

# Public Health (PH)

---

## Courses

### **PH 142 Health Communication in a Diverse World (3 Hours)**

This course provides the students with opportunities to explore the principles and application of communication at the individual, group and community level. Communication and advocacy will be studied in a variety of settings such as healthcare, schools, workplace and special populations including children, elderly, homeless, limited English-proficient patients and individuals with special needs. 3 hrs. lecture/wk.

### **PH 152 Health Education (3 Hours)**

Students in this course will explore the importance of health, health education and health promotion at the individual, group and community level. The course emphasizes a skill-oriented focus and preparation for a health educator, including opportunities to identify and address a community need while applying basic skills of advocacy and leadership through the delivery of a course. 3 hrs. lecture/wk.

### **PH 162 Health Administration (3 Hours)**

This course will provide an overview of the healthcare delivery system, including various levels of care providers and facilities. Students will explore administration of long-term care and public health services, including financial management, government policies and management of care. 3 hrs. lecture/wk.
