing, hand flapping, ?Just a behavior, or is it the disorder?? Parents often pose this question when a child with an autism spectrum disorder demonstrates a disruptive behavior. This course challenges the perspective that a problem behavior is just a behavior, arguing that all behaviors serve a communicative function. The process of discovering that function and the overall management of problem behaviors will be addressed through both the school and home lens. Special attention will be paid to the Functional Behavioral Assessment (FBA), an approach commonly used by schools to understand problem behaviors, and the Rumbling-Rage-Recovery Curve, a tool for understanding the dynamics of difficult behaviors at home or school. Proactive and reactive strategies for handling behaviors in all environments will also be discussed. RNs, LPNs, LMHTs, social workers, counselors, and psychologists will earn 4 contact hours. Approval is pending for OTs and PTs.

Management and Leadership in Long-term Care
This 2-day course is for all supervisors in all departments of any long-term care organization. The purpose is to help managers be successful in the areas of budget, staffing, hiring, leadership and understanding their role as a manager in this highly regulated and complex industry. The participant will first grow in understanding of their own leadership style through the DISC personality profile, then apply those strengths to their own natural ability to lead and impact the outcome for their departments. RNs, LPNs, LMHTs and social workers will earn 12 contact hours. ACHAs will earn 12 (A) hours. Approval is pending for OTs and PTs.

Epidemiology of Infectious Diseases: An Update
Epidemiology is the study of how disease is distributed in populations. This program will help update your knowledge and familiarize you with infectious disease epidemiology and provide you with strategies to effectively minimize transmission in the healthcare environment. Discussions will focus on pathogens, hosts and methods of surveillance and investigation. In addition, the emergence and re-emergence of pathogens including avian influenza and human immunodeficiency virus will be discussed. Participants will investigate outbreaks of an infectious disease, identify the source of the outbreak and make recommendations for prevention and control. RNs, LPNs, and LMHTs will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs, PTs and dental hygienists.
Beyond Fight or Flight...Dealing Constructively With Conflict

In reality, there are more than just two responses to conflict. Each of us, and each DiSC style, reacts to conflict in a unique way. We have our own goals, our own fears and our own ways to get what we need. This course helps participants understand their reactions to conflict and how these reactions affect those around them. It also helps then discover more constructive ways to deal with conflict. Using the DiSC assessment, participants will learn the building blocks of personal style as well as conflict and walk away with a robust understanding of both as well as a personal action plan for managing conflict. (DiSC behavior style assessment cost is included) RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours. ACHAs will earn 6 (E) hours.

Systemic Health Starts with Good Oral Care

Today, oral health is well documented to influence systemic health and overall well being. Diseases of the teeth, gums and tongue greatly affect heart disease and other systemic illnesses. As the physician workforce shrinks and our aging population increase, the demand for medical support and long-term care needs may not be met with the current models of care. A larger portion of future health care may be in the dental office, not the physician? s office. This workshop will explore how the relationship with dentists and physicians will integrate to provide people with optimum systemic health. The pathology of heart, renal and other diseases as influenced by oral health will also be discussed. RNs, LPNs, LMHTs, dietitians and dental hygienists will receive 3 contact hours.

Diagnosis and Treatment of Multiple Sclerosis

Multiple sclerosis is an auto-immune neuromuscular illness with an unpredictable nature that is frequently difficult to diagnose in its early stages. MS can cause a variety of disabilities that range from mild to very severe. This course will discuss the diagnostic procedures used to differentiate MS from other illnesses with similar symptomatology. The different types of MS and varying treatment strategies will also be reviewed. RNs, LPNs, and LMHTs, will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

Sorting Through the Kids' "ADD Fog" - Practical Tips for Busy Clinicians

What? s up with all of the ADD diagnosis in so many kids these days? There are many reasonable clinical explanations and thankfully, some ?doable? solutions for families who must deal with the added challenges of raising these special kids on a daily basis. This workshop will be an interesting combination of current scientific research along with some good old fashioned suggestions that even Grandma can use! RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours.

Basic Life Support (CPR) for Health Care Provider

The student will develop a basic understanding of the cardiovascular and respiration systems, discuss medical and environmental emergencies as they might relate to CPR, as well as gain insight into the structure and function of the emergency medical services system. The student will demonstrate most current practical CPR skills including airway obstruction techniques on adults, children
and infants. The automated external defibrillator (AED) will be introduced to the student. Upon successful completion of all American Heart Association standards, the student will receive affirmation at the Basic Rescuer level (Health Care Provider).

**Childhood Obesity: Prevention of Long-term Morbidity**

Obesity among children is becoming a major health issue today. The affects on these children, their families, society and the healthcare field will be profound as we try to deal with this preventable problem. This course will focus on the psychosocial and medical issues facing these individuals as they age. Interventions and treatments will be explored. RNs, LPNs, LMHTs, social workers, counselors, dietitians, and dental hygienists will earn 3 contact hours. Approval is pending for OTs and PTs.

$36.00

XNC 3215

**Sorting the Facts for the Anti-Cancer Diet: What Really Works**

It has been estimated that 30 to 40 percent of all cancers can be prevented by lifestyle and dietary measures alone. By implementing the guidelines covered in this workshop, an estimated 60 to 70 percent reduction in breast, colorectal, and prostate cancers and 40 to 50 percent in lung cancers could be attained. Such an intentional food intake plan would not only be conducive to preventing cancer it would favor recovery as well. This comprehensive seminar will provide the learner with practical and science based guidelines for reducing the risk of cancer and improving the survival rates of those who have been diagnosed. RNs, LPNs, LMHTs, social workers, counselors, dietitians and dental hygienists will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for PTs and OTs.

$36.00

XNC 3220

**Antisocial Personality Disorder**

A frequent remark heard by mental health and criminal justice professionals is, 'they're antisocial'. Images of individuals famous and infamous come to our mind when this phrase is used. This program will explore the meaning of the clinical diagnosis of antisocial personality disorder. We will also explore some of the views and theories that are proposed to explain the causality of one becoming antisocial. Case studies of people who have been in the news who present as individuals with antisocial characteristics will be covered. Lastly we will look at some of the treatment modalities that are being utilized in working with such individuals. RNs, LPNs, LMHTs, social workers, and counselors will earn 3 contact hours. Approval is pending for OTs and PTs.

**Neuropathic Pain**

According to which article you read, 34 to 94 percent of persons with a spinal cord injury (SCI) have pain. A large part of this pain is neuropathic in nature. Nurses need to understand the complexities of this problem in order to be able to assist their patients to improve their quality of life. The presenter will review the types of pain individuals with SCI experience and how pain syndromes can negatively impact
quality of life. The current literature will be reviewed. Evidence based treatments for neuropathic pain will be discussed. Pathophysiology, pharmaceutical, surgical and complementary interventions will be presented. RNs and LPNs will earn 3 contact hours. Approval is pending for OTs and PTs.

$36.00
XNC 3235
**Antagonist or Protagonist: Does the Survey Process Prevent Culture Change?**

Does the LTC survey process prevent resident-directed care? Since the advent of culture change, some providers have contended that the federal and state regulations prohibit implementing person centered care. Nothing could be further from the truth. Many long term care administrators, directors of nursing, staff nurses, and regulators believe in the movement and have been able to implement change in accordance with the regulations. This course will explain person centered care and show how the survey process supports the concept. RNs, LPNs, LMHTs, social workers, and counselors will earn 6 contact hours. ACHAs will earn 6 (A) hours. Approval is pending for OTs, PTs and dieticians.

$72.00
XNC 3240
**Anxious Organizations and Noxious Workplaces: Co-Workers on the Therapist's Couch**

Organizations are made up of people - fortunately and unfortunately with all the good and bad qualities thereof. Every day individuals in the workplace, from management to those ‘in the trenches,’ make decisions based upon their own sensitivity to the world. Ultimately, these countless choices affect the success of the organization. When decisions are grounded in reality, the behaviors of the organization will seem sound. However, if driven by anxiety, the behaviors of the organization will seem illogical at best, or self-destructive at worst. Even with a great product, smart leaders, and high profit, a number of organizations receive fines, incur legal charges, and experience high employee turnover. Chalk it up to organizational anxiety, a primitive survival instinct. Learn practical techniques for assessing the level of anxiety in any organization or workplace. The more anxious an organization, the clearer the symptoms and dynamics become. The behavioral dynamics also become very predictable with increased anxiety. Learn practical ways to manage yourself and your employees in the intensity. Bring any challenges you have for application and discussion. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 3 contact hours. Approval is pending for OTs, PTs and dieticians.

$36.00
XNC 3245
**Humor and Healing**

Healthy people laugh - A LOT! Learn how to integrate humor into every aspect of your life - your personal health, your marriage/family, and the workplace. Spend time learning with others where EVERYONE gets to be the class clown. RNs, LPNs, LMHTs, social workers, counselors and psychologists will earn 3 contact hours. Approval is pending for OTs, PTs and dieticians.

$36.00
XNC 3250
**Narcissistism and Borderline**

$36.00
XNC 3255
**Music That Speaks to Alzheimer's**
In this workshop you will learn why and how music is a powerful tool for helping Alzheimer’s patients. Much of this workshop is experiential so you learn from a whole brain perspective. You will learn about practical musical solutions for relaxation to help the Alzheimer’s patient. There will be an explanation of entrainment, the body’s natural ability to synchronize with outside rhythms and the use of entrainment to help lower heart rate and blood pressure by experiencing music written at exactly 50 and 60 bpm. Participants will learn about the sound environment and how it effects the Alzheimer’s patient. There will be a discussion of sensory issues, challenges and how to reduce agitation in the Alzheimer’s patient by altering the sound environment. Learn many musical techniques for coping with dementia. No musical ability needed to benefit from this workshop. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours. ACHAs will earn 6 (RC) hours. Approval is pending for OTs and PTs.

$72.00
XNC 3260
Native American Flute: Therapeutic Aspects
In this experiential class, you will learn the basic techniques needed to play a Native American cedar flute. This instrument is one of the easiest to learn and a wonderful meditative tool. There are two ways to play it: the Western scale and the 5-note Native scale. In this class you will learn the difference between these two scales, but the concentration will be on the Native scale because it allows even non-musicians to quickly learn to make music on this instrument. The cedar wood gives it a wonderful organic sound—great for playing inside or outside. You will learn the therapeutic aspects of the cedar flute, as well as the spiritual significance in working with those who have lung disease, cancer, arthritis, and other medical conditions. A flute will be available for participant use during this class time. RNs, LPNs, LMHTs, social workers and counselors will earn 4 contact hours.

$48.00
XNC 3265
The Difficult Patient: Clinical and Ethical Issues
This one day workshop will give both the beginner and experienced clinician a chance to review and discuss basic concepts and issues in work with difficult-to-treat patients and families. In the morning, participants will divide up into “fictional” families and role play the initial interview. Dr. Stamm will use the material that emerges from this role-play to talk about important clinical concepts such as making a proper diagnosis, forming a treatment alliance, and dealing with resistance. In the afternoon, Dr. Stamm will illustrate and talk about difficult treatment situations and the troublesome feelings some patients evoke in the patient. The focus will be on how to maintain therapeutic and ethical boundaries with the patient and how to keep the treatment alliance in tact when the patient and/or family seems bent on sabotaging the process. RNs, LPNs, LMHTs, social workers, psychologists and counselors will earn 6 contact hours.

$72.00
XNC 3270
Psychotropic Medications: When and Why to Use Them
The use of psychotropic medications for mental illness is a common practice among health care practitioners. This practice has led to the improved quality of life for many, but it is not without risk. More recent medications have a lower negative side-effect profile, but risks still remain including the increase in the number of suicidal thoughts, plans and attempts in adolescents. Behavior problems in adults with dementia are also treated with psychotropic medications. Being able to identify the use of any particular medication is dependent on target symptoms and side-effect profile. This workshop reviews common psychotropic medications, their appropriate use for mood and behavior problems and potential negative side-effects and drug interactions. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs, PTs and dieticians.

spring-2009 Copyright 2009 Johnson County Community College Page 755
Cerebral Palsy: Old and New Concepts

Our concept of cerebral palsy has changed in recent years because of improved methods of examining the brain. CT, MRI & PET scanning have given us the ability to see inside into the structural and functional status of the brain. Genetic testing has also advanced our understanding of this condition. Most injuries to the neonatal brain are not due to lack of oxygen, but to developmental defects that occur during the first trimester of pregnancy. Many of these are due to genetic factors. This workshop focuses on the neurological diagnostics that health care professionals need to know to support individuals and their families living with this chronic condition. RNs, LPNs, LMHTs, social workers, counselors and psychologists will earn 3 contact hours. ACHAs will earn 3 (RC) hours. Approval is pending for OTs and PTs.

T.E.A.M. Commandments: Tips for Positive and Productive Relationships

The 'Team' is the common structure in today's workplace and how well people work together determines the success of the organization. In this presentation the audience gets involved in discussions and activities that explore 10 skills, attitudes, and beliefs common to successful teams. This learning experience is perfect for all people who have to work with other people. Join the fun and stretch your teamwork muscles in this program of energizing and interactive team-based activities. RNs, LPNs, LMHTs, dental hygienists, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (E) hours. Approval is pending for OTs and PTs.

Sexual Addiction and the American Family

Mental health professionals are increasingly being confronted with clients who report problematic sexual behavior. These clients often describe out of control, compulsive behaviors which put them and their primary relationships at risk. This course is designed to be an introduction to sexual addiction, its scope, impact on families, identification and treatment. This course is also designed to provide information regarding the resources and training which are available to clinicians who are interested in learning how to treat this population by giving them resources they can share with their clients who may be struggling with sexual behaviors they find problematic. RNs, LPNs, LMHTs, social workers and counselors will earn 3 contact hours. ACHAs will earn 3 (RC) hours.

The Pregnant Heart: Keeping Two Hearts Beating During Pregnancy

Heart disease is a major complication of pregnancy. It occurs in about 1 percent of all pregnancies. Sometimes, heart disease is known before pregnancy. However, some women may have unknown heart conditions that only become apparent during pregnancy. RNs, LPNs, LMHTs, and social workers will earn 3 contact hours. Approval is pending for OTs, PTs and dieticians.

Metabolic Syndrome, Hyperglycemia and Heart Disease

Metabolic syndrome is a cluster of conditions that occur together, increasing the risk for heart disease, stroke and diabetes. Having just one of these conditions - increased blood pressure, elevated insulin levels, excess body fat around the waist or abnormal cholesterol levels - contributes to the risk of serious disease. In
combination, the risk is even greater. RNs, LPNs, LMHTs, social workers and counselors will earn 6 contact hours. Approval is pending for OTs, PTs and dieticians.

Health and Lifestyles (XPG)

XPG 5003
Luscious, Low-Fat, Lightning-Quick Meals
Uncover the secrets of making lowered-fat recipes taste terrific. Learn how to get in and out of the kitchen quicker, and explore a registered dietitian’s tricks for encouraging reluctant family members to eat more healthfully.

$85.00

Home Ownership (XPK)

XPK 1005
Home Inspections: A Buyer’s Best Protection
All homes have problems of some sort. The critical question is: how serious are those problems? You'll learn common "red flags" in a house's structural and mechanical systems and components, many of which are highly visible to the average person if you simply know what to look for and where to look. You'll also learn how to get further help or negotiate repairs with the seller, if a defect is significant.

$12.00

XPK 1012
Community Homebuyers Program (American Sign Language)
Description: You may be able to afford more home than you've thought possible. This four-hour course will help you decide, as it addresses the basic steps involved in achieving home ownership. You will acquire essential information on budgeting, credit reporting, qualifying for the purchase, home inspection and maintenance. Participation in this program is a prerequisite for qualifying for several government-sponsored and conventional loan programs. The class includes information on a new public Web site on financing options and programs available to consumers in the Kansas City metro area. Note: The course is co-sponsored by the Kansas City Regional Association of Realtors and will be taught in American Sign Language. The $10 registration fee entitles you to one instructional packet and one certificate of completion.

$10.00

XPK 1015
Homebuilding 101: New Construction Defects
With the current lowered interest rates and increased building activity, there is a serious shortage of competent tradesmen to build new homes. Come learn what to look for when buying or building a new home and how to correct the most common defects.

$12.00

XPK 1020
Community Homebuyers Program

The class includes information about financing options and programs available to consumers in the KC metro area. Note: This is a course co-sponsored by the college and the Kansas City Regional Association of Realtors. The $10 registration fee entitles you to one instructional packet and one certificate of completion.

$10.00

XPK 1025
All About Mortgages
Getting a mortgage can be painless if you're "armed" with information on various types of loans, the loan process, and factors that determine your interest rates. Special emphasis on avoiding the mortgage pitfalls and traps out there and what some lenders don't tell you. New trends in mortgage insurance are discussed.

$12.00
XPK 1045
**How to Save $$$ Buying a Home**
This class will inform you about the 13 steps you need to know to negotiate the lowest possible price on the next home you buy. Discover what the lenders and realtors don't usually discuss, and learn how to avoid those costly mistakes.

$12.00
XPK 1050
**Successful Home Remodeling**
If you are looking to remodel a home or business, this valuable 2 hour workshop will teach you essential information to protect yourself from contractor liens and to have a successful remodeling job that is on time and within budget. Learn the benefits of being your own contractor or how to choose the correct one.

$12.00

**House and Garden (XPI)**

### XPI 1021
**Bulbs for Spring Bloom**
Learn easier and more effective ways of adding spring-blooming bulbs to your existing flower beds. Get answers to your questions on why your tulips don't always come back, which bulbs are resistant to deer, which bulbs do well in part-shade and more. This class comes with a handout and gorgeous slide program, and is for novice and seasoned gardeners alike.

$12.00

### XPI 1023
**Rain Gardens**
Turn your problems into landscaping opportunities! This is the class for you if you have an area of your yard that gets swampy for a day or two after a heavy rain, if you are needing to solve a problem with rain-water runoff from your gutters or your neighbors, or are curious about this latest trend in horticulture. This class includes an extensive handout and slide program describing what problems raingardens can solve, how they are constructed, useful plants for sun or shade, and examples of local raingardens. We'll debunk mosquito myths and talk a bit about plant maintenance as well. For novice and seasoned gardeners alike.

$12.00

### XPI 1035
**Container Gardens**
Learn how to make container growing more successful and accessible, including discussions of pot types, medium, color and texture considerations, fresh ideas for plant combinations, flowers for hot or shady conditions, and growing edibles. Session includes slide program and handout.

$12.00

### XPI 1125
**How to Grow Veggies, Herbs & Flowers from Seed**
If you have been frustrated with previous window sill efforts, look no further for answers to how you can produce flats of seedlings, even without a greenhouse. We will also examine plants with special germination needs and interpreting catalogues.

$12.00  
XPI 1126  
Growing Great Vegetables  
In the first session we will discuss dozens of ideas for making growing your own vegetables easier and more accessible, including how to get more production from less space. The second session focuses upon how to grow specific cool-season and warm-season crops. Both sessions include slide programs and handouts.

$17.00  
XPI 1200  
Herb Gardening for the Novice  
This class is an exciting sensory experience with fresh herbs to smell and taste, as well as, a full slide program of different herbs and herb gardens. We will explore a variety of annual and perennial culinary herbs, and discuss how to dry herbs, prepare herbal vinegars and more. For novice and seasoned gardeners alike.

$12.00  
XPI 1210  
Made-in-the-Shade Gardening  
Shade gardeners don’t worry about sunburn, tomato wilt or wind-whipped plants. But what do you grow in the shade besides impatiens and hostas? What can you do about (eeuw) slugs and snails? Learn about flowering shade plants beyond impatiens and hostas. Class includes a slide program of three seasons of flowering plants and handout. For novice and seasoned gardeners alike.

$12.00  
XPI 1225  
The "Dirt" on Composting  
Composting can be as easy or as enthusiastic as you want. We will discuss a heap of ways to add inches of nutritious, soil-loosening compost to your beds. Dig into the details of how to trouble-shoot your pile and what to do about all those leaves! Class includes a slide program and handout. For novice and seasoned gardeners alike.

$12.00  
XPI 1240  
Xeriscaping: Cottage Gardens on the Prairie  
Xeriscaping doesn't mean "zero-landscaping", but rather landscaping that holds up better in years of drought. Learn how our native wildflowers and other tough, well-adapted flowers and ornamental grasses will allow you to create an old-fashioned style "cottage garden" for the sunny areas of your yard. Class includes a slide program and handout. For novice and seasoned gardeners alike.

$12.00  
XPI 1265  
Perfect Perennials and Awesome Annuals  
Perennials are sometimes advertised as "just plant and that's all"; well, not quite. What we have here is a plan for pinching, pruning and dividing to keep your’
flowers blooming longer and plants tidier and healthier. Class includes a slide program illustrating different techniques, and a handout detailing how you can keep your garden "in the pink" with a minimum of fuss. For novice and seasoned gardeners alike.

$12.00
XPI 1280
Flower Bed Design
This visually-oriented program on design concepts will use the first class to introduce you to the uses of color, visual texture, foliage effects, plus address the quantity of materials needed and using hardscape elements in your flower garden. The second session allows you to then put these concepts into practice in instructor-guided and small-group work. Classes include a slide program and handout. For novice and seasoned gardeners alike.

$17.00
XPI 5000
Growing Plants for Fun and Profit
Turn your love of plants into an enjoyable and profitable home business. Learn how to grow and market plants on a small scale without major capital investment, select and produce plants appropriate to your climate zone, and how to produce quality material.

$85.00

Students continue to develop listening and speaking skills and strategies necessary for critical thinking, listening to lectures, participating in discussions, giving presentations, taking notes and working in study groups with an emphasis on clarification through rewording and asking questions.

$195.00

XGI 1122

Pronunciation 1122
Prerequisite: Appropriate placement test score or XGI 1112. 3 HRS. This course provides the students with knowledge of academic pronunciation and prepares such students for future participation in U.S. based college and university classes. Students will learn and practice high level strategies and activities which will develop oral and aural proficiency improving the student's ability to understand conversational and academic North American English and to be able to produce English sounds individually and within the context of continuous speech at an advanced level. The goal is for the students to understand and to be understandable to a native speaker of North American English.

$195.00

XGI 1130

Oral Communication 1130
Prerequisite: Appropriate placement test score or XGI 1120. 3 HRS. Students develop communication, organization, and pronunciation skills necessary for effective academic presentation and discussion with an introduction to lecture note taking.

$195.00

XGI 1132

Pronunciation 1132
Prerequisite: Appropriate placement test score or XGI 1122. 3 HRS. This course provides the students with knowledge of academic pronunciation and prepares such students for future participation in U.S. based college and university classes. Students will learn and practice high level strategies and activities which will develop oral and aural proficiency improving the student's ability to understand conversational and academic North American English and to be able to produce English sounds individually and within the context of continuous speech at an advanced level. The goal is for the students to understand and to be understandable to a native speaker of North American English.

$195.00

XGI 1140

Oral Communication 1140
Prerequisite: Appropriate placement test score or XGI 1130. 3 HRS. This course is designed to focus on developing practical study skills to enhance academic and life skills success. Skills taught in this class are time management, concentration, listening, note-taking, goal setting, exam preparation and testing, use of library resources, and personal issues that face many university students.

$195.00

XGI 1142

Pronunciation 1142

Prerequisite: Appropriate placement test score or XGI 1132. 3 HRS. This course provides the student with knowledge of academic pronunciation and prepares such students for future participation in U.S. based college and university classes by providing tools, strategies, and techniques to speak clearly and accurately. Students will learn and practice high-level strategies and activities which will develop oral and aural proficiency improving the student's ability to understand conversational and academic North American English and to be able to produce English sounds individually and within the context of continuous speech at an advanced level. The goal is for the students to understand and to be understandable to a native speaker of North American English.

XGI 1210

Structure 1210

Prerequisite: Appropriate placement test score. 3 HRS. This course is designed to provide students numerous opportunities for practice in all grammar areas that are important for the beginning grammar student to become a better writer of English. A variety of exercises and activities, both written and oral, enhance this practice with guided study in the classroom and independent work outside the classroom. Weekly computer labs provide further self-paced practice, both during and outside of class time. The goal of this course is to set a foundation for bridging the gap between the study of English as a Second Language and the use of academic English in the college classroom setting.

$195.00

XGI 1220

Structure 1220

Prerequisite: Appropriate placement test score or XGI 1210. 3 HRS. This course is designed to provide students sufficient practice in all the grammar structures that are important for the intermediate grammar student to become a better writer of English. A variety exercises, both oral and written, supplement this practice with guided study in the classroom and self-study outside the classroom. Weekly computer labs give further self-paced practice, both during and outside of class time. The goal of this course is to begin bridging the gap between the study of English as a Second Language and the use of academic English in the college classroom setting.

$195.00

XGI 1230

Structure 1230

Prerequisite: Appropriate placement test score or XGI 1220. 3 HRS. This course is designed to provide students intensive practice using the target grammar structures that are important for the high-intermediate grammar student to become a better academic writer of English. Students will focus on the form, meaning and use of those grammar structures most pertinent to high-intermediate-level rhetorical styles and writing requirements, through extensive and diverse practice exercises, both oral and written. This practice is provided by means of guided study in the classroom, self-study outside the classroom, and weekly computer labs for further self-paced practice, both during and outside of class time. The goal of this course is to further reduce the gap between the study of ESL and the use of academic English in the college classroom setting.
$195.00
XGI 1240
Structure & Writing 1240
Prerequisite: Appropriate placement test score or XGI 1230. 6 HRS. Students develop the ability to comprehend and interpret authentic college-level writing assignments across the disciplines and to respond to them by applying appropriate writing strategies (i.e., comprehend and select material, plan, draft, and revise their written text).

$390.00
XGI 1250
Structure Workshop 1250
Prerequisite: Appropriate placement test score or XGI 1210. 3 HRS. Study, practice, and use the various structures of English to become a better speaker and writer.

$189.00
XGI 1310
Writing 1310
Prerequisite: Appropriate placement test score. 3 HRS. Students review basic English sentences structures and develop the ability to write accurate, fluent, multiple sentences about basic academic topics with an emphasis on the use of specific detail and sentence combining.

$195.00
XGI 1320
Writing 1320
Prerequisite: Appropriate placement test score or XGI 1310. 3 HRS. Students continue to develop academic writing with an emphasis on writing level-appropriate academic paragraphs in the traditional modes: observing, describing, defining, comparing and/or contrasting, explaining processes and/or classifying, and explaining cause(s) and/or effect(s).

$195.00
XGI 1330
Writing 1330
Prerequisite: Appropriate placement test score or XGI 1320. 3 HRS. Students develop the ability to compose (i.e., comprehend, select, plan, and draft) and produce lengthier texts on diverse general education academic topics by applying appropriate writing strategies.

$195.00
XGI 1410
Reading 1410
Prerequisite: Appropriate placement test score. 3 HRS. Students develop the ability to read texts on familiar, basic academic topics with an emphasis on application of critical reading skills.

$195.00
XGI 1411
Vocabulary 1411
Prerequisite: Appropriate placement test score. 3 HRS. Students expand vocabulary and develop vocabulary skills.
Reading 1420
Prerequisite: Appropriate placement test score or XGI 1410. 3 HRS. Students continue to develop academic reading abilities including texts on contemporary academic and literary topics with an emphasis on extensive reading and the enhancement of critical reading skills.

Vocabulary 1421
Prerequisite: Appropriate placement test score or XGI 1411. 3 HRS. Students continue expanding vocabulary and developing vocabulary skills.

Reading 1430
Prerequisite: Appropriate placement test score or XGI 1420. 3 HRS. Students continue to develop academic reading abilities including texts on contemporary academic and literary topics with an emphasis on extensive reading and the enhancement of critical reading skills.

Short Stories 1431
Prerequisite: Appropriate placement test score or XGI 1420. 3 HRS. Students develop academic reading abilities by being introduced to the works of famous American authors, while building reading, vocabulary, writing, and discussion skills and analyzing and understanding literary terms and techniques. The texts feature original and adaptations of classic stories that progress in difficulty and which highlight important people and periods in American cultural, social, and political history.

Reading 1440
Prerequisite: Appropriate placement test score or XGI 1430. 4 HRS. Students develop academic reading abilities including texts on contemporary literary and academic topics with an emphasis on extensive reading and the enhancement of critical reading skills. Students develop the ability to understand and use academically appropriate new words.

Law Enforcement (XNP)

XNP 0140
Basic Leadership/Johnson County Sheriff's Department
Upon successful completion of this course, the student should be able to define the supervisor's role within a company and identify the skills necessary to successfully fulfill that role. In addition, the student should be able to determine the supervisor's role in supervising employees on an individual basis and as a group. The student should also be able to apply the principles of supervision in simulated work situations. (10 sessions)

Supervision of Police Personnel
Prepare your first-line supervisors with the training they need to fulfill their leadership responsibilities. This two-week, 80 hour program assists supervisory personnel in making the transition form office to supervisor. The role of law enforcement supervisor is a challenging one, requiring the ability to maintain a balance between the objectives and responsibilities of workers and upper-level management, and the ability to manage the ever-increasing volume of job-related data. Topics covered include responsibilities of a staff officer, ethics, professionalism, community image, communication, motivational principles, supervisory challenge, diversity, disciplinary process, complaint investigations, planning and decision making, leadership, managing problem employee, employee performance appraisal, the personal profile system (DiSC) and case studies.

Identity Theft
This lesson will include an overview of Identity Theft. The presentation encompasses video, scenarios, law review, and a simulated Identity Theft investigation. The simulated scenario will focus on obtaining new techniques in combating financial crimes by utilizing audience input to capture a broad range of expertise from the initial police complaint to prosecution. Conscious of the statistic that 1 out of every 4 people will have their identity compromised within the next two years, the course design encourages an attendee to listen as a responding officer as well as a potential victim. Prevention tips on guarding ones identity will be discussed, examples of schemes and new trends will be shared, and details on courses of action in the event an identity is compromised will be included.

$65.00
XNP 5785
Computer Crimes
This course will provide a comprehensive look at the current trends in the growing subject of computer-related crimes. Instruction will include topics of on-line fraud, electronic storage of evidence of criminal activity, child pornography, on-line enticement, and financial crimes. This course will also instruct attendees on the basic seizure of electronic evidence and proper packaging techniques. The instructor will also present some personal case studies to demonstrate how investigations were conducted and mistakes that were made. Several new technology devices and "toys" will be presented in the class. The instructor intends for the course to be interactive and discussion from the participants is highly encouraged. Some material may be offensive, but is Law Enforcement related and intended for educational purposes only. The instructor will also attempt some humor and will keep the mood very casual. This course is directed to Law Enforcement Officers who have had very little computer exposure, to those who have a great deal of expertise in the subject.

$65.00
XNP 5790

Crime Scene Basic Photography
This will be a four hour class on basic police and crime scene photography. Topics covered will include the basic operation of the digital cameras that most agencies utilize for crime scene photography and their associated media, downloading/emailing/editing images, storage/evidence issues, special features found on most digital cameras, how to photograph various types of crime scenes, the use of scales, the proper use of perspective in photography, legal issues regarding digital images vs. 35 mm photos, do's and don'ts of crime scene photography. The course will consists of the viewing and analyzing of actual crime scene photos taken from various types of cases that the instructor has been involved in including homicide, rape, child abuse, aggravated battery, robbery, and property crimes.

$65.00

XNP 5791

Crime Scene Patrol Level
Understanding each crime scene is unique but that each requires similar processes, procedures, and documentation is the first step to a systematic approach to each scene. This class is for patrol officers and covers topics from gathering initial information and doing a walk through to crime scene diagrams and evidence collection.

$65.00

XNP 5795

Stress Management
This course will teach officers how to be pro-active throughout their careers in regard to the emotional problems consistent within law enforcement. This class will follow the model provided through PHD Kevin Gilmartin, author "Emotional Survival for Law Enforcement" and will discuss the varying stresses an officer can expect to encounter through their social, family and duty roles. The class will examine such topics of entitlement, balance and perspective that are primary issues in a law enforcement career.

$65.00

XNP 5800

Ethics

$35.50

XNP 58005

Advanc'd Accident Investigation
The course is a technical motor vehicle crash investigation class in which students will learn and apply basic principles of physics and mathematical equations to estimate speeds and causes of motor vehicle crashes. The proper procedures for measuring, completing scale diagrams, and recording physical evidence and facts available only at the crash scene will be taught.

$129.00

XNP 5810

Advanced FTO
Designed for Training Officers and Supervisors who have completed a basic Training and Evaluation Program course based on the San José Model. The advanced strategies used in this presentation are designed to maximize the effectiveness of those responsible for training and supervising the newly hired employee.
Criminal Interdiction
In this class, officers will learn how, during routine traffic stops, to identify indicators that may lead to investigation of other criminal activity. The course will also teach officers to identify hidden compartments: both those existing naturally in vehicles, and those that have been mechanically installed by sophisticated drug smugglers. Topics will include: Indicators, legal issues, racial profiling, rental cars, false compartments and use of K-9.

Pharmaceutical Diversion Investigation Training
This course will provide the student with a national overview of the abuse of prescription drugs, an understanding of the Controlled Substance Act as it applies to prescription controlled substances and a description of prescription drug crimes and their victims. Suggestions will be provided for the targeting, investigating and reporting of these offenses.

Officer Involved Shooting Investigations
The purpose of this course is to provide attendees with a basic investigative model that is applicable to all officer involved shootings, incidents, regardless of the size of their department. Police officer involved shootings are vastly different from any other type of investigation. The stakes for the shooting officer and his department are so high that it is imperative that the investigation be conducted in a prescribed manner. This course will provide those in attendance with the knowledge, skills and confidence necessary to handle any deadly force incident.

Command Officer Development Course
The course has been developed to provide participants with a group of management tools that can be applied on the job. This training provides a comprehensive overview of management practices. The course was built around a traditional police administration course. Additional classroom hours were added to provide an in-depth treatment of specific topical areas.

Domestic Terrorism
The session examines the wide variety of hate groups currently active in the United States - their history, activities and leaders. Beginning with a broad overview of the various factions of the hate movement, which include the Ku Klux Klan, neo-Nazis, racist Skinheads, black supremacists and others, it will then focus on the most prominent national organizations and state and local chapters. The session also offers several open-source, public Internet resources that can be used to examine these groups and their websites.

Columbine Debriefing
Dr. John Dunaway will complete a de-briefing for law enforcement on the Columbine High School shootings, which took place in Littleton, Colorado on April 19, 1999. John was the Undersheriff of Jefferson County at the time of the
incident and was heavily involved in handling it from start to finish. His de-briefing will cover the actual incident, the aftermath and ways to avoid having something like it happen again. This class is for Law Enforcement Officers only.

$19.00

XNP 5845

The Bullet Proof Mind
One of the world's foremost experts and speakers on the psychology of conflict, Army Ranger, West Point Psychology Professor, author of the Pulitzer nominated books: On Killing, and his new book, On Combat, Lt. Col. Dave Grossman, addresses: A new era of 'record' body counts in international and domestic terrorism, Salient historical events that may influence terrorist behavior, The possibility of school violence, and school/workplace violence prevention, A virus of violence in America and world-wide, its causes, and its effect, The psychological cost of conflict, The physiology and psychology of a conflict situation, PTSD: What is it and how to prevent it, The resistance to killing in every healthy human, Non-firers throughout history, A revolution in combat: Use of training to overcome the resistance to killing, Training kids to kill: The virus of violence and how kids can be enabled to kill, Survival after the battle and in the years to come.

$165.00

XNP 5850

Linguistic Statement Analysis Technique
All humans use the same subconscious strategies to lie by using different words and phrases, statement structure, and content in their written and spoken statements. Decades of research by experts in the fields of language, psychology, and deception detection have led to the identification of these trends in language that are referred to as linguistic signals. Using LSAT, investigators can identify the linguistic signals that differentiate deceptive statements from truthful ones.

$219.00

XNP 5855

Law Enforcement Operations
This program will be a presentation on law enforcement operations, focusing on risk management, systems design, customer service, accountability, and integrity. Also included in the program is a system for ethical decision making and many operational risk management ideas for identifying and addressing problem areas. This class is specifically designed for law enforcement supervisory and management personnel. Attendees will learn about techniques to maximize customer service, the decision making process, the "risk/frequency" analysis to better insure things go right, utilization of discretionary time, and where improvement is currently needed in our operations of these critical areas. This program is featured at the FBI National Academy program, the National Executive Institute, and the LEEDS program.

Basic Report Writing
Law Enforcement reports are an historical record, a legal document that you (or others) may have to defend in court much later, after your memory has faded. In this police report writing training seminar, you will learn techniques for successfully developing, organizing, writing and proofreading your report content.

$65.00
XNP 6082
Basic Police Training Officer
The 40-hour Basic PTO Course prepares the trainer to become a Police Training Officer (PTO) under the Reno Model. The fundamentals of post-academy training are covered including problem-based learning theory and method, available training resources, evaluation methods, emotional intelligence, the Learning Matrix, cooperative learning, mentoring, and the Neighborhood Portfolio.

$299.00
XNP 6084
Hostage/Crisis Negotiations 401
A description is not available for this course.

$0.00
XNP 6085
Racially Biased Policing
Agencies are recognizing that even the best officers might manifest bias and therefore, even the best agencies must be proactive to achieve fair and impartial policing. This training presents what is known as human biases and promotes guidance for promoting fair and impartial policing with areas of policy, training, supervision/accountability, leadership, recruitment/hiring, outreach, and measurement.

$0.00
XNP 6089
Law Enforcement Media Officers
This training will be useful for all levels of personnel having direct and formal contact with the media and for all command and executive personnel.

Leadership (XBZ)

XBZ 2100
Adapting to Change
If people wince, stonewall, or rebel when a change in routine is mentioned, there is a solution. When employees can adapt quickly, the entire organization becomes faster, more flexible, and better able to answer the demands of an increasingly competitive marketplace. This course develops the confidence and skills needed to face change and welcome it as an opportunity to grow and learn.

$99.00
XBZ 2101
Building Trust
Broken promises. Failed teams. Stalled initiatives. Sagging morale. These are just some of the destructive consequences of a lack of workplace trust. Trust is the responsibility of each individual--no exceptions. When it's there, you feel it. In a trusting environment, you see more teamwork, partnering, and productivity. This course gives you hands-on, proven strategies for building trust in the workplace.

$99.00
XBZ 2102
Communicating and Listening
When people in your organization are communicating effectively, they are informed and able to participate, contribute, and add value to their jobs and the
organization. This course is designed to equip you with the skills you need to communicate clearly and listen carefully.

$99.00

**XBZ 2103**

**Contributing to Meeting Success**

Although meetings are a fact of workplace life, too often employees are stuck in meetings that run late, accomplish little, and keep them from their real work. This course gives you the skills to save meeting time, keep meetings moving forward efficiently, and commit to and follow through on post-meeting actions.

$99.00

**XBZ 2104**

**Feedback Fundamentals**

Feedback isn't criticism! Once people understand that feedback is valuable, usable information, real performance improvement begins. Feedback Fundamentals helps you use feedback to enhance your job performance and ensure your success. The course emphasizes seeing feedback as objective information about performance that can help you improve the way you work.

$99.00

**XBZ 2105**

**Personal Empowerment: Taking Initiative**

If people see empowerment as something that is given to them, they will miss out on opportunities to take responsibility for action, or to take initiative to solve problems, improve processes, and give your company a competitive edge. This course seeks to change the mindset that empowerment is something that is given. It helps you see that you can and should look for improvement opportunities.

$99.00

**XBZ 2106**

**Reaching Group Agreement**

Productivity obviously suffers when group members cannot come to agreement or have different interpretations of decisions. And without strong commitment from each member, decisions will always fall short of their goal. This course focuses on the dynamics of group agreement and the importance of having everyone's commitment. It teaches seven techniques for making clear, high-quality decisions that have the buy-in and commitment of every group member.

$99.00

**XBZ 2107**

**Taking Charge of Your Development**

Retaining high-caliber employees is a pressing problem facing businesses today. Surprisingly, lack of professional growth often beats compensation as a reason why employees are leaving. Having employees who continuously learn and improve skills enables the organization to quickly adapt to and capitalize on opportunities. This course enables you to initiate, create, and execute your own development plan with your leader.

$99.00

**XBZ 2108**

**Valuing Differences**

Everyone looks at things in a unique way. Today, the companies with the greatest competitive advantage are those that can make the most of their people's diverse abilities. This course gives you effective tools for appreciating others' unique
perspectives, understanding people's inherent differences, and collaborating in a mutually beneficial way.

$99.00
XBZ 2109

Working as a Team
For a team to achieve its goals, its members must do more than just carry their own weight. They must involve, support, and share information with their teammates. And they must commit to the success of the entire team, not simply their own success. This course clearly teaches you the personal, interpersonal, and organizational advantages of working together, whether in teams or work groups.

$99.00
XBZ 2110

Working Through Conflict
When differences cause people to become angry and closed-minded, the resulting conflict has a negative effect on quality, productivity, cooperation, and communication. This course discusses how to manage conflict by dealing with differing ideas, interests, or perceptions.

$99.00
XBZ 2200

Coaching for Improvement
Your employees need to take responsibility for addressing unacceptable performance or work habits that impact others and the organization, but you must know how to help them do it. This course will help you conduct effective improvement discussions and provide the feedback and ongoing support employees need to improve performance.

$99.00
XBZ 2201

Coaching for Success
You will learn a proven coaching process to ensure that you identify coaching opportunities, provide needed coaching and support, observe performance, and measure results until desired outcomes are achieved. In addition, you will learn how coaching for success benefits individuals, strengthens work groups, and supports your company's objectives and priorities.

$99.00
XBZ 2202

Delegating for Results
In this course, you will overcome your hesitation for delegation by learning skills for successfully matching people, responsibility, and authority. This allows your staff to maximize involvement, productivity, motivation, and growth for individuals, groups, and your organization.

$99.00
XBZ 2203

Developing Others
Developing your employees is critical to retaining key talent, driving higher levels of engagement, and ultimately impacting your organization's success. This course provides you with a practical process and the skills necessary to develop talent.

$99.00
XBZ 2204

Essentials of Leadership
The essence of being an effective leader lies in establishing good interpersonal work relationships and having the ability to spark action in others. This course teaches you how to get results through people. You will acquire a set of proven interaction skills, discover seven Leadership Imperatives key to meeting today’s challenges, and realize your role as a catalyst leader who inspires others to act.

$99.00

XBZ 2205

Leading Change
This course focuses on your crucial role in effectively leading change initiatives in your workplace. You will learn how to introduce a change initiative and lead discussions with employees to explore how best to implement the changes. You will also learn to help others overcome their resistance to change. These skills will enable your ability to minimize the potentially negative effects of change on morale, processes, and productivity.

$99.00

XBZ 2206

Resolving Conflict
This course teaches you how to recognize that a conflict is escalating and minimize damage by using the most appropriate resolution tactic-regardless of which stage a conflict is in. You will also learn the true cost of conflict to your organization and techniques for handling even the most challenging conflict-related discussions effectively.

$99.00

XBZ 2207

Getting Started as a New Leader
It is an exciting day when you are recognized for your performance and rewarded with a promotion to the leadership ranks. This course arms you with the knowledge and skills needed to confront the challenges associated with getting your footing and results more quickly in your new leadership role. Learn how to focus your time and efforts on tasks that are most important to your organization’s success.

$99.00

XBZ 2208

Making Meetings Work
Meetings are a great tool for achieving business results when the right people meet with a clear purpose and specific agenda. You can save time and resources by leading meetings that support business needs. Learn how to plan, facilitate, and follow-up on meetings (including virtual meetings) to ensure that there is a payoff for the time invested.

$99.00

XBZ 2209

Reaching Agreement
In today’s fast-paced and competitive environment, organizations must be able to make high-quality decisions as efficiently as possible. You need leaders who can get all of the ideas out on the table and then get everyone to agree on and commit to a course of action. This course teaches leaders seven techniques for making high-quality decisions group members will support and execute.

$99.00
XBZ 2210

Assessing Talent
The move from an individual contributor to a leadership role marks a critical and challenging career transition. Many people who are outstanding in their functional area prove to be less than successful leaders when it comes to motivating, developing, and retaining top talent. This program is set up as a day-in-the-life format so that you complete tasks and engage in role-plays that simulate challenges that typically occur on the job. You will be assessed on oral communication, coaching, gaining commitment, planning and organizing, and decision making. Two weeks after the assessment center is completed, you will receive a follow-up phone call and feedback report which provides information in key leadership competencies and includes a guide containing activities that will help develop your leadership skills.

$1,499.00

XBZ 2212

Retaining Talent
Do you understand your critical role in retaining organizational talent? Come learn how to identify what it takes to keep employees happy and satisfied, and how to conduct "quick check" discussions critical for retaining valuable employees. By taking a proactive approach to retaining people, and encouraging people to openly discuss what it will take for them to stay, you can create an environment in which people feel valued and satisfied in their jobs.

$99.00

XBZ 2213

Influential Leadership
In today's flatter, ever-evolving organization, you need to get things done through people who work outside their line of reporting—and in some cases who even "outrank" you. Welcome to the new age of influence, where effective leaders don't, or can't, throw their weight around to make things happen—even with their direct reports. You will learn influencing strategies and how to package ideas to gain the commitment of even the most skeptical coworkers and partners.

$99.00

XBZ 2214

Managing Performance Problems
This course builds your skills in handling chronic performance, work-habit problems or serious misconduct. You will learn how to document the problem and explain what the employee must do to address it. Leaders are skilled in discussing and imposing formal consequences while adhering to their organizations disciplinary policies and procedures.

$99.00

XBZ 2216

Reviewing Performance Progress
This course helps you drive performance and accountability by replacing the "dread" of performance reviews with the "human touch" that builds trusting relationships with your employees. You will learn to conduct effective discussions that recognize people's success and plan for their future development.

$99.00

XBZ 2217

Building an Environment of Trust
Because of the crucial link between trust and business success, you must realize the power of trust as a business tool. You will learn how to avoid the trust
breakers and take action to create an environment in which people take risks, identify and solve problems, and work together to create and sustain high levels of trust.

$99.00

XBZ 2218

Setting Performance Expectations
This course helps you drive performance and accountability by helping your employees understand what is expected of them and gaining their commitment to achieving it. When you conduct effective setting expectations discussions, your staff feel more motivated to perform well because they see how their efforts make a difference.

$99.00

XBZ 2220

Achieving Your Leadership Potential
According to surveys of CEOs and HR managers, effective leadership is a competitive advantage for their organizations. This course bridges the widening gap between what is needed and required of you as an emerging leader. A three step process—Diagnose, Plan, and Execute—will help you stretch your capabilities and accelerate your leadership development.

$99.00

XBZ 2221

Interaction Skills for Success
Improving people’s interaction skills will improve the way your workforce thinks and acts. This course presents the basics on how to work well together, reduce wasted time, lessen conflict, and influence interactions in a positive way.

$99.00

Legal Education and Mediation (XNL)

XNL 1000

Principles of Core Mediation: How to Settle Disputes
You will gain valuable information about the mediation process and how it can be used to effectively settle conflicts. Our instructors are state-approved mediators who will teach you the stages of core mediation, which involves neighbor-to-neighbor disputes, as well as the guidelines for using mediation in your current position. Upon completion of this course and the Practicum you can apply with the state of Kansas to be an approved core mediator.

$449.00

XNL 1005

Core Mediation Practicum
The Core Mediation Practicum involves co-mediating three actual court cases under the supervision of a state-approved mediator. To become state-approved you must co-mEDIATE all three cases in the content area in which you wish to specialize (core, civil, domestic, juvenile dependency or parent/adolescent). Note: This Practicum will meet the Core requirement only. Contact the Professional Education office at 913-469-4420 for more information.

$299.00

XNL 1010

Domestic Relations Mediation Training
You will learn to apply mediation principles to situations involving divorcing parents who are in dispute over their children, disputes pertaining to access to their children or co-parenting matters. Course materials include a review of mediation principles, application to divorce situations, child development, conflict theory, ethics, Kansas laws, resource development and networking. You will participate in several role-play activities to practice your skill development. This course has been approved by the KS Supreme Court to meet the educational/classroom requirements for approval as a domestic mediator. Upon completion of this course and the Domestic Practicum you can apply with the state of Kansas to be an approved domestic mediator. Prerequisite: Principles of Core Mediation.

$429.00

XNL 1015

Civil Mediation Training
You will focus your mediation skills to practice resolving disputes between employers and employees, management and labor, businesses and consumers, government and environmental groups, residents and communities. The training techniques include lecture, video, class discussion, demonstrations and student role-plays. This course has been approved by the KS Supreme Court to meet the educational/classroom requirements for approval as a civil mediator. Upon completion of this course and a Civil Practicum you can apply with the state of Kansas to be an approved civil mediator. Prerequisite: Principles of Core Mediation.

$429.00

XNL 1016

Civil Mediation Practicum
The Civil Mediation Practicum involves co-mediating three actual court cases under the supervision of a state-approved mediator. To become state-approved you must comediate all three cases in the content are in which you wish to specialize (core, civil, domestic, juvenile dependency or parent/adolescent). Note: This Practicum will meet the Civil requirement only. Contact the Professional Education office at 913-469-4420 for more information.

$349.00

XNL 1060

Awakening the Spirit of Mediation
At the heart of each mediation session is a relationship between you and each party. One of the least recognized resources for finding solutions in disputes is each party's innate personal need to have positive, beneficial relationships with others. You will explore the nature of this need and explore a variety of strategies and techniques to help find resolution of the issues by fostering the reconciliation of the relationships that embody these issues.

$99.00

XNL 1126

Mentoring New Mediators
This course will prepare experienced mediators to become Kansas Supreme Court-approved "mentor mediators", ready to supervise and guide new mediators in their actual practice. Participants need to have conducted 10 or more full mediation cases in any setting - core, domestic, civil, parent-adolescent, victim-offender, etc. Participants are encouraged to read "The Making of a Mediator" by Michael Lang and Alison Taylor prior to the class.

$69.00

XNL 1150

Conflict Management Skills for Professionals
You will learn a simple and effective framework for approaching conflict in professional settings. You will gain an awareness of potential disputes, foster communication about differences and respond constructively to clients, staff and colleagues. With these skills you can manage your own reaction to difficulties and create positive outcomes.

$59.00

**XNL 1157**

**Employment Mediation**

Not all workplaces lend themselves to mediation. In this course you will learn to create a positive environment that uses mediation when needed. You will review conflict theory and negotiation theory as applied in appropriate environments. You will also develop strategies for using mediation in your workplace. Prerequisite: Read and be ready to discuss "Getting to Yes". This book is included as part of the course fee.

$119.00

**XNL 1160**

**Negotiating Win/Win Solutions**

You will enhance your negotiation skills by discussing ways to separate the people from the problem, focus on interests not positions, develop creative options for mutual gain while insisting on the use of objective criteria. You will discover your preferred negotiation style and how it compares to others. The required textbook will be provided.

$129.00

**XNL 1172**

**Communication Strategies and Techniques for Mediators/Negotiators**

Whether you are mediating disputes or negotiating agreements on your own behalf, your success depends largely on the manner in which you communicate with other parties. In this highly interactive course you will review the role of perception in negotiation, examine your nonverbal and listening strategies, and improve your skills in constructing messages, word choice, diplomacy and tact.

$99.00

**XNL 1174**

**Mediating Conflict in Organizations**

You will learn to use your mediation skills to effectively deal with all types of conflicts within public and private sector organizations. You will learn to convert conflict from an unpleasant encounter into a positive interaction, break the reactive cycle of accusations, neutralize emotions, frame issues appropriately and create new perspectives through powerful questions.

$99.00

**XNL 1177**

**Beyond Impasse Attitudes and Skills**

You will learn to generate new energy and creativity as a mediator with techniques such as positive approaches, humor and mindset to help parties move past obstacles towards solutions.

$49.00

**XNL 1180**

**Negotiating with Power, Influence and Leverage**

Do you need to upgrade your negotiating strategies? This course will cover the relationship between perception and power, sources of power, strategies to
increase your leverage at an uneven table, and strategies to enhance your ability
to persuade and influence others in interpersonal, group and organizational
negotiations.

$59.00
XNL 1181

Working With High Conflict Families
Are you ready to arm your practice with a positive mindset and new strategies for
working effectively with the high conflict families who use the most service time
and community resources? This course highlights interdisciplinary approaches to
adult learning and cognitive behavioral change. You will learn simple but effective
skills to manage emotions, streamline communication and negotiate with
challenging clients.

$59.00
XNL 1182

Mediation Strategies for Dealing with Difficult Situations and Behaviors
You will explore ways to deal with complex conflict situations that go beyond the
realm of simple disagreements and learn how to get better results when
mediations involve contentious issues. You will learn what you need to do
differently when dealing with multiple parties and issues; how to best deal with
controversies; how to set the stage for positive outcomes by the way you develop
the negotiation agenda; and how to reduce the stress level and improve group
dynamics. You will also learn how to deal more effectively with various types of
difficult behaviors, including how to handle emotional outbursts, threats, and
ultimatums.

$99.00
XNL 1183

Mediation Skills for Changing Times
In today’s quickly changing, dynamic, and sometime volatile world, mediation
skills are more important than ever before. This highly participatory and dynamic
course has been designed to provide you with strategies that can be used to
improve outcomes in all types of mediations. In particular, you will learn how to
select the best mediation style, how to use timing techniques effectively, how to
neutralize emotionalism, and when and how to make creative solutions,
compromises and concessions.

$99.00
XNL 1184

Everyday Conflict Resolution Skills
Conflict is normal at work and in life! Avoiding conflict may not be possible or
productive. This course will help you expand and adapt your approach to any
problem at hand. Learn simple but effective strategies for managing your
emotions, defusing conflict, clarifying others' concerns, and choosing productive
responses. Build on your unique characteristics and natural problem-solving
methods with new strategies. This interdisciplinary, interactive course focuses on
appreciating and managing differences between colleagues and within work
teams with a positive, centered approach to conflict management.

$59.00
XNL 1185

Mediation and Peacemaking Skills for Leaders and Managers
This course shows you how to become a more effective mediator who guides
others through the conflict resolution process. You will explore essential mediation
behaviors, ways to deal with emotionalism, how to stay objective, how to uncover
underlying needs, and how to achieve creative solutions. You will also learn the
art of organizational peacekeeping, with strategies for developing a culture in
which people feel comfortable and safe in expressing divergent views.

$99.00
XNL 1186
Grief 101 for Mediators
A common denominator in all disputes and conflicts is grief, the dynamic of responding to and resolving life changing events. Greater success during mediations is possible if you recognize these dynamics and understand how they play into resolution of the issues. At the end of this course you will be able to identify various manifestations of the grief process, understand the components of the process, and utilize a variety of approaches for turning grief into agreement.

$59.00
XNL 1187
Mediating with Emotional Intelligence
You will explore four personal and social competencies that can enhance your capabilities as a mediator: self-awareness, self-management, social awareness and relationship management. You will learn how to tune into your core instincts, avoid overly negative inner dialogue when assessing people, and control your emotions. Also, you will learn how to deal with different emotional thresholds, utilize the styles that enable you to drive emotions in a positive way, and be more emotionally in sync with mediation participants.

$99.00

Lifetime Learning (XLN)

You will understand your own emotions and how they have contributed to your effectiveness as a leader, be able to apply emotional intelligence skills to a variety of workplace situations, and create an action plan for enhancing your emotional
Negotiating for Results
This workshop provides you with an interactive approach to negotiations. You will be encouraged to focus on interests rather than positions, so you can develop relationships of mutual trust, fairness and respect for one another. You will learn and practice effective communication skills, problem-solving and consensus building, with the intention of turning face-to-face confrontation into side-by-side problem solving.

Increased Personal Productivity
It takes more than good intentions to manage your time. Learn how you can take control to increase your personal productivity by developing goals that get results, setting priorities and staying on track. Plan what you want to achieve and make it happen. These specific strategies and tools for time management will decrease your stress and increase your success.

Understanding the Human Resources Function
No matter what role you play in an organization, you are affected by human resources. This course is designed to help people without experience in human resources to understand this very vital link in the organizational chain. It will prepare both managers and business owners to handle basic human resource functions in a way that will ensure the best possible result. In particular, attention is given to the hiring process, including ways to locate quality employees in a competitive labor market.

Principles of Sales Management
You will learn how to prepare and lead better sales meetings and how to resolve team conflict. You will also learn how to develop sales plans and budgets, recruit and interview new sales professionals, and set team goals and objectives. Finally, you will practice the art of sales training.

Effective Business Writing
Do you have a nagging suspicion that a small improvement in your writing skills might also improve your career prospects? This course will help you identify and eliminate problem areas. You will learn the secret to developing powerful written documents that immediately draw readers in and keep them motivated to continue until your very last, well-chosen word.

Administrative Assistant Fundamentals
Rapid growth in the health, legal services, data processing, management, public relations, and other industries have created many new job opportunities for administrative assistants. This course will help you discover and master the
essentials of managerial and staff support, information and records management, communications technology, travel and meeting coordination, space planning, and office ergonomics.

$99.00
XDM 0610

Business Law for the Small Business Owner
Learn how to successfully protect your small business and solve most of the legal problems that may arise. You will learn how to deal with issues such as contracts, employee relations, customer relations, and choosing the right business model. You will also find out how to deal with government licensing requirements and regulations, as well as problems with tax collectors. Special considerations are included for home-based and Internet-based businesses.

$99.00
XDM 0611

Workers Compensation
Knowing the ins and outs of workers’ compensation is an absolutely essential skill for any paralegal. Having a solid foundation in this field of law is also a great way to land a job with a private law firm or local, state, or federal governments. This course presents workers’ compensation in a straightforward and enjoyable manner.

$99.00
XDM 0613

Employment Law Fundamentals
Learn the basics of employment law so you can legally hire, evaluate and manage employees as a manager, supervisor, small business owner, human resource specialist, or corporate executive. Learn the difference between an employee and independent contractor; the basic types of employee benefits; effective hiring, evaluation, and termination procedures; methods to resolve employment disputes in and out of court; discrimination and union laws; and workplace safety rules.

$99.00
XDM 0614

Managing Customer Service
Are you empowering your organization with quality customer service suggestions? Do you know how to evaluate your customers, or better yet, what to do with the data once you have it? You will discover dynamite methods for bringing out the best in your team, measuring customer service, and learning what you need to do to anticipate the needs of your reps and your customers. In addition, you will learn how to communicate, resolve complaints, and foster winning traits in each of your reps.

$99.00
XDM 0621

Accounting Fundamentals
If you are interested in increasing your financial awareness and accountability while also gaining a marketable skill, this course is for you. This course will introduce you to managerial accounting, the process that uses financial information to organize and govern finances within an organization. It will give you a basis for understanding and analyzing financial statements and prepare you to make effective financial decisions at a managerial level. You will be able to identify evolving management themes, understand the fundamental differences between management and financial accounting, and apply various types of management accounting systems. You will be prepared to explain cost volume profit analysis and identify the major components of product costing systems. You will know how to describe various types of business overhead costs, how to prepare budgeted statements, and you will understand variance...
analysis systems.

$199.00  
**XDM 0663**  
**Principles of Marketing**  
You will become familiar with the role of marketing in business as well as the process of market analysis and planning. Marketing is about companies creating and developing relationships with their customers. Effective marketing efforts build a bond between customers and sellers, causing customers to grow loyal to companies. You will learn how to analyze buyers, markets, and products, and how to determine whether an ad really does its job. You will have an insider’s understanding of the purpose of marketing and what it takes to develop an effective marketing plan.

$199.00  
**XDM 0664**  
**Building Teams That Work**  
Teams are becoming a staple in today's workplace. You will learn the components of a successful team and the stages of its development. You will master the skills you will need to effectively manage projects, make decisions, and solve problems in a team setting. Plus, you will have a chance to learn the pitfalls of unhealthy group interaction and minimize any of its effects on your team.

$99.00  
**XDM 0665**  
**Achieving Success with Difficult People**  
Do you know people whose behavior makes completing even the simplest tasks difficult? Would you like to learn how to have more successful relationships with difficult bosses, co-workers, students, neighbors or family members? You will gain helpful information for understanding yourself, solving people problems, and improving your professional productivity.

$99.00  
**XDM 0667**  
**Leadership**  
Leadership skills can help you gain the respect and admiration of others, while also allowing you to enjoy success in your career and more control over your destiny. Contrary to popular belief, leadership skills can be learned and developed. Even if you do not hold a leadership position, this course will teach you how to use the principles of great leaders to achieve success in almost every aspect of your daily life.

$99.00  
**XDM 1400**  
**Distribution & Logistics Management**  
This course will not only show you how to create and operate a logistics function, but it will also show you how to achieve success through a combination of strategies and tactics. All elements of distribution and logistics management will be covered, including physical distribution, warehouse selection, material handling, packaging, order fulfillment, customer service, inventory management, receiving, production stores, and returned goods. The course will also address key technology issues such as enterprise resource planning (ERP), bar coding, electronic data interchange (EDI), electronic commerce (e-commerce), and distribution resource planning (DRP).
XDM 1401

Manufacturing Fundamentals
You will learn the basic skills required to work in the manufacturing field. Discover the role of production design, process planning, and the heart of 13 different manufacturing processes. Master product development concepts such as the voice of the customer (VOC), quality function deployment (QFD), and failure mode and effects analysis (FMEA). You will also find out how ISO 9000 and enterprise resource planning (ERP) make the most of a manufacturer's potential.

$99.00

XDM 1402

Manufacturing Applications
You will learn how successful organizations effectively use master production scheduling (MPS), production activity control (PAC), material requirements planning (MRP), and inventory management. You will also discover how the application of Six Sigma, and statistical process control (SPC) increase customer satisfaction, and you will learn about the elements of a logistics system, including warehousing and receiving. In addition, you will understand the purpose of customer demand forecasting and find out what forecasting methods are suitable for which situations.

$99.00

XDM 1403

Purchasing Fundamentals
You will learn how to define internal customer needs, generate purchase requisitions and purchase orders, expedite, trace and receive supplier deliveries, maintain effective purchasing records and create and manage various purchasing budgets. You learn about business law, contracts, leasing, Six Sigma and total quality management (TQM). This course will help you prepare for the internationally-recognized Certified Purchasing Manager (C.P.M.) and Accredited Purchasing Practitioner (A.P.P.) exams offered by the Institute for Supply Management (ISM).

$99.00

XDM 1404

Purchasing Applications
You will learn the basics of enterprise resource planning (ERP), bar coding, electronic data interchange (EDI), and electronic commerce (e-commerce). You will also be able develop and communicate specifications, understand control charts, create an ABC inventory classification, and interpret a balance sheet, income statement, and cash flow statement. This course will help you prepare for the internationally-recognized Certified Purchasing Manager (C.P.M.) and Accredited Purchasing Practitioner (A.P.P.) exams offered by the Institute for Supply Management (ISM).

$99.00

XDM 1405

Six Sigma: Total Quality Applications
You will learn how to effectively apply the elements and methods of Six Sigma and understand how more than 25 tools and methods relate to the DMAIC (define, measure, analyze, improve, and control) model. You will learn how to define, plan, implement, and close a Six Sigma project. You will also know how to use process capability and how to apply lean thinking.

$99.00

XDM 1406

Supply Chain Management Fundamentals
Supply chain management professionals play a key role in capturing customer demands, creating forecasts, developing schedules, ordering and managing inventory, controlling production orders, and maximizing customer satisfaction. You will understand how to represent top management’s interests on the shop floor, and you will know how to translate such initiatives as strategic planning, sales and operations planning, and new product introduction into achievable operational plans. The course also includes essential information to help you prepare for internationally recognized supply chain and materials management certification examinations.

$99.00

**XDM 1407**

**Supply Chain Management Applications**

You will discover the finer points of SCM including manufacturing strategy, inventory budgeting and management, lean manufacturing, total quality management (TQM), Six Sigma, total employee involvement (TEI), the theory of constraints (TOC), manufacturing technology, and facility selection. You will learn about enterprise and distribution resource planning (ERP and DRP) and discover statistical process control (SPC). Finally, you will also learn how to reduce manufacturing set-up time and how to make an effective facility layout. This course will help you prepare for the internationally-recognized Certified in Production and Inventory Management (CPIM) exam offered by APICS.

$99.00

**XDM 1408**

**Total Quality Fundamentals**

You will learn how successful organizations apply quality to their everyday activities. You will find out how to use teamwork to make the most of employees’ abilities and potential. You will be prepared to manage the process of change, reduce customer complaints, and increase customer service. In addition, discover the role of customers in quality and determine the major elements of a quality system. Master key concepts such as the cost of nonquality, variation, and total employee involvement (TEI).

$99.00

**XDM 1478**

**Lean Six Sigma Green Belt**

This comprehensive course prepares you to work directly with cross-functional project leaders to carry out identified improvement projects using Lean and Six Sigma methodologies and tools. You will review key practices and tools, learn statistical tools and techniques, learn to identify business improvement projects and apply a structure problem solving methodology, and learn key principles in the DMAIC model. Upon completion of the course, a project, and an exam you will be certified as a Lean/Six Sigma Green Belt.

$1,999.00

**XDM 1479**

**Lean Six Sigma Champion**

This overview course is designed to help executives understand how Lean and Six Sigma methodologies work together in their organizational improvement efforts. You will gain an awareness of terminology and a clear understanding of the necessity of Lean/Six Sigma as part of your business process. You will leave this course with the ability to guide the selection of projects and training paths of colleagues within your organization.

$349.00

**XDM 1480**

**Lean Six Sigma Black Belt**
This comprehensive course prepares you to lead cross-functional teams in the implementation and completion of identified improvement projects. As a Black Belt you will be trained to be an expert in Lean and statistical process control tools and techniques. You will review key practices and tools, learn essential DMAIC principles, understand value stream mapping, and review Kaizen Sigma. You will identify a project and develop an action plan to implement the learned principles. Upon completion of the course, a project, and an exam you will be certified as a Lean/Six Sigma Black Belt.

$5,999.00
XDM 1489

Lean Six Sigma Black Belt for Healthcare
This course takes the core concepts of our Black Belt training and gears them for your industry needs. Through classroom studies, hands-on exercises, and a keystone project, you will learn how to help your organization increase the quality of your safety goals, clinical outcomes, compliance rates, financial impact, service cost, operational efficiency, and stakeholder satisfaction. You will learn to reduce errors, redundancies and costs. Upon completion of the course, a project, and an exam you will be certified as a Lean/Six Sigma Black Belt.

$5,999.00
XDM 1490

ASQ Quality Engineer Exam Prep
This course provides an overview of the body of knowledge covered in the Quality Engineer exam. You will study test questions and determine your strengths and where you need help to pass the exam.

$115.00
XDM 1491

ASQ Quality Auditor Exam Prep
This course provides an overview of the body of knowledge covered in the Quality Auditor exam. You will study test questions and determine your strengths and where you need help to pass the exam.

$115.00
XDM 1492

ASQ Mgr of Quality Exam Prep
This course provides an overview of the body of knowledge covered in the Manager of Quality exam. You will study test questions and determine your strengths and where you need help to pass the exam.

$115.00
XDM 1493

ASQ Software Qlty Eng Exam Prep
This course provides an overview of the body of knowledge covered in the Software Quality exam. You will study test questions and determine your strengths and where you need help to pass the exam.

$115.00
XDM 1494

Hist of Continuous Improvement
You will review the history of quality management systems, emphasizing the philosophy, goals, origins, and motivational systems.

$77.00
XDM 1495

Metrology
In this course you will study common gages and measurement instruments, including variable gages, attribute gages, transfer gages, and others. You will review gage selection, calibration, measurement system analysis, and repeatability and reproducibility studies.

$300.00

XDM 1496

Voice of the Customer and Requirements
You will learn how to elicit requirements from customers who do not know what they want.

$77.00

XDM 1497

Process Mapping
You will review SIPOC process flow chart making, terminology, symbols, flows and flow related tools. Mapping will be practiced during class.

$77.00

XDM 1498

Critical to Quality Requirements
You will learn how to translate customer feedback into goals and objectives, including CTQ and requirements. Prerequisite: Voice of the Customer.

$30.00

XDM 1499

Customer and Suppliers
You will cover supplier relations, management methods to include customer relations, needs and satisfactions.

$150.00

XDM 1500

Financial Measures-CoQ
After completing this course, you will: understand the critical success factors for implementation, including buy-in; learn the strategy of using finance for improvement; use a project approach to get started; practice application of the major categories of quality costs; understand the five ways to collect quality cost information; and recognize how process flow can be used to measure quality costs.

$150.00

XDM 1501

Quality Tools
In this course you will cover the following topics: Cause-and-effect diagram; Check sheet; Control charts; Histogram; Pareto chart; Scatter diagram; Stratification; Affinity diagram; Relations diagram; Tree diagram; Matrix diagram; Matrix data analysis; Arrow diagram; Process decision program chart (PDPC); Nominal Group Technique; Force field analysis; Brainstorming; Time series data plots; Process capability; Radar chart; Activity Network diagram; Pert Chart; Gantt chart; Flowchart; FMEA; Root Cause Analysis; QFD; DOE.

$150.00
XDM 1502

Risk Management
You will describe and use basic techniques for risk identification, control, and mitigation.

$150.00

XDM 1503

Lean Six Sigma Green Belt for Health Care
This course takes the core concepts of our Green Belt training and gears them for your industry needs. Through classroom studies, hands-on exercises, and a keystone project, you will learn how to help your organization increase the quality of your safety goals, clinical outcomes, compliance rates, financial impact, service cost, operational efficiency, and stakeholder satisfaction. You will learn to reduce errors, redundancies and costs. Upon completion of the course, a project, and an exam you will be certified as a Lean/Six Sigma Green Belt.

$1,999.00

XDM 8924

Effective Team Building Skills for Project Managers
Use of teams in project management is universal, yet not every team leader has been trained how to do more than simply "manage". Successful team leaders share important communication skills. It takes more than strong business or technical skills to run a thriving and efficient project team. A good project team leader inspires others and makes working for them exhilarating, educational, and fulfilling. An effective project team leader works with team members to attain a common goal, inspires by example and deals with problems in a decisive but compassionate way. Students will be offered the opportunity to develop the teambuilding skills necessary to become truly effective and inspiring project team leaders. This highly-interactive course offers online self-assessment, dynamic exercise and role plays, and demonstrative videos to achieve immediate results for on-the-job use. Special attention will be given to working successfully with functional managers. Prerequisite: Project Leadership and Team Motivation or equivalent experience.

$559.00

XDM 8926

Conflict Resolution for Project Managers: Moving into Solution Success with Stakeholders
Conflict within the project is inevitable, yet many are at a loss when trying to manage conflict within their project or surrounding their project simply because they haven't been trained in conflict resolution. Within this highly-interactive course, students will gain a clear understanding of conflict, as well as be able to identify their own conflict patterns. Students will be trained to manage disputes positively rather than responding to them on an emotional level. Practical strategies will be presented addressing conflict management, dealing with difficult behavior, and developing trust to minimize potential conflict. Students will apply their knowledge through role-play, dynamic exercises, and self-assessment quizzes. Special attention will be given to mediation techniques for project team leaders and multi-party disputes between stakeholders. The end results: better work environment, stronger project results, and greater team performance. Prerequisite: Project Management Essentials or equivalent experience

$559.00

XDM 8927

Project Management Essentials
Project Management is defined as the process of planning, organizing, staffing, directing and controlling the production of a system. This 3-day course uses lecture, discussion and case studies to provide an overview of project management concepts and principles. Topics include the Project Management
Framework, Standards, Process Groups, and Knowledge Areas. Specific issues such as project authority, leadership, people skills, and stakeholder communication strategies will also be covered.

$829.00

**XDM 8928**

**Estimating and Managing Project Costs**

The successful management of project cost is essential for the success of an organization. Realistic estimates are required to make informed decisions about funding projects. During project execution the estimate provides a basis for tracking and controlling project costs. This one-day course ensures that a comprehensive process is used to estimate project costs with an appropriate level of detail. Technical professionals are presented with financial concepts that will improve communication and teamwork with business and financial managers. Practice in developing estimates, creating estimate forms, and analyzing cost reports ensure participants leave the course ready to apply what they have learned. Prerequisite: Project Management Essentials or equivalent experience.

$279.00

**XDM 8929**

**Project Risk Management**

Identifying, analyzing, and responding to risk are crucial elements for the successful management of projects. In this one-day course, students will gain an understanding of risk management and the role and elements of a risk management plan (RMP). Other topics include identifying risks, methods and tools for analyzing risks and determining risk impacts, risk prioritization and mitigation techniques, and methods to track, control, and communicate risks throughout the project life cycle. Prerequisite: Project Management Essentials or equivalent knowledge.

$279.00

**XDM 8930**

**Effective Presentation and Public Speaking Skills for Project Managers**

This course offers a hands-on approach with team role-plays and practical exercises to make even a beginning project manager a good presenter, and an experienced project manager a great presenter. This highly-interactive course provides students with the opportunity to develop and practice their presentation skills and gain confidence in the types of public speaking required in the field of project management. Students will develop the skills to analyze and evaluate effective methods of presenting for a project, including delivery style, message organization, content development, and visual aids use. During this course, students will work collaboratively to learn how to distinguish characteristics of a strong presenter and how to improve their own presentation abilities. Students will deliver a brief (5-minute) presentation on a project topic of their choice, as well as give and receive feedback from their classmates. Special emphasis will be given to influencing your audience, thinking on your feet, and handling questions with clarity and effectiveness. Prerequisite: Project Management Essentials or equivalent experience.

$559.00

**XDM 8931**

**Effective Project Scheduling and Control**

Project managers are charged with developing and managing project schedules. On-time delivery is often critical to project success, and also contributes to controlling project cost. This 2-day course ensures students have a foundation of critical path method (CPM) scheduling concepts, and the ability to build a workable project plan. Participants practice developing and analyzing schedules using Microsoft Project as a software tool. Prerequisite: Project Management Essentials or equivalent experience.
Effective Communication for Project Managers

Internal and external client communication skills are the trademark of successful project personnel. Managing project communications is one of the most important duties of a project manager. This two-day workshop emphasizes the importance of communication skills in building strong partnerships between technical professionals, project managers and their customers. Along with providing models for diagnosing and reducing existing barriers to effective communication, enrollees learn how to match the mode of communication to the message. Through case studies and role-plays, this course builds specific skills for active listening, one-on-one and group meetings, telephone calls, and written communications. This course also helps project managers assess their project communication needs, plan for meeting those needs, and discusses effectively communicating project status and forecasts. Prerequisite: Project Management Essentials or equivalent experience.

Project Leadership, Team Motivation, and Contract Management

Effective leadership and team motivation are critical for the success of any project. In this two-day seminar students are introduced to the elements and methods of leadership in a technical environment as well as the tools and techniques for team development and motivation. Other topics include resolving conflict and managing personnel issues, analyzing stages of team development and maximizing team effectiveness. Prerequisite: Project Management Essentials or equivalent experience.

Project Quality Management

Project Quality Management focuses on overseeing product quality and ensuring process quality when creating project deliverables. In this one-day course, students master the quality planning process, quality planning tools and metrics, and quality assurance. Prerequisite: Project Management Essentials or equivalent experience.

Project Management Workshop

This course is designed, but not limited to, as a capstone for the Certificate of Project Management. In this 3-day workshop students gain experience and reinforce concepts learned in previous project management seminars by putting their knowledge into practice by simulating managing a real-world project. Prerequisite: Completion or equivalent experience of all other requirements for the Certificate of Project Management.

Massage Therapy (XNM)

Chronic Illness Intervention
A description is not available for this course.
**XNM 5000**  
**Bodywork I**  
This training module will introduce you to the theory and practice of bodywork. The history, philosophy, art, techniques and experience of Swedish Massage will be presented. You will be taught the five basic Swedish Massage techniques (vibration, friction, effleurage, tapotement, and petrissage) and how to combine them into a full-body massage. Other topics will include review of anatomy and body structures, benefits, contraindications, breathing and grounding skills, practitioner self-care, use of oils and draping techniques. (72 hours)  
$936.00

**XNM 5001**  
**Anatomy and Physiology**  
You will study the relationship of structure to function in the organ systems of the human body. Emphasis will be on the location of anatomical features and their functions. This course is designed to study anatomy and physiology as it relates to the field of massage. You will receive 100 contact hours for this course. Call to determine if previously earned credits or hours are equivalent and/or transferable.  
$1,300.00

A description is not available for this course.  
$300.00

**XNM 5007**  
**Professional Business Development**  
This course will serve as the foundation for establishing and maintaining a
successful professional massage practice. Students will go through a series of exercises designed to stimulate their awareness of establishing business fundamentals. Ethical issues, documenting massage sessions using medical terminology, and maintaining a safe and nurturing work environment will be covered. Students will also apply learning skills toward public speaking, conceptual planning, and mastering marketing tools.

$572.00
XNM 5010

Kinesiology
Kinesiology is the study of movement as it relates to the human body. This course will include an intense review of muscular-skeletal anatomy, and elements of physics, geometry, and physiology. The curriculum is designed to provide instruction in Kinesiology as it pertains to therapeutic massage, and as students you will practice palpation and assessment of body motion with the intent of being able to apply appropriate body work. (40 hours)

$520.00
XNM 5011

Credit by Exam/Kinesiology
A description is not available for this course.

$220.00
XNM 5020

First Aid and CPR
Adult CPR and Basic First Aid are taught in this lecture and hands-on training. Airway obstruction, basic life support, wounds, bleeding, injuries, sudden illness and dressings are a few of the topics discussed.

$65.00
XNM 5021

First Aid/CPR Recertification
This reaffirmation course is open to adults who are currently certified and who wish to obtain recertification. Material covered includes assessment of victim, what to do in case of bleeding, shock, poisoning, thermal or heat burns, hypothermia, stroke, fracture management, and other medical emergencies.

$39.00
XNM 5030

Communicable Diseases
This course, designed for JCCC's Therapeutic Massage Certification program, explains infection control and why it is necessary. Topics include identification of common communicable diseases; high risk behaviors; how infection is spread; and how to reduce the risk of such diseases.

$39.00
XNM 5040

Bodywork II
This is the second class in fulfilling the certification requirements. It is the continuation of the therapeutic massage techniques, with emphasis on integration of the parts into a full body massage. New strokes will be introduced for a broader and deeper application to the muscles. Time will also be spent on how to lengthen and shorten individual and muscle groups, as well as continued muscle locations. (72 hours) Prerequisite: Introduction to Bodywork

Pharmacology
Numerous clients receiving massage therapy are taking prescription or over-the-counter medications and/or supplements. Drug therapy of any sort causes physiological and chemical changes in the body. Massage therapists must be familiar with the effects of drug therapy that may enhance or disrupt the effects of massage. This knowledge will lead to changes in how the therapist applies massage therapy in individual cases and how to assess outcomes. This course explores the primary pharmacological agents, their mechanisms of action, disease processes they are prescribed for and contraindications for massage.

$208.00

Lymphatic Drainage Techniques
LDT is a hands-on technique that influences the efficacy of the superficial lymphatic system. Understanding the lymphatic system and learning to apply the proper hand technique results in the body’s return to homeostasis. LDT is
effective for treating a myriad of symptoms and conditions including headaches, migraines, constipation, acne, bruising and swelling due to injury or accident. Students in this course will earn a Certificate of Completion by attending and participating in the full 16 hours of class time. Participation and learning outcomes will be assessed. Students who do not satisfactorily complete the course requirements will not be awarded the contact hours.

$240.00
XNM 6017
Myofascial Release
Myofascial release is a technique that stretches and releases restricted connective tissue fibers (fascia) that cover and connects our muscles, organs and skeleton. These restrictions can be caused by trauma, scar tissue, emotional and environmental factors. Myofascial release is effective in reducing discomfort and improving bodily function and posture. This class is available to massage therapists, RNs, and PTs. Participants should bring a set of sheets.

$240.00
XNM 6018
Body Mechanics for Massage Therapy (1 CR)
Every year, numerous massage therapists are forced to give up their careers due to injuries sustained while performing services. The proper use of body mechanics by the massage practitioner increases their strength, power and fluidity, while at the same time reducing their risk of injury. This class will enable therapists to apply specific techniques and strategies to work smarter instead of harder, therefore allowing them to work longer, safer and more effectively. Class participants should wear loose, comfortable clothing that allow them to move freely. Participants are also requested to bring a massage table, as one table is needed for every two participants. Massage therapists will earn 4 contact hours.

$48.00
XNM 6020
Ancient Thai Massage
In this course, students will learn history and philosophy of ancient Thai massage, location of 10 main Sen lines, 4 positions of ancient Thai massage, 6 points of Nuad Bo-Ran, and proper techniques and postures to perform a one-hour Thai massage.

$225.00
XNM 6021
Plantar Fasciitis Treatment
Plantar Fasciitis is a difficult and often troubling condition to treat. In this course, the student will learn the anatomy and neural pathways that are responsible for this disorder. The student will learn through lecture and hands on practice the five step process of the MyoKinesthetic System and how to address each muscle with stretching and stimulation to successfully treat this disorder. Massage Therapists, RNs and LPNs will earn 7 contact hours.

$105.00
XNM 6022
Headaches: Effective Non-pharmacological Treatment
Headaches are one of the primary conditions that cause people to miss work. They are often difficult to treat and more often difficult to find their cause. In this course, the student will learn the anatomy and neural pathways that are responsible for this disorder. The student will learn through lecture and hands on practice the five step process of the MyoKinesthetic System and how to address each muscle with stretching and stimulation to successfully treat headaches without medication. Massage Therapists, RNs and LPNs will earn 7 contact
Fibromyalgia, Myofascial Pain and Chronic Fatigue Syndromes
This course explores these painful and difficult to treat conditions. Pain Cycles, common sites of muscular pain and the body's biomechanical compensations will be reviewed. Tissue healing and the stages of repair as well as normal biomechanics versus compensatory mechanisms of dysfunctional syndromes will be discussed. Traditional and alternative forms of treatment will be reviewed. Appropriate Massage Therapy interventions will be explored and practiced in this interactive course. Massage therapists will earn 6 contact hours. This course is approved through NCBTMB.

Seated Chair Massage
In this class, students will learn a basic routine for chair massage, fundamental concepts for proper body mechanics, and important concepts for marketing seated chair massage.

Hot Stone Massage Therapy
Students will learn a multi-faceted approach to using traditional hot stone therapy. In addition to learning basic hot stone application(s) for relaxation the student will apply the techniques to a 'hot spot' massage which targets specific areas of client discomfort. Routines will be adapted from traditional 90 to 60 minute routines to 30 minute add-on services. Each student will be proficient in giving a safe, relaxing/therapeutic massage at the end of the class. Cost includes a starter stone set. Each student is asked to bring 3-4 bath towels.

Pregnancy Massage
This course is designed to train participants in methods of Pregnancy/Postpartum Massage. Topics include anatomy and physiology, complications, and benefits. You will also learn massage techniques, labor support, relaxation and aromatherapy. Bring body support cushions or 6-8 pillows and massage lotion. Licensed massage therapists will earn 16 contact hours of continuing education.

Reiki I and II
Reiki is an ancient, gentle and spiritual healing technique, focusing on understanding the energy system. Students will learn to use hand positions, symbols and techniques to help balance energy functions of the body. This class uses lecture, discussion, demonstrations and hands-on practice. Licensed massage therapists will earn 16 contact hours of continuing education.

Beating Burn-Out: A Holistic Approach
Whether you've been performing massage for 20 years or 2 months, it can be a challenge to keep it fresh, maintain passion and joy for your work, and keep your
body and spirit healthy and motivated. You are not a slave to your practice! In this class we will address these issues from a holistic standpoint - it's not just about body mechanics and managing schedules - it's about consciously creating balance and joy in your life! Together we will share experience, discuss concerns, and explore ways in which each of us can take back our power - in our massage practice and in life - to create happiness, success and reclaim the joyfulness in being of service. Come prepared to create new possibilities!

$104.00
XNM 6042

Frozen Shoulder
This class will focus on shoulder injuries like rotator cuff problems, frozen shoulder, shoulder pain, anterior scalene syndrome, pain at the deltoid tuberosity, midback burning, numbness in the shoulder and more. We will look at some causes to these injuries, how other professions treat some of these problems and how we can get rid of these problems with Dr. Uriarte's MyoKinesthetic System work in 4 treatments or less.

$104.00
XNM 6060

Watsu
A description is not available for this course.

$150.00
XNM 6061

Intro. to Professional Clinics
Course is a part of Bodywork II Module. Intro. to Clinics explains the duties and protocol to each student clinician. Students will learn the procedures for checking in/out of clients, review of S.O.A.P. charting, and the care of linens, equipment and dress code.

$14.00
XKD 1066
Connections
This weekly social skills course is designed for young adults with mild-moderate special needs. The weekly classes alternate between in class instructional sessions or social outings. The weekly instructional sessions emphasize social skills practice, social interaction, and how to plan, organize and access community activities. Various topics related to self-awareness, developing relationships and pursuing a social life are discussed. Role-playing, open forums, speakers, and small group interaction keep students engaged. In addition, the students attend a group-planned social outing in the community called "Community Connections," twice a month. For "Connections" application form, call 913-469-3837. The course is limited to 28 students with special needs. Note: At the first class session, a special activities fee of $50 will be due.

$175.00
XKD 1080

$155.00  
**XBE 0277**  
**Mindset Series: Three business and life planning sessions for experienced business owners**  
This first time offered series of three workshops is designed for experienced business owners seeking to strategically grow their businesses as part of their plan for a successful life. Bring balance to your life by understanding and planning for a successful relationship between your life’s dreams and ambitions and the needs and requirements of your business. These workshops also will help you better understand a major resource in your business and life – you and the people who make up your team. See following descriptions for the individual workshops, Strategic Planning, Team Building, and Strategic Life Planning. Receive a discount of $75 ($25 per workshop) if you register in advance for all three workshops (Mindset Series Parts 1, 2, & 3 described below). Fee includes workbooks.

$650.00  
**XBE 0278**  
**Mindset Series Part 2 -Strategic Planning**  
Participants will learn more about their entrepreneurial mindset as it relates to planning. The process incorporates the human element into the plan and participants will plot a strategic course for their business by attending this innovative and results oriented workshop. Upon completion of this strategic planning process, participants will have a one-page blueprint to follow to take their businesses to new levels of success. Fee includes workbook.

$325.00  
**XBE 0279**  
**Mindset Series Part 3-Team Profile**  
Participants will look at their own mindset to understand what might be holding them back from reaching their full potential and achieving their goals. Insights into the mindsets needed to run a successful business will be identified. Team building will take on new meaning as the knowledge learned in this workshop is put into action. Fee includes workbook.

$75.00  
**XBE 0280**  
**Mindset Series Part I-Strategic Life Planning**  
Participants will choose the life they desire, plan that life, and develop action plans to live that life. Without a plan, we are destined to live a life of default, responding to life as it happens. This workshop will help participants emerge from the maze of life and discover where they want to go and how the pieces of life can be fit together to reach their goals and dreams. Fee includes workbook.
**Introduction to QuickBooks Point of Sale**
For retailers using the QB POS system, this course will cover: setting up a new company, department classifications and vendor lists, entering new merchandise, sales receipts, merchandise returns, layaways, using the print designer, purchase orders, receiving vouchers, and running reports. There will also be discussion of integrating the POS software with QuickBooks Pro/Premier software. This course does not cover the basics of using QB Pro/Premier.

**Introduction to QuickBooks Payroll**
Learn how to set up payroll items, enter employee information, create a payroll schedule, create paychecks, track and pay payroll tax liabilities, and print payroll tax returns and annual W-2s. Participants should be somewhat familiar with QuickBooks Pro/Premier as this course does not cover any other areas of QuickBooks Pro/Premier. Participants should be familiar with payroll laws and filing due dates applicable to their business for federal and state withholdings and unemployment.

**IRS Small Business Tax Workshop**
Learn the basics of complying with IRS regulations, including business use of the home, self-employment tax, employee versus independent contractor, payroll taxes, and electronic filing (EFTPS). Also learn record keeping requirements for business expenses, including vehicle use. Presented by an experienced CPA tax accountant.

**Financing Options for Your Business**
This workshop helps entrepreneurs understand the variety of funding sources that are available for their business and where to find them. Topics covered include determining your financing strategy, equity vs debt financing, types of business loans, financing sources, lease financing, the Small Business Innovation Research (SBIR) program, and more. The workshop also covers the advantages and disadvantages of equity versus debt, which financing options are typically available to early stage businesses and issues to consider in selecting a financing option. Fee includes a box lunch.

**Business Valuation**
Valuation involves estimating the worth of a company. It's at the core of determining how much ownership an investor is entitled to for funding a venture. It's also critical for family businesses for the purpose of succession and estate planning. This workshop covers valuation methods, why business valuation is important, factors that affect valuation and valuation by life stage. The workshop will also provide entrepreneurs assistance in preparing an actual valuation for their business. Fee includes a box lunch.

**The Process of Raising Capital**
This workshop helps entrepreneurs understand the process of raising capital. Topics covered include traits necessary for success; Angel Investors - who are they, what they look for in an investment and how to find and deal with them; Angel Capital vs Venture Capital; securities laws; Regulation D offerings; private placement memorandums, and documentation. Additionally, the workshop covers potential deal-breaker issues, negotiation and post-closing considerations.

XBE 0287

Bootstrapping Your business Workshop
Bootstrapping - the art of starting a company with little or no money - represents one of the surest routes to success for many entrepreneurs. In fact, there have been many great American businesses launched with less than $20,000. So how does one go about bootstrapping? Does it mean you need to build your desk out of doors and sawhorses? Or, is it something more? This Workshop will provide you with many proven bootstrapping techniques that will allow you to build on your "street smarts" while stretching your dollars. Also, the second half of the workshop includes a panel of successful local entrepreneurs who share their strategies for bootstrapping success.

$50.00
XBE 0288

Family Business I: Family Business as a System
For family businesses, the crossover between family and business creates challenges for all involved. Developing structures and policies can help family businesses meet these challenges by defining family members roles. In this dynamic, interactive workshop facilitated by a family business counselor and mediator, you will discover ways to professionalize the family business by developing policies for compensation, employment, advisory boards, and systems for communication and conflict resolution.

$59.00
XBE 0289

Family Business Succession and Estate Planning
Developing a succession and estate plan well in advance allows family business owners to effectively transition their business to the next generation. Key components of succession and estate planning include determining the value of the business, minimizing taxes, and structuring the transition/buyout to meet the financial needs of the current CEO and the business. Learn from an experienced family business attorney and insurance specialist how to avoid business killers during a time of transition.

$59.00
XBE 0290

Family Business Strategic Planning
Developing a strategic plan for your family business engages both management and family in the process of thinking about the future. Small and mid-size family businesses need strategic planning because of the mixed roles of family business members. Learn a simplified process to identify both family and business goals and then, develop a step by step plan to satisfy both. Facilitated by experienced family business consultants.

The Road to Success...Creating a Marketing Plan
Are you getting the marketing results you desire? Are there marketing strategies
you want to implement but haven’t yet? The road map to increasing your business
visibility will begin with the development of a creative, targeted marketing plan
that will include tactics, strategies and while staying within your budget.
Understanding Your Financial Statements
Learn to read and interpret basic financial reports, explore three fundamental ways to increase profitability, and identify key financial indicators. Gain a better understanding of how to use financial reports to operate a more profitable business.

Preventing Revenue Leakage in Your Business
This practical and interactive operations overview will provide managers and business owners with strategies to maximize the prevention of revenue leakage. It will highlight practical approaches for designing new processes or repairing weak processes that might be contributing to revenue loss. It will also discuss ways to identify and eliminate the fraud risks that exist in every business. Participants can take the ?Fraud Check Up? to assess the fraud risk in their own business.

CEO Roundtable
It?s lonely at the top! Designed for small business owners who want to learn from other small business owners. Led by an experienced facilitator and entrepreneur, this leadership series is for owners who are ready for a growth transition and want to begin working ?on? their business rather than ?in? their business. Companies must be at least 5 years old. There is an application process for membership in this group. Call 913-469-3878 for additional information and to obtain an application.

FOCUS: Productivity and Time Management for Small Business Owners and Employees
This FranklinCovey workshop teaches you to clarify, focus on, and execute your highest priorities. Learn to spend time on tasks that really matter; define goals and break them down into key tasks; reduce stress; and master information management. This workshop includes: a FranklinCovey Planning System, technological best practices to manage information, a goal-setting process, and a FranklinCovey resource CD-ROM with interactive planning tools. The materials are designed to integrate with PDAs and other productivity tools such as Outlook software.

Preparing a Business for Successful Transition
Creating a succession plan for your family business can be a daunting task, both personally and professionally. Marjorie Engle, vice president of organizational development and family business services for CPA and advisory firm Allen, Gibbs & Houlik, L.C. along with Brent A. Mitchell, a partner with law firm Martin Pringle Oliver Wallace & Bauer, LLP who specializes in estate planning and business succession planning, will shed light on both the logistical and emotional issues.
that can arise when creating a succession plan for your family business. They will discuss key questions and issues that family business owners face when looking to transition their businesses, such as: What are the critical steps and stages necessary for a successful business transition? When to start devising a succession plan? Tips for identifying and preparing a successor? How to transfer ownership and control, including necessary legal documents and procedures? Ideas to help you manage the challenges and avoid the pitfalls associated with family business succession? Discussion time will allow for an individual question-and-answer period. Fee includes breakfast.

What You Should Know about Tax Planning for 2008-09: Ideas to Build and Preserve Your Wealth

When is the last time you REALLY scrutinized your tax return to see whether you could wring any additional savings out of it? Or whether you were comfortable with the level of risk the various tax positions on your return may expose you to? For most people, the answer is probably either years or maybe even never. Join us for a fast-paced overview of the top 10 tax ideas you should be aware of to see if they can help you increase profitability and cash flow and perhaps just as important protect your wealth from the risk of penalties and additional tax liability. What tax-saving calculation has been radically simplified so that I might be able to use it now, even if I couldn't before? What are the most effective tax-saving strategies for family business transitions? Are the accounting methods I've been using for the past 5, 10 or 25 years still the ones best for my organization right now? What is an uncertain tax position and when should I disclose it? Donald J. Glenn, executive vice president of tax services for CPA and advisory firm Allen, Gibbs & Houlik, L.C. will partner with Brent A. Mitchell, a partner specializing in estate planning, business succession planning, and trust and estate administration with law firm Martin Pringle for the presentation. This session will take you on a brief but enlightening tour of the tax ideas you should have on your radar screen for 2008-09 for their potential to help you build and preserve your wealth. Fee includes breakfast.

From the Kitchen Table to the Conference Table: Family Business Communications

Both family and non-family employees must be able to get along at work, but it can be incredibly difficult. In this session you'll take away real tactics you can implement immediately, including how to: View family members as professionals instead of relatives in a business environment. Offer solutions when non-family employees are unsure how to act when new family members come into the business. Identify and overcome core issues in family-business relationship challenges. Manage the dynamics of different personality types in family business. Handle tough situations with more senior non-family employees who may feel threatened by a family member. Presented by Laura Michaud, nationally recognized consultant, author, and owner of the Michaud Group, a firm dedicated to bringing personal and business success to clients. This is a free presentation. Breakfast will be served.

Baseball Spring Indoor League
JCCC's winter indoor league is set up to help young baseball players improve their skills during the cold, Kansas winters. Live pitching and hitting will help players see as game-like competition as possible to help them prepare for the upcoming season. Games will take place in a batting cage with a live catcher, hitter, and pitcher. Different areas of the cage will be designated for singles and home runs. Games will be as game-like as possible except for base running and defense. What better way to improve your skills than to play a simulated game in an indoor cage against some of the best players in the Kansas City Area. Pitchers can fine tune their mechanics and improve their arm strength by throwing year round. Hitters can work on their techniques while developing a better eye seeing opposing live pitching. League will be made up of players from ages 8-14. Divisions will be based on grade level player is currently in. This league is set up
to help players see live competition before their outdoor season begins.

$75.00

Pole Vault Camp -February
This camp is targeted at developing proper technique for pole vaulting. Four-time Big 12 Champion and four-time All-American pole vaulter Kate Sultanova will employ a unique and innovative gymnastic bungee rope in order to improve their jumping technique and ability more rapidly. Also, this is a great opportunity for athletes to be assisted and taught by one of the finest pole vaulting coaches who has coached professional and world-class athletes Coach Vyacheslav Sultanov. Coach V. Sultanov has collaborated with famous world record holder Sergy Bubka's coach, Vitaly Petrov. Learning unique exercises will help campers gain knowledge about pole vaulting technique. More traditional pole vaulting drills will also be employed in order to provide a complete overall program with the goal of helping young vaulters of all ability levels improve.

$160.00

$50.00
XLC 3003

Baseball Hitting Camp (ages 7 - H.S. Senior)
The Cavalier Baseball Hitting Camp will allow players to fine tune their swings
during the cold Kansas winter. Players will take part in an intense hitting circuit
that will help fine tune and improve each player’s swing. In addition to working on
the fundamentals of hitting, campers will also be coached on the mental aspects
of the hitting game. They will be given ideas and suggestions as to how they
should mentally prepare for an at-bat in a game. Each one hour session will focus
on a different part of the swing (I - Lower body, II - Grip and Hands, III - Finish and
Balance). Campers should gain a more confident approach at the plate along
with a better swing for more consistent results at the plate.

$65.00
XLC 3004

Baseball Pitching Camp (7-H.S. Senior)
The Cavalier Pitching camp will serve as a tune up for pitching fundamentals.
Campers will be taught proper mechanics that they can incorporate into their
pitching delivery. Players will also be taught how to be mentally prepared and
focused in order to maximize their pitching performance. The pitchers will go
through a drill series each night, in which each drill focuses on a different part of
the pitching delivery. The campers should come out of the camp feeling more
confident in their mental and mechanical approach to pitching as well as being
able to throw strikes at a more consistent rate.

$65.00
XLC 3005

Pole Vault Camp (10-18 Boys and Girls)
This is a great opportunity for participants to learn the proper technique of pole
vaulting. With the right technique, the athlete can increase their chances of
success at pole vaulting. Proper technique is the key to success in pole vaulting.
All athletes must be equipped with a good pair of running shoes, sweats, gym
shorts, and water bottle. We recommend if athletes have their own poles to bring
them, but poles will be available.

$250.00

XVT 2000
Math Compass Re-Placement
This course is a 20 hour intensive review for students who have already taken the COMPASS placement test. It is appropriate for students whose goal is to enroll in Intermediate or College Algebra and would like to improve their placement.

$99.00

XVT 5001
GRE Preparation - Part 1
This online course reviews all question types on the verbal and analytical sections of the GRE. How to do your best will be emphasized and time-saving techniques for both the paper-based and computer administrations of the test.

$99.00

XVT 5002
GRE Preparation - Part 2
This online course features a math review and techniques for tackling the quantitative comparison, discrete quantitative, and data interpretation questions. We will also cover time-saving techniques for both the paper-based and computer administrations of the test.

$99.00

XVT 5003
Skills for Making Great Decisions
Master techniques for achieving your goals, managing risk, dealing with crises, and making decisions--big and small--with knowledge and confidence. Find out how to avoid many types of mistakes and how to recover from others.

$99.00

XVT 5005
ACT/SAT Preparation - Part 1
This online course includes verbal refreshers and discusses techniques aimed at reducing test-taking anxiety. Taking both parts 1 and 2 in this two-part series prepares you for question types on each test using test-taking techniques.

$99.00

XVT 5006
ACT/SAT Preparation - Part 2
Continue online preparation for the ACT and SAT by learning test-taking techniques and practicing on previously administered ACT and SAT tests. Math and verbal areas will be reviewed and stress-reducing techniques will be taught.

$99.00

XVT 5007
Everyday Math
You'll get valuable hands-on experience and advice on using a calculator; discounts, and taxes; managing your income and expenses; checking your bills and bank statement for errors and overcharges; comparing investment vehicles; shopping for the best loans and more.

$99.00
XVT 5008

Introduction to Algebra
Understand how algebra is relevant to almost every aspect of your daily life, and become skilled at solving a variety of algebraic problems. This unique and thought-provoking online course integrates algebra with many other areas of study.

$99.00

XVT 5011

LSAT Preparation - Part 1
This online course you will practice on actual LSAT exams from previous years and learn proven test-taking techniques. Law school entrance procedures, law school survival techniques, analytical reasoning, and drafting diagrams are discussed in Course 1 of this two-course series.

$99.00

XVT 5012

LSAT Preparation - Part 2
Reading comprehension, logical reasoning, techniques for quick elimination of incorrect answers, explanations of correct answers and proven approaches for selecting the correct answer are discussed in Course 2 of this two-course series.

$99.00

XVT 5021

GMAT Preparation
Learn test-taking techniques and methods for improving your score while saving time with this online course. Review questions like critical reasoning and data sufficiency for verbal and quantitative sections. You will practice on GMAT tests from previous years.

Youth and Talents (XLY)

XLY 1001
Etiquette for Boys and Girls
Learn appropriate behavior in different social settings and situations. Topics include telephone and table manners; courtesy in language, at home, at school, and in public places.

$35.00
XLY 1167
Fun with Science, Gr. 2-3
What makes a light bulb turn on when you flip the switch? How does a rocket fly high into the sky? What makes paper airplanes fly, twist, and turn in the air? Learn the answers to these questions and many more as you become a science investigator and have fun with science!

$65.00
XLY 1174
Exploring with Mother Goose, Gr K-1
Join Mother Goose for a week of fun! Through hands-on math activities, science investigations, art projects, songs, and reading activities, you will explore the world of nursery rhymes. During the week, we will devise a safety plan for Humpty; explore density with Jack and Jill; and use a map to help Little Bo Peep find her sheep. Each day we will learn a new nursery rhyme as we engage in creative thinking activities.

$75.00
XLY 1201

Supervised Lunch Break
Supervision is available during the lunch hour for students enrolled in both morning and afternoon summer youth enrichment classes. Students are required to bring a sack lunch and a drink.

$0.00
XLY 1206

Exploring Our World, Gr. 2-3
Take a fascinating journey around the world through hands-on activities. Discover and create animals that live on different continents - a panda bear, boa constrictor and penguin. Play "Continent Lotto" and take home your very own ocean in a bottle.

$65.00
XLY 1207

The World of Living Things, Gr 2-3
Anyone craving a creepy crawly snack? In the World of Living Things you will make and eat edible insects, observe plants, conduct experiments and classify mammals, reptiles, birds and fish. Have fun as you construct your very own worm habitat.

$65.00
XLY 1226

Exploration of Young Adult Literature, Gr. 6-7
Read, eat, explore, create! Explore young adult literature, create projects and play vocabulary enhancing games. While sharing and relaxing with our literature, we will prepare snacks to share.

$65.00
XLY 1227

One Week in China, Gr. 4-5
This class will introduce you to a variety of customs in the Chinese culture and language. Students will learn to speak basic conversations in Mandarin Chinese and writing. Get ready to explore the language, costumes, food and a lot more through fun activities and drills.

$65.00
XLY 1228

Math Games Galore, Gr. 2-3
Do you like to play games? Do you enjoy math? Then this class is for you! Join us as we explore math through fun hands-on learning activities.

$65.00
Raising Responsible Kids by Using Household Chores and Allowance
Start the New Year out with a plan for your family by learning how to design an allowance and chores program that is just right for your household no matter the ages of the kids or family dynamics.

$15.00

Calming the Chaos of an ADHD Household
ADHD causes chaos but it can also bring many wonderful attributes when the energy is funneled in a positive direction. Meet with an ADHD Parent Coach for ideas to guide your child through day-to-day issues if ADHD, learning differences, social skill issues, and anxiety.

$15.00

Stretch Your Thinking: Games, Puzzles and Brain Teasers, Gr. 6-7
Come join the fun of learning by playing! Students will work together to strengthen those critical thinking skills through classic mind-challenging games, puzzles and brainteasers.

$65.00

Creative Problem Solving
Have fun while being challenged to creatively solve problems. You will work on teams to push the limits of your imagination. There will be skits, structures and much more.

$65.00

Debate
Learn the skills of public speaking, research and "thinking on your feet" as you explore topics of interest. You will learn debate techniques and fundamentals. Class will conclude with participation in an actual debate.

$65.00

It's a Doggy Dog World, Gr. 4-5
Calling all canine fans! Come enroll in this tail wagging course to learn about man's best friend. Students will discover popular AKC breeds, doggy care, ownership responsibility and dog training. Special guest dogs and speakers will highlight the course.

$65.00

Learning Through Literature, Gr. K-1
Use math and science skills to explore favorite children's literature. Each day, a different book will be used as a focus for discoveries in problem solving and language expression through games and creative activities.

$75.00
Fairy Tale Fun, Gr. 2-3
Sleeping Beauty, the Three Little Pigs and more! Join us as we explore the fairy tale characters and their stories. We'll make masks, put on plays and create a fairy tale city.

$65.00
XLY 1281

Smileyburg-The Town You Create, Gr. 2-3
Come create a town that only you can call home. Make townspeople and give them names and jobs, decide what they are going to look like, buy materials and build your own home and a place to work. Design the streets of your town...where will houses and businesses go, what about that water park you wanted to build? Come do all of this in the miniature town of Smileyburg!

$65.00
XLY 1401

Spectacular Science, Gr. 2-3
Be prepared to get down and dirty with Spectacular Science! This class will be full of hands-on science experiments that will spark your curiosity. Bring your love of science and be prepared to be dazzled!

$65.00
XLY 1402

Fun Kitchen Math, Gr. 2-3
Learn basic math concepts through measuring and dividing real foods. Math class disguised as snacks are prepared for the students. Students will be introduced to Gallon Man to learn equivalents. Basic Kitchen Safety will also be covered. Children will not operate appliances.

$65.00
XLY 1403

Rockin’ Rockets, Gr. 4-5
Can you make a rocket that shoots high into the sky? What about one that can twist in the air, or maybe turn a flip. Come create, modify, and fly your own rocket. Get ready to blast off!!

$65.00
XLY 1404

Beach Blast! CRN 50410, Gr. 2-3; CRN 50411, Gr. 4-5
Learning is a blast when you combine big-time summer fun and great beach crafts. Make your summer feel like you have been seaside for four days with literature and hands-on activities that will be a "shore" imaginary trip to the beach.

$65.00
XLY 1405

Super Science, Gr. 2-3
Super Science is a hands-on experience covering the Kansas State Science standards. Come spend a week as a scientist learning and conducting science investigations.

$65.00
XLY 1407

Picture Book Biographies, Gr. 2-3
Looking for some great books? Explore this exciting genre that will introduce you to interesting and unique individuals. Connect to picture book biographies through read alouds, writing, special book projects and illustration techniques.

$65.00
XLY 1408

**Dinosaurs!, Gr. 2-3**
Calling all Paleontologists! Come join the exciting study of dinosaurs through fun activities. Students will learn and analyze the footprints of dinosaurs. Activities will include creating habitats for dinosaurs and creating your own original dinosaur.

$65.00
XLY 1409

**Whodunit, Gr. 4-5**
Mystery lovers will love this crime solving class! Sleuths and problem solvers will learn many different techniques to solving mysteries. Each day the crime solvers will be faced with a new and exciting crime.

$65.00
XLY 1414

**Fun Kitchen Math, Gr. 4-5**
Learn grade level basic math concepts through measuring and dividing real foods. Math class disguised as snacks are prepared for the students. Students will be introduced to Gallon Man to learn equivalents. Basic kitchen safety will also be covered. Children will not operate appliances.

$65.00
XLY 1415

**Fun Kitchen Math, Gr. 6-7**
Students will practice everyday math skills while learning to prepare easy snacks using griddles, toaster ovens, and blenders. Students will have hands-on snack preparation opportunity while working on grade level math problems and learning basic measuring skills as well as kitchen safety skills.

$65.00
XLY 1417

**CSI Junior-Forensic Science Investigation, Gr. 4-5**
This course is a multi-disciplinary, investigative approach to learning about forensic science. Our class will engage in activities designed to learn about how forensic science is used to solve mysteries, and how we continue to advance technologically through this science.

$115.00
XLY 1419

**Learning with Puppets, Gr. 2-3**
In this class we will spend time creating and designing puppets to integrate the arts and the love of it as we express the joys of life in our creativity.

$59.00
XLY 1420

**Color Me Healthy, Gr. 2-3**
Introduction of nutrition in the world of kids using colors as we learn more about
foods in the two primary food groups: fruits and vegetables. This class will include emphasis on the importance of being healthy as they learn to enjoy and prepare some of these foods.

$59.00
XLY 1421
Reading with Friends and Characters, Gr. 2-3
The choice of good stories and stuffed animals will be shared. Favorite book characters will be exchanged and correlated with stories. We will do puppet shows, write poems and express the arts in different ways.

$59.00
XLY 1424
Math Matters, Gr. 2-3
Join our investigation of math through hands-on experiences, games, and inquiries. You will enter the math world to explore numbers through problem solving in real-life situations. We will be using technology, the internet, and manipulatives.

$59.00
XLY 1425
Games & Cooking, Gr. 4-5
Explore a variety of mind enhancing games such as Apples to Apples and Squint while cooking and enjoying a daily snack. Create your own game as a culminating project.

$59.00
XLY 1426
Edible Science-CRN 50359, Gr. 4-5; CRN 50378, Gr. 6-7
Do you love Science? Do you love food? If so, this is the class for you! Students will conduct science activities with food. Some experiments will be edible, while other activities will use food to demonstrate a variety of science concepts. (All activities will be peanut free.)

$59.00
XLY 1427
Are You All Write? Writers Workshop, Gr. 4-5
Creative writers of all kind will love the opportunity to learn about different writing styles. Each day we will focus on a different genre of writing. Literature will be used to enrich our writing.

$59.00
XLY 1428
Wanted! Secret Agents, Gr. 5-6
Have you ever wanted to become a special agent searching for clues and solving mysteries? Your mission, should you choose to accept it, is to come and train with our Mad Science Secret Agent. Learn how to create and decode top-secret messages. Master forensic science through fingerprint analysis, chromatography, dental impressions, and more!

$105.00
XLY 1429
Crazy Chemistry, Gr. 5-6
Journey into our Mad Laboratory to create reactions that are sure to boggle your mind as well as your eyes? Then tackle chemistry and physics as well. Analyze Gatorade to see if it’s all it’s cracked up to be. Discover the physics of balls, explore the center of gravity and more!

$105.00
XLY 1430
Creative Engineers, Gr. 5-6
After this awesome experience, you'll be prepared to build the next world wonder! Investigate simple machines and learn to use them to conquer complicated tasks. Use your engineering skills to build a giant geodesic dome to hangout in and to assemble bridges with your team of Engineers.

$105.00
XLY 1431
Rocket Blast Off!, Gr. 5-6
In this new, expanded version of this popular class, you will discover the principles of flight, the parts of a rocket, rocket design, the stages of rocket flight and the history of space travel. You will build your own model rocket to take home and participate in multiple rocket launches to test rockets of different sizes and designs. Design, build and launch your own water-powered rocket.

$105.00
XLY 1432
To Bee or Not to Bee, Gr. 6-7
Students will look at flora from a new perspective as we investigate the intricate details of a variety of flowers and plants. This will be our research and inspiration as we create Georgia O'Keefe inspired chalk drawings of flowers. We will explore the world of color and learn how to create and use a color wheel to create visually interesting art work.

$65.00
XLY 1433
Me, Myself & Eye, Gr. 6-7
Students will discover the importance of drawing what they see as they study their faces and break this complicated subject into basic lines and shapes. This class will be focused on creating a variety of self portraits using a variety of media. We will discuss and use a range of the elements of art and principles of design.

$65.00
XLY 1444
Polyhedraville, Gr. 2-3
Be an architect and design a city of the future! Students construct 2D shapes while learning about characters of prisms, polygons, and polyhedra. With a team, they will determine surface area of futuristic buildings within an established budget. Polyhedraville is exciting and gives students a chance to be artistic, creative and most importantly, extends their understanding of math concepts as they begin applying math in a real world context.

$115.00
XLY 1445
Secret Formula Scientist, Gr. 2-3
If you are a young scientist and want to be challenged, join us as we jump into chemistry with Secret Formulas. Develop your own glue, cola, and ice cream by observing and testing ingredients, and creating/recording formulas for each
product! In the process, you will learn important science skills and concepts as you experience the scientific method firsthand. This program was developed by the Great Explorations in Math and Science (GEMS) program at the Lawrence Hall of Science, and has been tested in classrooms nationwide.

$115.00
XLY 1446
Fairy Tale Land, Gr. K-1
Welcome to the land of fairy tales where dreams may come true and people live happily ever after! Join us as we work to create a fairy tale land through reading, math, science, and creative activities. Each day we will discuss different fairy tales and story elements as we enter the world of the enchanted!

$75.00
XLY 1447
Puzzles, Puzzles, Puzzles, Gr. K-1
A fun hands-on exploration of a variety of Primary creative problem solving activities. We will investigate Tangrams, Pentominoes, Sets, Clip Clues, Yarn Puzzles, Analogy patterns and more.

$75.00
XLY 1448
On the Loose with Dr. Seuss, Gr. K-1
Dr. Seuss has gotten loose and has left several of his stories for us to read throughout the week. Join us for math, reading, and science investigations related to Dr. Seuss' most loved stories. Throughout the week we will engage in cooperative learning, cooking, problem solving, creating, and much, much more.

$75.00
XLY 2003
Writing Wrinkles, Gr. 4-5
If you really like to write, join us and try a new "wrinkle" of written expression. We will sample different types of writing experiences...poetry, myths, fables, fairy tales, summaries, scripts, etc. You'll participate in group activities and produce an individual project.

$115.00
XLY 2005
W-H-A-M (Writing in Harmony, Art & Music), Gr. 2-3
Do you like to make up stories, draw, and listen to music? We will focus activities around a theme for each day...Animals, Hats, Fairy Tales and others. Come and join us as we read and write, draw and color, listen and make music.

$115.00
XLY 2008
Game Factory
"Play Fair!" But are games always fair? In this class, you will use all of your math skills to study probability and determine "fairness" in games. Working in pairs, you will explore whether games are fair, modify them when needed, and design your own fair game to share with the class. All this, while reinforcing your skills in addition, subtraction, multiplication, division, and fractions.

$105.00
XLY 2023
Creative Problem Solving
Have fun thinking outside the box! We will learn brainstorming techniques, solve problems and be challenged to think spontaneously. We will perform skits, build structures and use your sense of humor.

$115.00
XLY 2029

Music Technology & You, Gr. 8-9
Do you love music...and computers, too? Spend two weeks at a MIDI computerized work station learning the hardware and software currently used to produce music. You’ll learn to operate a workstation capable of digitally recording 32 tracks of music utilizing over 1500 present instruments via the synthesizer. Course conclusion will feature a concert of student compositions.

$115.00
XLY 2041

Explore the World of Art, Gr 2-3
Come join us as we explore the world of art. Journey around the world and create art inspired by many cultures from Asia, Africa, Australia and the Americas.

$115.00
XLY 2050

Mock Trial Experience-CRN 50322 & CRN 50347, Gr. 6-7; CRN 50336, Gr. 8-9
Be part of a courtroom drama. Learn the criminal justice system's procedures, processes, and roles so you can actively participate in a mock trial, playing judge, lawyer or witness. Speakers from related professions and a field trip, too!

$115.00
XLY 2072

E.O.A.S. Earth, Oceans, Atmosphere, Space, Gr. 6-7
Students will explore and learn about astronomy, weather, tornadoes, caves, volcanoes, the oceans and other subjects while using the internet and other resources. Students will apply their knowledge while working with activities/projects, and creating blogs, websites and presentations.

$115.00
XLY 2083

Exploring Veterinary Medicine and Other Animal Careers, Gr. 6-7
Do you love animals? Have you thought about working with animals as a career? In this seminar overview course, explore some of the exciting options available for a career working with animals. Visits by animals will be included as often as possible. Field trips may include contacts with animals. Guest speakers will be scheduled when possible as we “go to the dogs.”

$115.00
XLY 2150

After Class Activities
The Carlsen Center After Class Activities is a college-supervised activity for students enrolled only in the following programs: TALENTS!, JCCC Adventurers, Crazy About Learning, and Mad Science.

$25.00
XLY 2192
After Class Activities
The Carlsen Center After Class Activities is a college-supervised activity for students enrolled in Summer Academy.

$29.00
XLY 3001
Summer Academy, Gr 2-7
Summer Academy offers a full-day program where students experience fun and learning in team building activities, writing, art, and other interactive, hands-on classes. A supervised hot lunch is included in the Academy fee.

$170.00
XLY 3002
Summer Academy, Gr 2-7
Summer Academy offers a full-day program where students experience fun and learning in team building activities, writing, art, and other interactive, hands-on classes. A supervised hot lunch is included in the Academy fee.

$170.00
XLY 3003
Summer Academy Jump Start, Gr. K-1
Program for Kindergarten through First Grade students! Choose a morning session of fun-filled reading and math activities.

$69.00
XLY 4000
Lets Get Digital: Scrapbooking Grades 2-3
Have your picture taken and develop a virtual scrap book! Learn how to make the best pages for your favorite memories.

$65.00
XLY 4001
Art: Made out of What? Grades 2-3
In art the possibilities are endless. In this class you never know what will be chosen to work with. We are guaranteed to get down and dirty with fun fun and more fun.

$65.00
XLY 4002
Jazz it up- Read, Grades 2-3
Jazz it up- Read. Join this class for a jazzy good time in the wonderful world of reading. We will swing through a variety of genres as we read the day away.

$65.00
XLY 4003
Reading Adventures Grades 2-3
Read and discuss several short stories that take you on amazing adventures. Increase your understanding of what you read and increase your vocabulary.

$65.00
XLY 4004
Fun with Reading Grades 2-3
Increase your vocabulary skills while reading and listening to award winning books for children. Come join the fun and get ready to read!

$65.00
XLY 4005

Hands on Science Grades 2-3
Science is everywhere! Making bubbles, modeling clay and more as you learn and design fun creations. Use color in coordinating with art and more about the world around you.

$65.00
XLY 4006

Science Discoveries Grades 2-3
Do you wonder how things work and why things are as they are? Come learn more about the world around you and all the little things in between.

$65.00
XLY 4007

Science Quest, Grades 2-3
Join us in this hands-on class as we mix and make scientific recipes to help us enjoy and experience nature as we learn.

$65.00
XLY 4020

Hands on Art Grades 4-5
Love Art? Come join the fun with paint, paste and much more to create your own fantastic project. Don’t wear your good clothes.

$65.00
XLY 4021

Let’s Get Digital: Scrapbooking Grades 4-5
In this computer scrap booking class, have your pictures taken and create a virtual scrap book to keep for years to come. Take home a hard copy at the end of the day.

$65.00
XLY 4022

Art: Made out of what? Grades 4-5
The focus will be on a fun learning experience. Try new materials and techniques as your imagination takes off! Don’t wear your good clothes you may get dirty or bring a smock.

$65.00
XLY 4023

Chinese Cooking and Culture, Grades 4-5
Learn about Chinese food and games. There will be a variety of activities, such as paper-making, Chinese yo-yo, calligraphy, and making simple Chinese foods.

$65.00
XLY 4024
Hands on Science Grades 4-5
Get involved in this activity based science class. Through a unique combination of activities, games and demonstrations, learn how things work.

$65.00
XLY 4025

Chinese Language Learning Grades 4-5
Students will learn a few simple Chinese conversations in the morning and perform a short "movie" or photo clips in the afternoon. Then we'll make a Chinese learning CD at the end of the day.

$65.00
XLY 4026

Finance for Kids, grades 4-5
What is a bull market? Can you win at the real game of life? Learn about the stock market and investments and watch your portfolio grow!

$65.00
XLY 4027

Math Quest, Grades 4-5
Get involved in learning strategies for problem solving. Games, activities and demonstrations will be used to prepare you for success in future math courses.

$65.00
XLY 4040

Let's Get Digital: Scrapbooking Grades 6-7
Time to get creative with your digital photos! Develop a virtual scrap book online. You will be able to view your creation for years to come.

$65.00
XLY 4041

Hands on Art, Grades 6-7
A wide variety of projects to choose from and all completed in one day! Explore colors, patterns and paints. Come ready to get inspired and maybe a little messy too.

$65.00
XLY 4042

Art: Made out of What? Grades 6-7
Love art but don't know where to start? Create your own masterpiece using a variety of mediums. Don't wear your good clothes, we may get dirty!

$65.00
XLY 4043

Chinese Cooking and Culture, Grades 6-7
Have fun with your taste buds and learn more about Chinese culture. Learn to make paper, calligraphy and Chinese yo-yo.

$65.00
XLY 4044
**Chinese Language Learning, Grades 6-7**
Be a foreign movie star! In the morning learn a few Chinese phrases and perform a short movie or phot clips in the afternoon. Take home your own CD.

$65.00  
XLY 4045

**Stock Market Simulation, Grades 6-7**
Buy low and sell high! There is more to the stock market than this. Have fun making thousands in this stock market simulation.

$65.00  
XLY 4046

**Young Entrepreneurs, Grades 6-7**
Do you aspire to be your own boss one day? Learn the basics of starting your own business or creating a new product.

$65.00  
XLY 4047

**Money Matters, Grades 6-7**
Got allowance? What should you do with it to prepare for your future? Learn the basics of money management and savings.

$65.00  
XLY 4999

**Friday After Class Activities**
Game time is for students enrolled in the Friday Discoveries program. Bring your favorite board game as we wind down the day. We will have an awesome time playing games from around the world! You may bring a snack if you like.

$10.00

**Ronald Stinson**
Professor Instr. Music
B.M.E., Wichita State University
M.M., Yale University

**William Stockton**
Professor History
B.A., Drake University
M.A., Ph.D., Brandeis University

**Roger Stone**
Professor Auto Tech
B.S., M.S., Central Missouri State College
Stacey Storme  
Assoc. Prof./CPF Intrprtr Trng  
B.A., University of Denver

Norma Stratemeier  
Professor Paralegal  
B.A., J.D., Univ of Missouri - Kansas City

Felix Sturmer  
Assoc. Prof. Hospitality Mgmt.  
Apprenticeship - Berlitz Translation

Lisa Sullivan  
Benefits Specialist  
B.S., Kansas State University

K Sumner  
Information Analyst  
B.S., M.S., Univ of Missouri - Kansas City

Heather Sumstine  
Asst. Mgr. Bookstore  
B.A., Univ of Missouri - Kansas City

Timothy Sumstine  
Asst. Mgr. Catering

Alan Swarts  
Dir. Accelerated Programs  
B.S., Emporia State University  
M.S., University of Kansas

Ronald Symansky  
Assoc. Prof. Interpreter Trng  
B.A., Gallaudet University  
M.A., New York University

Frank Syracuse  
Professor Economics  
A.B., John Carroll University  
M.B.A., Avila College

Thomas Tarnowski  
Professor Photography  
B.A., University of South Florida  
M.F.A., Rhode Island Sch of Design

Terri Teal  
Assoc. Prof. Vocal Music  
B.S., Louisiana College  
M.M., University of North Texas  
Ph.D., University of Kansas

Anita Tebbe  
Professor/CPF Legal Studies  
B.A., Mundelein College  
M.A., Univ of Missouri - Kansas City  
J.D., Washburn University

Sandra Tebbenkamp  
Professor Mathematics  
A.B., William Jewell College
M.A., Hunter College

John Thomas
Professor Fine Arts
B.F.A., Southeast Missouri State Univ
M.A.,M.F.A., University of Iowa

Karen Thomas
Accountant
B.S., Central Missouri State Univ

Diana Tilton
Asst. Prof. Nursing
B.S., Univ of Missouri - Kansas City

Danial Turner
Professor Hospitality Mgmt.
A.A., Johnson County Comm College

Rick Tyrell
Sr. Network Analyst
B.S., Bethel College - North Newton

Carolyn Urbom
Professor Info. Technology
A.A.S., Johnson County Comm College
B.B.A.,M.A., Wichita State University

Russell Vandekauter
Programmer Analyst
B.A., University of Illinois

Van VanDruff
Sr. Support Analyst

Jennifer Vasquez
Asst. Prof. Esthetics

Pamela Vassar
Prog. Dir. Stdnt Life/Lead Dev
B.S.E., Northeast Missouri State University
M.S., Western Illinois University

Judith Vaughn
Professor/Librarian
B.S., University of Kansas
M.L.S., Univ of Missouri - Columbia

Philip Veer
Asst. Professor Mathematics
B.S., Friends University
M.S., Emporia State University

Jean Ann Vickers
Assoc. Prof. Science
B.A.,M.A., Baylor University

Janelle Vogler
Dir. Internal Audit Svcs.
B.S., Kansas State University

Casey Wallace
Campus Visit/Ambassador Coord.  
B.S., Northwest Missouri State Univ  
M.S., University of Kansas

**Philip Wallack**  
Assoc. Prof. Info Sys/Comp Sci  
B.S., M.S., City College of New York

**Ola Walsh**  
Asst. Dean Nursing  
A.D.N., Olney Central College  
B.S.N., M.S.N., University of Evansville

**Shun Wang**  
Asst. Prof. Mathematics  
B.A., M.S., Washington State University  
Soochow University

**Sandra Warner**  
Dir. ACS/Deputy CIO  
B.A., University of Kansas  
M.B.A., Univ of Missouri - Kansas City

**Amy Warner Koch**  
Counselor  
B.A., Hastings College  
M.A., Univ of Nebraska - Lincoln

**Michael Waugh**  
Acad. Dir. Media Prod. & Svcs.  
B.S., M.S., University of Kansas

**Karon Way**  
Assoc. Prof. Mathematics  
B.A., Rockhurst College  
M.A., Webster University - St. Louis

**Larry Weaver**  
Asst. Prof. Science  
A.A., Johnson County Comm College  
B.S., University of Kansas  
M.A., M.S., Ph.D., Indiana University-Bloomington

**Frederick Webb II**  
Professor Business Admin.  
B.S., Baker University  
M.B.A., Avila College

**Philip Wegman**  
Prog. Dir. Skills Enhancement  
A.B., Benedictine College - Atchison  
M.S., Kansas State University  
Ed.S., Univ of Missouri - Kansas City

**Michael Weible**  
Prof./CPF Elec Tech  
A.B., Baker University

**Richard Weis**  
Assoc. Prof. HPER  
B.S., Oklahoma State University - Stillwater  
M.Ed., Wichita State University
Steven Werkmeister  
Asst. Prof. English  
B.A., M.A., University of Nebraska - Lincoln

Nancy West  
Professor Nursing  
A.A., Fort Scott Community College  
B.S.N., Pittsburg State University  
M.N., University of Kansas

Rosalie Wetherill  
Professor Health Occ.  
A.D.N., Penn Valley Comm College  
B.A., Univ of Missouri - Kansas City  
B.S.N., Webster University - St. Louis  
M.S., Kansas State University

Carmaletta Williams  
Exec Dir, Div/Equity/Inclusion  
B.A., M.A., Univ of Missouri - Kansas City  
Ph.D., University of Kansas

Deborah Williams  
Asst. Prof. Science  
B.S., B.S., M.S., Kansas State University  
M.A., J.D., Ph.D., University of Kansas

Janna Willnauer  
Access Services Supervisor  
A.A., Johnson County Comm College  
B.S., Morningside College  
M.A., University of Kansas

LeAnna Wilson  
Dir. Community Services  
A.A., Johnson County Comm College  
B.A., MidAmerica Nazarene Univ  
M.S., Emporia State University  
M.S., Kansas State University

Nancy Wilson  
Professor Graphic Design  
B.F.A., Kansas City Art Institute  
M.F.A., University of Kansas

Steven Wilson  
Professor Mathematics  
B.A., M.A.T., University of Chicago

Jennifer Winchester  
Bus. Solutions Consultant  
B.A., MidAmerica Nazarene Univ

Randy Winchester  
Prog. Coord. Comp. Training  
B.S.E.E., Kansas State University

Sally Winship  
A.S., Pensacola Junior College  
B.S., Armstrong State College  
M.S., Columbia Univ in the City - New York
Stephen Wnek
Assoc. Prof. EMS
B.A., Clark University
M.A., Univ of Missouri - Kansas City

Luanne Wolfgram
Assoc. Prof./CPF Biotechnology
B.S., University of Wisconsin - LaCrosse
Ph.D., Johns Hopkins University

Kathleen Wolford
Project Accountant
B.B.A., Univ of Nebraska - Lincoln

Jerry Wolfskill
Exec. Dir. Public Safety
B.S., M.S., Central Missouri State Univ
Ed.D., University of Kansas

Christopher Worthington
Mgr. Bookstore
A.A., Johnson County Comm College

Brian Wright
Assoc. Prof. Political Science
B.A., M.A., Duquesne University
Ph.D., Kent State University

Jeffrey Wright
Professor Accounting
B.S., M.B.A., University of Kansas

Ray Wright
Professor EMS
B.A., Bethel College

Robert Xidis
Professor English
B.A., Ph.D., University of Kansas
M.A., Indiana University-Bloomington

Phillip Yeager
Assoc. Prof. Info. Technology
B.S., Ball State University
M.B.A., Webster University

Patrick Yeung
Sr. Support Analyst
A.A., Penn Valley Comm College
B.B.A., Univ of Missouri - Kansas City
M.S., University of Kansas

Rae Ann York
Mgr. Benefits

Myra Young
Professor Speech
B.S., Northwest Missouri State Univ
M.A., University Northern Colorado
Charles Zarrelli
Professor RR Ops/Civil Eng.
B.A., University of Houston

Mark Zolton
Systems Programmer/Analyst
B.S., Kansas State University
