

Railroad Conductor (RRTC)

Courses

RRTC 123 Introduction to Conductor Service* (4 Hours)

Prerequisites : Admission to the JCCC railroad operations program.

This is an introductory course for the conductor service option within the railroad operations program. Upon successful completion of this course, the student should be able to describe railroad organization and general operations, policies and practices to ensure railroad safety, and the basic responsibilities of conductors.

RRTC 175 Conductor Mechanical Operation* (2 Hours)

Prerequisites : Admission to the JCCC railroad operations program.

This course covers mechanical operations that relate to conductor service. Upon successful completion of this course, the student should be able to describe the importance and application of freight care mechanical policies and practices to ensure safe railroad operations.

RRTC 261 Conductor Service* (2 Hours)

Prerequisites : Admission to the JCCC railroad operations program.

Upon successful completion of this course, the student should be able to describe and apply railroad organization and general operations, policies and practices to ensure railroad safety and basic responsibilities of conductors. This course includes safety and the general rules with which conductors must comply and teaches the techniques and administrative procedures conductors use on the job to perform safely and effectively.

RRTC 263 General Code of Operating Rules* (4 Hours)

Prerequisites : Admission to the JCCC railroad operations program.

Conductors must maintain a thorough understanding of the General Code of Operating Rules (GCOR). This course provides an in-depth study of the GCOR. Upon completion of this course, the student should be able to demonstrate abilities to apply the General Code of Operating Rules to safe and efficient train movement and operations.

RRTC 267 Conductor Field Application* (4 Hours)

Prerequisites : Admission to the JCCC railroad operations program.

Upon successful completion of this course, the student will have observed actual operations and be able to apply skills learned in classroom-based instruction to those operations. The student will observe and perform operations under the supervision of experienced conductor mentors in an actual field location.
